The Department of Computer Science has expanded over the last several years adding several new areas of expertise including: software engineering, artificial intelligence, high performance computing, data mining, health informatics, and graph networks. The MSc program in computer science offers the opportunity for students to study a wide range of advanced computer science topics such as: Artificial Intelligence, Computer Graphics, Cyber-security, Data Mining, Data Science, Machine Learning, and Software Engineering. Graduates of Masters degrees are highly sought after in many areas including software developer, data scientist, database analyst, information technologist, and professor.

Requirements

Master of Science in Computer Sciences.

Complete the following requirements:

- 2.0 credits from approved COIS graduate course list
- Thesis
- Successful completion of thesis oral defence

Note: The same course cannot be used to meet multiple degree requirements

Program Regulations

The general regulations and requirements of Trent University for the MSc degree apply to this graduate program. Students can be admitted starting in September, January or May of each academic year. The normal requirement for admission into the MSc program is an upper second class (77% or better) (B+ at Trent) standing or its equivalent, in a joint or single Honours BSc

degree (or equivalent). Before acceptance into the Masters degree, a core faculty member must be identified to supervise the student's work.

A grade of at least B- (70%) must be obtained in each of the graduate courses.

MS.ENLS - Environmental & Life Sciences - MSc (Thesis)

Overview

Academic Level
Graduate

Credential
Master of Science

Program Description
Thesis

Description
The Environmental & Life Sciences Graduate Program is an interdisciplinary program leading to either a MSc or a PhD degree in the natural sciences. Students conduct research in applied and basic science and many students develop their research projects in partnership with governmental agencies, industry, organizations, and other universities. The centrepiece of student training is the thesis - an original investigation in the natural sciences - augmented by seminars, a mandatory core course (for MSc students), elective courses, and the candidacy examination (for PhD students).

The Program is served by faculty principally from the departments of Biology, Chemistry, Forensic Science, and School of the Environment among others. Faculty also include Canada Research Chairs, as well as adjunct faculty from provincial and federal government agencies, nongovernmental organizations and industry. The program serves as a broad umbrella for these disciplines to interconnect.

This program offers instruction in four areas of emphasis:

- Earth Sciences, Natural Resources, and Agriculture
- Ecosystem Biogeochemistry and Trace Contaminants
- Ecology, Evolution, and Conservation
- Genes, Cells, and Physiological Systems

The aim of the program is to provide students with a background in the theory and practice of environmental and biological science that will enable them to function and thrive in a variety of work environments.

Requirements

Master of Science in Environmental and Life Sciences.

Complete the following requirements:

- 0.5 credit from: ENLS 5000H (Research Foundations)
- Thesis
- 0.5 elective credit in addition to the above*
- Successful completion of thesis oral defence

*Unless approved, elective credit must be taken from ENLS course list

Note: The same course cannot be used to meet multiple degree requirements

Program Regulations

The general regulations and requirements for graduate degrees at Trent University apply to the Environmental & Life Sciences Graduate Program. Application for admission should be received by February 1 for consideration for scholarships, bursaries, and teaching assistantships for Fall admission into the program. A small number of students are admitted in January and May. Applicants should hold an undergraduate Honours Science degree in a relevant field of study. Students must have a supervisor before acceptance in the program. The ENLS course (ENLS 5000H) is compulsory for all first year MSc students. Students are permitted to take a maximum of one half-credit reading course (ENLS 5090H). In addition to the thesis, candidates for the MSc degree will be required to complete the minimum equivalent of 1.0 course credits. The supervisory committee may specify an additional 0.5 credits, in consideration of the student's academic background and research requirements; any such requirement will be determined by the committee within 8 months of admission. All Environmental & Life Sciences (ENLS) graduate students need to establish a supervisory committee in conjunction with their thesis and research supervisor(s) within the first term. The supervisory committee will consist of three ENLS faculty members. They may be derived from ENLS Trent faculty, ENLS adjunct faculty, or ENLS special graduate faculty; every student supervisory committee must have a minimum of one regular (non-adjunct) Trent faculty member.

Prospective PhD students will normally have a thesis-based MSc degree. Candidates for the PhD degree will be required to complete at least 0.5 credits; the supervisory committee may require an additional 0.5 credits, determined within 8 months of admission. If a Master's student achieves a superior academic record and shows particular aptitude for research, the Graduate Studies Committee, on the recommendation of the Environmental & Life Sciences Graduate Program Executive, may authorize conversion to the PhD program without completion of the MSc degree. MSc to PhD converted students (those who have passed the conversion examination) will be required to complete a minimum of 1.0 credit; the supervisory committee may require an additional 0.5 credits, determined within 8 months of the conversion examination. For both degrees (MSc and PhD), the thesis is expected to include the results of an original investigation. PhD students must enrol in the PhD candidacy examination (ENLS 6100H) at the start of their second year of study; they must undertake the oral candidacy examination within the first 16 months of study. The examination will establish, to the satisfaction of the program, that the student has an effective grasp of their research area. Degree candidates (MSc and PhD) have the option of submitting their thesis either in the "traditional" or "manuscript" format. Candidates must pass an oral examination in defence of their thesis research. Students must attain at least a B- (70%) in all course work to remain registered in their program. The expected time for completion for full time students is two years for the MSc, four years for the PhD, and five years for those who convert to the PhD program before completion of the MSc. Please see the Graduate Academic Calendar for additional details on time limits for part-time students.

MS.FRSC.COUR - Forensic Science - MScFS (Course Based)

Overview

Academic Level
Graduate

Credential
Master of Science

Program Description
Course Based

Description
The field of forensic science is growing and rapidly evolving to meet a variety of social, judicial and academic needs of modern crime scene investigation. The field is applied by nature, and integrates theoretical aspects of physical, biological and social sciences. The focus of the MScFS program will be to promote cutting-edge training and higher level-critical thinking in all aspects of crime scene investigation and analysis, in particular emphasizing the added value of research within a forensic context. The program is served by faculty with significant and relevant experience in academic, practitioner, and professional forensic sciences.

Requirements

Master of Science in Forensic Science (Course Based).
Complete the following requirements.

This is a professional course-based program that consists of three academic terms. Through lectures, labs, and a full term research placement, students can be ready to apply their learned skills to the workforce in one year.

- 2.0 required credits from: FRSC 5001H, FRSC 5003H, FRSC 5030H*, FRSC 5040H
- 2.0 elective credits from: FRSC 5007H, FRSC 5010H, FRSC 5070H, FRSC 5100H, FRSC 5320H, FRSC 5600H or FRSC 5800H
- Research Placement (FRSC 5009H)

*Students who have earned credit for FRSC 4312H are excluded from completing FRSC 5030H. These students must complete an additional 0.5 elective credit instead.

Students will take two core courses each semester and are recommended to select two elective courses for the fall and winter for a total of four classes each semester.

Unless approved, elective credit must be taken from FRSC graduate course list.

Note: The same course cannot be used to meet multiple degree requirements.

Program Regulations

The general regulations and requirements of Trent University apply to the Forensic Science graduate program. Students are admitted to the program once a year for studies beginning the following September. Applicants are required to hold a four-year Bachelor of Science degree in a relevant science including anthropology, biology, chemistry, forensic science, physics, psychology, or other disciplines. Applicants must have achieved an average of at least an upper second class standing (B+/77%) in the work of the last 10 full academic credits or the last two undergraduate years (fulltime equivalent). Applicants that do not meet these requirements, but have significant practical forensic experience, will also be considered.

MS.FRSC.PROJ - Forensic Science - MScFS (Major Research Paper)

Overview

Academic Level
Graduate

Credential
Master of Science

Program Description
Major Research Paper

Description
The field of forensic science is growing and rapidly evolving to meet a variety of social, judicial and academic needs of modern crime scene investigation. The field is applied by nature, and integrates theoretical aspects of physical, biological and social sciences. The focus of the MScFS program will be to promote cutting-edge training and higher level-critical thinking in all aspects of crime scene investigation and analysis, in particular emphasizing the added value of research within a forensic context. The program is served by faculty with significant and relevant experience in academic, practitioner, and professional forensic sciences.

Requirements

Master of Science in Forensic Science (Major Research Paper).
Complete the following requirements.

Students design and carry out forensic research under the supervision of a faculty member and write a major paper. Students must apply to the Project stream of the MScFS degree.

Students design and carry out forensic research under the supervision of a faculty member and write a major paper in addition to required courses.

- 2.0 required credits: FRSC 5950D
- 0.5 required credits: FRSC 5970H
- 2.0 credits from FRSC 5001H, FRSC 5003H, FRSC 5030H*, FRSC 5040H, FRSC 5007H, FRSC 5010H, FRSC 5070H, FRSC 5100H, FRSC 5320H, FRSC 5600H or FRSC 5800H

*Students who have earned credit for FRSC 4312H are excluded from completing FRSC 5030H.

Program Regulations

The field of forensic science is growing and rapidly evolving to meet a variety of social, judicial and academic needs of modern crime scene investigation. The focus of the MScFS program will be to promote cutting-edge training and higher level-critical thinking in all aspects of crime scene investigation and analysis, in particular emphasizing the added value of research within a forensic context. The program is served by faculty with significant and relevant experience in academic, practitioner, and professional forensic sciences.

MS.MTSC - Materials Science - MSc (Thesis)

Overview

Academic Level
Graduate

Credential
Master of Science

Program Description
Thesis

Description
The Materials Science Graduate Program is offered jointly by Trent University and Ontario Tech University and leads to the degree of Master of Science (MSc) in Materials Science. Materials Science is a broad multi-disciplinary area of science; its goal is the understanding, prediction, and application of the properties of matter. This requires the development of experimental and theoretical predictive tools applicable to size scales ranging from the molecular to the macroscopic levels. The field lies at the intersection of physics and chemistry, and includes many sub-fields, such as nanotechnology, electronic materials, surface science, biomaterials, and materials characterization. The program provides both a broad and integrated overview of materials science and the opportunity for in-depth study of a particular problem emphasizing either theory or experiment, under the guidance of a thesis advisor and a multi-disciplinary team of faculty from Trent University and Ontario Tech University. The program requirements include both coursework and a research thesis.

Requirements

Master of Science in Materials Science

Complete the following requirements:

- Core Course (0.5 credits) MTSC 6000H
- Two elective courses (total of 1.0 credits), with minimum one of the following: MTSC 6012H, MTSC 6020H or MTSC 6140H.

  Additional electives may include one-term courses acceptable for graduate credit completed with at least a 70% final grade in each course. One of the elective courses may be a fourth-year undergraduate course, approved by the student's supervisor and the graduate program director.
- MTSC 6100H (non-credit course) prior to the thesis defence
- Thesis

Note: The same course cannot be used to meet multiple degree requirements

Program Regulations

The formal requirements for the MSc degree in Materials Science are the following:

1. Each student must complete the core course MTSC 6000H.

2. Two elective courses (total of 1.0 credits), with minimum one of the following: MTSC 6012H, MTSC 6020H or MTSC 6140H.

Additional electives may include one-term courses acceptable for graduate credit completed with at least a 70% final grade in each course. One of the elective courses may be a fourth-year undergraduate course, approved by the student's supervisor and the graduate program director.

3. Each student successfully complete the non-credit course MTSC 6100H prior to their thesis defense.

4. The student must meet with his/her supervisory committee within the first six months of registration, and subsequently at least once every twelve months. The committee consists of the student's supervisor and at least two other faculty members in the program; each supervisory committee must include at least one faculty member from each institution.

5. An acceptable thesis on a research topic must be submitted. Detailed specifications of the format of the thesis are available from the School of Graduate Studies. Acceptance of the thesis requires the approval of an Examining Committee following an oral defence of the thesis. The Examining Committee for a Trent student normally consists of four faculty members: an external examiner, one supervisory committee member from each institution, and the supervisor.

PROGRAM REGULATIONS

The general regulations and requirements of Trent University for graduate degrees apply to the MSc and PhD in Materials Science. The normal requirement for admission is an average of at least B+ (77%, GPA 3.3). The Graduate Programs Selection Committee will begin the selection process in the weeks following the application submission date of February 1. Applications received after this date will be accepted and considered for funding until all available positions/spaces are filled. Students are normally admitted into the program once a year for studies beginning in the following September. Entrance to the program in January or May of any calendar year is considered on a case-by-case basis.

TRANSFERRING FROM THE MSC PROGRAM TO THE PHD PROGRAM

Materials Science MSc students may transfer directly to the PhD program after completing one academic year and their first progress report in the MSc program if the following conditions are met:

1. Completion of at least three courses in the master's program with at least an A- (80%) average

2. Strong evidence of research ability as identified by the supervisory committee

For students who transfer, the minimum number of courses taken during their graduate work in the two programs must be five one-term courses. Details on the transfer process are available from the program office.

MS.PSYC - Psychology - MSc (Thesis)

Overview

Academic Level
Graduate

Credential
Master of Science

Program Description
Thesis

Description
The Psychology MSc* graduate program at Trent is a two-year program leading to the degree of Master of Science. This research-intensive program has three distinct streams of study: Health Psychology, Developmental Psychology, and Cognition/ Perception/Neuroscience. The Psychology graduate program provides a natural stepping-stone for students interested in pursuing further doctoral (PhD) studies as well as provides a strong foundation in research, methodology, and the application of human behaviour for students interested in pursuing careers in health, science, and/or communication-related fields.

The Behavioural and Cognitive Neuroscience stream is intended for candidates who wish to focus primarily on basic research and theoretical issues related to the analysis of neurobiological and psychological processes that govern behaviour in humans or non-human species, and include topics of investigations involving the connection between action and perception, language comprehension, visual cognition, focused attention, neural mechanisms of memory formation and learning, the ethics of cognitive enhancement, and the molecular/cellular foundations of stress biology and neuropsychiatric disorders.

The Developmental Psychology stream is concerned with training candidates in the theoretical and research foundations involved with the study of psychological change across the lifespan and includes areas of research such as the acquisition of cognition, language, social cognition, atypical development, attachment relationships, community and family dynamics, culture and development, and identity formation and sexuality.

The Social, Health, and Personality Psychology stream is concerned with psychological, social and behavioural factors that impact overall health and well-being, and include areas of focus in emotional intelligence, community and family dynamics, attachment relationships, human sexuality, self-regulation,

personality, psychopathology and mental health, determinants of health within LGBTQ+ communities, and promoting stress coping/resilience.

*Students can petition for the degree of Master of Arts (MA).

Requirements

Master of Science in Psychology. Complete the following requirements.

- 1.5 credit from: PSYC 5016H, PSYC 5801H and PSYC 5802H
- 0.5 credit from: PSYC 5017H or PSYC 5120H
- Thesis Project
- 1.0 elective credit in addition to the above*

*Unless approved, elective credit must be taken from PSYC graduate course list

Note: The same course cannot be used to meet multiple degree requirements.

MSc

Course-based instruction will involve a series of statistical and field-specific courses that are typically completed during the first year. A research-based thesis will start in the f irst year and will be completed during the second year. The thesis provides the opportunity for student to further their scientific training by acquiring valuable hands-on experience using a variety of methodological, statistical, and/or laboratory techniques. Students will participate in the seminar courses (PSYC 5801H and PSYC 5802H) for the entire two years of the program. Students must attain at least a B- (70%) in all course work to remain registered in their program. A final grade standing at less than a B- will be assigned a grade of F and will preclude continuation in the Psychology Graduate Program. For further details, see Failed Course Policy.

Year 1

Students participate in a year-long seminar course (PSYC 5801H), enroll in Advanced univariate statistics (PSYC 5016H) in the fall and choose one of Advanced multivariate statistics (PSYC 5017H) or Advanced qualitative analysis (PSYC 5120H) offered in either the fall or winter semester. Two additional half-credit courses (totalling 1.0 credit) must be completed. Students will also be expected to begin their thesis research.

Year 2

Students participate in a year-long seminar course (PSYC 5802H) and complete their thesis.

Program Regulations

ADMISSIONS

Applicants to the MSc program will normally have completed a BA or BSc honours degree in Psychology from a recognized university, with an overall average of at least B+ (77%, GPA 3.3) in the last 10 credits or equivalent (or two years of full-time study) and an average of A- (80%, GPA 3.7) in Psychology courses. General and subject specific GRE scores are recommended, but not required.

Admissions to the MSc program are based on the availability of appropriate faculty as instructors, supervisors and committee members, feasibility of the applicant's proposed course of study and research project, appropriateness of the applicant's previous education and training.

Students are normally admitted into the MSc Program once a year for studies beginning in September. The Psychology Graduate Program Committee will begin the selection process immediately following the application submission date of February 1. Applications received after this date will be considered if unfilled spaces remain.

MSN.NURS.PROJ - Nursing - MScN (Project)

Overview

Academic Level
Graduate

Credential
Master of Science in Nursing

Program Description
Project

Description
In response to current and emerging trends in health care delivery, nursing practice, and health care workforce needs, the Trent-Fleming School of Nursing (TFSON) hosts the Master of Science in Nursing (MScN) program. This program focuses on professional practice leadership and will prepare graduates to contribute to an increasingly complex health care sector by providing an education that includes mentorship, interdisciplinary opportunities, and experiential learning through research, project, and class assignments. Professional practice leaders are responsible for implementing expert practice, professional development, research, and leadership; they are often charged with quality assurance and safety as well, and the program is designed to develop expertise in these areas.

To ensure that current professionals with high working demands are able to pursue this program, courses are delivered online with a combination of synchronous and asynchronous instruction and learning activities.

Requirements

Master of Science in Nursing (Project)

Complete the following 5.0 course requirements:

- 2.0 credits from: NURS 5021H, NURS 5111H, NURS 5119H and NURS 5120H
- 1.0 credits from: NURS 5123H and NURS 5118H
- 1.0 elective credits in addition to the above*
- 1.0 credit from: NURS 5097Y Advanced/Professional Nursing Practice Project

*Unless approved, elective credit must be taken from NURS graduate course list

Note: The same course cannot be used to meet multiple degree requirements.

Program Regulations

Project Based – the project-based option prepares nurses for professional practice leadership by focusing their scholarly inquiry on an identified need related to quality assurance, policy analysis, or nursing practice. The project must acknowledge a real world, pragmatic application to nursing. The project is carried out under the guidance of a faculty advisor and on-site mentor. Students should consider the project option if they a) desire an opportunity to explore additional content in their area of interest by completing two required electives, and b) if they wish to use the project option to strengthen their clinical, administrative or educational role.

- 1.0 credits from: NURS 5111H and NURS 5119H
- 2.0 credits from: NURS 5096D Thesis in Nursing

Note: The same course cannot be used to meet multiple degree requirements.

Program Regulations

Thesis Option – The thesis option prepares nurses for professional practice leadership with an emphasis on simultaneously building advanced knowledge and understanding in research. Students should consider the thesis option if they wish to a) explore an original question related to nursing leadership or practice, in order to advance nursing knowledge, and b) be prepared to work in research, health care, or academic environments. By developing and implementing a research study, students will build advanced research skills and an understanding of the influence of research on policy and practice.

OPTN.APETH - Applied Ethics - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Applied Ethics

www.trentu.ca/philosophy

A solid grounding in critical thinking, ethical theory, and applied ethics is increasingly important for the many different kinds of careers that involve developing reasoned responses to public policy initiatives. The Option in Applied Ethics is designed for students interested in careers as ethicists in fields such as medicine, environmental resource management, computing, law, or business. It also provides a good background for students interested in careers that involve advocacy on public policy issues.

Students who have fulfilled the requirements for an Honours or a General degree in a subject other than Philosophy may graduate with an Option in Applied Ethics if they have successfully completed 4.0 PHIL credits from the following list:

- PHIL 1100H
- PHIL 2010H
- PHIL 2020H
- PHIL 2030H
- PHIL 2110H
- PHIL 2150H
- PHIL 2210H
- PHIL 2390H
- PHIL 3025H
- PHIL 3030H
- PHIL 3050H
- PHIL 3110H
- PHIL 3140H
- PHIL 3180H
- PHIL 3190H
- PHIL 3270H
- PHIL 3301H
- PHIL 3302H
- PHIL 3303H
- PHIL 3360H
- PHIL 3370H
- PHIL 4250H
- PHIL 4260H
- PHIL 4270H
- PHIL 4310H
- PHIL 4332H

Description

Option in Communications

www.trentu.ca/durham/academics/degrees-and-programs/communications-ba

Communications helps to prepare students for a long and satisfying career in a variety of fields. As an option, this program encourages you to take courses that will complement your major from another field. It will also help you to develop durable and transferable skills—including creative and logical thinking, project management, teamwork, problem analysis, and clear and persuasive communication—that are prized by a variety of employers.

Students who have fulfilled the requirements for an Honours or a General degree in another subject may graduate with an Option in Communications if they have successfully completed the following 4.0 credits:

- 1.5 COMM credits consisting of COMM 1000H, 1001H, and 2000H
- 2.0 credits from COMM 2001H, 2002H, 2003H, 3001H, 3002H, 3003H, 3094H, 4001H, 4901H, or ADMN 2410H
- 0.5 WRIT credit consisting of WRIT 1001H

OPTN.CIRC - Circumpolar Studies - Option

Credential
Option

Description

Option in Circumpolar Studies

www.trentu.ca/environment

The Option in Circumpolar Studies connects students to the emerging field of Arctic and Northern Studies. It has been inspired by the importance of the Circumpolar World under conditions of climate change, globalization and unprecedented accessibility of the Circumpolar region to the outside world. This interdisciplinary option will be of importance for students engaged in political studies, geography and natural sciences, legal and health studies, history, cultural and Indigenous studies, and the study of Canada more broadly.

Students who have fulfilled the requirements for an Honours or a General degree in any subject may graduate with an Option in Circumpolar Studies if they have successfully completed the following 4.0 credits:

- 1.5 GEOG credits consisting of GEOG 1045H, GEOG-ERST 2320H, and 2330H
- 1.0 INDG credit consisting of INDG 3745H and 3750H
- 1.0 GEOG credit from GEOG 2811H, 3390H, or GEOG-CAST 3640H
- 0.5 credit from CAST 3241H, CAST 3243H, ERST-GEOG 2812H, ERST-INDG 3740H, GEOG-CAST 2810H, or GEOG 3904H

OPTN.DH - Digital Humanities - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Digital Humanities

This interdisciplinary option will provide students with a Humanities-rooted perspective on Digital Humanities and innovations. This option allows students from across the university to draw on methods and insights from Canadian Studies, Cultural Studies, English Literature, Gender & Social Justice, History, Media Studies, Philosophy, and Computer Science to consider the relevance and ramifications of digital humanities in a world that navigates between digital spaces and human insights and creativity. Students will develop culturally appropriate, inclusive, and historically grounded connections to the Digital Humanities. This will prepare them for careers in sectors which rely on digital innovation and research but also demand nuanced and socially aware perspectives.

Students who have fulfilled the requirements for an Honours or a General degree in any subject may graduate with an Option in Digital Humanities if they have successfully completed the following 4.0 credits:

- 0.5 ENGL credit consisting of ENGL-HIST 2020H
- 3.5 credits from:
    - CAST-GESO-MDST 2600Y/2601H
    - COIS-MDST 1010H
    - COIS-MDST 2800H
    - COIS-MDST 2830H
    - COIS-MDST 3560H
    - COIS-MDST 3820H
    - CUST-MDST 1535H
    - CUST-MDST 2236H
    - CUST-MDST 3133H
    - CUST-MDST 3545H
    - CUST-MDST 4136H
    - ENGL 4209H

- ENGL 4309H
- GESO-MDST 2410H
- GESO 3122/4122H
- HIST 2421H
- HIST-GDST 2422H

OPTN.EDUC - Education - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Education

www.trentu.ca/education

The Option in Education is designed for students who wish to pursue a career in elementary or intermediate education; it encourages exploration of some of the subjects of the school curriculum that might be outside a students major area of study. The Option provides a solid foundation in a range of curriculum subjects that are required teaching within schools and will support students in constructing their own understanding of these curriculum areas.

Students who have fulfilled the requirements for an Honours or General degree in any subject may graduate with an Option in Education if they have successfully completed the following 4.0 credits:

- 4.0 credits from CUST 2186H, CUST 2511H, CUST 2526H, CUST 2572H, EDUC-ERSC-BIOL 2701H, EDUC-ERSC-BIOL 2702H, EDUC-MATH 2081H, 2082H, EDUC-PHIL 2200H, EDUC-PHYS 2091H, EDUC-PHYS 2093H, or PHIL 1200H

Please consult the academic timetable, available at www.trentu.ca/timetable, for information on course offerings, including when they will be scheduled.

- EDUC-MATH 2081H: Mathematics for Teacher Education: Numbers and Geometry (Sc) (see Mathematics)
- EDUC-MATH 2082H: Mathematics for Teacher Education: Growth, Statistics, and Probability (Sc) (see Mathematics)
- EDUC-PHYS 2091H: Light and Colour for Future Teachers (see Physics & Astronomy)
- EDUC-PHYS 2093H: Electricity and Motion for Future Teachers (see Physics & Astronomy)
- EDUC-PHIL 2200H: Philosophy of Education

Education is one of the most significant human occupations, in both the formal and informal understandings of the concept. In this course, we explore philosophical enquiries related to education, focusing on the nature, purpose, and aims of education, effective teaching and learning, issues of social justice, equity, and access. Prerequisite: 4.0 university credits.

