

Waiting Lists for Upper-Year Winter Term Biology Courses

You may be on a waiting list for a Winter Term course,
Or you may be thinking about changing your course registration.

1) The following courses, which have waiting lists, will be opened for those on the waiting lists, and possibly others:

Biol 336H (Behavioural Ecology) – *and note the Friday lecture is being moved from 11:00 to 10:00 to accommodate more students.*

Biol 362H (Population Genetics)

Biol 4520H (Biology of Invasions)

2) Courses that have waiting lists, but that are unlikely to be able to accept more students (you need to register in alternative courses):

Biol 415H (Marine Mammals)

Biol 416H (Immunology)

Biol 418H (Mammalogy)

3) Other courses that still have room in them:

Biol 318H (Plants in Action)

Biol 319H (Plants of Ontario)

Biol 3330H (Forensic Entomology)

Biol 338H (Advanced Ecology)

Biol 433H (Global Climate Change)

Biol 438H (Molecular Biology)

Biol 461H (Evolutionary Ecology)

If you are currently registered in five courses in Winter Term, and wish to enrol in one of the courses under 1) or 3) above, you will have to first drop one of the courses you are registered in.

If you wish to register in, or add your name to a waiting list for a course for which you do not have the prerequisite, you must email the course instructor for permission. In the email, give your full name, your student number and your request to be added. If your instructor gives permission, s/he will forward the email to the department for processing.
