

Master of Management – Health Care Management Stream

The health care landscape in Canada is continually evolving, with many moving pieces and complex challenges. For health care professionals, it is essential to build both knowledge *and* expertise to navigate this system effectively.

Program Purpose

Trent University's Health Care Management stream has been designed to **equip students with the skills** to develop, implement, and assess strategies for delivering health care services — even in the face of critical resource constraints.

The program combines a strong mix of management foundations and health care-specific courses, along with an integrated field placement that helps launch graduates into impactful careers in the health sector.

Key Benefits

- Gain the knowledge and expertise required for professional managerial careers in Canada's uniquely dynamic and complex health care sector.
- Apply learning outcomes directly through an **integrated work placement** in a health care setting, gaining valuable real-world experience.
- With flexible study options, you can complete the program **in person, online, or through a hybrid model** — making it accessible for both domestic and international students.
- Here, you'll collaborate with peers from diverse professional backgrounds, share ideas, and explore innovative solutions to today's most pressing health care challenges.

To Summarize:

- The MMgt–Health Care Management Stream at Trent prepares you to become a **forward-thinking leader** — ready to make a real difference in the future of health care.