- EDUC-ERSC-BIOL 2701H: Environmental Education: Biological Issues (Sc) (see Environment)
- EDUC-ERSC-BIOL 2702H: Environmental Education: Fostering Stewardship and a Sustainable Future (Sc) (see Environment)

OPTN.GLPP - Global Power & Politics - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Global Power & Politics

www.trentu.ca/globalpolitics

The Option in Global Power & Politics (GP) is offered by the Global Politics Section within the Department of Political Studies. It is intended for students interested in developing a critical understanding of the formal and informal, visible and hidden structures of power in the global age. A critical approach starts from the premise that the most urgent political problems of our time pose fundamental moral problems that require not only goodwill and commitment, but a deep understanding of the mechanisms of global power and politics. From imperialism and resource wars to the corruption of both liberal democracy and socialism, as well as the ubiquitous rise of inequality, those who desire to make a difference must seek this expanded knowledge. While housed in the social sciences, the Option also seeks to appeal to politically-minded students in the sciences and the humanities. The Option in Global Power & Politics is closely tied to the work done in the Centre for the Critical Study of Global Power & Politics. Students are invited to participate in the work of the Centre. Students are strongly encouraged to explore the thesis option in their final year of study.

Students who have fulfilled the requirements for an Honours degree in any subject may graduate with an Option in Global Power & Politics if they have successfully completed the following 5.0 credits:

- 1.0 credit from POST 2200Y or 2230Y
- 2.0 credits from 3000-level POST (GP) courses or HIST 3150Y/3151H or GDST-GESO-POST 3881H
- 2.0 credits from 4000-level POST (GP) courses

The following courses carry the designation “GP” in the Political Studies section of the Calendar. See Political Studies for course descriptions:

- POST 2200Y
- POST 3200H

- POST-CAST 3210H
- POST-SOCI 3230Y
- POST 3240H
- POST 3905Y/3906H
- POST 3960Y
- POST 4030Y
- POST 4200H
- POST-SOCI 4210Y
- POST 4340H
- POST 4341H
- POST 4905Y/4906H
- POST 4960H

OPTN.HMED - Health & Medical Humanities - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Health & Medical Humanities

The COVID pandemic reminded us that understanding health is a vital part of everyday life, not only for doctors and nurses, but for everyone. Like literature and visual art, health care is rife with symbolism and deeply invested in the human. This interdisciplinary option encourages students to make connections between how we imagine health, illness, and disabilities and how we live and/or work with them. Students from across the university can draw on methods and insights from History, English Literature, Philosophy, Gender & Social Justice, and Canadian Studies to investigate these connections, situate themselves as future health professionals who want meaningful careers, and discover new pathways to caring professions outside traditional medical fields. Students will learn about arts-based approaches to health, what it takes to make good ethical decisions in a medical context, and how understanding history can improve current health care.

Students who have fulfilled the requirements for an Honours or General degree in any subject may graduate with an Option in Health & Medical Humanities if they have successfully completed the following 4.0 credits:

- 0.5 GESO credit consisting of GESO 2002H
- 3.5 credits from:
    - CAST-SOCI-GESO 4551H
    - CUST 2560H
    - ENGL 2609H
    - ENGL-GESO 3609H
    - ENGL-GESO 3700Y/3701H
    - GESO-NURS 2121H

OPTN.IDST - Global Development Studies - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Global Development Studies

www.trentu.ca/ids

The Option in Global Development Studies provides students with a critical understanding of the processes of change that shape the globe. Students will explore the relationship between colonialism, development, and globalization to address issues of inequality, poverty, the environment, gender, human rights, migration, food, agriculture, health, culture, and ethnicity in different regions of the world. This option complements a range of disciplines in the social sciences and humanities, such as anthropology, sociology, business administration, history, and political studies. It also enhances student capacities to work in such fields as education, social work, health, environment, psychology, policy, law, and global development.

Students who have fulfilled the requirements for an Honours or a General degree in another subject may graduate with an Option in Global Development Studies if they have successfully completed the following 4.0 credits:

- 1.0 GDST credit consisting of GDST 1001H and 1002H
- 3.0 GDST credits in addition to the above

OPTN.INRR - Indigenous Reconciliation & Resurgence - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Indigenous Reconciliation & Resurgence

www.trentu.ca/indigenous

The Option in Indigenous Reconciliation & Resurgence provides students with knowledge and skills necessary to contribute effectively to the Canadian national project of reconciliation, which is in large part animated by the resurgence of Indigenous peoples over the last few decades.

Students who have fulfilled the requirements for an Honours or a General degree in any subject may graduate with an Option in Indigenous Reconciliation & Resurgence if they have successfully completed the following 4.0 credits:

- 2.0 credits from category A
- 2.0 credits from category B

OPTN.LANG - Languages - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Languages

www.trentu.ca/tcll

The Option in Languages allows students to combine a range of modern, ancient, and/or Indigenous language courses as a complement to a major in another discipline. Students may start all languages without any background or may, where courses are available, take intermediate- or advanced-level courses.

Students who have fulfilled the requirements for an Honours or a General degree in any subject may graduate with an Option in Languages if they have successfully completed the following 4.0 credits:

- 1.5 credits in ARAB, ASLA, CHIN, FREN, GRMN, ITAL, RUSS, or SPAN
- 1.0 credit in GREK or LATN or from INDG 2250Y, 2800Y, 3800Y, 3851H, 3852H, or 4800Y
- 1.0 additional credit from the language courses listed above
- 0.5 credit in LING at the 2000 level or beyond
- May not include more than 1.0 FREN credit

OPTN.LASP - Latin American Studies - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Latin American Studies

www.trentu.ca/ids

Students who have fulfilled the requirements for a single- or joint-major Honours or General degree in a subject other than Global Development Studies may graduate with an Option in Latin American Studies if they have successfully completed the following 5.0 credits:

- 1.0 GDST credit consisting of GDST 1001H and 1002H
- 1.0 SPAN credit from SPAN 1000Y or 1001H and 1002H*; or from 2001H and 2002H**
- 1.5 GDST credits consisting of GDST 3760Y and 3830H (taken in Bolivia)
- 1.0 SPAN credit consisting of SPAN 2501H and 2502H (taken in Bolivia)
- 0.5 credit from GDST 3891H or 0.5 SPAN credit in addition to the above

*Students whose level of fluency in Spanish is judged to exceed the level of SPAN 1000Y are exempt from this requirement

**Students whose level of fluency in Spanish is judged to exceed the level of SPAN 2002H are exempt from this requirement

OPTN.LEAD - Leadership - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Leadership

www.trentu.ca/politicalstudies

The Option in Leadership enables undergraduate students to accumulate knowledge in the area of leadership studies, and to highlight this academic concentration with the formal Option designation. This initiative is associated with Trent University's Jarislowsky Chair in Trust and Political Leadership. Fundamentally, leadership is a social relationship that concerns how a group of people organize themselves to achieve certain common goals and objectives, usually (but not always) via the direction of a specific person or set of persons. The Option in Leadership aims to increase student education and training in the area of leadership and enable learners to signal their leadership capacity to future employers. To leverage the existing resources as well as reflect the interdisciplinary nature of leadership studies, the Option in Leadership is designed to reach across academic units and allow students to gain credits beyond any one single department or program.

Students are advised to plan course selection carefully in order to acquire needed prerequisites (see individual course descriptions).

Students may choose to graduate with only one of the Option in Leadership or the Certificate in Political Leadership.

Students who have fulfilled the requirements for an Honours or General degree in any subject may graduate with an Option in Leadership if they have successfully completed the following 4.0 credits:

- 0.5 POST credit consisting of POST 3850H
- 3.5 credits from the following:
    - ADMN 2010H
    - ADMN 2220H
    - ADMN 2230H
    - ADMN 3230H

OPTN.LEGL - Legal Studies - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Legal Studies

The Option in Legal Studies provides students with an opportunity to learn about Canadian law. The option's 4.5 credits provide a basic understanding about the legal system in Canada. It is recommended to students who are considering pursuing employment opportunities that require familiarity with the law.

Students are advised to plan course selection carefully in order to acquire needed prerequisites (see individual course descriptions).

Students who have fulfilled the requirements for an Honours or General degree in any subject may graduate with an Option in Legal Studies if they have successfully completed the following 4.5 credits:

- 3.0 credits consisting of FRSC 1100H, FRSC 2100H, PHIL 1200H, PHIL-POST 2150H, POST 2011H, and WRIT 1001H
- 1.5 credits from ERST 3250H, FRSC 2110H, GESO 3962H, GDST-CRIM-POST-SOCI 3115H, INDG 3401H, INDG 3402H, PHIL-POST 3140H, POST 2012H, POST-CAST 3091H, POST-CAST 3092H, SOCI 2610H, or SOCI 3601H

OPTN.LING - Linguistics - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Linguistics

www.trentu.ca/tcll

The Option in Linguistics enables students to add to their programs a series of courses designed specifically to complement their studies in a language or languages. The basis of the program is the first-year introductory courses in linguistics, and then students may choose from a variety of courses offered by Languages & Linguistics, English Literature, Anthropology, Ancient Greek & Roman Studies, and other departments, which will allow them to pursue more specific interests in language and linguistics.

Students who have fulfilled the requirements for an Honours or a General degree in any subject may graduate with an Option in Linguistics if they have successfully completed the following 5.0 credits:

- 1.0 LING credit consisting of LING 1001H and 1002H (or 1000Y)
- 1.0 LING credit from LING 2000H, 2002H, 2003H, or 3003H
- 0.5 LING credit from LING 2010H, 2020H, or 2050H
- 0.5 LING credit from LING 3010H, 3050H, 3060H, or 3070H
- 0.5 LING credit in addition to the above
- 1.5 credits from the following, including at least 0.5 credit from category A and 0.5 credit from category B:

CATEGORY A	CATEGORY B	
Any ARAB credit	ANTH 2002H	
Any ASLA credit	ANTH-MDST 2312H (3312H)

OPTN.MARK - Marketing - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Marketing

www.trentu.ca/business

Marketing is a fundamental aspect of most businesses, so an option in Marketing provides students in any discipline enhanced career opportunities. The option's 4.0 credits provide a solid foundation in the core principles of both marketing theory and practice.

Students who have fulfilled the requirements for an Honours or a General degree in any subject (other than the BBA, joint major or minor in Business Administration) may graduate with an Option in Marketing if they have successfully completed the following 4.0 credits:

- 3.0 ADMN credits consisting of ADMN 1000H, 2080H, 2100H, 3150H, 3170H, and ADMN-COIS 3750H
- 1.0 ADMN credit from ADMN 1221H, 2010H, 2220H, 2410H, 3185H, 3460H, or 4160H

OPTN.PLAN - Planning - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Planning

www.trentu.ca/environment

The Option in Planning offers students a career-focused stream for students interested in urban planning.

Students who have fulfilled the requirements for an Honours or a General degree in any subject may graduate with an Option in Planning if they have successfully completed the following 4.0 credits:

- 2.5 GEOG credits consisting of GEOG 1030H, GEOG-ERSC 2090H, GEOG-CAST 2710H, GEOG-CAST-ERST 3711H, and GEOG-ERST 3790H
- 1.0 credit from ERST 3502H, ERST 4810H, GEOG 2310H, GEOG 3100H* or ERST 3000H*, GEOG-GESO-CAST 3220H, GEOG-NURS 3820H, GEOG-CAST-SAFS 4444H, INDG-GEOG 3202H, INDG-ERST-IESS 4730Y, or POST-CAST-GEOG 4555H
- 0.5 credit from EGEO-ERSC-GEOG 3003H, ERSC-GEOG 3010H, ERST 3081H, ERST 3250H, ERST-GEOG 4140H, GEOG-ERSC 3020H, GEOG 3530H, or GEOG-CAST-ERST 3720H

*Only one of GEOG 3100H or ERST 3000H may be counted toward the Option.

OPTN.PMED - Premedical Studies - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Premedical Studies

www.trentu.ca/premedicalstudies

The Option in Premedical Studies is intended for students who are planning to pursue a professional career in a medically related field upon completion of any Trent University undergraduate degree. It is targeted specifically at students who are considering entry into a medical school and is open to students in any discipline at Trent. Many of the academic areas of required study for medical school entry are applicable for entry into the schools of dentistry, veterinary medicine, and pharmacy, making this Option appropriate for those considering these professions. The Option includes entry-based academic content relevant to the Medical College Admissions Test (MCAT), the Dental Admission Test (DAT), and Pharmacy College Admission Test (PCAT). It also includes courses from the social sciences and humanities that are recommended or required for entrance into medical and other health-related professional schools. Academic requirements for individual medical schools vary and students are responsible for consulting the specific school's admissions criteria when choosing their electives.

Students should note that it is not possible to take all courses listed in the Option within a single- or joint-major degree, and that upper-year courses often have prerequisite requirements.

Students who have fulfilled the requirements for an Honours or a General degree in any subject may graduate with an Option in Premedical Studies if they have successfully completed the following 4.0 credits with a minimum grade of 75% in each course:

- 1.0 credit from category A (Humanities)
- 2.0 credits from category B (Sciences)
- 1.0 credit from category C (Social Sciences)

OPTN.PMOD - Pre-modern Studies - Option

Overview

Academic Level
Undergraduate

Credential
Option

Description

Option in Pre-modern Studies

The Option in Pre-modern Studies answers a growing student interest in the thought, literature, and history of the pre-industrial (pre-1800) world. While the more remote past is often romanticized as a golden fantasy realm, the study of historical culture in world civilizations from antiquity through early modernity (ca. 1800) allows students a window onto the origins and development of culture informing modern global society.

Students who have fulfilled the requirements for an Honours or a General degree in any subject may graduate with an Option in Pre-modern Studies if they have successfully completed 5.0 credits from the courses listed below, including at least 0.5 credit from each of the periods, and an additional 3.5 credits from ANY of the periods:

ANTIQUE	MEDIEVAL	EARLY MODERN / RENAISSANCE
AGRS-HIST 1100H	ENGL 2100Y (Term 1)	ENGL 2100Y (Term 2)

Description

Option in Visual Arts

www.trentu.ca/culturalstudies

The Option in Visual Arts provides students with the chance to study the visual arts through both theory and practice. In addition to workshop classes offered by Cultural Studies in drawing, photography, film, and other visual media, students take classes in theoretical, historical, and contemporary issues in the visual arts from a range of contributing departments. The Option in Visual Arts is particularly appropriate for Education students in the Teacher Education Stream who intend to teach art classes in elementary or secondary school.

Students who have fulfilled the requirements for an Honours or a General degree in any subject (other than the Specialization in the Integrated Arts as part of an Honours or General degree in Cultural Studies) may graduate with an Option in Visual Arts if they have successfully completed the following 4.0 credits:

- 1.0 credit from category A (Practice)
- 1.0 credit from category B (Theory and History)
- 2.0 additional credits from either category A or B

PHD.CAST - Canadian Studies - PhD

Overview

Academic Level
Graduate

Credential
Doctor of Philosophy

Description

The doctoral program is offered by the Frost Centre for Canadian Studies & Indigenous Studies in the School for the Study of Canada/ École d'études canadiennes at Trent University. The PhD program fosters an interdisciplinary and multidisciplinary approach to the study of Canada, including in comparative perspectives. The program of courses and dissertation guidance, drawing upon diverse faculty encompasses course requirements, comprehensive examinations and a dissertation.

The PhD program in Canadian Studies normally will be undertaken on a full-time basis. However, in cases of exceptional merit, the Frost Centre will accept a few candidates for the degree on a part-time basis.

Students in the program are required to familiarize themselves with the program guidelines.

TRENT UNIVERSITY
CANADIAN STUDIES PHD

Requirements

Doctor of Philosophy in Canadian Studies. Complete the following requirements.

- 1.0 credit from: CAST 6000Y
- 0.5 credit from: CAST 6070H
- 0.5 credit from either CAST 6075H or CAST 6080H
- Successful defence of written dissertation proposal
- 1.0 credit from: PhD Dissertation (CAST 6090Y)

- 1.0 elective credit, in addition to the above, with grades of B+ or better*

*Unless approved, elective credit must be taken from CAST graduate course list

---

Doctoral candidates must successfully complete 4 credits. Candidates with deficiencies in certain areas may be admitted to the PhD program, but normally will be required to complete additional work. The specific requirements are as follows:

- 1.0 credit for successful completion of the mandatory core seminar, CAST 6000Y.
- 1.0 credit for successful completion of two courses or tutorials (or the equivalent) drawn from the graduate list below. A GPA of 9.0 (B+) or better must be obtained in these courses for students to be allowed to proceed to the comprehensive examinations.
- 1.0 credit for successful completion of two 0.5 credit written comprehensive examinations. Students will be examined in two fields.
- a defence, in English, of a written dissertation proposal. Following the completion of their comprehensives, students will be expected to defend a proposal of the research and analysis they plan to undertake in completing their PhD dissertation. The dissertation proposal defence should normally occur within three months after completion of a student's comprehensive examinations. The dissertation committee will be composed of three faculty members.
- a 1.0-credit dissertation, which must be successfully defended in English at an oral examination.

Program Regulations

ADMISSION REQUIREMENTS

The normal requirement for admission into the PhD program is a Master's degree (or equivalent), with at least high Honours standing, in Canadian Studies or a cognate discipline. Applicants should note, however, that meeting the admission requirement does not guarantee admission to the program. Applicants wishing to be considered for admission to the PhD program must submit completed applications by February 1.

PHD.CUST - Cultural Studies - PhD

Overview

Academic Level
Graduate

Credential
Doctor of Philosophy

Description
WEBSITE

The Cultural Studies Department at Trent University extends its groundbreaking approach to the field with its PhD program, the first free-standing PhD in Cultural Studies program in Canada. The program provides students with the freedom to pursue their fields of interest within a context of interdisciplinary integration.

The innovative design of the program allows students the flexibility to work on three interrelated research projects during their career as a PhD student. The projects are developed in a supportive and intensive intellectual environment. As each project is completed, original work may be presented at conferences and submitted to scholarly journals. The unique and flexible design of the program puts the emphasis on research, research-creation, and professional development.

Graduates of the program will have gained a critical and comprehensive knowledge of the intellectual traditions in cultural studies; comprehensive knowledge of their own special field; experience in presenting original work to peers and preparing it for scholarly journals; demonstrated ability to design and follow through programs of original research; and teaching experience in Cultural Studies and cognate areas.

The program welcomes applications from students with a completed MA who have demonstrated excellence in research and writing. A wide range of research is possible on the arts, culture, and using theoretical approaches influenced by such diverse figures as De Saussure, Marx, Freud, Adorno, Benjamin, Brecht, Barthes, Levi-Strauss, Durkheim, Lukács, Arendt, Habermas, Williams, Derrida, Deleuze, Lacan, Kristeva, Foucault, Bourdieu, Ranciere, Butler, Thoreau, and Wittgenstein. Graduates of the program are prepared for work in Cultural Studies, but also in areas such as the Contemporary Arts and Films, Literary Studies, Media and Communication Studies (Television and Internet Studies), Gaming, Digital and Literacy Studies, Interdisciplinary Humanities, Memory and Place Studies, Tourism Studies, Urban Studies, Aging Studies, Science Fiction and social studies of culture and the arts.

In order to foster an intellectual community for all the students and faculty of the Cultural Studies PhD there are a number of ongoing lectures and events that include salon seminars and the John Fekete and Elaine Stavro Lecture Series.

For further information about the Cultural Studies PhD Program at Trent University, please visit our website.

Requirements

Doctor of Philosophy in Cultural Studies. Complete the following requirements.

- 5.0 credits from: CUST 6100Y, CUST 6110Y, CUST 6200Y, CUST 6225Y, CUST 6325Y
- Comprehensive Examination (CUST 6125Y)
- Dissertation Proposal (CUST 6275Y)
- PhD Dissertation (CUST 6475Y)
- Successful completion of dissertation oral defence
- Submission of project for publication
- 0.5 elective credit in addition to the above*

*The elective credit must be approved by the student's Supervisor and Program Director.

Program Regulations

Satisfactory completion of each program requirement requires a passing grade (PASS). In all cases of program requirements, with the exception of CUST 6100Y and the required elective, which requires a grade of 70% or higher to pass, the grade awarded will be PASS, FAIL, or INC ("incomplete"), in accordance with the University's grading system. Each INC grade alerts the student to a problem in progressing toward the degree and requires consultation with the supervisory committee. If necessary, an interview with the director may take place, in which the student will be asked to show why they should not be asked to withdraw from the Program. Each FAIL grade indicates unsatisfactory work and the student may be asked to withdraw from the Program.

The expected time of completion of the degree is four years. The CUST PhD degree is granted once the Program confirms that all Program requirements have been met and once the dissertation is formally approved by the University.

PHD.ENLS - Environmental & Life Sciences - PhD (Thesis)

Overview

Academic Level
Graduate

Credential
Doctor of Philosophy

Program Description
Thesis

Description

The Environmental & Life Sciences Graduate Program is an interdisciplinary program leading to either a MSc or a PhD degree in the natural sciences. Students conduct research in applied and basic science and many students develop their research projects in partnership with governmental agencies, industry, organizations, and other universities. The centrepiece of student training is the thesis – an original investigation in the natural sciences – augmented by seminars, a mandatory core course (for MSc students), elective courses, and the candidacy examination (for PhD students).

The Program is served by faculty principally from the departments of Biology, Chemistry, Forensic Science, and School of the Environment among others. Faculty also include Canada Research Chairs, as well as adjunct faculty from provincial and federal government agencies, nongovernmental organizations and industry. The program serves as a broad umbrella for these disciplines to interconnect.

This program offers instruction in four areas of emphasis:

- Earth Sciences, Natural Resources, and Agriculture
- Ecosystem Biogeochemistry and Trace Contaminants
- Ecology, Evolution, and Conservation
- Genes, Cells, and Physiological Systems

The aim of the program is to provide students with a background in the theory and practice of environmental and biological science that will enable them to function and thrive in a variety of work environments.

Requirements

Doctor of Philosophy in Environmental and Life Sciences.

Complete the following requirements:

- PhD Candidacy Examination (ENLS 6100H)
- PhD students are expected to give at least one seminar
- Thesis
- Successful completion of thesis oral defence
- 0.5 elective credit*

*Unless approved, elective credit must be taken from ENLS course list

Program Regulations

The general regulations and requirements for graduate degrees at Trent University apply to the Environmental & Life Sciences Graduate Program. Application for admission should be received by February 1 for consideration for scholarships, bursaries, and teaching assistantships for Fall admission into the program. A small number of students are admitted in January and May. Applicants should hold an undergraduate Honours Science degree in a relevant field of study. Students must have a supervisor before acceptance in the program. The ENLS course (ENLS 5000H) is compulsory for all first year MSc students. Students are permitted to take a maximum of one half-credit reading course (ENLS 5090H). In addition to the thesis, candidates for the MSc degree will be required to complete the minimum equivalent of 1.0 course credits. The supervisory committee may specify an additional 0.5 credits, in consideration of the student's academic background and research requirements; any such requirement will be determined by the committee within 8 months of admission. All Environmental & Life Sciences (ENLS) graduate students need

to establish a supervisory committee in conjunction with their thesis and research supervisor(s) within the first term. The supervisory committee will consist of three ENLS faculty members. They may be derived from ENLS Trent faculty, ENLS adjunct faculty, or ENLS special graduate faculty; every student supervisory committee must have a minimum of one regular (non-adjunct) Trent faculty member.

Prospective PhD students will normally have a thesis-based MSc degree. Candidates for the PhD degree will be required to complete at least 0.5 credits; the supervisory committee may require an additional 0.5 credits, determined within 8 months of admission. If a Master's student achieves a superior academic record and shows particular aptitude for research, the Graduate Studies Committee, on the recommendation of the Environmental & Life Sciences Graduate Program Executive, may authorize conversion to the PhD program without completion of the MSc degree. MSc to PhD converted students (those who have passed the conversion examination) will be required to complete a minimum of 1.0 credit; the supervisory committee may require an additional 0.5 credits, determined within 8 months of the conversion examination. For both degrees (MSc and PhD), the thesis is expected to include the results of an original investigation. PhD students must enrol in the PhD candidacy examination (ENLS 6100H) at the start of their second year of study; they must undertake the oral candidacy examination within the first 16 months of study. The examination will establish, to the satisfaction of the program, that the student has an effective grasp of their research area. Degree candidates (MSc and PhD) have the option of submitting their thesis either in the “traditional” or “manuscript” format. Candidates must pass an oral examination in defence of their thesis research. Students must attain at least a B- (70%) in all course work to remain registered in their program. The expected time for completion for full time students is two years for the MSc, four years for the PhD, and five years for those who convert to the PhD program before completion of the MSc. Please see the Graduate Academic Calendar for additional details on time limits for part-time students.

