Senate received the report as information.

Discussion – Student Core Competencies. Senator Skinner said that the mission and vision renewal process had sparked discussions about Trent's academic, and non-academic, outcomes for students. This led to questions about what skills, capacities and knowledge our students acquire while at Trent. He noted that each program/degree has clearly articulated expectations but asked whether these identified Trent's unique outcomes.

Senators broke into groups to address the question "What are the key "take-aways" from a Trent education" with some common themes emerging:

- Cultural competence (the ICR was identified by several of the groups).
- The opportunities that Trent's emphasis on interdisciplinarity offers.
- Leadership opportunities for students.
- A campus small enough that students get to know their professors.
- Opportunities to develop presentation/speaking skills.
- Mentorship from faculty and staff.
- A flattened hierarchy.
- Opportunities for undergraduate students to do research.
- Constructive (critical) and creative thinking.

During the round-table discussion that followed the group presentations it was noted that it would be difficult to measure the extent to which we succeed at some of these. The Provost indicated that we need further discussions with students about this question.

Any Other Business. A discussion was held on the financial update, uncertainties and transparency. It was noted that Senators have received a number of updates about enrolment figures and the subsequent financial challenges that we face but these have not removed some of the uncertainties. Faculty with questions about the budget were encouraged to speak with their department/program chair and/or their dean.

Adjournment. The meeting adjourned at 4:07.

Dr. C. Bruce, Chair
T. Harrington, Secretary
