

Trent University OUPFB Field Biology Course

Desert Entomology in Southeastern Arizona

August 20 to September 3, 2011

A field biology course located at the Southwestern Research Station in the Chiricahua Mountains; home to thousands of species of insects, plants, mammals, reptiles and birds

Learn about insect evolution, anatomy, behaviour and ecology in a small group setting with seminars, lectures and labs

Conduct an independent study on a Chiricahuan insect species or ecosystem to stretch your research wings

Explore a mountain range from 4000 to 9000ft that encompasses Chihuahuan desert and alpine forest

...and perhaps encounter a wild tarantula...