PHD.IDSR - Interdisciplinary Social Research - PhD

Overview

Academic Level
Graduate

Credential
Doctor of Philosophy

Description
The PhD in Interdisciplinary Social Research (IDSR) will prepare students to understand and expand interdisciplinary and transdisciplinary approaches to examining complex social issues. This degree will offer students a pathway into academic (university-based) and non-academic (public, private and civil society sectors) research positions in a range of fields that require doctoral level social science research skills, including education and caring professions, business and management, and the social sciences where there is benefit in interdisciplinary and transdisciplinary knowledge and approaches.

This graduate degree will build on Trent University’s strengths in interdisciplinary scholarship in the social sciences. As Canada adapts to an era of profound social, economic and environmental change, leadership and expertise in interdisciplinary perspectives and processes for identifying and solving complex social issues are required. With a combined emphasis on social inquiry, interdisciplinary research and professional scholarship, the IDSR provides a theoretical, methodological and experiential training ground for the development of leading scholarship that builds understanding of key social, material and environmental issues facing societies, both historically and in the present day.

TRENT UNIVERSITY

INTERDISCIPLINARY SOCIAL RESEARCH PHD

Requirements

Doctor of Philosophy in Interdisciplinary Social Research.
Complete the following requirements.

- 1.5 credit from: IDSR 6010H, IDSR 6020H and IDSR 6060H
- PhD Qualifying Exam (IDSR 6100H)
- PhD Dissertation
- Successful completion of dissertation oral defence
- Successful completion of public talk on dissertation research
- 1.0 elective credit in addition to the above*

*The elective credit must be approved by the student's Supervisor and Program Director.

The expected time of completion of the degree is four years. The IDSR PhD degree is granted once the Program confirms that all Program requirements have been met and once the dissertation is formally approved by the University.

The requirements for the PhD degree in IDSR are the following:

- Each student must complete three mandatory core courses: IDSR 6010H; IDSR 6020H; IDSR 6060H; and two elective courses at the 5000 or 6000 level (0.5 credit advancing theoretical and conceptual understandings developed in IDSR 6010H and 0.5 credit advancing research methods knowledge and competencies developed in IDSR 6020H).
- Elective courses are normally taken at the 6000 (PhD) level, usually drawn from the Trent University graduate calendar, including but not limited to IDSR 6050H (Independent Reading and Research). The elective course must be approved by the student's Supervisor and Program Director. Masters (5000) level courses taken as a PhD Student may qualify for the elective requirements with approval from the Program Director.
- Students will be required to give a 30-minute public talk on their dissertation research within the two months prior to their scheduled dissertation defence.
- Students are required to pass a qualifying examination, including dissertation proposal (IDSR 6100H). The qualifying examination will be prepared in conjunction with the supervisory committee and defended in an oral examination. The committee for the qualifying examination will include three or more members of the supervisory committee and the program director (or delegate) as Chair). The outcome of the examination will be Pass, Pass with Remediation, or Fail.
- Students are required to complete and submit a PhD dissertation on an approved research topic. Detailed specification of the format is available from the School of Graduate Studies. Acceptance of the dissertation requires the approval of an Examining Committee following an oral defence of the dissertation. The Examining Committee consists of at least four faculty members: an external examiner, one supervisory committee member, one internal-external examiner, and the supervisor.

Program Regulations

The general regulations and requirements of Trent University for the PhD degree apply to the Interdisciplinary Social Research PhD program.

ADMISSION REQUIREMENTS

Admission is competitive for a limited number of places. Consideration of applications due December 15th for admission the following fall. To be considered, applicants should have a relevant social science or professional Masters degree with a minimum A- (80%) on their Masters degree course work, demonstrated aptitude for theoretical inquiry and applied scholarship, as well as excellent writing skills, and an area of intellectual and research interest consonant with the emphasis and aims of the program.

Students not meeting the entrance average may be considered for entry on a case-by-case basis, often looking at other mitigating factors such as length of time since previous graduate work, work experience and undergraduate degrees. This review is completed by the Director of the program and approved by the Special Admissions Committee.

PHD.INDG - Indigenous Studies - PhD (Monograph)

Overview

Academic Level
Graduate

Credential
Doctor of Philosophy

Program Description
Monograph Dissertation

Description
The Indigenous Studies PhD Monograph Stream offers Indigenous and non-Indigenous students an educational opportunity at an advanced level of study. Students engage in learning experiences that are grounded in Indigenous cultures in content and process and which reflect the interaction between traditional and contemporary Indigenous knowledges within the academic context.

Specific Objectives of the Stream:

- to advance Indigenous Studies as an interdisciplinary field of study through the rebuilding and recognition of Indigenous knowledge systems and the creation of knowledge which reflects Indigenous peoples' experiences.
- to explore research methodologies that reflect Indigenous knowledge systems.
- to prepare students for a variety of careers and provide academic training for the preparation of a monograph dissertation.

TRENT UNIVERSITY
INDIGENOUS STUDIES PHD

Requirements

Doctor of Philosophy in Indigenous Studies (Monograph).
Complete the following requirements.

- 4.5 credits from: INDG 6600Y, 6603H, 6700Y, 6701Y, 6715H and 6720H
- INDG 6740H: Written Core Comprehensive Examination
- INDG 6750H: Oral Core Comprehensive Examination
- Dissertation Proposal
- Successful completion of the Ethics Process

Following the research proposal process students are required to submit an ethics application to be reviewed by both Trent's Research Ethics Board (REB) and the INDG PhD Ethics Committee. This process should coincide with the proposal defence phase.

- Dissertation (INDG 6800Y)
- Dissertation Defence
- Successful completion of the Language Requirement

See program regulations for more details.

Program Regulations

Admissions

To be considered for admission, students must have completed a master's degree in a field relevant to Indigenous Studies with an overall average at graduation of at least B+ (77%). In cases, where the master's degree is in a field other than Indigenous Studies, students may be required to enroll in a Qualifying Year Program in Indigenous Studies to ensure an adequate academic background for pursuing PhD work in the discipline. The Qualifying Year will consist of between four and five upper year undergraduate courses in Indigenous Studies (with MA level assignments); the number of courses will depend on the student's background and qualifications. Successful completion of a Qualifying Year will permit the student to compete for admission on an equal basis with other applicants. Admission to the PhD program is not, however, guaranteed. Students admitted to the program having completed a MA MRP project instead of a thesis may be required to take additional research and/ or writing courses or workshops.

Enrollment Status Expectations

The PhD program is full-time program for the first two years. This means that students should be living within driving distance of the campus for this period. There is an expectation that students will be available regionally to participate in course and program activities on a regular basis throughout the academic year. Upon completion of all coursework, comprehensive exams, and a successful defence of a dissertation proposal, students may apply for part time status.

*subject to the regulations of the Indigenous Studies PhD program and the School of Graduate Studies.

During the first two-years, students will enrol in 2.0 credits in the first year and 2.5 credits in the second year. All students will take INDG 6600Y, 6603H, 6700Y, 6701Y, 6715H, and 6720H during this period. To maintain an appropriate time frame for program completion it is important that students complete all first-year program requirements in order to register in second year courses.

Failed Courses and Progress Reports

Students must maintain a B+ average in all courses. Students who receive a failing mark in a required course will be asked to leave the program. Students are required to complete an annual form that documents completion of courses and program milestones. Student progress is reviewed annually by the Student Progress Committee. If a student has not met normal timelines in the program due to outside factors, they will be required to submit a plan to their supervisor that provides a timeline to complete outstanding milestones. Such a plan is reviewed by the Student Progress Committee. Students can also request a meeting with the Student Progress Committee to provide more information about delays in their progress. If outstanding milestones are not met within the timeframe agreed upon in the approved plan, the student may be asked to leave the program.

Comprehensive Exams

Upon successful completion of the required courses in year two, all students will complete two comprehensive examinations: INDG 6740H, a written scholarly submission in Indigenous Studies and INDG 6750H, an oral examination in Indigenous Knowledges. There is one opportunity to sit for the oral exam (May-June) and two opportunities to take the written exam (July & January).

INDG 6740H

Students will submit a scholarly paper in response to exam questions. Student submissions will undergo a peer review process by an examination committee made up of graduate faculty members who teach and supervise within the PhD Program. Student submissions will be evaluated based upon their ability to demonstrate comprehensively their understanding and use of the core comp bibliography through:

1. Integration of the four themes (and associated sources) from the bibliography to demonstrate a comprehensive understanding of Indigenous Studies as a discipline; and
2. The ability to situate themselves and their work within the discipline of Indigenous Studies.

Upon completion of the initial review, the examination committee will consider the submission with respect to the following options:

Pass with Distinction
Pass
Pass (with Minor or Major Revisions)

Students who pass with distinction on the initial submission, will receive this designation on their transcript. Students who pass with minor or major revisions will be provided with comprehensive feedback and the requirement to submit a revised paper within 45 days. After resubmission and re-evaluation by the examination committee, students will have an additional 15 days to submit final revisions. Final decision on revised submissions will be provided by the chair of the exam committee to the program directors.

Failure of the written core comprehensive exam is defined as the inability of a student to produce a revised draft of sufficient quality to meet the scholarly standards expected for publication, despite two submissions and opportunities for feedback and revision. Specifically, failure to effectively address feedback or produce a draft that demonstrates sufficient critical engagement with the themes and readings contained in the core comprehensive bibliography, or lack of participation in the review process, including missed revision deadlines, constitutes a failure of the exam.

Students whose submissions are not revised to expected outcomes for a written comprehensive exam after the completion of the review process period (60 days), will be required to meet with the student performance committee and their supervisor to develop a plan of study to retake the exam. Students must retake the exam within six months of the last attempt. Students who do not pass the exam after a second time will be required to withdraw from the program.

INDG 6750H

Students will participate in an oral examination in Indigenous Knowledges. The examination committee will be chaired by the

Director of Studies, and members of the PhD Traditional Council comprising both Anishinaabe and Haudenosaunee Elders and/or Knowledge Holders.

Student examinations will be evaluated based upon their ability to demonstrate comprehensively their understanding of and academic engagement with Indigenous Knowledges.

Upon completion of the oral exam the examination committee will consider the submission respect to the following options:

Pass with Distinction
Pass
Fail

Dissertation Proposal and Proposal Defence

Dissertation proposals should not exceed 40 pages and will normally be defended within six months of successful completion of the comprehensive examination(s). An examination committee must examine the dissertation proposal and determine if it provides a satisfactory road map for successful completion of the monograph dissertation.

Dissertation Supervision

Doctoral dissertations within the graduate program are overseen by a Dissertation Supervisor selected from Trent's Graduate Faculty, along with a Supervisory Committee possessing the requisite expertise to offer guidance throughout the dissertation process. The composition of the supervisory committee must adhere to the guidelines set by the School of Graduate Studies.

Ethics Process

As part of the doctoral journey, students are required to engage in an ethics process, involving the submission of an ethics application and review by both Trent's Research Ethics Board (REB) and the INDG PhD Ethics Committee. This process should coincide with the proposal defense phase. Upon successful completion of the ethics process and proposal defense, students progress to PhD Candidacy.

Language Requirement

Students will be required to demonstrate an introductory level of understanding in an Indigenous language. This can be demonstrated by:

- Passing an examination in an Indigenous language (either Mohawk or Nishinaabemowin) administered by the Chanie Wenjack School for Indigenous Studies. If a student speaks a different Indigenous language, the Program will hire a language examiner, on a case-by-case basis, to conduct exams in an Indigenous language other than Mohawk or Nishinaabemowin.
- Presenting a transcript with a grade of B+ or better in a 1.0 credit course in an Indigenous language taken at an accredited university.
- Enrolling in a 1.0 credit undergraduate Indigenous language course (such as INDG 2800Y, INDG 2250Y). A grade of B+ or higher must be achieved in the course.
- Enrolling in two 0.5 credit courses in one Indigenous language (such as INDG 3851H and INDG 3852H) or by taking two of the following courses: INDG 6625H-EDUC 5625H and INDG 6626H-CSID SUST 5626H when they are offered periodically. A grade of B+ or higher must be achieved in both 0.5 credit courses.
- Taking a community language course or one-on-one instruction with a fluent language speaker for an 8-month long period. Upon completion of a language course or one on-one instruction, students must submit a copy of a transcript or letter from a language instructor to the program assistant clearly stating the course taken, the length of the course, the level of language learned, and the letter grade provided to the student. This transcript or letter can come from an Indigenous community outside of Canada. It will be at the discretion of the Director of Studies or the Program Director to approve the letter in cases where a family member of the student has been the language instructor.

PHD.INDG.AKNW - Indigenous Studies - PhD (Knowledge Basket Dissertation: Path A Research-Creation)

Overview

Academic Level
Graduate

Credential
Doctor of Philosophy

Program Description
Path A - Research-Creation

Description
Path A is a research-creation path wherein students will demonstrate candidate mastery of a particular area through original research that results in a creative component and written component.

Specific Objectives of the Stream:

- to advance Indigenous Studies as an interdisciplinary field of study through the rebuilding and recognition of Indigenous knowledge systems and the creation of knowledge which reflects Indigenous peoples' experiences.
- to explore research methodologies that reflect Indigenous knowledge systems.
- to prepare students to disseminate research through a practical creative project and a written component that will benefit a community of practice.

TRENT UNIVERSITY
INDIGENOUS STUDIES PHD

Requirements

Doctor of Philosophy in Indigenous Studies (Knowledge Basket Dissertation: Path A Research-Creation).
Complete the following requirements:

- 4.5 credits from: INDG 6600Y, 6603H, 6700Y, 6701Y, 6715H and 6720H
- INDG 6740H: Written Core Comprehensive Examination
- INDG 6750H: Oral Core Comprehensive Examination
- Knowledge Basket Dissertation Proposal
- Successful completion of the Ethics Process

Following the research proposal process students are required to submit an ethics application to be reviewed by both Trent's Research Ethics Board (REB) and the INDG PhD Ethics Committee. This process should coincide with the proposal defence phase.

- Project-Based Dissertation (INDG 6825Y)
- Complete Creative Component
    - No more than 70% of the basket emphasis can call on the Creative Component.
- Complete Written Component
    - No more than 30% of the basket emphasis can fall on the Written Component.
- Successfully pass Round Table
- Successful completion of the Language Requirement

*see program regulations for more details.

Program Regulations

Admissions

To be considered for admission, students must have completed a master's degree in a field relevant to Indigenous Studies with an overall average at graduation of at least B+ (77%). In cases, where the master's degree is in a field other than Indigenous Studies, students may be required to enroll in a Qualifying Year Program in Indigenous Studies to ensure an adequate academic background for pursuing PhD work in the discipline. The Qualifying Year will consist of between four and five upper year undergraduate courses in Indigenous Studies (with MA level assignments); the number of courses will depend on the student's background and qualifications. Successful completion

of a Qualifying Year will permit the student to compete for admission on an equal basis with other applicants. Admission to the PhD program is not, however, guaranteed. Students admitted to the program having completed a MA MRP project instead of a thesis may be required to take additional research and/ or writing courses or workshops.

Enrollment Status Expectations

The PhD program is full-time program for the first two years. This means that students should be living within driving distance of the campus for this period. There is an expectation that students will be available regionally to participate in course and program activities on a regular basis throughout the academic year. Upon completion of all coursework, comprehensive exams, and the successful defence of a dissertation proposal, students may apply for part time status.

*subject to the regulations of the Indigenous Studies PhD program and the School of Graduate Studies.

During the first two-years, students will enroll in 2.0 credits in the first year and 2.5 credits in the second year. All students will take INDG 6600Y, 6603H, 6700Y, 6701Y, 6715H, and 6720H during this period. To maintain an appropriate time frame for program completion it is important that students complete all first-year program requirements in order to register in second year courses.

Failed Courses and Progress Reports

Students must maintain a B+ average in all courses. Students who receive a failing mark in a required course will be asked to leave the program. Students are required to complete an annual form that documents completion of courses and program milestones. Student progress is reviewed annually by the Student Progress Committee. If a student has not met normal timelines in the program due to outside factors, they will be required to submit a plan to their supervisor that provides a timeline to complete outstanding milestones. Such a plan is reviewed by the Student Progress Committee. Students can also request a meeting with the Student Progress Committee to provide more information about delays in their progress. If outstanding milestones are not met within the timeframe agreed upon in the approved plan, the student may be asked to leave the program.

Comprehensive Exams

Upon successful completion of the required courses in year two, all students will complete two comprehensive examinations: INDG 6740H, a written scholarly submission in Indigenous Studies and INDG 6750H, an oral examination in Indigenous Knowledges. There is one opportunity to sit for the oral exam (May-June) and two opportunities to take the written exam (July & January).

INDG 6740H

Students will submit a scholarly paper or Voicethread presentation in response to exam questions. Student submissions will undergo a peer review process by an examination committee made up of graduate faculty members who teach and supervise within the PhD Program. Student submissions will be evaluated based upon their ability to demonstrate comprehensively their understanding and use of the core comp bibliography through:

1. Integration of the four themes (and associated sources) from the bibliography to demonstrate a comprehensive understanding of Indigenous Studies as a discipline; and

2. The ability to situate themselves and their work within the discipline of Indigenous Studies.

Upon completion of the initial review, the examination committee will consider the submission with respect to the following options:

Pass with Distinction
Pass
Pass (with Minor or Major Revisions)

Students who pass with distinction on the initial submission, will receive this designation on their transcript. Students who pass with minor or major revisions will be provided with comprehensive feedback and the requirement to submit a revised paper within 45 days. After resubmission and re-evaluation by the examination committee, students will have an additional 15 days to submit final revisions. Final decision on revised submissions will be provided by the chair of the exam committee to the program directors.

Failure of the written core comprehensive exam is defined as the inability of a student to produce a revised draft of sufficient quality to meet the scholarly standards expected for publication, despite two submissions and opportunities for feedback and revision. Specifically, failure to effectively address feedback or produce a draft that demonstrates sufficient critical engagement with the themes and readings contained in the core comprehensive bibliography, or lack of participation in the review process, including missed revision deadlines, constitutes a failure of the exam.

Students whose submissions are not revised to expected outcomes for a written comprehensive exam after the completion of the review process period (60 days), will be required to meet with the student performance committee and their supervisor to develop a plan of study to retake the exam.

Students must retake the exam within six months of the last attempt. Students who do not pass the exam after a second time will be required to withdraw from the program.

INDG 6750H

Students will participate in an oral examination in Indigenous Knowledges. The examination committee will be chaired by the Director of Studies, and members of the PhD Traditional Council comprising of Anishinaabe and Haudenosaunee Elders and/or Knowledge Holders.

Student examinations will be evaluated based upon their ability to demonstrate comprehensively their understanding of and academic engagement with Indigenous Knowledges.

Upon completion of the oral examination the examination committee will consider the submission with respect to the following options:

Pass with Distinction
Pass
Fail

Knowledge Basket Proposal

Dissertation proposals should not exceed 40 pages and will normally be defended within six months of successful completion of the comprehensive examination (s). An examination committee must examine the dissertation proposal and determine if it provides a satisfactory road map for successful completion of the project-based dissertation.

Proposal Defence

The proposal examination committee shall be made up of the supervisor and at least one member of the supervisory committee as well as a member who is external to the committee. A graduate faculty member who is outside the supervisory committee shall chair the proposal defence.

Ethics Process

As part of the doctoral journey, students are required to engage in an ethics process, involving the submission of an ethics application and review by both Trent's Research Ethics Board (REB) and the INDG PhD Ethics Committee. This process should coincide with the proposal defense phase. Upon successful completion of the ethics process and proposal defense, students progress to PhD Candidacy.

Creative Component

This section reflects the act of creating something that has practical applicability. It should reflect the research process under-taken as well as the findings from that research. The creative component can be:

- A creative piece (graphic novel, fictional novel, film, play/performance, painting, visual arts, pottery, sculpture, quilts, etc.) under the guidance of an Elder, Knowledge Holder, or other Expert in that practice),
- Product or tool (educational, environmental, etc.),
- Architectural design,
- Website or online/web-based platform etc.

These suggestions are not exclusive, other options are possible if determined appropriate for the student/ committee/project. The nature and scope of this component should reflect the student's level of knowledge, skills, and capacity to carry out the work required to complete the project. It must also consider the availability and willingness of an expert in the specific area of the project to serve on the committee. The proposed creative piece must also be appropriate in effort and scope for inclusion in a PhD Knowledge Basket. Upon completion of the creative component, it is distributed (or presented) to the community of practice.

Note that students are responsible for any fees associated with all apprenticeships or training that might be required to undertake the work involved in producing the creative component.

Written Component

This section is meant to situate the creative component and the students overall research project. It does not have to follow a monograph format exclusively but should address the students positionally, the research undertaken, community of practice and teachers related to the creative component, findings of the research, who benefits from the project and how it contributes to humanity and human experience. The written component can be made up of one or more written pieces equaling 20,000-30,000 words. The written component should be completed within one term of completing the creative component.

Dissertation Supervision

Doctoral project-based dissertations within the graduate program are overseen by a Dissertation Supervisor selected from Trent's Graduate Faculty, along with a Supervisory Committee possessing the requisite expertise to offer guidance throughout the dissertation process. The composition of the supervisory committee must adhere to the guidelines set by the School of Graduate Studies.

Round Table

The Round Table serves as the defence and final component of the knowledge basket dissertation. The program will organize a round table within one month of receiving the external examiner reports. The Round Table will provide an opportunity for the candidate to discuss the dissertation knowledge basket in its entirety. After the presentation, the examining committee will engage with the candidate about each component and provide guidance, support, and specific feedback for any revisions that are required. The examining committee will then meet in camera to discuss what was shared by the candidate (both components as well as the presentation) and make one of the following decisions:

– Pass with No Revisions
– Pass with Minor Revisions
– Not a Pass but the Candidate can Resubmit
– Not a Pass

At the conclusion of the Round Table the candidate will be provided with a reasonable amount of time to make the necessary changes required as part of defence process. Once the required changes are made and the external examiners (or the supervisor if appointed to do so by the examining committee) have signed off then the candidate will be considered to have completed the defense stage of the program. They would then proceed to deposit their dissertation with Graduate Studies. Upon completion of that step, they would be considered to have met the academic requirements of the PhD Program given there are no other outstanding requirements (such as the language requirement).

Language Requirement

Students will be required to demonstrate an introductory level of understanding in an Indigenous language. This can be demonstrated by:

- Passing an examination in an Indigenous language (either Mohawk or Nishinaabemowin) administered by the Chanie Wenjack School for Indigenous Studies. If a student speaks a different Indigenous language, the Program will hire a language examiner, on a case-by-case basis, to conduct exams in an Indigenous language other than Mohawk or Nishinaabemowin.
- Presenting a transcript with a grade of B+ or better in a 1.0 credit course in an Indigenous language taken at an accredited university.
- Enrolling in a 1.0 credit undergraduate Indigenous language course (such as INDG 2800Y, INDG 2250Y). A grade of B+ or higher must be achieved in the course.
- Enrolling in two 0.5 credit courses in one Indigenous language (such as INDG 3851H and INDG 3852H) or by taking two of the following courses: INDG 6625H-EDUC 5625H and INDG 6626H-CSID SUST 5626H when they are offered periodically. A grade of B+ or higher must be achieved in both 0.5 credit courses.
- Taking a community language course or one-on-one instruction with a fluent language speaker for an 8-month long period. Upon completion of a language course or one on-one instruction, students must submit a copy of a transcript or letter from a language instructor to the program assistant clearly stating the course taken, the length of the course, the level of language learned, and the letter grade provided to the student. This transcript or letter can come from an Indigenous community outside of Canada. It will be at the discretion of the Director of Studies or the Program Director to approve the letter in cases where a family member of the student has been the language instructor.

PHD.INDG.BKNW - Indigenous Studies - PhD (Knowledge Basket Dissertation: Path B Scholar-Practitioner)

Overview

Academic Level
Graduate

Credential
Doctor of Philosophy

Program Description
Path B - Scholar Practitioner

Description
Path B is designed for students who carry a specific Indigenous practice and would like to apprentice with an Elder or Knowledge Holder as a component of a practice-based research project within the field of Indigenous Knowledges: Peoples, Lands, Waters, Cultures. To qualify for this path, students must have a minimum of seven years prior experience with said Indigenous practice. As a scholar practitioner, students will demonstrate candidate mastery of an Indigenous practice (under the direction of an approved Elder or Knowledge Holder) as well as disseminate the findings of their practice-based original research through a Creative component (accompanied by support documentation).

Specific Objectives of the Stream:

- to advance Indigenous Studies as an interdisciplinary field of study through the rebuilding and recognition of Indigenous knowledge systems and the creation of knowledge which reflects Indigenous peoples' experiences.
- to explore research methodologies that reflect Indigenous knowledge systems.
- to prepare students to disseminate research through a practical creative project and a written component that will benefit a community of practice.
- support student in acquiring Indigenous Knowledge through an apprenticeship.

Requirements

Doctor of Philosophy in Indigenous Studies - PhD (Knowledge Basket Dissertation: Path B Scholar-Practitioner). Complete the following requirements.

