

Ph.D. Positions - Ecology of Lake and River Ecosystems

Supervisor: Dr. Maggie Xenopoulos

Graduate Ph.D. positions are available to contribute to on-going ecological research on rivers in the Laboratory of Freshwater Ecology at Trent University in Peterborough, Ontario and as part of a Tier 1 Canada Research Chair in Global Change of Aquatic Ecosystems. Research for these positions could range from food web responses to environmental stress to landscape studies of carbon and nutrients. Field work for these positions could include the Great Lakes

basin and central Ontario in cottage country. The graduate positions are funded at the Ph.D. level but exceptional M.Sc. candidates who are interested in transferring to a Ph.D. will be considered. Students will be enrolled in the Environmental & Life Sciences Graduate Program at Trent University which takes in new students in January, May and September each year. This posting will remain open until all positions are filled. Interested students should contact Dr. Maggie Xenopoulos (mxenopoulos@trentu.ca) with a brief statement of interests, transcripts and a recently updated resume. Information of lab projects can be found at: www.xenopoulos.ca.
