

## Avian Research Assistants

Two positions available with the Geomatics and Landscape Ecology Lab at Carleton University, Ottawa, to conduct point counts in agricultural/grassland habitats in eastern Ontario. Successful applicants will be responsible for conducting point counts, recording land use types and data entry. Applicants should have some point count experience in open habitats. Point counts are usually carried out 5 days/week, although some flexibility to work on weekends in case of bad weather is required. Positions start in mid-May and last either 8 weeks (point counts only), or 16 weeks (point counts followed by either butterfly surveys or insect trapping), depending on applicants availability. An Ontario G driver's licence or equivalent is preferred. Transportation is provided and pay is C\$11.25/hour. Please send a resume and two references to [jude.girard@gmail.com](mailto:jude.girard@gmail.com), by February 28; positions will be filled as qualified applicants become available.

### Vegetation Research Assistant

One position available with the Geomatics and Landscape Ecology Lab at Carleton University, Ottawa, to conduct vegetation surveys in agricultural/grassland habitats in eastern Ontario. Successful applicants will be responsible for conducting herbaceous and woody plant surveys, recording land use types and data entry. Applicants should have some knowledge of Ontario plant species. Positions start in early May and run for 16 weeks. An Ontario G driver's licence or equivalent is preferred. Transportation is provided and pay is C\$11.25/hour. Please send a resume and two references to [jude.girard@gmail.com](mailto:jude.girard@gmail.com), by February 28; positions will be filled as qualified applicants become available.