- 4.5 credits from: INDG 6600Y, 6603H, 6700Y, 6701Y, 6715H and 6720H
- INDG 6740H: Written Core Comprehensive Examination
- INDG 6750H: Oral Core Comprehensive Examination
- Dissertation Proposal
- Successful completion of the Ethics Process

Following the research proposal process students are required to submit an ethics application to be reviewed by both Trent's Research Ethics Board (REB) and the INDG PhD Ethics Committee. This process should coincide with the proposal defence phase.

- Project-Based Dissertation (INDG 6825Y)
- Complete Creative Component
    - No more than 90% of the basket emphasis can fall on the Creative Component
- Complete Written Component
    - No more than 10% of the basket emphasis can fall on the Written Component
- Successfully pass Round Table
- Successful completion of the Language Requirement

*See program regulations for more details

Program Regulations

Admissions

To be considered for admission, students must have completed a master's degree in a field relevant to Indigenous Studies with an overall average at graduation of at least B+ (77%). In cases, where the master's degree is in a field other than Indigenous Studies, students may be required to enroll in a Qualifying Year Program in Indigenous Studies to ensure an adequate academic background for pursuing PhD work in the discipline. The Qualifying Year will consist of between four and five upper year undergraduate courses in Indigenous Studies (with MA level assignments); the number of courses will depend on the student's background and qualifications. Successful completion of a Qualifying Year will permit the student to compete for admission on an equal basis with other applicants. Admission to the PhD program is not, however, guaranteed. Students admitted to the program having completed a MA MRP project instead of a thesis may be required to take additional research and/ or writing courses or workshops. To qualify for Path B, students must have a minimum of seven years prior experience with an Indigenous practice.

Enrollment Status Expectations

The PhD program is full-time program for the first two years. This means that students should be living within driving distance of the campus for this period. There is an expectation that students will be available regionally to participate in course and program activities on a regular basis throughout the academic year. Upon completion of all coursework, comprehensive exams, and the successful defence of a dissertation proposal, students may apply for part time status.

*subject to the regulations of the Indigenous Studies PhD program and the School of Graduate Studies .

During the first two-years, students will enroll in 2.0 credits in the first year and 2.5 credits in the second year. All students will take INDG 6600Y, 6603H, 6700Y, 6701Y, 6715H, and 6720H during this period. To maintain an appropriate time frame for program completion it is important that students complete all first-year program requirements in order to register in second year courses.

Failed Courses and Progress Reports

Students must maintain a B+ average in all courses. Students who receive a failing mark in a required course will be asked to leave the program. Students are required to complete an annual progress report that documents completion of courses and program milestones. Student progress is reviewed annually by the Student Progress Committee. If a student has not met normal timelines in the program due to outside factors, they will be required to submit a plan to their supervisor providing a timeline to complete outstanding milestones. Such a plan is reviewed by the Student Progress Committee. Students can also request a meeting with the Student Progress Committee to provide more information about delays in their progress. If outstanding milestones are not met within the timeframe agreed upon in the approved plan, the student may be asked to leave the program.

Comprehensive Exams

Upon successful completion of the required courses in year two, all students will complete two comprehensive examinations: INDG 6740H, a written scholarly submission in Indigenous Studies and INDG 6750H, an oral examination in Indigenous Knowledges. There is one opportunity to sit for the oral exam (May-June) and two opportunities to take the written exam (July & January).

INDG 6740H

Students will submit a scholarly paper or Voicethread presentation in response to exam questions. Student submissions will undergo a peer review process by an examination committee made up of graduate faculty members who teach and supervise within the PhD Program. Student submissions will be evaluated based upon their ability to demonstrate comprehensively their understanding and use of the core comp bibliography through:

1. Integration of the four themes (and associated sources) from the bibliography to demonstrate a comprehensive understanding of Indigenous Studies as a discipline; and

2. The ability to situate themselves and their work within the discipline of Indigenous Studies.

Upon completion of the initial review, the examination committee will consider the submission with respect to the following options:

Pass with Distinction
Pass
Pass (with Minor or Major Revisions)

Students who pass with distinction on the initial submission, will receive this designation on their transcript. Students who pass with minor or major revisions will be provided with comprehensive feedback and the requirement to submit a revised paper within 45 days. After resubmission and re-evaluation by the examination committee, students will have an additional 15 days to submit final revisions. Final decision on revised submissions will be provided by the chair of the exam committee to the program directors.

Failure of the written core comprehensive exam is defined as the inability of a student to produce a revised draft of sufficient quality to meet the scholarly standards expected for publication, despite two submissions and opportunities for

feedback and revision. Specifically, failure to effectively address feedback or produce a draft that demonstrates sufficient critical engagement with the themes and readings contained in the core comprehensive bibliography, or lack of participation in the review process, including missed revision deadlines, constitutes a failure of the exam.

Students whose submissions are not revised to expected outcomes for a written comprehensive exam after the completion of the review process period (60 days), will be required to meet with the student performance committee and their supervisor to develop a plan of study to retake the exam. Students must retake the exam within six months of the last attempt. Students who do not pass the exam after a second time will be required to withdraw from the program.

INDG 6750H

Students will participate in an oral examination in Indigenous Knowledges. The examination committee will be chaired by the Director of Studies, and members of the PhD Traditional Council compromising both Anishinaabe and Haudenosaunee Elders and/or Knowledge Holders.

Student examinations will be evaluated based upon their ability to demonstrate comprehensively their understanding of and academic engagement with Indigenous Knowledges.

Upon completion of the oral examination the examination committee will consider the submission with respect to the following options:

Pass with Distinction
Pass
Fail

Knowledge Basket Dissertation Proposal

Dissertation Knowledge Basket Proposals should not exceed 40 pages and will normally be defended within six months of successful completion of the comprehensive examination. An examination committee must examine the dissertation proposal and determine if it provides a satisfactory road map for successful completion of the project-based dissertation.

Proposal Defence

The proposal examination committee shall be made up of the supervisor and at least one member of the supervisory committee as well as a member who is external to the committee. A graduate faculty member who is outside the supervisory committee shall chair the proposal defence.

Ethics Process

As part of the doctoral journey, students are required to engage in an ethics process, involving the submission of an ethics application and review by both Trent's Research Ethics Board (REB) and the INDG PhD Ethics Committee. This process should coincide with the proposal defense phase. Upon successful completion of the ethics process and proposal defense, students progress to PhD Candidacy.

Apprenticeship

For this path students must submit a plan for an apprenticeship detailing the levels of learning to be achieved above their previous years of experience with said Indigenous practice. The proposal should clearly detail how each level of learning within the apprenticeship will be undertaken, evaluated and by whom. The apprenticeship should be sufficient to qualify as a component of the Knowledge Basket, and thus, a PhD. Apprenticeships require a final demonstration of said practice (specifics to be determined by the Elder or Knowledge Holder and communicated to the dissertation supervisor) to qualify for an advanced degree (PhD). Note: this apprenticeship is above and beyond the brief experience gained from INDG 6715H., although the new apprenticeship can build upon what was learned as part of that course. Depending upon the nature of the apprenticeship (ceremonial, etc.), it may not be appropriate for the demonstration to be open to the public. In such cases, a member of the Traditional Council will represent the PhD Program and the examining committee at the demonstration and provide a report to the program that details that the apprenticeship was completed successfully. The Elder or Knowledge Holder supervising the apprenticeship will also provide a letter to the program indicating the student's successful completion of the apprenticeship.

Creative Component

The creative component is the primary method of disseminating the findings of the community-based research project. The creative component can be:

- A creative piece (graphic novel, fictional novel, film, play/performance, painting, visual arts, pottery, sculpture, quilts, etc.) under the guidance of an Elder, Knowledge Holder, or other Expert in that practice)
- Product or tool (educational, environmental, etc.),
- Architectural design
- Website or online/web-based platform etc.

These suggestions are not exclusive, other options are possible if determined appropriate for the student/committee/project. The nature and scope of this component should reflect the student's level of knowledge, skills and capacity to carry out the

work required to complete the project. It must also consider the availability and willingness of an expert in the specific area of the project to serve on the committee. The proposed creative piece must also be appropriate in effort and scope for inclusion in a PhD Knowledge Basket. Upon completion of the creative component, it is distributed (or presented) to the community of practice, the supervisory committee and external examiners.

Written Component

Support documentation for Path B can be produced in written form or through the creation of a Voicethread Presentation. Written documentation should be 25-30 pages in length and be in any format that is best suited to the overall project. It can be one document or a combination of written documentation that serves the purposes of the project and the intended audience (s). Voicethread presentations should be 8-10 professional slides with accompanying audio or video commentary. The overall commentary for the presentation should be kept to under 30 minutes. Support documentation must be completed within one term of completing the creative component. Both components are reviewed by an examining committee and discussed collectively at a Round Table by the candidate and the examining committee

Dissertation Supervision

Doctoral project-based dissertations within the graduate program are overseen by a Dissertation Supervisor selected from Trent's Graduate Faculty, along with a Supervisory Committee possessing the requisite expertise to offer guidance throughout the dissertation process. The composition of the supervisory committee must adhere to the guidelines set by the School of Graduate Studies.

Round Table

The Round Table serves as the defence and final component of the knowledge basket dissertation. The program will organize a round table within one month of receiving the external examiner reports. The Round Table will provide an opportunity for the candidate to discuss the dissertation knowledge basket in its entirety. After the presentation, the examining committee will engage with the candidate about each component and provide guidance, support, and specific feedback for any revisions that are required. The examining committee will then meet in camera to discuss what was shared by the candidate (both components as well as the presentation) and make one of the following decisions:

– Pass with No Revisions
– Pass with Minor Revisions
– Not a Pass but the Candidate can Resubmit
– Not a Pass

At the conclusion of the Round Table the candidate will be provided with a reasonable amount of time to make the necessary changes required as part of defence process. Once the required changes are made and the external examiners (or the supervisor if appointed to do so by the examining committee) have signed off then the candidate will be considered to have completed the defense stage of the program. They would then proceed to deposit their dissertation with Graduate Studies. Upon completion of that step, they would be considered to have met the academic requirements of the PhD Program given there are no other outstanding requirements (such as the language requirement).

Language Requirement

Students will be required to demonstrate an introductory level of understanding in an Indigenous language. This can be demonstrated by:

- Passing an examination in an Indigenous language (either Mohawk or Anishinaabemowin) administered by the Chanie Wenjack School for Indigenous Studies. If a student speaks a different Indigenous language, the Program will hire a language examiner, on a case-by-case basis, to conduct exams in an Indigenous language other than Mohawk or Anishinaabemowin.
- Presenting a transcript with a grade of B+ or better in a 1.0 credit course in an Indigenous language taken at an accredited university.
- Enrolling in a 1.0 credit undergraduate Indigenous language course (such as INDG 2800Y, INDG 2250Y). A grade of B+ or higher must be achieved in the course.
- Enrolling in two 0.5 credit courses in one Indigenous language (such as INDG 3851H and INDG 3852H) or by taking two of the following courses: INDG 6625H-EDUC 5625H and INDG 6626H-CSID SUST 5626H when they are offered periodically. A grade of B+ or higher must be achieved in both 0.5 credit courses.
- Taking a community language course or one-on-one instruction with a fluent language speaker for an 8-month long period. Upon completion of a language course or one on-one instruction, students must submit a copy of a transcript or letter from a language instructor to the program assistant clearly stating the course taken, the length of the course, the level of language learned, and the letter grade provided to the student. This transcript or letter can come from an Indigenous community outside of Canada. It will be at the discretion of the Director of Studies or the

Program Director to approve the letter in cases where a family member of the student has been the language instructor.

PHD.MTSC - Materials Science - PhD

Overview

Academic Level
Graduate

Credential
Doctor of Philosophy

Description
The Materials Science Graduate Program is offered jointly by Trent University and Ontario Tech University and leads to the degree of PhD in Materials Science. Materials Science is a broad multi-disciplinary area of science; its goal is the understanding, prediction, and application of the properties of matter. This requires the development of experimental and theoretical predictive tools applicable to size scales ranging from the molecular to the macroscopic levels. The field lies at the intersection of physics and chemistry, and includes many sub-fields, including nanotechnology, electronic materials, surface science, biomaterials, and materials characterization. The program provides both a broad and integrated overview of materials science and the opportunity for in-depth study of a particular problem emphasizing either theory or experiment, under the guidance of a thesis advisor and a multi-disciplinary team of faculty from Trent University and Ontario Tech University. The program comprises coursework and a thesis.

TRENT UNIVERSITY

MATERIALS SCIENCE MSC/PHD

Requirements

Doctor of Philosophy in Materials Science

Complete the following requirements:

- Thesis Project
- Successfully complete oral qualifying examination: MTSC 7000H
- Thesis

- Successful completion of thesis oral defence
- 2x (0.5 elective credits)* in addition to the above, one of which must be MTSC-6000H if MSc not completed at Trent University

*Unless approved, elective credits must be taken from MTSC graduate course list

Program Regulations

The general regulations and requirements of Trent University for graduate degrees apply to the PhD in Materials Science. The normal requirement for admission is an average of at least B+ (77%, GPA 3.3). The Graduate Programs Selection Committee will begin the selection process in the weeks following the application submission. The Materials Science Program has 3 intakes: September, January and May of each year.

a) Each student must complete at least two one-term courses at the graduate level with at least a 70% final grade in each course.

b) The student must meet with his/her supervisory committee within the first six months of registration and subsequently at least once every twelve months. The committee consists of the student's supervisor and at least two other faculty members in the program; each supervisory committee must include at least one faculty member from each institution.

c) Each student must successfully complete an oral qualifying examination, normally at the beginning of their second year of study. This exam includes a written research proposal of approximately 10 pages describing the research to be undertaken, related previous literature and the primary techniques used in the research. The student will present their proposal to their supervising committee.

d) An acceptable thesis on a research topic must be submitted. Detailed specifications of the format of the thesis are available from the School of Graduate Studies. Acceptance of the thesis requires the approval of an Examining Committee following an oral defence of the thesis. The Examining Committee for a Trent student normally consists of at least three faculty members: an external examiner, one supervisory committee member from Ontario Tech, and the supervisor.

TRANSFERRING FROM THE MSC PROGRAM TO THE PHD PROGRAM

Materials Science MSc students may transfer directly to the PhD program after completing one academic year and their first progress report in the MSc program if the following conditions are met:

1. Completion of at least three courses in the master's program with at least an A- (80%) average
2. Strong evidence of research ability as identified by the supervisory committee

For students who transfer, the minimum number of courses taken during their graduate work in the two programs must be five one-term courses (3 in MSc and 2 in PhD). Details on the transfer process are available from the program office.

PHD.PSYC - Psychology - PhD

Overview

Academic Level
Graduate

Credential
Doctor of Philosophy

Description
The PhD in Psychology is a 4-year program leading to a Doctor of Philosophy (PhD). The aim of the PhD program is to train and equip students with the knowledge, skills, and experiences to carry out advanced research in Psychology and to become independent producers of original scholarly research. The PhD program offers prospective students with the opportunity to focus their program of study along three distinct areas of research: Behavioural and Cognitive Neuroscience, Development Psychology, and Social, Health, and Personality Psychology. Students will have the opportunity to gain breadth in their knowledge base and skill set as scholars in Psychology by completing advanced specialization courses and research opportunities. With this degree, PhD graduates will have the knowledge and training to prepare them for traditional positions within academia (University) or to pursue non-academic career paths, where in-depth research training is required.

The Behavioural and Cognitive Neuroscience stream is intended for candidates who wish to focus primarily on basic research and theoretical issues related to the analysis of neurobiological and psychological processes that govern behaviour in humans or non-human species, and include topics of investigations involving the connection between action and perception, language comprehension, visual cognition, focused attention, neural mechanisms of memory formation and learning, the ethics of cognitive enhancement, and the molecular/cellular foundations of stress biology and neuropsychiatric disorders.

The Developmental Psychology stream is concerned with training candidates in the theoretical and research foundations involved with the study of psychological change across the lifespan and includes areas of research such as the acquisition of cognition, language, social cognition, atypical development, attachment relationships, community and family dynamics, culture and development, and identity formation and sexuality.

The Social, Health, and Personality Psychology stream is concerned with psychological, social and behavioural factors that impact overall health and well-being, and include areas of focus in emotional intelligence, community and family dynamics, attachment relationships, human sexuality, self-regulation, personality, psychopathology and mental health, determinants of health within LGBTQ+ communities, and promoting stress coping/resilience.

TRENT UNIVERSITY
PSYCHOLOGY PHD

Requirements

Doctor of Philosophy in Psychology.

The minimum requirements for the PhD degree in Psychology includes 5.0 credits.

The specific requirements are completion of:

Year 1

- 0.5 credit from: PSYC 6801H: Research Seminar I
- 0.5 credit from Foundations course I: PSYC 6610H, PSYC 6620H, or PSYC 6630H
- 0.5 credit from Foundations course II*: PSYC 6610H, 6620H, or PSYC 6630H

*Students that enter the PhD program having already completed one of the program's Foundations courses may have this requirement removed at the discretion of the Program Director.

Year 2

- 0.5 credit from: PSYC 6802H: Research Seminar II
- 0.5 elective credit
- 1.0 credits from: PSYC 6100Y: Comprehensive Exam

A minimum of 0.5 elective credits from the Special Topics or Directed Reading must be related to the student's research and subject area. Electives may be selected from courses from other cognate departments, but these must be approved by the Program Director.

Year 3

- 0.5 credit in Experiential Skills Practicum. Choose from: PSYC 6994H: Practicum course in University level Teaching in Psychology or PSYC 6993H: Research Practicum

Year 4

- 1.0 credits: PSYC 6200Y: PhD Dissertation

In addition to these requirements, all students must submit a thesis proposal within the first year of their studies and write and orally defend a thesis by the end of their fourth year of studies. Students are expected to attend all departmental events, research area talks, and colloquia.

Course registration must be approved by the student's supervisor and Graduate Program Director.

Beyond the required courses, the supervisor and advisory committee may request the completion of additional courses in order to ensure adequate background and preparation of the student to complete the PhD degree. All courses are typically completed by the end of the 2nd year of the PhD program.

Program Regulations

Admissions

Applicants to the PhD program will normally have completed an MSc or MA or equivalent degree in Psychology (or related field) with a minimum A- (80%) average on Master's degree course work. Applicants must have completed at least 1 credit in Statistics or Experimental Design at the graduate level. Also, applicants must have a demonstrated aptitude for theoretical inquiry, as well as excellent writing skills, and an area of intellectual and research interest consistent with the emphasis and aims of the program.

Students are normally admitted into the PhD Program once a year for studies beginning in September. The Psychology Graduate Program Committee will begin the selection process immediately following the application submission date of February 1. Applications received after this date will be considered if unfilled spaces remain.

Failed Courses

Students must attain at least a B- (70%) in all course work to remain registered in their program. A final grade standing at less than a B- will be assigned a grade of F and will preclude continuation in the Psychology Graduate Program. For further details, see Failed Course Policy.

SPEC.ACCT - Accounting - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Accounting is open to students in the BBA program or the joint-major BA/BSc program in Business Administration.

Accounting is an essential language and a key management system for all types of businesses, and the Specialization in Accounting is designed to allow Business Administration students to study accounting in some depth. Students who wish to pursue the CPA Ontario designation are strongly recommended to consult directly with CPA Ontario to learn more about the required courses and the processes for admission to the profession.

Students who have fulfilled the requirements for a Bachelor of Business Administration or a joint-major Honours degree in Business Administration may graduate with a Specialization in Accounting if they have successfully completed the following 5.5 credits with a minimum grade of 65% in each and an overall average of at least 70% in courses for the Specialization:

- 3.0 ADMN credits consisting of ADMN 1221H, 2221H, 3121H, 3200H, 3221H, and 3321H
- 2.5 ADMN credits from ADMN 1620H, 3250H, 3700H, 3710H, 4300H, 4301H, 4302H, 4303H, 4610H, or 4710H

SPEC.AFRC - African Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in African Studies is open to students in the Honours program in Global Development Studies.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Global Development Studies may graduate with a Specialization in African Studies if they have also successfully completed the following credits from area studies and the Ghana Year Abroad program:

- 5.0 credits from GDST 2401H, 2402H, 3010Y, 3401H, 3402H, 3770Y, 3781Y, 3790Y, 3800D, or HIST 4410Y

Note: No more than 1.0 credit from HIST-GDST 2401H, 2402H, 3401H, or 3402H may satisfy the Category B requirement for the Honours program in Global Development Studies.

SPEC.APIK - Applied Indigenous Knowledge - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Applied Indigenous Knowledge is open to students in the Indigenous Studies and Indigenous Environmental Studies/Science degree programs.

Students who have fulfilled the requirements for a single- or joint-major degree in Indigenous Studies or Indigenous Environmental Studies/Sciences may graduate with a Specialization in Applied Indigenous Knowledge if they have successfully completed the following 4.5 credits:

- 2.5 INDG credits consisting of INDG 2100Y, 2601Y, and 3508H
- 0.5 INDG credit from INDG 3635H or 4500H
- 1.0 INDG credit from INDG 2250Y or 2800Y
- 0.5 INDG credit from INDG 3745H, 3851H, or 4180H

SPEC.BCOG - Behavioural and Cognitive Neuroscience - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description

The Specialization in Behavioural and Cognitive Neuroscience is open to students in the single- and joint-major Honours degree programs in Psychology and is intended for students interested in pursuing future post-graduate work in the areas of cognitive psychology and behavioural neuroscience. This specialization provides students with a strong foundation in the concepts and methods necessary for understanding the structural and functional aspects of the brain and brain dysfunction.

Students who have fulfilled the requirements for an Honours degree in Psychology may graduate with a Specialization in Behavioural and Cognitive Neuroscience if they have successfully completed the following 4.0 credits:

- 1.5 PSYC credits consisting of PSYC 2200H, 2400H, and 3220H
- 2.0 PSYC credits from PSYC 2210H, 2600H, 3210H, 3230H, 3240H, 3430H, 3451H, 3460H, or a practicum course (PSYC 3801H or 3802H) that focuses on cognitive or behavioural neuroscience
- 0.5 PSYC credit from PSYC 4225H, 4410H, 4625H, 4840H, or a practicum course (PSYC 4801H or 4802H) that focuses on cognitive or behavioural neuroscience

SPEC.BCOMM - Business Communication - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description

The Specialization in Business Communication is open to students in the Honours program in Communications.

This specialization develops the ability to effectively communicate ideas and messages across organizations and through multiple channels. Learn how to tailor your writing to your target audience, create strategies to effectively share ideas, and master the latest communications tools by specializing in this essential business skill.

Students who have fulfilled the requirements for an Honours degree in Communications may graduate with a Specialization in Business Communication if they have successfully completed the following 4.0 credits:

- 2.0 COMM credits consisting of COMM 1001H, 2002H, 3003H, and 4001H
- 2.0 ADMN credits from ADMN 2080H, 2100H, 2410H, 3150H, or 4160H

SPEC.BIAN - Biological Anthropology - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Biological Anthropology is open to students in the Anthropology or Archaeology degree programs.

Students who have fulfilled the requirements for a single- or joint-major Bachelor of Arts or Bachelor of Science degree in Anthropology or Archaeology may graduate with a Specialization in Biological Anthropology if they have successfully completed the following 4.0 credits:

- 0.5 ANTH credit consisting of ANTH 2410H
- 2.5 ANTH credits from ANTH 2450H, 2470H, 2490H, 3404H, 3405H, 3460H, 3540H, 4420H, 4430H, 4450H, or 4460H
- 1.0 additional ANTH credit from the list above and/or from ANTH 3160H, 3333H, 4512H, 4770H, or 4932H

SPEC.BIAR - Bioarchaeology - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Bioarchaeology is open to students in the Anthropology or Archaeology degree programs.

Students who have fulfilled the requirements for a single- or joint-major Bachelor of Arts or Bachelor of Science degree in Archaeology or Anthropology may graduate with a Specialization in Bioarchaeology if they have successfully completed the following 4.0 credits:

- 2.0 ANTH credits consisting of ANTH 2410H, 3404H, 3405H, and 4430H
- 2.0 ANTH credits from ANTH 2123H, 2150H, 3151H, 3153H, 3460H, 3540H, 3731H, 4153H, 4163H, 4420H, or 4500H

SPEC.BLK - Black Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Black Studies is open to students in the Honours program in Sociology, and is available at Trent's Durham GTA campus only.

This specialization will enable students to explore the complex histories and enduring presence of Black communities in Canada, the Americas, and beyond. Students will delve into the struggles and triumphs of African Canadians and other African peoples as they challenge and dismantle various structural and institutional barriers. Through courses in Black Studies, students will gain critical insights into the impactful contributions Black communities have made to shape and humanize Canada—and the world. They will engage with thought-provoking content such as Black political cultures of resistance, Black futurism, racial profiling, environmental racism, Black-Indigenous solidarity, police violence, housing precarity and unemployment, sharpening their theoretical understanding and practical skills. This will empower them to drive meaningful change within Black communities.

In their final year, students will have the opportunity to apply the theories and foundational knowledge gained to explore community-centred solutions aimed at dismantling anti-Black racism and enhancing the health and well-being of Black populations through SOCI 4410H and SOCI 4850H, which can include an assessment component that is a community engagement activity (attendance at or creation of workshop content, attendance at a community event, or organizing a community/activists/community based event).

The specialization will equip students with the knowledge and skills to pursue diverse career paths, including social services, public policy, business, law, international affairs, social work, medicine, and the arts.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Sociology may graduate with a Specialization in Black Studies if they have successfully completed the following 4.0 credits:

- 1.5 SOCI credits consisting of SOCI 1003H, 2002H, and 3002H
- 2.5 credits from SOCI 2003H, 2220H, 2340H, 3052H/4052H, 3601H, 3615H, 3661H, 3860H, 4410H, 4850H, ENGL-GESO 4351H, GESO-CUST-MDST 2210H, or with prior approval from the department, reading courses (SOCI 3900Y, 3901H, 3902H, 4900Y, 4901H, 4902H), community-based research courses (SOCI 3570Y, 3580H, 4570Y, 4580H), research practica (SOCI 4021Y, 4022H, 4023H), or thesis courses (SOCI 4010Y or 4020D) focused on race, ethnicity, equity, or social justice content

Requirements

No Requirements

SPEC.CBIO - Conservation Biology - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Conservation Biology is open to students in the Honours program in Biology.

The specialization is designed to provide students with theoretical and practical training in the conservation of living organisms. It capitalizes, in part, on the expertise and activities of collaborating regional, provincial, or national agencies such as the Ministry of Natural Resources, the Toronto Zoo, regional Conservation Authorities, the Royal Ontario Museum, or Environment and Climate Change Canada. A distinctive feature of the Specialization is the opportunity for a placement with a collaborating agency.

Note: Students must apply to enrol in BIOL 4400Y: Placement in Conservation Biology in the academic year before enrolment in the course. Application forms may be obtained from the department website. Enrolment is limited and competitive.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Biology may graduate with a Specialization in Conservation Biology if they have successfully completed the following 5.5 credits:

- 1.5 BIOL credits consisting of BIOL 3380H, 3391H, and 3600H
- 1.0 BIOL credit from BIOL 4400Y (must apply by April in year prior to enrolment) or 4890Y
- 3.0 credits from the following:
    - BIOL-ERSC-SAFS 2350H
    - BIOL 3050H
    - BIOL 3051H
    - BIOL 3080H
    - BIOL 3090H
    - BIOL 3120H (4110H)
    - BIOL 3140H
    - BIOL 3170H
    - BIOL 3180H
    - BIOL 3190H
    - BIOL 3200H
    - BIOL 3340H
    - BIOL-PSYC 3360H
    - BIOL 3830H
    - BIOL 3840H
    - BIOL 3850H, 3851H, 3852H, 3853H
    - BIOL 3901H**
    - BIOL 3902H**
    - BIOL 4010Y/4020D**
    - BIOL-ERSC 4030H
    - BIOL 4140H
    - BIOL 4150H
    - BIOL 4180H
    - BIOL-ERSC 4330H
    - BIOL 4340H
    - BIOL 4410H
    - BIOL 4500H
    - BIOL-FRSC 4510H
    - BIOL 4520H
    - BIOL 4550H
    - BIOL 4610H
    - BIOL 4830H
    - BIOL 4900Y**
    - ERSC-GEOG 3010H
    - ERSC-GEOG 3020H
    - ERSC 3160H
    - ERSC 3200Y
    - ERSC-BIOL 3260H
    - ERSC 3510H
    - ERSC-GEOG-SAFS 3650H
    - ERSC-BIOL 4240H
    - ERSC 4520H
    - ERSC-GEOG 4640H
    - ERSC/ERST 4801H
    - ERSC/ERST 4802H

- ERST-POST 2100H
- ERST 3110H
- ERST-CAST-FRSC-POST 3120H
- ERST-PHIL 3301H
- ERST-PHIL-SAFS 3302H
- ERST-CAST-HIST 4670H

**Thesis/directed research project must be conservation related. Approval must be obtained from the specialization coordinator for thesis/directed research credit(s) to be included within this list.

SPEC.CLIM - Climate Change - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Climate Change is open to students in the Environmental & Resource Science/Studies (BA, BSc, BESS) or Geography (BA, BSc) degree programs.

The specialization offers a career-focused stream for students interested in both the scientific and policy aspects of climate change.

Students who have fulfilled the requirements for a single- or joint-major degree in Environmental & Resource Studies (Bachelor of Arts), Environmental & Resource Science (Bachelor of Science), Geography (Bachelor of Arts or Bachelor of Science), or a Bachelor of Environmental Science/Studies degree may graduate with a Specialization in Climate Change if they have successfully completed the following 4.0 credits:

- 0.5 ERSC-GEOG credit consisting of ERSC-CLIM-GEOG 1060H
- 3.0 ERSC/T or GEOG credits from ERSC-GEOG 2180H, ERSC 2300H, ERSC-GEOG 2401H, 2320H, ERST 3501H,

  3502H, 3590H, ERST-GEOG 4140H, GEOG 2460H, 3440H, or 3470H
- 0.5 ERSC/T credit from ERSC 3810H, 2100H, 3551H, 4330H, or ERST 4610H

SPEC.COSC - Theoretical Computer Science - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Theoretical Computer Science is open to students in the Honours program in Computer Science (single-major only).

The theoretical computer scientist studies and develops software systems which interface most closely with the underlying hardware. These systems are grounded in both mathematical and non-mathematical paradigms such as object-orientation, relations, and complexity theory. Because the theoretical computer scientist bridges the gap between software and hardware systems, he or she develops applications which exploit the speed and power of digital computation, designing new models of computation and new methods of problem-solving. The Specialization in Theoretical Computer Science fully prepares students to pursue graduate studies in computer science.

Students who have fulfilled the requirements for a single-major Honours degree in Computer Science may graduate with a Specialization in Theoretical Computer Science if they have successfully completed the following 8.0 credits:

- 3.0 COIS credits consisting of COIS 2320H, 3030H, 3050H, 3320H, 4050H, and 4100H
- 1.0 credit from ADMN
- 1.0 arts credit from AGRS, CAST, CUST, ENGL, FREN, GESO, HIST, PHIL, or SPAN
- 1.0 science credit from BIOL, CHEM, ERSC, FRSC, GEOG, or PHYS
- 2.0 additional credits outside of COIS and MATH

SPEC.CRIMS - Socio-Legal Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Socio-Legal Studies is open to Honours students in Sociology who are interested in a career related to social justice, restorative justice, and the critical research in law and society. The specialization provides students with course options for theoretical and methodological approaches to sociological study of criminalization, victimization, and punishment.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Sociology may graduate with a Specialization in Socio-Legal Studies if they have also successfully completed the following 4.0 credits:

- 2.5 SOCI credits consisting of SOCI 2220H, 2610H, 2615H, 4110H, and 4270H
- 1.5 SOCI credits from:
    - SOCI 2005H, 3250H, 3601H, 3740H, 3962H, 3966H, 4750H
    - Or with prior approval of the department, reading courses (SOCI 3900Y, 3901H, 3902H, 4900Y, 4901H, 4902H), community-based research courses (SOCI 3570Y, 3580H, 4570Y, 4580H), research practica (SOCI 4021Y, 4022H, 4023H), SOCI 4430H, or thesis courses (SOCI 4010Y or 4020D) that are primarily focused on socio-legal content

SPEC.CRIT - Critical Race Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Critical Race Studies is open to students in the Gender & Social Justice degree program.

The specialization provides students with expertise in theories of race and racialization as intimately linked to questions of equity, inclusion, and social justice. Courses emphasize the foundational implications of race and racialization in shaping historical, contemporary, and socio-political conditions through an interdisciplinary, transnational framework.

Students who have fulfilled the requirements for a single- or joint-major Honours or General degree in Gender & Social Justice may graduate with a Specialization in Critical Race Studies if they have successfully completed the following 4.0 credits:

- 4.0 credits from GESO 2210H, 2487H, 3052H/4052H, 3122H/4122H, 3151H, 3860H, 4351H, CAST-POST-SOCI 2003H, 3661H, ENGL 3604Y/3605H, INDG-CAST-POST 2002H, INDG-CAST 4050H, 4051H, or POST 4341H

SPEC.CRIT - Criticism & Theory - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Criticism & Theory is open to students in the Cultural Studies degree program.

Interdisciplinary, multimedia courses in social and cultural criticism and theory that focus on engagements with complex, contemporary themes, such as gender and sexuality, the modern body, ideology, globalization, technology, the senses, psychoanalysis, ethics, and the law. Includes courses that provide theoretical introductions to the different fields of study offered by the Department of Cultural Studies.

Students who have fulfilled the requirements for a single- or joint-major Honours or General degree in Cultural Studies may graduate with a Specialization in Criticism & Theory if they have successfully completed 4.0 CUST credits from the following:

- CUST 1500H
- CUST 2035Y
- CUST 2516H
- CUST 2535H
- CUST 2545H
- CUST 2550H
- CUST 2560H
- CUST 2572H
- CUST 2805H
- CUST 3087Y
- CUST 3112H
- CUST 3250H
- CUST 3529H
- CUST 3530H
- CUST 3531H
- CUST 3532H
- CUST 3545H
- CUST 3547H
- CUST 3550H
- CUST 3571H
- CUST 3590H
- CUST 3601H
- CUST 3900Y/3901H/3092H
- CUST 4010Y/4020D
- CUST 4041Y/4541H
- CUST 4241H
- CUST 4250H
- CUST 4515H
- CUST 4529H
- CUST 4535H
- CUST 4538H
- CUST 4550H
- CUST 4552H
- CUST 4558H
- CUST 4565H
- CUST 4580H
- CUST 4586H
- CUST 4900Y/4901H/4902H

SPEC.DATA - Data Analytics - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Data Analytics is open to students in the Honours program in Computer Science (single-major only).

Today, there is a clear trend away from single-core processors, even in contemporary desktop machines, and toward the analysis of large datasets in the realm of Big Data Science. The efficient analysis of large scientific and retail datasets will require a generation of programmers, analysts, and developers who are familiar with techniques suitable for the analysis of Big Data. The Specialization in Data Analytics provides a solid foundation in those techniques, including parallel programming, visualization, and predictive modelling.

Students who have fulfilled the requirements for a single-major Honours degree in Computer Science may graduate with a Specialization in Data Analytics if they have successfully completed the following 4.0 credits:

- 4.0 COIS credits consisting of COIS 1400H, 3030H, 3510H, 3560H, 4350H, 4400H, 4470H, and 4550H

Requirements

No Requirements

SPEC.ECON - Economics - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Economics is open to students in the BBA program or the joint-major BA/BSc program in Business Administration.

Students who have fulfilled the requirements for a Bachelor of Business Administration or a joint-major Honours degree in Business Administration may graduate with a Specialization in Economics if they have successfully completed the following 5.5 credits with a minimum grade of 65% in each:

- 0.5 ADMN credit consisting of ADMN 3700H
- 3.0 ECON credits consisting of ECON 1010H, 1020H, 1250H, 2000H, 2010H, and 2200H
- 1.0 ECON credit from ECON 3020H, 3022H, 3110H, or 3120H
- 0.5 credit from ADMN 3610H or 0.5 ECON credit in addition to the above
- 0.5 credit from ADMN 4870H or 0.5 ECON credit in addition to the above

Note: Students may choose to complete only one of the Specialization in Economics or the minor in Economics.

SPEC.ENAR - Environmental Archaeology - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Environmental Archaeology is open to students in the Anthropology or Archaeology degree programs.

Students who have fulfilled the requirements for a single- or joint-major Bachelor of Arts or Bachelor of Science degree in Archaeology or Anthropology may graduate with a Specialization in Environmental Archaeology if they have successfully completed the following 4.0 credits:

- 0.5 ANTH credit consisting of ANTH 3680H
- 3.5 ANTH credits from ANTH 2150H, 3001H, 3153H, 3165H, 3175H, 3185H, 3550H, 3650H, 3731H, 4153H, 4163H, 4180H, 4185H, or 4350H

SPEC.ENTR - Entrepreneurship - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Entrepreneurship is open to students in the BBA program or the joint-major BA/BSc program in Business Administration.

Students who have fulfilled the requirements for a Bachelor of Business Administration or a joint-major Honours degree in Business Administration may graduate with a Specialization in Entrepreneurship if they have successfully completed the following 4.5 credits with a minimum grade of 65% in each:

- 3.0 ADMN credits consisting of ADMN 2080H, 3420H, 3430H, 3441H, 3460H, and 3750H
- 0.5 ADMN credit from ADMN 3150H or 3170H
- 1.0 ADMN credit from ADMN 3550H, 3560H, 3610H, 4420H, 4430H, 4450H*, or 4870H

*Note: ADMN 4450H may not simultaneously count toward the requirements for the major (the BBA Honours program) and the Specialization in Entrepreneurship.

SPEC.ETHS - Ethics - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Ethics is open to students in the Philosophy degree program.

Students who have fulfilled the requirements for a single- or joint-major Honours or General program in Philosophy may graduate with a Specialization in Ethics if they have successfully completed the following 5.0 credits:

- 0.5 PHIL credit from PHIL 3110H or with prior approval of the department, a reading course (PHIL 4901H) that focuses on Ethical Theory
- 4.5 PHIL credits from:
    - PHIL 1100H
    - PHIL 2010H
    - PHIL 2020H
    - PHIL 2030H
    - PHIL 2110H
    - PHIL 2150H
    - PHIL 2161H
    - PHIL 2210H
    - PHIL 2320H
    - PHIL 2390H
    - PHIL 3025H
    - PHIL 3030H
    - PHIL 3050H
    - PHIL 3140H
    - PHIL 3180H
    - PHIL 3190H
    - PHIL 3270H
    - PHIL 3301H
    - PHIL 3302H
    - PHIL 3303H
    - PHIL 3360H
    - PHIL 3370H
    - PHIL 4250H
    - PHIL 4260H
    - PHIL 4270H
    - PHIL 4310H
    - PHIL 4332H
    - PHIL 4390H

SPEC.ETSU - Ethics & Sustainability - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Ethics & Sustainability is open to students in the BBA program or the joint-major BA/BSc program in Business Administration.

Students who have fulfilled the requirements for a Bachelor of Business Administration or a joint-major Honours degree in Business Administration may graduate a Specialization in Ethics & Sustainability if they have successfully completed the following 4.0 credits with a minimum grade of 65% in each:

- 0.5 ADMN credit consisting of ADMN 3300H
- 1.0 ADMN credit from ADMN 4250H, 4260H, or 4450H
- 1.0 credit from PHIL 1100H, PHIL 2110H, PHIL 2390H, PHIL 3110H, PHIL-POST 3140H, PHIL-POST 3180H, ERST-PHIL 3301H*, ERST-PHIL 3302H*, PHIL-COIS-MDST 3370H, or PHIL 4310H
- 1.0 credit from ERST-POST 2100H, ERST-CAST-POST 3120H, ERSC 3160H, ERST 3250H, ERST-PHIL 3301H*, ERST-PHIL 3302H*, ERST-GEOG 4140H, ERSC/ERST 4801H, HIST-ERST 3756H, or INDG-ERSC 4730Y
- 0.5 additional credit from the courses listed above

*may only count toward one list

Notes

- With the permission of the specialization coordinator, students may substitute 0.5 credit not on the above lists provided the course has significant content on ethics and/or sustainability.
- The same course may not simultaneously satisfy the requirements of the Specialization in Ethics & Sustainability and the Option in Applied Ethics.

SPEC.FARM - Small-Scale Farming - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Small-Scale Farming provides students in the Sustainable Agriculture & Food Systems program with a comprehensive background and hands-on experience in growing food.

Students who have fulfilled the requirements for a single- or joint-major Bachelor of Arts or Bachelor of Science degree in Sustainable Agriculture & Food Systems may graduate with a Specialization in Small-Scale Farming if they have successfully completed the following 5.0 credits:

- 5.0 SAFS credits consisting of SAFS 2350H, 2800H, 3801H, 3341H, 3530H, 4003D, and 4101H

SPEC.FEMS - Feminist Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Feminist Studies is open to students in the Gender & Social Justice degree program. It provides a pathway through the program and allows students to deepen their understanding of intersectional feminism, while signaling their expertise in this area as they advance in their academic studies or move into advocacy work or related careers.

Students who have fulfilled the requirements for single- or joint-major degree in Gender & Social Justice may graduate with a Specialization Feminist Studies if they have successfully completed the following 4.0 credits:

- 2.0 GESO credits consisting of GESO 2141H, 2487H, 3250H/4250H, and 3400H
- 2.0 GESO credits from GESO 2151H, 2251H, 2711H, 3050H, 3141H, 3162H, 3431H/4431H, 3506Y/3507H, 3609H, 3671H, 3672H, 3700Y/3701H, 3709H, 3796H/4796H, 3860H, 3932H/4932H, 3965H, or 4995Y

SPEC.FINA - Finance - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Finance is open to students in the Honours BBA program or the joint-major BA/BSc program in Business Administration.

Students who have fulfilled the requirements for a Bachelor of Business Administration or a joint-major Honours degree in Business Administration may graduate with a Specialization in Finance if they have successfully completed the following 5.5 credits with a minimum grade of 65% in each and an overall average of at least 70% in courses for the Specialization:

- 2.5 ADMN credits consisting of ADMN 3200H, 3700H, 4300H, 4700H, and 4720H
- 1.0 ECON credit consisting of ECON 2000H and 3020H
- 0.5 ADMN or ECON credit from ADMN 3610H or ECON 3200H
- 0.5 MATH credit from MATH 1005H, 1110H, 1111H, 1350H, or 1550H
- 1.0 credit in addition to the above from ADMN-ECON 3110H, ADMN-ECON 3120H, ECON 3200H, ADMN 3250H, ADMN 3550H, ADMN 3610H, COIS 1400H, COIS 3510H, ECON 3000H, ECON 4200H, MATH 3510H, or MATH 4510H

Note: Students pursuing a Specialization in Finance are recommended to take ADMN 2610H.

SPEC.FLMM - Film & Media - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description

The Specialization in Film & Media has been discontinued. Students enrolled at Trent prior to May 1, 2026 may still complete the Specialization as described in the 2025-2026 Calendar. Consult the Chair of the Department of Culture, Arts, and Media for further information.

SPEC.FLNT - Film, Literature & Narrative - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description

The Specialization in Film, Literature & Narrative is open to students in the Cultural Studies program.

Courses in film, world literature, and other kinds of storytelling in different media contexts, such as theatre, oral narrative, graphic novels, social media and television. Discussions open up the relationships between cinema, narrative and culture, sometimes with a focus on historical contexts (such as modernism, postmodernism, surrealism), and sometimes as engagements with specific genres, such as world cinema, science fiction, historical fiction, utopian fiction, experimental fiction.

Students who have fulfilled the requirements for a single- or joint-major Honours or General degree in Cultural Studies may graduate with a Specialization in Film, Literature & Narrative if they have successfully completed 4.0 CUST credits from the following:

- CUST 1520H
- CUST 2525H
- CUST 2526H
- CUST 2529H
- CUST 2574H
- CUST 2581H
- CUST 2582H
- CUST 2650H
- CUST 2805H
- CUST 3087Y
- CUST 3128H
- CUST 3129H
- CUST 3176H
- CUST 3177H
- CUST 3184H
- CUST 3186H

- CUST 3465H
- CUST 3515H
- CUST 3524H
- CUST 3525H
- CUST 3526H
- CUST 3581H
- CUST 3582H
- CUST 3900Y/3901H/3092H
- CUST 4010Y/4020D
- CUST 4041Y/4541H
- CUST 4227H
- CUST 4228H
- CUST 4302H
- CUST 4512H
- CUST 4523H
- CUST 4526H
- CUST 4529H
- CUST 4586H
- CUST 4611H
- CUST 4900Y/4901H/4902H

SPEC.FREW - French Writing - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in French Writing is open to students in the French Studies program.

Students who have fulfilled the requirements for a degree in French Studies may graduate with a Specialization in French Writing if they have successfully completed the following 4.0 credits:

- 3.0 FREN credits from FREN 2051H, 3051H, 3052H, 3053H, 4053H, 4201H, 4251H, or any FREN reading course on a writing subject with permission of the chair
- 1.0 FREN credit at the 3000 level or beyond in addition to the above

Note: FREN 2151H and/or 2152H are prerequisites for most specialization courses. Students should check individual course descriptions for prerequisites.

SPEC.GIESC - Global Innovation, Entrepreneurship & Social Change - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description

The Specialization in Global Innovation, Entrepreneurship & Social Change is open to students in the Global Development Studies program, the BBA program or the joint-major BA/BSc program in Business Administration. It is designed for students in Business Administration or Global Development Studies with an interest in global social change. It equips students with the knowledge and skills to better navigate the global economy and to appreciate the promise and limitations of social entrepreneurship and innovation in the Global South. It also offers experiential learning opportunities in the Global South where an intensive summer field course is followed by a placement with an organization or firm.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Global Development Studies, a joint-major Honours degree in Business Administration, or a Bachelor of Business Administration may graduate with a Specialization in Global Innovation, Entrepreneurship, and Social Change if they have successfully completed the following 4.0 credits with a minimum grade of 65% in each:

- 1.0 ADMN-GDST credit consisting of ADMN-GDST 1030H and 2030H
- 3.0 credits from:
    - ADMN-GDST 3030H
    - ADMN-POST-ECON 3123H
    - ADMN-ECON 3110H
    - ADMN-ECON 3120H
    - ADMN-ECON-GDST 3310H
    - ADMN-ECON-GDST 3330H
    - ADMN 3420H
    - ADMN 3441H
    - GDST-POST 3220H
    - GDST-SOCI 4111H
    - POST 2232H
    - POST-ADMN-GDST-SOCI 4255H
    - Students in the BBA program or a joint-major program in Business Administration and a subject other than Global Development Studies may include any of GDST 1001H, 1002H, or 4100H

SPEC.GMRS - Global Migration & Refugee Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description

The Specialization in Global Migration and Refugee Studies is designed for students in Global Development Studies who wish to pursue a career and/or graduate studies in migration. The specialization provides an interdisciplinary understanding of cross-border population movements to address issues of the causes and effects of displacement and forced migration, migrant experiences, human rights work, governance, settlement, and citizenship. It also offers opportunities for experiential learning and international field research with courses designed to enable students to gain first-hand experience with migrant communities, community organizations, and NGOs.

Graduating students who have fulfilled the requirements for a single- or joint-major Honours degree in Global Development Studies may apply for a Specialization in Global Migration and Refugee Studies if they have successfully completed the following 4.0 credits:

- 0.5 GDST credit consisting of GDST 3150H
- 3.5 credits from GDST 3115H (3120H), 3121H, 3802D, 3850H, 4011Y/4021D, 4221Y, 4252H, 4750H, 4873H, CAST-GEOG-GESO-POST 2245H, SOCI 3661H, or SWRK 3108H

SPEC.GPIS - Global Politics & International Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Global Politics & International Studies is open to students in the Political Studies program.

Students who have fulfilled the requirements for the single- or joint-major Honours or General degree in Political Studies may graduate with a Specialization in Global Politics & International Studies if they have successfully completed the following 4.0 credits:

- 1.0 POST credit consisting of POST 1001H and 1002H
- 0.5 POST credit from POST 2231H or 2232H
- 2.5 POST credits from:
    - 2231H (if not counted above)
    - 2232H (if not counted above)
    - 2282H
    - 3030H
    - 3123H
    - 3161H
    - 3285H
    - 3290H
    - 3295H
    - 3420H
    - 3604H
    - 3850H
    - 4240Y
    - 4241H
    - 4252H
    - 4255H
    - 4258H
    - 4272H
    - 4873H
    - reading courses (POST 3900Y, 3901H, 3902H, 3903H, 4900Y, 4901H, 4902H, 4903H), research practicum courses (POST 4800Y, 4801H, 4802H), or thesis (POST 4020D) primarily focused on global politics and international studies

SPEC.GREK - Greek & Latin - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Greek & Latin is open to students in Ancient Greek & Roman Studies who wish to pursue an increased emphasis on the core languages of classical archaeology, history, and literature. Most graduate programs in these fields require such language training.

In most cases, achieving the Specialization in Greek & Latin in four years is only possible if the student takes courses in both Greek and Latin, starting at least one language in the first year. The availability of the Specialization in Greek and Latin, and of Greek and Latin courses beyond the 2000 level, is subject to program staffing conditions. Interested students should consult the program coordinator of Ancient Greek & Roman Studies as early as possible.

Students who have fulfilled the requirements for a single- or joint-major degree in Ancient Greek & Roman Studies may graduate with a Specialization in Greek & Latin if they have successfully completed 5.0 credits in GREK and LATN.

SPEC.HLST - Health Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Health Studies is open to single- and joint-major Honours students in Sociology who are interested in a career related to medical sociology, health care systems, or critical research in health and illness. The specialization provides students with course options designed for in-depth examination of theoretical and methodological approaches to health-related topics.

