

INDIGENOUS ENVIRONMENTAL STUDIES CO-OP

Indigenous Environmental Studies at Trent

Indigenous Environmental Studies & Sciences (IESS) at Trent University is an innovative and multidisciplinary program offered jointly by the School of the Environment and the Chanie Wenjack School for Indigenous Studies. It brings together principles of both Indigenous knowledge and Western science. Instruction integrating these approaches will provide students with the necessary knowledge and skills, including both critical and integrative thinking abilities, to begin to address the complex environmental problems facing Indigenous communities, governments, business, industry, research, and society in general. The foundation upon which the program is based recognizes both the strengths and limitations of any single perspective, and seeks to develop interactive and integrative thinking to address environmental, health, and social issues.

These explorations can take place both in the classroom and beyond – through the Indigenous Environmental Studies Co-op program, you can put skills to action across three paid work terms in professional settings.

Indigenous Environmental Studies Co-op

Co-op is an opportunity for students to gain work-integrated experiential learning that will help them get a head start on their career. The Indigenous Environmental Studies Co-op assists graduating students in achieving a competitive edge while generating experience within a wide range of sectors. Specifically, co-op gives the students a chance to obtain 12 months of practical experience on the job, develop or enhance technical skills, explore career options, network with a variety of individuals and organizations, learn from mentors, enhance communication and presentation skills, and develop technical writing skills.

Indigenous Environmental Studies Co-op is a competitive direct-entry program with a limited number of spaces.

Program Requirements for Admittance into Co-op:

- Minimum 80% cumulative average
- ENG4U with a minimum of 60%

To remain in the co-op, students must:

- Successfully complete the required Co-op courses: COOP 2000H with a grade of 70%+ and COOP 4000H with a grade of 65%+
- Maintain a minimum 75% cumulative average throughout their study terms
- Complete three co-op work terms (COOP 2100P, 3100P and 4100P)
- Receive satisfactory evaluations during each of their work terms

Indigenous Environmental Studies Co-op Work Term Schedule

	Fall	Winter	Summer
Year 1	Study Term 1	Study Term 2	Study Term 3
Year 2	Study Term 4	Study Term 5	Work Term 1
Year 3	Study Term 6	Study Term 7	Work Term 2
Year 4	Work Term 3	Study Term 8	

INDIGENOUS ENVIRONMENTAL STUDIES CO-OP

All co-op students are encouraged to meet with an Academic Advisor for degree mapping and to ensure they are meeting all their program requirements. You can book an appointment on the Student Experience Portal (trentu.ca/sep) or by calling (705) 748-1011 ext. 1488.

Please Note: Co-op is meant to prepare students for the real-world job application process and as such, the co-op process is competitive and dependent upon many factors including market conditions, the student's efforts to secure a work term, and the academic performance of a student. Every effort is made to find suitable co-op work terms for students, but a work term opportunity cannot be guaranteed for every student. Co-op students will secure positions through successful participation in the co-op interview process and/or their own job search activities. It is preferred that no more than two of the three work terms are with the same employer. Withdrawal from the co-op program will not normally be approved while a student is on a work term.

Students who are unable to obtain a suitable co-op opportunity in an upcoming work term are expected to continue with their academic program on a full-time basis. A missed work term can be made up. If a co-op student is unable to complete three work terms yet otherwise fulfills degree requirements, they will be awarded an Honours Bachelor of Arts in Indigenous Environmental Studies.

Students do not pay tuition during each work term. Students are required to pay co-op fees plus ancillary fees and levies. The Co-op Assistance Program is available to support students in financial need with co-op expenses. For more information, please reach out to coop@trentu.ca.

International Students As of April 1, 2026, international post-secondary students no longer need a co-op work permit to participate in a mandatory work component of their study program. To be eligible for student work placements, you must have a valid study permit that includes authorization to work on campus. For full eligibility requirements and updates on working in Canada as an international student, visit [Immigration, Refugees, and Citizenship Canada](https://www Immigration, Refugees, and Citizenship Canada).

Students with Disabilities are strongly encouraged to register with Student Accessibility Services (SAS). Please contact sas@trentu.ca for more support.

Sample Work Term Areas for Indigenous Environmental Studies:

- Community Education
- Environmental Planning
- Evaluation & Research
- Policy Analysis

Potential Career Paths for an Indigenous Environmental Studies Graduate:
