

## Ecology of Lake and River Ecosystems

**Supervisors: Dr. Maggie Xenopoulos and Dr. Paul Frost**

Graduate PhD positions are available in the Laboratory of Freshwater Ecology at Trent University in Peterborough, Ontario to conduct ecological research on lakes and rivers. Research for these positions could range from nutrient effects on animal nutrition and food webs to landscape studies of carbon and nutrients. Field work for these positions could include projects in the Great Lakes and their watersheds, central Ontario in cottage country and the Experimental Lakes Area in northwestern Ontario. These graduate positions are funded at the PhD level but we will consider exceptional M.Sc. candidates

who are interested in converting to a PhD. Students will be enrolled in the Environmental & Life Sciences Graduate Program at Trent University which takes in new students in January, May and September each year. This posting will remain open until all positions are filled.

Interested students should contact [Dr. Maggie Xenopoulos](#) and/or [Dr. Paul Frost](#) with a brief statement of interests, transcripts, and a recently updated resume.

Please visit [Dr. Xenopoulos' website](#) and [Dr. Frost's website](#) for more information.