This specialization offers students several courses throughout their degree program that focus on conceptualizations of health, illness, and disease, social determinants of health, medical sociology, the intersections of gender, race, and health, and review and critique of the social organization of health care. In their final year, students may explore such topics as health policy and health activism, with opportunities for research practica, community-based research courses, and thesis courses with faculty members.

Students who have fulfilled the requirements for an Honours degree in Sociology may graduate with a Specialization in Health Studies if they have successfully completed the following 4.0 credits:

- 1.0 SOCI credit consisting of SOCI 2630H and 3631H
- 3.0 SOCI credits from:
    - SOCI 2015H, 2220H, 2500H, 2601H, 3250H, 3341H, 3420H, 3440H, 3630H, 4050H, 4410H, 4420H, 4510H, 4512H, 4551H, 4620H, 4850H
    - Or with prior approval of the department, reading courses (SOCI 3900Y, 3901H, 3902H, 4900Y, 4901H, 4902H), community-based research courses (SOCI 3570Y, 3580H, 4570Y, 4580H), research practica (SOCI 4021Y, 4022H, 4023H), or thesis courses (SOCI 4010Y or 4020D) that are primarily health-focused in content

SPEC.HLTH - Health Sciences - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Health Sciences is open to students in the Honours programs in Biology or Biochemistry & Molecular Biology and is intended for students who are interested in a career related to health care or research. The course-based Specialization gives students training in both the practical and theoretical aspects of a diversity of medically related topics.

Notes

- Many medical schools require General Biology, General Chemistry, Physics, and a Humanities or Social Sciences course for admission. Students should consult each school for specific requirements.
- Students intending to pursue graduate studies are strongly encouraged to take a research thesis course (BIOL 4010Y or 4020D).

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Biology or Honours degree in Biochemistry & Molecular Biology may graduate with a Specialization in Health Sciences if they have successfully completed the following 9.0 credits with a minimum 75% average (calculated using all courses for the Specialization):

- 3.0 BIOL credits consisting of BIOL 1020H, 1030H, 2050H, 2070H, 3111H, and 3080H
- 1.0 CHEM credit consisting of CHEM 1000H and 1010H
- 0.5 BIOL credit from BIOL 3830H or 3840H
- 4.5 credits in addition to the above from the following:
    - BIOL 3040H
    - BIOL 3120H
    - BIOL-PSYC 3210H
    - BIOL 3250H
    - BIOL 3640H
    - BIOL 3660H
    - BIOL 3830H

**Thesis/directed research project must be health related. Approval must be obtained from the specialization coordinator for thesis/directed research credit(s) to be included within this list.

SPEC.HRAD - Gender, Law & Human Rights Advocacy - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description

Specialization in Gender, Law, and Human Rights Advocacy is designed for students in Gender & Social Justice or Human Rights & Global Justice who are interested in the intersections of gender and human rights. It provides a foundation in human rights legal and institutional frameworks, feminist methodologies, and advocacy strategies for addressing gender-based violence, discrimination, care labour, and economic inequality. Gender & Social Justice students will explore how human rights law shapes gender justice, while Human Rights & Global Justice students will engage with feminist perspectives on law, policy, and social change. Students choosing to participate in the Trent in Bolivia study abroad program will also gain experiential learning opportunities in the Global South.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Gender & Social Justice or Human Rights & Global Justice may graduate with a Specialization in Gender, Law, and Human Rights Advocacy if they have successfully completed the following 4.0 credits*:

- 1.5 GESO credits consisting of GESO 1001H, 3151H, and 3962H
- 1.0 HURI credit consisting of HURI 1002H and 3121H
- 1.0 HURI-GESO credit consisting of HURI-GESO 2251H and 3881H
- 0.5 GESO credit from GESO 2487H, 3122H/4122H, 3150H/4150H, 3965H, or 3966H

*With approval of the program coordinator, students participating in the Trent in Bolivia study abroad program may substitute GDST 3760Y for 1.0 credit of the total 4.0 credits above.

Requirements

No Requirements

SPEC.HRM - Human Resource Management - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description

The Specialization in Human Resource Management is open to students in the BBA program or the joint-major BA/BSc program in Business Administration.

Upon successful completion of the 5.5 credits associated with the Specialization in Human Resource Management, students will have satisfied the nine subject areas required for the "Certified Human Resources Professional Designation (CHRP)" and be eligible to write the CHRP Knowledge Exam (CHRP-KE). Students must achieve a cumulative average of 70% in all courses, with no individual course mark less than 65%. In order to take the exam, a student must be an enrolled member of the Human Resources Professionals Association (HRPA) of Ontario, which involves a monetary fee to the Association.

Students who have fulfilled the requirements for a Bachelor of Business Administration or a joint-major Honours degree in Business Administration may graduate with a Specialization in Human Resource Management if they have successfully completed the following 5.5 credits with a minimum grade of 65% in each and an overall average of at least 70% in courses for the Specialization:

- 5.5 ADMN credits consisting of ADMN 1221H, 2220H, 2221H, 2230H, 3220H, 3230H, 3260H, 3270H, 3280H, 3290H, and 3500H

Note: Students pursuing a Specialization in Human Resource Management are recommended to take both COIS 1010H and COIS 1620H as electives as part of their degree.

SPEC.HWEL - Health & Well-Being - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Health and Well-Being is open to students in the single- and joint-major Honours degree programs in Psychology and is intended for students interested in pursuing a career related to mental and/or physical health and well-being (e.g., in health care, rehabilitation, psychotherapy, graduate work with a specialization in health psychology, behavioural medicine, or clinical psychology). This specialization provides students with course choices covering the theoretical and empirical foundations needed to understand the motivational, emotional, cognitive, and behavioural underpinnings of health and well-being, as well as empirically-supported psychological interventions based upon them.

Students who have fulfilled the requirements for an Honours degree in Psychology may graduate with a Specialization in Health & Well-Being if they have successfully completed the following 4.5 credits:

- 3.0 PSYC credits consisting of PSYC 2300H, 2400H, 2600H, 3420H, 3610H, and 3750H
- 0.5 PSYC credit from PSYC 2200H or 2700H
- 1.0 PSYC credit from PSYC 3220H, 3300H, 3760H, 3770H, 3780H, 4310H, 4560H, 4740H, 4860H, 4861H, reading courses (PSYC 3900Y, 3901H, 3902H, 4900Y, 4901H, 4902H), or practicum courses (PSYC 3801H, 3802H, 4801H, 4802H) primarily focused on health and well-being*

*Note: only 0.5 credit from a practicum or reading course may count toward the specialization

SPEC.INAR - Integrated Arts - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Integrated Arts is open to students in the Cultural Studies program.

Courses in modern, contemporary, and experimental visual art, music, theatre, and film that ground artistic practices, products, and events in cultural, historical, media, and political contexts. Small and intensive art, theatre, film, video, photography, and music workshop courses, taught by practicing artists, are available. Certain courses (especially in theatre and visual arts) are counted as “teachables” for Teacher Education Stream students. Theatre courses count toward the Option in Theatre Studies, while visual arts courses count toward the Option in Visual Arts.

Students who have fulfilled the requirements for a single- or joint-major Honours or General degree in Cultural Studies may graduate with a Specialization in Integrated Arts if they have successfully completed 4.0 CUST credits from the following:

- CUST 1510H
- CUST 1570H
- CUST 2114H
- CUST 2184H
- CUST 2186H
- CUST 2511H

SPEC.INFC - Information Systems & e-Commerce - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Information Systems & e-Commerce is open to students in the BBA program or the joint-major BA/BSc program in Business Administration.

Students who have fulfilled the requirements for a Bachelor of Business Administration or a joint-major Honours degree in Business Administration degree may graduate with a Specialization in Information Systems & e-Commerce if they have successfully completed the following 4.5 credits with a minimum grade of 65% in each:

- 1.0 ADMN credit consisting of ADMN 1620H and 2620H
- 2.0 COIS credits consisting of COIS 1010H, 1020H, 2240H, and 2430H
- 1.0 ADMN credit from ADMN 3750H, 3850H, or 4870H
- 0.5 COIS credit from COIS 3030H, 3400H, or 3430H

SPEC.INTL - International Law & Policy - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in International Law and Policy is designed for students in Human Rights & Global Justice, Global Development Studies, or Political Studies who are interested in the intersections of law, governance, and global justice. The specialization provides a foundation in international legal frameworks, political institutions, and policy processes that shape economic and social systems. Through an interdisciplinary approach, Human Rights & Global Justice students will gain deeper insights into the political and policy dynamics that influence influencing human rights and global governance. Meanwhile, Political Studies students will explore the role of law and human rights institutions in shaping international relations and justice. Experiential learning opportunities, including policy-focused courses and placements, enable students to apply legal and political analysis to pressing international and global challenges, preparing them for careers in law, diplomacy, public policy, and international organizations.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Human Rights & Global Justice, Political Studies, or Global Development Studies may graduate with a Specialization in International Law and Policy if they have successfully completed the following 4.5 credits:

- 0.5 HURI-GDST credit consisting of HURI-GDST 3121H
- 0.5 POST credit consisting of POST 3605H
- 0.5 HURI credit from HURI 1001H or 1002H
- 0.5 POST credit from POST 2231H or 2232H
- 2.5 credits from:
    - GDST-HURI 4220Y, 0.5 credit from category A, 0.5 credit from category B, and 0.5 additional credit from category A or B

SPEC.IPER - Indigenous Performance - Specialization

Overview

Academic Level
Undergraduate

Credential
Other

Description
The Specialization in Indigenous Performance is open to students in the Indigenous Studies or Indigenous Environmental Studies/Sciences programs.

Students who have fulfilled the requirements for a single- or joint-major degree in Indigenous Studies or Indigenous Environmental Studies/Sciences may graduate with a Specialization in Indigenous Performance if they have successfully completed the following 4.0 credits:

- 2.5 INDG credits consisting of INDG 1570H, 2110Y, and 3560Y
- 1.5 INDG credits from INDG 2010H, 2020H, 3010H, 3025H, 3030H, 3060H, 3105Y, 3180H, or a practicum course (INDG 3861H or 3862H) focused on performance or theatre

SPEC.LAPO - Law & Policing - Specialization

Overview

Academic Level
Undergraduate

Credential
Other

Description
The Specialization in Law & Policing is open to students in the Forensic Science program (BScFS, BA, or BSc).

The Specialization in Law & Policing requires a suite of courses deemed important for those interested in pursuing a career in enforcement or the law and an additional list of courses students can choose from based on their own interests within law and policing.

Students who have fulfilled the requirements for a Bachelor of Science in Forensic Science or a joint-major Bachelor of Arts or Bachelor of Science degree in Forensic Science may graduate with a Specialization in Law & Policing if they have successfully completed the following 4.0 credits:

- 1.5 FRSC credits consisting of FRSC 2100H, 2110H, and 3110H
- 1.0 FRSC credit from FRSC 2750H, 3010H, 4089H, 4100H, 4312H, 4380H, or 4410H
- 1.5 credits from the following:
    - FRSC-BIOL 3000H
    - FRSC 3111H
    - FRSC-ERST 3250H
    - FRSC-PSYC 3320H
    - FRSC-INDG 3401H
    - FRSC-INDG 3402H
    - FRSC-HIST 3680H
    - FRSC 3800H
    - FRSC 4110H
    - FRSC 4111H
    - FRSC-ERST 4250H
    - FRSC 4310H
    - FRSC-BIOL 4570H
    - FRSC 4210H
    - ANTH-FRSC 3405H
    - BIOL-FRSC 3330H
    - GDST-SOCI 3120H
    - GESO-CAST-CRIM-SOCI 3966H
    - PHIL-POST 2150H
    - HURI-CRIM-GDST-SOCI 3121H
    - PHIL-POST 3140H
    - POST-CAST 3091H
    - POST-CAST 3092H
    - PSYC 2300H
    - PSYC 3240H
    - PSYC 3300H
    - PSYC 4310H
    - PSYC 4720H
    - SOCI 2615H
    - SOCI 4110H

SPEC.LASP - Latin American Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Other

Description
The Specialization in Latin American Studies is open to students in the Global Development Studies program.

Graduating students who have fulfilled the requirements for a single- or joint-major Honours or General degree in Global Development Studies may apply for a Specialization in Latin American Studies if they have successfully completed the following 5.0 credits:

- 1.0 GDST credit consisting of GDST 1001H and 1002H
- 1.0 SPAN credit from SPAN 1000Y or 1001H and 1002H*; or from 2001H and 2002H**
- 1.5 GDST credits consisting of GDST 3760Y and 3830H (taken in Bolivia)
- 1.0 SPAN credit consisting of SPAN 2501H and 2502H (taken in Bolivia)
- 0.5 credit from GDST 3891H or 0.5 SPAN credit in addition to the above

*Students whose level of fluency in Spanish is judged to exceed the level of SPAN 1000Y are exempt from this requirement

**Students whose level of fluency in Spanish is judged to exceed the level of SPAN 2002H are exempt from this requirement

Note: The Specialization may be completed as an Option in Latin American Studies for students not majoring in Global Development Studies.

SPEC.LITH - Literary History - Specialization

Overview

Academic Level
Undergraduate

Credential
Other

Description
The Specialization in Literary History is open to students in the Honours program in English Literature.

An understanding of the evolution of literary forms is an important foundation for literary criticism and analysis. For this reason, all students of English, especially those planning to pursue their studies beyond the undergraduate level, benefit from an awareness of the English literary tradition. The Specialization in Literary History ensures that those who complete it have studied literature from all of the major historical periods of its development from the medieval to the modern.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in English Literature may graduate with a Specialization in Literary History if they have successfully completed 4.0 credits from the following courses with a minimum grade of 65% in each course:

- Medieval literature:
    - at least 0.5 ENGL credit from ENGL 3121H, 3127H, or 4120Y/4121H
- Renaissance literature:
    - at least 0.5 ENGL credit from ENGL 2150Y/2151H, 2152Y/2153H, 3153H, 3155H, 3157H, 4150Y/4151H, or 4152Y/4153H
- Long eighteenth-century literature:
    - at least 0.5 ENGL credit from ENGL 3200Y/3201H, 3203H, 3205H, 3207H, 3209H, 3250Y/3251H, or 4250Y/4251H
- Long nineteenth-century literature:
    - at least 0.5 credit from ENGL 3300Y/3301H, 3400Y/3401H, 3403H, 3808Y, 4400Y/4401H, or 4503H

- Modernist literature:
    - at least 0.5 ENGL credit from ENGL 3412Y/3413H, 3421H, 4450Y/4451H, 4802Y/4803H, 4804Y/4805H, or 4806Y/4807H

SPEC.LSCM - Logistics & Supply Chain Management - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description

The Specialization in Logistics and Supply Chain Management is open to students in the BBA program or the joint-major BA/BSc program in Business Administration.

Students who have fulfilled the requirements for a Bachelor of Business Administration degree or a joint-major Honours degree in Business Administration may graduate with a Specialization in Logistics and Supply Chain Management if they have successfully completed the following 4.5 credits with a minimum grade of 65% in each course, and an overall average of at least 70% in the courses for the specialization:

- 2.0 LSCM credits consisting of LSCM 2002H, 2003H, 2005H, and 3000H
- 0.5 LSCM or ADMN credit from LSCM 1001H or ADMN 3550H
- 0.5 COIS credits consisting of COIS 1010H
- 1.5 credits from ADMN 3170H, ADMN 4870H, COIS-ADMN 3750H, COIS-ADMN 3850H, LSCM 3100H, LSCM 3400H, or LSCM 3500H

SPEC.MEDAR - Mediterranean Archaeology - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description

The Specialization in Mediterranean Archaeology is open to students in the Anthropology or Archaeology degree programs.

Students who have fulfilled the requirements for a single- or joint-major Bachelor of Arts or a Bachelor of Science degree in Archaeology or Anthropology may graduate with a Specialization in Mediterranean Archaeology if they have successfully completed the following 4.0 credits:

- 1.5 ANTH-AGRS credits consisting of ANTH-AGRS 1200H, 2205H, and 2206H
- 2.5 ANTH-AGRS credits from ANTH-AGRS 2201H, 3221H, 3222H, 3250H, 3251H, 3255H, 3275H, 4003H, or 4145H

SPEC.MFIN - Mathematical Finance - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Mathematical Finance is open to students in the Mathematics program.

Students who have fulfilled the requirements for a single-major Honours degree in Mathematics may graduate with a Specialization in Mathematical Finance if they have successfully completed the following 6.5 credits:

- 5.0 MATH credits consisting of MATH 2150H, 2560H, 2570H, 3150H, 3160H, 3350H, 3510H, 3560H, 4251H, and 4510H
- 1.5 ECON credits consisting of ECON 1010H, 1020H, and 3020H

Note: The following courses are recommended: COIS 1020H, MATH 4120H, MATH 4560H, MATH 4570H.

SPEC.MRCC - Marketing & Consumer Culture - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Marketing & Consumer Culture is open to students in the BBA program or the joint-major BA/BSc program in Business Administration.

Students who have fulfilled the requirements for a Bachelor of Business Administration or a joint-major Honours degree in Business Administration may graduate with a Specialization in Marketing & Consumer Culture if they have successfully completed the following 5.5 credits with a minimum grade of 65% in each:

- 2.5 ADMN credits consisting of ADMN 2080H, 2100H, 3150H, 3170H, and 4160H
- 0.5 ADMN credit from ADMN 3185H or 3460H
- 2.5 ADMN credits in addition to the above from ADMN 2410H, 3185H, 3460H, 3550H, 3560H, 3610H, 3750H, or 4870H

Note: Students pursuing a Specialization in Marketing & Consumer Culture are strongly encouraged to develop a wider foundation in the social sciences.

SPEC.NATH - Natural History - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Natural History is designed for students who wish to gain a comprehensive understanding of biodiversity, and the many ways in which organisms interact with their environment. This knowledge underpins many aspects of ecology and conservation biology and is relevant to a wide range of careers in various governmental agencies, environmental consultancies, parks, conservation authorities, NGOS, museums, herbaria, zoos, outdoor education centres, ecotourism, and other arenas.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Biology may graduate with a Specialization in Natural History if they have successfully completed the following 4.5 credits:

- 3.0 BIOL credits from:
    - BIOL 2001H
    - BIOL 2100H
    - BIOL 3110H
    - BIOL 3200H
    - BIOL 3090H
    - BIOL 3140H
    - BIOL 3170H
    - BIOL 3180H
    - BIOL 3340H
    - BIOL 3850H
    - BIOL 4140H
    - BIOL 4180H
- 1.5 BIOL credits from:
    - BIOL 3050H
    - BIOL 3051H
    - BIOL 3360H
    - BIOL 3380H
    - BIOL 3391H
    - BIOL 4510H
    - BIOL 4520H

Requirements

SPEC.NIIG - Niigaaniiwin - The Art of Leading - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Niigaaniiwin—The Art of Leading is open to students in the BBA program or the joint-major BA/BSc program in Business Administration.

The Niigaaniiwin—The Art of Leading Specialization brings together two knowledge systems—Western business practices and Indigenous ways of knowing and working—with a view to developing students' ability to work skillfully in the twenty-first-century business environment.

Students who have fulfilled the requirements for a Bachelor of Business Administration or a joint-major Honours degree in Business Administration may graduate with a Specialization in Niigaaniiwin—The Art of Leading, if they have successfully completed the following 3.5 credits with a minimum grade of 65% in each:

- 1.0 INDG credit consisting of INDG 1001H and 1002H
- 2.5 credits from IESS 1001H, INDG 1500H, 1510H, 2001H, 2002H, 2100Y, 2601Y, 2800Y, 3040H, 3050H, 3202H, 3402H, 3508H, 3631H, 3632H, or 4500H

SPEC.NISH - Nishinaabemowin - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Nishinaabemowin is open to students in the Indigenous Studies or Indigenous Environmental Studies/ Sciences degree programs.

Students who have fulfilled the requirements for a single- or joint-major degree in Indigenous Studies or Indigenous Environmental Studies/Sciences may graduate with a Specialization in Nishinaabemowin if they have successfully completed the following 4.0 credits:

- 3.0 INDG credits consisting of INDG 2800Y, 3800Y, and 4800Y
- 1.0 INDG credit from INDG 3851H, 3852H, or 3853H

SPEC.PBRL - Public Relations - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Public Relations is open to students in the Honours program in Communications.

This specialization provides students with a thorough grounding in the theory and practice of public relations. Students will learn how to craft strategic communications messages for a range of platforms, plan and execute events, and effectively work with the media. The selected courses in this specialization are designed to provide ideal preparation for a career in the field of public-facing strategic communication.

Students who have fulfilled the requirements for an Honours degree in Communications may graduate with a Specialization in Public Relations if they have successfully completed the following 4.0 credits:

- 3.0 COMM credits consisting of COMM 2002H, 2005H, 3001H, 3002H, 3003H, and 4001H
- 1.0 credit from ADMN 2080H, ANTH-MDST 4820H, CUST-MDST 3535H, or SOCI-CAST-MDST 3450H

SPEC.PDEV - Psychological Development - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Psychological Development is open to students in the single- and joint-major Honours degree programs and is intended for students interested in pursuing a career in developmental psychology and associated fields (e.g., graduate work with a specialization in developmental psychology, health care, social work, recreation or developmental services, child protection). This specialization provides students with course options designed for an in-depth examination of theoretical, empirical, methodological, and practical approaches to development-related topics.

Students who have fulfilled the requirements for an Honours degree in Psychology may graduate with a Specialization in Psychological Development if they have successfully completed the following 4.0 credits:

- 2.0 PSYC credits consisting of PSYC 2550H, 3500H, 3510H, and 3550H
- 2.0 PSYC credits from PSYC 3440H, 3560H, 3590H, 4150H (3530H), 4530H, 4531H, 4560H, 4570H, 4580H, 4590H, 4850H, 4860H, 4861H, reading courses (PSYC 3900Y, 3901H, 3902H, 4900Y, 4901H, 4902H), practicum courses (PSYC 3801H, 3802H, 4801H, 4802H), or thesis (PSYC 4010Y/ 4020D) primarily focused on development

SPEC.POLT - Political Theory - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Political Theory is open to students in the Political Science program.

Students who have fulfilled the requirements for either the single-major Honours, joint-major Honours, single-major General, or joint-major General degree in Political Studies may graduate with a Specialization in Political Theory if they have successfully completed the following 4.0 credits:

- 1.0 POST credit consisting of POST 1001H and 1002H
- 0.5 POST credit from POST 2351H or 2352H
- 2.5 POST credits from POST 2150H, 2351H (if not counted above), 2352H (if not counted above), 3140H, 3180H, 3465H, 3475H, 3571H, 4258H, 4331H, reading courses (POST 3900Y, 3901H, 3902H, 3903H, 4900Y, 4901H, 4902H, 4903H), research practicum courses (POST 4800Y, 4801H, 4802H), or thesis (POST 4020D) primarily focused on political theory

SPEC.PSRM - Psychological Research Methods & Data Analysis - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Psychological Research Methods and Data Analysis is open to students in the single- and joint-major Honours degree programs and is intended for students interested in pursuing graduate work in psychology and a career related to research and data analysis or psychometrics. This specialization provides students with a background in the empirical foundations needed to understand how research is conducted in psychology and similar disciplines and how data are analyzed in these fields.

Students who have fulfilled the requirements for an Honours degree in Psychology may graduate with a Specialization in Psychological Research Methods and Data Analysis if they have successfully completed the following 4.0 credits:

- 2.0 PSYC credits consisting of PSYC 2018H, 2019H, 3016H, and 3017H
- 1.0 PSYC credit from PSYC 3755H, 4110H, 4120H, or 4850H
- 1.0 PSYC credit from reading courses (PSYC 3900Y, 3901H, 3902H, 4900Y, 4901H, 4902H) or research practicum courses (PSYC 3801H, 3802H, 4801H, 4802H) that focus on research methods and data analysis in psychology or psychometrics; or the thesis course (PSYC 4010Y/4020D)

SPEC.PUBP - Public Policy - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Public Policy is designed for students in Political Studies who are interested in careers in the public service, think tanks, and non-governmental and inter-governmental organizations.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Political Studies may graduate with a Specialization in Public Policy if they have also successfully completed the following 4.0 credits:

- 0.5 POST credit consisting of POST 3605H
- 3.5 POST credits from Group A and Group B, with at least 1.0 credit from Group A

Group A

- 4081H
- 4255H
- 4555H
- 4850H

Group B

- 3000Y
- 3030H
- 3091H

- 3120H
- 3200H
- 3210H
- 3420H
- 3431H
- 3602H
- 3604H
- 3621H

- 3661H
- 3665H
- 3672H
- 3850H
- 3881H
- 4240Y
- 4252H
- 4260H
- 4431H
- 4452H
- 4610H
- 4621H
- 4772H
- 4872H
- 4873H

SPEC.QUST - Quebec & Franco-Canadian Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Quebec & Franco-Canadian Studies is open to students in the French Studies program.

