

# Grow Your Understanding.

Feed. Produce. Sustain.

Sustainable Agriculture. **Trent.** You.

TRENT  
UNIVERSITY

Explore [www.trentu.ca/agriculture](http://www.trentu.ca/agriculture)

## Why Trent?

- Extensive agricultural campus and rooftop gardens
- Over forty courses covering issues related to food and/or agriculture
- Multiple research opportunities in several disciplines
- Specialists in many programs, including Biology, Environmental Studies, International Development Studies, and Anthropology
- A community of like-minded students running an on-campus organic café with locally-sourced produce
- Opportunities for hands-on experience with the Trent Centre for Community-Based Education

Everyone eats. Food is necessary for human life and central to our civilization. Gain an interdisciplinary understanding of the scientific, political, and social dimensions of food and agriculture. At Trent you can grow your own understanding of contemporary issues in organic food, food safety, fair trade, and many other aspects of food and agriculture.

## Career Conscious

Graduates from the Sustainable Agriculture and Food Systems program will better understand food production and supply, agroecosystems, historical changes in food production, conventional industrial and alternative agriculture, global and local food markets, fair trade, commodification of food, and concepts of sustainable agriculture. Opportunities abound in this growing field such as organic farming, agro-tourism, land-use consulting, government policy and more.

## Degree Opportunities

**Bachelor of Arts in Sustainable Agriculture and Food Systems (Honours)**

**Bachelor of Science in Sustainable Agriculture and Food Systems (Honours)**