Students who have fulfilled the requirements for an Honours or General degree in French Studies may graduate with a Specialization in Quebec & Franco-Canadian Studies if they have successfully completed the following 4.0 credits:

- 4.0 FREN credits from FREN 2236H, 2452H, 3231H, 3232H, 3237H, 3238H, 3239H, 3831H, 3832H, 4227H, 4228H, 4301H, 4302H, 4500Y/4501H, 4520Y, or 4611H; or any reading course on a Quebec or French-Canadian subject with permission of program coordinator

SPEC.RASOJ - Literatures of Social Justice - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Literatures of Social Justice is open to students in the Honours program in English Literature and provides a pathway through the program that allows students to focus on racial and social justice issues, critical race theory, and literature written by BIPOC, Indigenous, Queer, and Crip authors and authors from other equity-deserving groups. Students will deepen their understanding of systemic inequities and the representation and expression of diversity through literature, culture, and theory.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in English Literature may graduate with a Specialization in Literatures of Social Justice if they have successfully completed 4.0 ENGL credits from the following:

- ENGL 2703H
- ENGL 2705H
- ENGL 3151H
- ENGL 3306Y/3307H
- ENGL 3308Y/3309H
- ENGL 3451H
- ENGL 3481H
- ENGL 3483H
- ENGL 3604Y/3605H
- ENGL 3609H
- ENGL 3700Y/3701H
- ENGL 3704H
- ENGL 3707H
- ENGL 4351H
- ENGL 4450Y/4451H
- ENGL 4651H

SPEC.SENG - Software Engineering - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Software Engineering is open to students in the Honours program in Computer Science (single major only).

The software engineer works as part of a team to design, implement, test, maintain, and document software solutions. Because these solutions are typically large and complex, the software engineer must deal on several levels of abstraction and draw on sound methodologies and practices to produce software which is correct, robust, maintainable, and extensible. The software engineer therefore bridges the gap between the requirements of a client and the software solution to meet those requirements. He or she must have not only technical skills, but also interpersonal skills to work within the dynamics of a group. The capstone of the Specialization in Software Engineering is a full-year team project (COIS 4000Y) which exercises all phases of software development on a real-world application.

Students who have fulfilled the requirements for a single-major Honours degree in Computer Science may graduate with a Specialization in Software Engineering if they have successfully completed the following 9.5 credits:

- 4.5 COIS credits consisting of COIS 2430H, 3030H, 3040H, 3050H, 3320H, 3430H, 3850H, and 4000Y
- 1.0 credit from ADMN
- 1.0 arts credit from AGRS, CAST, CUST, ENGL, FREN, GESO, HIST, PHIL or SPAN
- 1.0 science credit from BIOL, CHEM, ERSC, FRSC, GEOG, or PHYS
- 2.0 additional credits outside of COIS and MATH

SPEC.SEXS - Sexuality Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Sexuality Studies is open to students in the Gender & Social Justice program and provides a pathway through the program that allows students to deepen their understanding of the regulation and expression of diverse forms of sexuality and its role in shaping societies across the world and through history. The specialization will signal students' expertise in this area as they advance in their academic studies or move into advocacy work, education, health, law, or related careers.

Students who have fulfilled the requirements for a single- or joint-major Honours or General degree in Gender & Social Justice may graduate with a Specialization in Sexuality Studies if they have successfully completed the following 4.0 credits:

- 0.5 GESO credit consisting of GESO 2465H
- 3.5 credits from GESO 3150H/4150H, 3151H, 3250H/4250H, 3310H, 3440H, 3508H, 3704H, 3796H/4796H, 3932H/4932H, 3962H, 4206H, 4630H, or PHIL 2010H

SPEC.SOEC - Social Justice & Equity Studies - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Social Justice and Equity Studies is open to Honours students in Sociology and provides a pathway through the program that focuses on understanding the various intersecting dimensions of social inequalities and social oppressions and their formation and impact in societies, cultures, organizations, and workplaces. Topics covered include gender, sexuality, ethnicity, embodiment, workplace equity, and social inequalities.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Sociology may graduate with a Specialization in Social Justice and Equity Studies if they have successfully completed the following 4.0 credits:

- 2.5 SOCI credits consisting of SOCI 2220H, 2430H, 3250H, 3440H, and 3661H
- 1.5 credits from:
    - SOCI 2340H, 2500H, 2630H, 3115H (3120H), 3121H, 3150H, 3320H 3400H, 3410H, 3420H, 3460H, 3672H, 3822H, 3860H, 3881H, 3962H, 3966H, 4111H, 4230H, 4252H, 4255H, 4270H, 4510H, 4551H, 4620H, 4630H, 4750H, 4850H, GESO 3122H/4122H, POST 3092H
    - Or with prior approval of the department, reading courses (SOCI 3900Y, 3901H, 3902H, 4900Y, 4901H, 4902H), community-based research courses (SOCI 3570Y, 3580H, 4570Y, 4580H), research practica (SOCI 4021Y, 4022H, 4023H), SOCI 4430H, or thesis courses (SOCI 4010Y or 4020D) that are primarily focused on social justice and equity in content

SPEC.STAT - Statistics - Specialization

Overview

Academic Level
Undergraduate

Credential
Specialization

Description
The Specialization in Statistics is open to students in the Honours program in Mathematics.

Students who have fulfilled the requirements for a single- or joint-major Honours degree in Mathematics may graduate with a Specialization in Statistics if they have successfully completed the following 4.5 credits:

- 3.0 MATH credits consisting of MATH 2560H, 2570H, 3560H, 3561H, 4560H, and 4561H
- 1.0 credit from COIS 1020H, 2020H, MATH-COIS 2600H, MATH 3160H, or 3180H
- 0.5 credit from MATH 4570H, 4851H, or 4852H

Note: The following courses are strongly recommended for students planning to pursue graduate studies in statistics: MATH 2200H, 3160H, 3770H, 3790H, 4570H, 4790H.

YAP.BOLI - Bolivia - Study Abroad Program

Description
Students in French Studies may apply to spend one or two terms of their second or third year of studies abroad, for which they will receive Trent credits. The Study Abroad program is offered at the University of Nantes, France.

Honours candidates are especially encouraged to spend time in Nantes. Honours students planning to participate in the Nantes program in their third year should take FREN 2051H and 2452H in their second year. In Nantes, students will be registered in 2.0 of FREN 3053H, 3203H, 3204H, 3306H, 3307H, 3506H, 3507H, and 4053H per term. Up to 0.5 additional credit per term may be obtained, selected from online courses offered by other Trent departments or from FREN reading or experiential learning courses.

Prerequisite: FREN 1102H and a minimum average of 70% on all French courses at Trent (or equivalent). To be considered for the program, students must apply in the Fall term of the academic year prior to the term(s) abroad. Interested students should contact the Nantes program coordinator in their first year; they should also consult with an academic advisor and/or the department of their major for advice on courses to be taken before and after the term(s) abroad.

YAP.GHAN - Ghana - Study Abroad Program

Overview

Academic Level
Undergraduate

Credential
Other

Description
The Ghana Year Abroad program is designed primarily for Honours students in the single-major or joint-major programs in Global Development Studies or Anthropology who have completed 9.0 university credits with an overall average of at least 70%.

The Ghana program consists of the following 5.0 credits:

- GDST-ANTH 3770Y, GDST-ANTH 3781Y, GDST-ANTH 3790Y, and GDST-ANTH-ERST-SAFS 3800D

All Courses

ADMN1000H - Contemporary Issues in Management and Organization

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Provides a macro framework and context for the management discipline by examining a wide selection of issues which affect both the practice and the conceptualization of management and organization. Issues studied include globalization, information technology, demographics, diversity, sustainability, and recent developments in management theory.

ADMN1030H - Globalization, Transnational Corporations, and Global Development

Overview

Department(s)
Global Justice & Development, Business

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Business - Not Set

Cross-Lists
GDST-1030H

Course Description
An overview of the global business environment and the contemporary corporate production networks that shape the process of international development. Using extensive case studies, issues covered include the globalization of the business environment, the organization of transnational corporations, their production networks, and their social and environmental effects. Equivalent to IDST 2030H.

ADMN1250H - Introduction to Mathematics for Economics and Management

Overview

Department(s)
Economics, Business

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Business - Not Set

Cross-Lists
ECON-1250H

Course Description
Topics include functions--quadratic and exponential, elementary linear algebra, function limits and continuity, single-variable calculus, unconstrained optimization, concavity, and convexity. These tools are integrated with and applied to micro and macroeconomic theory and managerial economics. Prerequisite: 2.0 university credits. Not open to students with credit for ECON-ADMN 2250H. Not open to students in the Mathematical Economics program.

ADMN1500H - Foundations of Indigenous Community Development

Overview

Department(s)
Indigenous Studies, Business

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Business - Not Set

Cross-Lists
INDG-1500H

Course Description
Explores the foundational elements of community development in an Indigenous context. Emphasis is placed on experiencing the application of community development theories. Concepts of personal development, relationships between individual and community, meaningful conversations within community, and effective ways of working in community are discussed both theoretically and experientially.

Academic Level
Undergraduate

Credit Value

Undergraduate

Credit Value

:
0.5

ADMN2080H - Managerial and Market Research

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Focuses on primary research and its use in problem solving and decision-making. Covers qualitative and quantitative research design, planning, implementation, and analysis. Research methods studied include surveys, focus groups, analytical interviews, ethnography, and action research. Prerequisite: 1.0 ADMN credit or 0.5 ADMN credit and CUST-MDST 1535H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN2100H - Introduction to Marketing

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Aims to give students a basic understanding of marketing and its core concepts--how a marketing approach can be implemented and managed in a range of markets, situations, and organizations. Prerequisite: 2.0 university credits including ADMN 1000H or all of ADMN 1221H, ECON 1010H, and ECON 1020H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN2200H - Introduction to Statistics for Economics and Management

Overview

Department(s)
Economics, Business

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Business - Not Set

Cross-Lists
ECON-2200H

Course Description
Introduces statistical methods in an applied setting with an emphasis on the development of theory through interactive learning. The material covered includes descriptive statistics, data analysis, inference, and estimation techniques. Prerequisite: ECON 1010H and 1020H. Not open to students in the Mathematical Economics program.

ADMN2220H - Organizational Behaviour

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
A conceptual and methodological analysis of the way individuals react to their employment environment. Topics include motivation, job satisfaction, leadership, group dynamics, and decision-making. Prerequisite: 2.0 university credits including ADMN 1000H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN2221H - Fundamentals of Managerial Accounting

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
An introduction to the basic concepts and procedures used in the collection and manipulation of accounting data for ongoing management decision-making. Topics include manufacturing accounting, cost accounting and variance analysis, cost allocation, cost-volume-profit analysis, and an introduction to budgeting. Prerequisite: ADMN 1221H. Not open to students with credit for ADMN 3021H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN2230H - Human Resource Management

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
A survey of the concepts and practices in the major functions of human resource management. Topics include human resource forecasting, human rights, recruitment and selection, training and development, collective bargaining, performance appraisal, and compensation. Prerequisite: 2.0 university credits including ADMN 1000H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN2340H - Work and Social Inequalities

Overview

Department(s)
Sociology, Business

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Business - Not Set

Cross-Lists
SOCI-2340H

Course Description
The nature and meaning of paid work and its relationship to wider social inequalities of ethnicity and gender. Specific topics may include the effects of technological changes, the shift to a service economy, global migration trends, managerial and employee strategies to control the workplace and to promote equity. Prerequisite: 60% or higher in SOCI 1002H or 1.0 ADMN credit. Not open to students with credit for SOCI-ADMN 3340H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN2410H - Communication in Organizations

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Verbal and non-verbal communication, social cognition, self-perception/concept, conflict theory, and their relevance to life in groups and organizations. Prerequisite: 2.0 university credits including ADMN 1000H. Not open to students with credit for WRIT 2003H or ADMN 3410H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN2510H - Organization Theory

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
An introduction to organization theory and an examination of specific organizations. Structure, process, environment, and other aspects of organizations are approached through different frames, images, and perspective analysis. Prerequisite: 2.0 university credits including ADMN 1000H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN2600H - Applied Quantitative Analysis for Business

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
This course integrates applied quantitative analysis in Business with Excel applications. It covers Excel basics, intermediate and advanced functions, data visualization, matrix algebra, differentiation, and quantitative analysis. Students will learn statistical analysis, financial modeling, and business applications of Excel, preparing them for data-driven decision-making in business contexts. Prerequisite: 2.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN2610H - Personal Finance

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
This course is designed to help students understand the planning and management of their current and future personal financial affairs. The course focuses on planning and managing personal finances, insuring assets, investing financial resources, and controlling financial futures. Prerequisite: 2.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN2620H - Systems Analysis and Design

Overview

Department(s)
Computer Science, Business

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Business - Not Set

Cross-Lists
COIS-2620H

Course Description
Systems analysis and design identifies the informational needs/ resources of an organization and specifies appropriate information systems to meet the needs and exploit the resources for strategic advantage. Core topics include the current methodologies, techniques, and tools used for both the analysis and design. Managerial and organizational issues are also discussed. Prerequisite: COIS-ADMN 1620H.

ADMN3001H - Event Management

Overview

Department(s)
Communications, Business

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%, Business - Not Set

Cross-Lists
COMM-3001H

Course Description
An introduction to the field of events management. Students learn about planning and managing events from conception to actualization. Includes topics related to planning, marketing, media relations, budgeting, human resource management, logistics, risk management, sustainability, and post-event analysis. Prerequisite: 7.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3020H - Financial Economics

Overview

Department(s)
Economics, Business

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Business - Not Set

Cross-Lists
ECON-3020H

Course Description
An introduction to the economic analysis of investment decisions and financial markets. Key concepts include present-value formula, market efficiency, portfolio choice, risk, arbitrage, and asymmetric information. Prerequisite: ECON 1010H and 1020H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3022H - Risk Management and Insurance

Overview

Department(s)
Economics, Business

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Business - Not Set

Cross-Lists
ECON-3022H

Course Description
Basic principles of risk and insurance. Examination of effective risk management programs, using insurance as a formal method to reduce losses and improve economic efficiency. Includes the study of different types of insurance: life, health and disability, property, home and automobile insurance. Prerequisite: ECON 1010H and 1020H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3030H - Social Entrepreneurship and Innovation Field Course

Overview

Department(s)
Global Justice & Development, Business

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Business - Not Set

Cross-Lists
GDST-3030H

Course Description
This summer field course provides first-hand knowledge of the challenges, promise, and limitations of social innovation and entrepreneurship in the institutional context of the Global South. Prerequisite: GDST-ADMN 2030H or permission of instructor. Not open to students with credit for IDST 3030D.

ADMN3121H - Intermediate Management Accounting

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Builds on Fundamentals of Managerial Accounting. The focus is internal accounting concepts, functions, and processes required to successfully manage an organization. Major topics include quantitative analyses of cost functions; strategy, balance scorecard, and profitability analysis; spoilage, rework, and scrap; inventory cost management strategy; and capital budgeting. Prerequisite: 8.0 university credits including ADMN 2221H (or 3021H) and 3.0 additional ADMN credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3123H - The Politics of Global Finance

Overview

Department(s)
Political Studies, Business, Economics

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Business - Not Set, Economics - Not Set

Cross-Lists
ECON-3123H, POST-3123H

Course Description
Explores the economic, political, and social impacts of global money and finance while surveying the tight linkages between finance and state power. Topics include the transformation of the global financial system, the causes and implications of financial crises, debt and development in the Global South, and debates on climate finance. Prerequisite: 5.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3150H - Advertising

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Students learn the way advertisements work, the many techniques used in advertising, and the impact of advertisements on the individual and society. The power of image and identity ads is emphasized. Prerequisite: ADMN 2100H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3170H - Introduction to Retail Marketing

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Introduces students to retailing and provides an understanding of the types of businesses, strategies, operations, formats, and environments through which retailing is carried out. Prerequisite: ADMN 2100H.

Academic Level
Undergraduate

Credit Value

:
0.5

Overview

Department(s)
Economics, Business

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Business - Not Set

Cross-Lists
ECON-3180H

Course Description
Efficiency criteria is emphasized in the theory and provision of public goods, voting behaviour, intergovernmental grants, and fiscal federalism. Focus on discussion of the efficiency and equity criteria in the theory and practice of personal and corporate income taxes, payroll taxation, and local government taxation in Canada. Prerequisite: ECON 1010H and 1020H. Equivalent to ECON 3160H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ADMN3185H - Consumer Behaviour

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
What do products mean to consumers? How do people decide what to buy? This course blends contemporary research on consumer behaviour with real marketing applications. Topics include decision making processes, situational influences, motivation, identity, and their implications for developing effective marketing strategies. Prerequisite: 3.0 ADMN credits including ADMN 2100H. Recommended: ADMN 2080H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3200H - Financial Management

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Introduces fundamentals of financial management. Students learn the valuation of future cash flows, stocks, and bonds. They also learn capital budgeting and capital investment decisions based on net present value, and risk-return trade-offs. Prerequisite: ADMN 1221H (or 2021H) and one of ADMN-ECON 2200H or MATH 2560H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3220H - Organizational Selection in the Canadian Workplace

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Designed to help students understand the matching process that takes place between individuals and organizations. Seeks to understand the principles, issues, trends, and legislative requirements affecting the recruitment and selection process. Prerequisite: ADMN 2220H and 2230H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3221H - Intermediate Financial Accounting 1

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Builds on the fundamentals of Financial Accounting I and II. The focus is the asset side of the Balance Sheet and Revenue Recognition criteria within the context of the Canadian financial reporting environment. The identification, discussion, and critique of accounting principles such as the International Financial Reporting Standards (IFRS) and Accounting Standards for Private Enterprises (ASPE) form an important component. Prerequisite: 8.0 university credits including ADMN 2221H (or 3021H) and 3.0 additional ADMN credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3230H - Training and Development

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
This course deals with training and development of employees in organizations from a theoretical and practical perspective. Fundamental concepts related to motivation and learning styles are studied in-depth and then complemented by a detailed application of the theoretical underpinnings. Coaching, mentoring, and leadership development are highlighted as important concepts for organizational success. Prerequisite: ADMN 2220H and 2230H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3250H - The Legal Environment of Business

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Addresses the legal limits in which business operates and the laws with which business decisions must comply. It utilizes actual case decisions and engages in examination of public and private law, contemporary issues in terms of human rights, the Charter, administrative law, and employment issues in relation to the operation of a business. Prerequisite: 3.0 ADMN credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3260H - Perspectives on Occupational Health and Safety

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Focuses on the legislative, technical, political, and social issues associated with the effective management of occupational health and safety concerns in contemporary Canadian organizations. Prerequisite: ADMN 2220H and 2230H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3270H - Human Resource Planning

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Provides an understanding of the essential elements of the human resource planning process in organizations. Students acquire knowledge in analyzing and programming for human resource requirements in the challenging environment of technological change, corporate repositions, rightsizing, cost containment, and pro-structuring improvements. Prerequisite: ADMN 2220H and 2230H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3280H - Motivation and Compensation Systems

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Provides the student with an understanding of the process, issues, and techniques involved in developing and administering compensation programs. Students gain knowledge of the theoretical and applied aspects of the compensation function, the linkage between the compensation function, and the overall management process. Prerequisite: ADMN 2220H and 2230H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3290H - Canadian Employment Law

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
Introduction to the laws that affect the non-union employment relationship in Canada, with a particular focus on Ontario. A broad range of workplace laws is covered, including human rights, employment standards, pay equity, employment equity, occupational health and safety, workers' compensation, privacy, and common law of contracts. Prerequisite: ADMN 2220H and 2230H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3300H - Personal Ethics in Organizations and Business

Overview

Department(s)
Business

Contact Department ('not set' refers to cross-listed depts)
Business - 100%

Course Description
An introduction to personal ethics in business and organizations. Major theories of ethics are applied to case studies. Students learn to identify ethical issues, reflect on their own values, and support their ideas with rational discussion. Prerequisite: 9.0 university credits, at least 3.0 of which must be ADMN including ADMN 1000H.

Academic Level
Undergraduate

Credit Value

:
0.5

ADMN3310H - The Economics of Developing Countries

Overview

Department(s)
Economics, Global Justice & Development, Business

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Global Justice & Development - Not Set, Business - Not Set

Cross-Lists
ECON-3310H, GDST-3310H

Course Description
Examines alternative models of growth and development, sectoral problems of LDCs (agriculture, education, health, environmental issues, etc.), planning strategies for economic development, and the diversity of the development experience. Prerequisite: ECON 1010H and 1020H.

Academic Level
Undergraduate

Course Designation

Business - 100%, Economics - Not Set, Supply Chain Management - Not Set

Cross-Lists
ECON-4890Y, LSCM-4890Y

Course Description
Designed for students interested in gaining in-depth, practical industry experience, while enhancing their classroom knowledge with real-world, paid industry positions. Students spend 6, 8, 12, or 16 months working full time in industry and return to Trent for a final term. Students apply, interview, and compete for limited positions. Course is graded on a pass/fail basis. Application deadline: October 15 of third year. Business Administration prerequisite: A minimum 75% cumulative average and 14.5 university credits including ADMN and ECON credits required for a single major in years 1-3, or permission of the director. Economics prerequisite: A minimum 75% cumulative average and 14.5 university credits including ECON credits required for a single major in years 1-3 and 2.0 ADMN credits, or permission of the director. Supply Chain Management prerequisite: A minimum 75% cumulative average and 14.5 university credits including LSCM, ADMN, and ECON credits required for years 1-3, or permission of the director. Accounting & Economics prerequisite: A minimum 75% cumulative average and 14.5 university credits including ADMN and ECON credits required for years 1-3, or permission of the director. Mathematical Economics prerequisite: A minimum 75% cumulative average and 14.5 university credits including ECON and MATH credits required for years 1-3, or permission of the director. Recommended prerequisite: ADMN 2410H. Open only to students in the single-major Honours programs in Business Administration, Economics, Supply Chain Management, Accounting & Economics, or Mathematical Economics. Not for credit toward a major in Business Administration, Economics, Accounting & Economics, or Mathematical Economics. Supply Chain Management students may take LSCM 4890Y in lieu of LSCM 4500Y. Not open to co-op students or students in the General programs in Business Administration or Economics.

AGRS2530H - Wonders of the Ancient World

Overview

Department(s)
Ancient Greek & Roman Studies, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, Anthropology - Not Set

Cross-Lists
ANTH-2530H

Course Description
An examination of The Seven Wonders of the Ancient World, exploring the literary and material evidence for these monuments, their enduring cultural impact, and why the list includes some famous monuments but excludes many others.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS2650H - Antiquity on Screen

Overview

Department(s)
Ancient Greek & Roman Studies, Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, Culture, Arts, and Media - Not Set, Media Studies - Not Set

Cross-Lists
CUST-2650H, MDST-2650H

Course Description
Contemplates depictions of ancient Greece and Rome in cinema and television alongside ancient sources to better understand how mass media representations have shaped our understanding of antiquity for at least a century. Themes and films (screened in class) may vary. Prerequisite: 4.0 university credits. Equivalent to AHCL 2650H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS2999H - Origins of Modern Terminology

Overview

Department(s)
Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%

Course Description
Introduces students to the role of ancient Greek and Latin in technical terminology and generates a core vocabulary of words and word parts to better comprehend complex etymologies. A modular approach allows students to target specific streams in science, medicine, law, and other fields. No prior knowledge of Greek or Latin needed. Not for credit toward a major or minor in Ancient Greek & Roman Studies. Equivalent to AHCL 2999H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3100H - The Athenian Empire

Overview

Department(s)
Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%

Course Description
During the fifth century BCE, the Athenian Empire controlled the Aegean. This course covers political, economic, and intellectual developments relating to events such as the construction of the Parthenon and the Melian Dialogue. Prerequisite: 4.0 university credits. Equivalent to AHCL 3100H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3103H - Ancient Warfare

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
HIST-3103H

Course Description
An in-depth study of the practice of ancient warfare from the Bronze Age to the Arab Invasions. Themes examined for each era include logistics, recruiting, intelligence, strategy, and naval warfare. Prerequisite: 8.0 university credits. Equivalent to AHCL 3101H, 3103H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3104H - The Environment in Ancient History

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
HIST-3104H

Course Description
Focuses on the concepts and methods used by ancient historians to investigate human interactions with the ancient Mediterranean environment. Demography, food supply, agriculture, disaster, disease, and climate are examined not only as described by ancient writers, but also as analyzed by modern historians of the ancient Mediterranean. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3130H - The Augustan Principate and Its Origins, 44 BCE-14 CE

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
HIST-3130H

Course Description
A study of the political, administrative, social, and cultural history from the assassination of Julius Caesar to the death of Augustus, with special attention paid to the ancient sources. Prerequisite: 4.0 university credits. Equivalent to AHCL 3130H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3140H - The Greek States to the End of the Persian Wars

Overview

Department(s)
Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%

Course Description
Examines the rise of the Greek city-states at the end of the Archaic Period (ca.700-480 BCE), touching upon such themes as the formation of a Greek identity; citizenship, tyranny, and democracy; slavery; women and patriarchy; Greek rationalism; Herodotus and the creation of history; and the Persian Wars. Prerequisite: 8.0 university credits including AGRS (or AHCL) 2103H or 2105H. Equivalent to AHCL 3140H.

Academic Level
Undergraduate

Credit Value
:
0.5

AGRS3155H - Current Topics in Ancient History

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Course Description
A focused study of a particular topic in the study of ancient Greek and Roman history. Topics change from year to year but emphasis will be on understanding some aspect of Mediterranean antiquity from a historical perspective. Prerequisite: 8.0 university credits. Equivalent to AHCL-HIST 3155H.

Academic Level
Undergraduate

Credit Value
:
0.5

AGRS3171H - Alexander the Great and His Age

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
HIST-3171H

Course Description
Offers both a survey of the life and deeds of Alexander and an examination of the background, the ancient sources (studied in English), and modern assessments. Prerequisite: 4.0 university credits. Equivalent to AHCL 3170H, 3171H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3181H - The Age of Constantine

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
HIST-3181H

Course Description
The "New Roman Empire" of Diocletian and Constantine, the emergence of Christianity as the state religion under Constantine, the foundation of Constantinople, and the Gothic Wars of Theodosius I. Prerequisite: 4.0 university credits. Not open to students with credit for AHCL 3120H or AHCL-HIST 3180H. Equivalent to AHCL 3181H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3182H - The Age of Attila

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
HIST-3182H

Course Description
The collapse of the Roman Empire in the West and its replacement by Germanic kingdoms; the survival of the Roman Empire in the East and the birth of Byzantine civilization. Prerequisite: 4.0 university credits. Not open to students with credit for AHCL 3120H or AHCL-HIST 3180H. Equivalent to AHCL 3182H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3190H - Ancient Anatolia

Overview

Department(s)
Ancient Greek & Roman Studies, Anthropology, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, Anthropology - Not Set, History - Not Set

Cross-Lists
ANTH-3190H, HIST-3190H

Course Description
A study of Anatolia in Antiquity. Topics include Lydian, Achaemenid, Seleucid, and Roman Empires, urbanism, roads, local languages and cultures, including Lycia, Isauria, and Pontus, as well as village life and cities such as Sagalassus, Ephesus, Sinop, and Euchaita. Prerequisite: 4.0 university credits. Equivalent to AHCL 3190H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3221H - State Religion in Ancient Greece & Rome

Overview

Department(s)
Anthropology, History, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, History - Not Set, Ancient Greek & Roman Studies - Not Set

Cross-Lists
ANTH-3221H, HIST-3221H

Course Description
Offers critical examination of the structure, function, and practices of official religion between the late Iron Age and the rise of monotheism in the late antique Mediterranean. Archaeological remains and ancient texts demonstrate how state-sponsored cults served to bind the populace and codify social and political behaviour. Prerequisite: 8.0 university credits including one of AGRS-HIST 2103H (or AHCL 2103H), ANTH-AGRS 2205H or 2206H. Equivalent to AHCL 3221H.

Academic Level
Undergraduate

AGRS3222H - Mystery Cults and Restricted Rituals in the Ancient Mediterranean

Overview

Department(s)
Anthropology, History, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, History - Not Set, Ancient Greek & Roman Studies - Not Set

Cross-Lists
ANTH-3222H, HIST-3222H

Course Description
In ancient Greece and Rome, exclusionary rituals and secretive initiation cults like those of Dionysos, Mithras, Isis, and Christianity overturned entrenched social norms and threatened the cohesion of the state. Archaeological and written evidence provide evidence for the origins, impact, and legacy of such practices in the ancient Mediterranean. Prerequisite: 8.0 university credits including one of AGRS-HIST 2103H (or AHCL 2103H), ANTH-AGRS 2205H or 2206H. Equivalent to AHCL 3222H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3240H - Etruscan Archaeology, ca. 1000-200 BCE

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
ANTH-3240H

Course Description
The material culture of the Etruscans, who rivalled the major Mediterranean powers in trade and warfare and whose art, architecture, and beliefs profoundly influenced ancient Roman culture. Prerequisite: 4.0 university credits including ANTH-AGRS 2205H or 2206H. Equivalent to AHCL 3240H.

Academic Level
Undergraduate

Credit Value
:
0.5

AGRS3250H - Aegean Bronze Age Archaeology

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
ANTH-3250H

Course Description
An exploration of the material culture of the Aegean Basin from the Neolithic Period through the Late Bronze Age (ca. 8000-1100 BCE), focusing on such topics as the built environment, art and symbolism, trade and exchange, religion and burial customs, and social stratification and state formation. Prerequisite: ANTH-AGRS 2205H. Equivalent to AHCL 3250H.

ANTH-3275H, HIST-3275H

Course Description
By critically comparing archaeological and textual evidence with scholarly publications, we examine attitudes toward culture and self-identification in ancient North Africa (ca. 700 BCE-450 CE), as expressed by both ancient peoples and scholars of the past circa 150 years, a period of tremendous change in political and academic thought. Prerequisite: 6.0 university credits. Equivalent to AHCL 3275H.

AGRS3310H - Love, Sex, and Death in the Ancient World

Overview

Department(s)
Ancient Greek & Roman Studies, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, Gender & Social Justice - Not Set

Cross-Lists
GESO-3310H

Course Description
Ancient Greeks and Romans explored concepts of love, sexual roles, and violence through writing that inspires scholars and artists to this day. This course draws upon works ranging from ancient drama and poetry to philosophy and epitaphs in order to explore both ancient attitudes and their critical reception. Prerequisite: 8.0 university credits. Equivalent to AHCL 3310H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3320H - Tragedy in the Ancient World

Overview

Department(s)
Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%

Course Description
A study of tragedy of the Athenian fifth century and Roman first century CE, covering the surviving works of Aeschylus, Sophocles, Euripides, and Seneca. Among the themes considered: the roles played by family, community, violence, and justice in tragedy, as well as exploration of notions of the "tragic." Prerequisite: 8.0 university credits. Equivalent to AHCL 3320H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3330H - Comedy in the Ancient World

Overview

Department(s)
Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%

Course Description
A study of what the ancient Greeks and Romans found funny. Considers the representative authors of Old Comedy (Aristophanes), New Comedy (Menander), and Roman Comedy (Plautus and Terence). Thematic concerns may include social and political influences; ancient taboos and decorum; and the evolution of comedy. Prerequisite: 8.0 university credits. Equivalent to AHCL 3330H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3351H - Fantasy and Adventure in the Ancient World

Overview

Department(s)
Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%

Course Description
Did the ancients share our concepts of "fiction" and "non-fiction"? How did they understand the role of the imagination in literature? Reading a range of works featuring quest stories, exotic travels, and utopias (including Atlantis), we will explore the ancient roots of fantasy, science fiction, and other genres of speculative fiction. Prerequisite: 8.0 university credits. Equivalent to AHCL 3351H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3355H - Current Topics in Ancient Literature

Overview

Department(s)
Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%

Course Description
A focused study of a particular topic in the study of ancient Greek and Roman literature. Topics change from year to year but emphasis will be on understanding some aspect of Mediterranean antiquity from a literary perspective. Prerequisite: 8.0 university credits. Equivalent to AHCL 3355H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3540H - Mortuary Archaeology

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Course Description
Examines the act of burial from an archaeological perspective. We focus on temporal trends in mortuary customs from Neandertals to modern humans. Gender, age, ethnic, and social differences in burial patterns are also explored. Prerequisite: ANTH 2001H or 2410H or both 2121H and 2122H, or permission of instructor. Not open to students with credit for ANTH-AHCL 4410H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS3850Y - Field Course in Ancient Mediterranean Archaeology

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
ANTH-3850Y

Course Description
A field course in archaeological methods and/or laboratory techniques at a Classical or Near Eastern site in the Mediterranean. Spring/summers only-confirm with the department office. Prerequisite: Permission of instructor and 1.0 credit from ANTH-AGRS 2205H, ANTH-AGRS 2206H, ANTH 2121H, or ANTH 2122H. Limited enrolment. Equivalent to AHCL 3850Y, 3851H.

Academic Level
Undergraduate

Course Designation

AGRS4001H - Senior Seminar

Overview

Department(s)
Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%

Course Description
Students gain practical experience in the processes of scholarly investigations and dissemination of findings by engaging in the ongoing research project of the instructor. Prerequisite: 10.0 university credits, including AGRS course(s) to be specified on a course-by-course basis. Equivalent to AHCL 4001H, 4002H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS4002H - Senior Seminar

Overview

Department(s)
Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%

Course Description
Students gain practical experience in the processes of scholarly investigations and dissemination of findings by engaging in the ongoing research project of the instructor. Prerequisite: 10.0 university credits, including AGRS course(s) to be specified on a course-by-course basis. Equivalent to AHCL 4001H, 4002H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS4145H - Cultural Heritage: Threats and Responses

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
ANTH-4145H

Course Description
The cultural identity of living peoples and the appreciation of the human past rely on the safeguarding of tangible heritage, yet physical remains of the past are under constant threat of destruction, disappearance, or distortion. What underlies these threats, and how effectively are legal and professional standards addressing them? Prerequisite: 8.0 university credits. Equivalent to AHCL 4145H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS4180H - Collapse of Complex Societies

Overview

Department(s)
Anthropology, Environment, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set, Ancient Greek & Roman Studies - Not Set

Cross-Lists
ANTH-4180H, ERSC-4180H

Course Description
Using anthropological theory and archaeologically-generated data sets, this course explores the characteristics of, and reasons for, the "collapse" of complex societies. The focus is on the last two phases of the "Adaptive Cycle": release and reorganization. Implications for the contemporary world are also discussed. Prerequisite: 10.0 university credits or permission of instructor. Equivalent to AHCL 4180H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

AGRS4185H - Human Impact on Ancient Environments

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set, Environment - Not Set

Cross-Lists
ANTH-4185H, ERSC-4185H

Course Description
Using archaeological and environmental theory and diverse data sets, lectures and student research projects explore human impacts on ancient environments. The focus is on the first two phases of the "Adaptive Cycle": exploitation and conservation. Seminars concentrate on contemporary environmental issues. Prerequisite: 10.0 university credits or permission of instructor. Equivalent to AHCL 4185H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

AGRS4430H - Advanced Topics in Ancient Philosophy

Overview

Department(s)
Philosophy, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
PHIL-4430H

Course Description
A focused study of texts and ideas from philosophers in Greek and Roman antiquity. Specific topics are determined each year. Prerequisite: 7.0 university credits including PHIL-AGRS 2420H and 2430H, or permission of department chair. Equivalent to AHCL 4430H.

Academic Level
Undergraduate

Credit Value

:
0.5

AGRS4900Y - Reading Course

Overview

Department(s)
Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%

Course Description
Provides an opportunity for more intensive or broader study of a selected topic which is pursued under the direction of a member of the program. Students must obtain the agreement of a faculty member to supervise the course. Prerequisite: 8.0 university credits including 2.0 credits in AGRS (or AHCL), one of which must be at the 3000 or 4000 level. Equivalent to AHCL 4900Y, 4905H.

Academic Level
Undergraduate

Credit Value
:
1

AGRS4905H - Reading Course

Overview

Department(s)
Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%

Course Description
Provides an opportunity for more intensive or broader study of a selected topic which is pursued under the direction of a member of the program. Students must obtain the agreement of a faculty member to supervise the course. Prerequisite: 8.0 university credits including 2.0 credits in AGRS (or AHCL), one of which must be at the 3000 or 4000 level. Equivalent to AHCL 4900Y, 4905H.

0.5

AIST1000H - Introduction to Artificial Intelligence

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
COIS-1000H

Course Description
A basic overview and introduction to the key concepts, history, applications, logic, ethics and current topics of artificial intelligence. Concepts such as machine learning, deep learning, and neural networks are discussed.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

AIST1400H - Introduction to Data Science

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
COIS-1400H

Course Description
Develops a solid foundation in the main concepts of data science and programming in Python. Core topics include repetition and selection structures, algorithm design techniques, file types, big data, data mining, and data visualization. Prerequisite: COIS 1020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

AIST2000H - Statistical Learning 1

Overview

Department(s)
Mathematics & Statistics, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Artificial Intelligence - Not Set

Course Description
This course introduces the fundamental concepts of statistical inference and statistical learning. Topics include random variable, sampling theory, experimental design and A/B testing, and hypothesis testing frameworks. Prerequisite: AIST-COIS 1000H. Not open to students with credit for MATH 1051H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

AIST2010H - Statistical Learning 2

Overview

Department(s)
Mathematics & Statistics, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Artificial Intelligence - Not Set

Course Description
This course continues the development of statistical learning concepts to establish a strong foundation for future courses in machine learning. Topics include regression and multiple regression, connections between linear models and non-linear frameworks such as neural networks and optional topics. Prerequisite: AIST 2000H. Not open to students with credit for MATH 1052H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

AIST2030H - Technology and Humanity

Overview

Department(s)
Anthropology, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Artificial Intelligence - Not Set

Cross-Lists
ANTH-2030H

Course Description
An introduction to the origin, development, and diversity of technologies in human prehistory and ethnology. Includes archaeological, biological, cultural, and linguistic anthropological perspectives on the role of technologies in human evolution and culture change. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
0.5

AIST3004H - Artificial Intelligence in Communication

Overview

Department(s)
Communications, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%, Artificial Intelligence - Not Set

Cross-Lists
COMM-3004H

Course Description
Artificial intelligence (AI) is increasingly involved in digital communication, media, and public relations. This course explores the theoretical foundations and practical applications of AI in various communication domains. The challenges and ethical implications of the evolving role of AI in communication and media are also examined. Prerequisite: 7.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

AIST3030H - Anthropology of AI

Overview

Department(s)
Anthropology, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Artificial Intelligence - Not Set

Cross-Lists
ANTH-3030H

Course Description
This course explores artificial intelligence (AI) through the interpretive framework of sociocultural anthropology. This course covers theoretical topics in Science and Technology Studies (STS) and anthropological methodologies for studying AI technologies. Students learn to critically evaluate the claims and motivations of the scientists and entrepreneurs of Silicon Valley. Prerequisite: 5.0 university credits. Recommended: ANTH 2030H. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

AIST3270H - Philosophy of Artificial Intelligence

Overview

Department(s)
Philosophy, Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set, Artificial Intelligence - Not Set

Cross-Lists
COIS-3270H, PHIL-3270H

Course Description
An examination of philosophical questions pertaining to artificial intelligence (AI) and the role AI plays in society. The first part treats the history, nature, and limits of AI. The second part turns to more applied questions related to ethics, and the social and political implications of AI. Prerequisite: 7.0 university credits or permission of the department chair.

Academic Level
Undergraduate

Credit Value
:
0.5

AIST3410H - Non-Classical Logic

Overview

Department(s)
Philosophy, Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set, Artificial Intelligence - Not Set

Cross-Lists
COIS-3410H, PHIL-3410H

Course Description
Building on classical propositional and first-order logic, this course introduces students to a variety of non-classical logics including modal logic, intuitionistic logic, and many-valued logic, as well as fuzzy logic. Prerequisite 7.0 university credits including PHIL 2410H or COIS 2320H.

Academic Level
Undergraduate

Credit Value

:
0.5

AIST3550H - Applied Artificial Intelligence and Machine Learning

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
COIS-3550H

Course Description
Fundamental artificial intelligence (AI) and machine learning concepts, algorithms, and techniques. The focus is on why and what can be done, along with available tools and applications in solving real-world problems, rather than the finer details of how it could be built. The course uses TensorFlow with provided Python code. Prerequisite: COIS 1020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

AIST3561H - Statistics 3: Advanced Statistics

Overview

Department(s)
Mathematics & Statistics, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Artificial Intelligence - Not Set

Cross-Lists
MATH-3561H

Course Description
Advanced statistical methods, especially in computational statistics: linear and generalized linear models; classification methods; variable selection; resampling; decision trees; neural networks; Markov Chain Monte Carlo methods; Bayesian estimation; multilevel and hierarchical models; and experimental design. Additional topics as time allows. Prerequisite: MATH 2560H or a minimum 75% in each of MATH 1051H and 1052H, or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

AIST3570H - LLM and Natural Language Processing

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
COIS-3570H

Course Description
Introduces the Large Language Models (LLMs), their impact, and application on natural language processing (NLP). Machine learning approaches are discussed. Students will learn how to build computational models for NLP, how to custom and fine-tune LLMs and how to optimize their performance. Prerequisite: COIS 2020H and AIST-COIS 3550H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

AIST3653H - (Mis)adventures in AI: Decolonial Dreaming

Overview

Department(s)
Gender & Social Justice, Artificial Intelligence, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Artificial Intelligence - Not Set, Media Studies - Not Set

Cross-Lists
GESO-3653H, MDST 3653H

Course Description
Drawing on developments in the field of AI, as well as representations in popular culture, students learn to both recognize discrimination, and understand how AI can be used as a tool for social and environmental justice. Critical approaches to artificial intelligence, including critical race, critical (dis)ability, feminist, queer, decolonizing, and ecological theories. Prerequisite: 1.0 GESO credit or AIST 1000H or 1.0 MDST credit, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

AIST4258H - Governing Machines? Technology and Power in the Age of AI

Overview

Department(s)
Political Studies, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Artificial Intelligence - Not Set

Cross-Lists
POST-4258H

Course Description
Examines how AI and emerging technologies reshape power, governance, and global order. Traces Silicon Valley's ideological roots, platform capitalism, and global tech diffusion before analyzing governance frameworks and future challenges of agentic AI and hybrid cognition. Explores whether techno-capitalism is governable, by whom, and for what purposes. Prerequisite: 10.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

AIST4270H - Ethics of Artificial Intelligence

Overview

Department(s)
Philosophy, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Artificial Intelligence - Not Set

Cross-Lists
PHIL-4270H

Course Description
An examination of pressing ethical issues raised by the transformative impacts of ArtificialIntelligence (AI) on our society and across the globe. Topics may include harm mitigation,autonomous systems, lethal autonomous weapons, surveillance, security, and privacy,manipulation and behaviour, fairness and bias, the future of work, and artificial moral agents. Prerequisite: 8.0 university credits including AIST 1000H or PHIL 1100H, or permission of the department.

Academic Level
Undergraduate

Credit Value

:
0.5

AIST4400H - Data Mining

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
COIS-4400H

Course Description
Data mining is the extraction of previously unknown and potentially useful patterns from large data sets. Core topics include the statistical foundations of data mining, sampling mechanisms, missing data, clustering, classification, and outlier detection. Case studies cover a wide variety of applications such as astronomy and marketing. Prerequisite: 1.0 COIS credit at the 3000 or 4000 level and one of COIS 2020H or COIS-ADMN 2620H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

AIST4430H - AI Innovations in Business

Overview

Department(s)
Business, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Business - 100%, Artificial Intelligence - Not Set

Cross-Lists
ADMN-4430H

Course Description
This course develops students' capabilities to drive business innovation and entrepreneurship in the AI era. Through evidence-based frameworks and hands-on projects, students build both practical applications and entrepreneurial skills essential for identifying, creating, and capturing emerging business opportunities. Prerequisite: 12.0 university credits of which 5.0 must be ADMN credits including ADMN 3420H or 3430H, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

AIST4445H - AI-Infused Leadership

Overview

Department(s)
Business, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Business - 100%, Artificial Intelligence - Not Set

Cross-Lists
ADMN-4445H

Course Description
Provides a comprehensive understanding of AI-infused leadership principles and strategies. Students explore the intersection of AI and leadership, focusing on the ethical, social, and technical dimensions of leveraging AI technologies in organizational settings. Students develop the knowledge and skills necessary to lead effectively in the evolving landscape of AI-driven innovation. Prerequisite: ADMN 3300H.

Academic Level
Undergraduate

Credit Value

:
0.5

AIST4550H - Artificial Intelligence

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
COIS-4550H

Course Description
Artificial intelligence is the study of those techniques which create perceptions of "machine intelligence" and "intelligent agents." Topics may include but are not limited to expert systems, various evolutionary learning systems such as genetic algorithms, genetic programming, and neural networks. The impact and ethics of artificial intelligence are also examined. Prerequisite: 10.0 university credits including COIS 2020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

AIST4570H - Deep Learning

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
COIS-4570H

Course Description
This course introduces students to the industry-shaping field of deep learning. The course covers deep directly connected artificial neural networks, CNNs, RNNs, LSTMs, and Attention-based neural networks. Students also learn about explainable AI techniques such as LIME, and advanced methods such as zero-shot, one-shot, and few-shot learning. Prerequisite: MATH 1110H, 1350H, and 1550H; and one of AIST 2010H or AIST-COIS 3550H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

AIST4851H - AI in Information Systems

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
COIS-4851H

Course Description
A capstone course providing students with the practical experience in the analysis and design (but not implementation) of a real-world information system. The idea is to customize the general information systems of COIS 4850H to AI related systems which has a wide range of selections with today's extensive applications of AI techniques. Prerequisite: COIS 2020H. Not open to students with credit for COIS 4000Y or 4850H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

AIST3960H - Research Practicum in AI

Overview

Department(s)
Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Artificial Intelligence - 100%

Course Description
Designed to allow students in the third year of the Artificial Intelligence program to pursue research activities under the direction of a Trent faculty member. Students will be able to transfer their classroom knowledge to the faculty member's active research, such as helping designing systems, services, and tools for data collection and analyses. Prerequisite: A minimum 75% cumulative average, 10.0 university credits, specific course prerequisites depending on the faculty supervisor, and permission of the instructor. Open only to students in the BA or BSc program in Artificial Intelligence.

Academic Level

AMOD5210H - The Foundations of Modelling

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
This course will introduce modelling process and basic types of models adopted in natural and social sciences. Models from a range of disciplines will be discussed. Prerequisite: one university course in either of calculus or statistics.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5220H - Mathematical Aspects of Modelling

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
Mathematical approaches to modelling are illustrated, with the emphasis on the methods rather than on the mathematical details. The topics include analytical modelling and computer simulation of dynamic processes, decision making, forecasting, probabilistic analysis, based on case studies from biology, geography, physics, economics, and social sciences.
Prerequisite: any university course in mathematics or physics, and working knowledge of a programming language.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5230H - Computational Aspects of Modelling

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
Computing concepts and programming skills fundamental to modelling and analysis form the core of this course (although no prior programming experience required). Students will learn about computer systems, data types, and programming fundamentals using a programming language suited to modelling and data science. Topics include computer organization, operating systems, basic programming concepts, object-oriented programming, common data structures and algorithms, and data access. Through hands-on programming exercises and assignments, students will develop practical coding abilities.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5240H - Statistical Aspects of Modelling

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
Various statistical approaches to modelling are illustrated, with an emphasis on the applications of statistics within the social and natural sciences. The course discusses both univariate and multivariate procedures, with particular attention to the latter (e.g., multiple regression, multi-analysis of variance, exploratory factor analysis, confirmatory factor analysis, and path analysis). Prerequisite: a university course in advanced statistics and some knowledge of SAS, SPSS or an alternative statistical application package.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5250H - Data Analytics With R

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
This course will introduce the student to the statistical programming language R. A wide range of topics will be covered, from data frames and functions to regression and statistical analysis. Emphasis is on visualization and statistical modelling to provide relevant applications for students to graduate research.

Academic Level
Graduate

Credit Value

0.5

AMOD5260H - Info Literacy & Comm in Data Science

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
This course is designed to familiarize graduate students in the data sciences with suitable genres of academic writing and communication. Part of the course will also focus on information literacy in the field, to help students better locate and evaluate the information they will need to utilize in their research. Other parts of the course will provide students with a suitable rhetorical approach to writing in scientific disciplines. Students will have opportunities to improve their existing writing and communication skills in these genres and develop a deeper comprehension of effective communication. The course will also provide opportunities to learn how to be an effective reviewer and editor, since students will be asked to evaluate the written communication of others.

AMOD5410H - Big Data

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
Big Data applications are pervading more and more aspects of our life, encompassing commercial and scientific uses at increasing rates as we move towards exascale analytics. Examples of Big Data applications include storing and accessing user data in commercial clouds, mining of social data, and analysis of large-scale simulations and experiments such as the Large Hadron Collider. In this course, students from a variety of disciplines will be introduced to the challenges and opportunities in this field, with the goal of providing them with theoretical and hands-on experience in the area of Big Data Analytics.

AMOD5420H - High Performance Computing

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
High Performance Computing is the use of advanced computer architectures to solve problems which require significant processing power, memory access, or storage. Core topics include advanced computer architectures, programming for shared and distributed memory machines, networking issues, caching, performance evaluation and parallel algorithms. Topics are supplemented with case studies. Excludes COIS 4350H.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5430H - Data Visualization

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
Data visualization is a main step in the analysis of data in a wide range of scientific research areas as well as business applications. We will discuss general approaches and tools, and techniques for the visualization of various types of data, including spatial data, graph data, and time series data. Excludes COIS 3510H.

Graduate

Credit Value

:
0.5

AMOD5440H - Data Mining

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
An introduction to the principles of data mining. Topics to be covered include an overview of existing work in data mining with a special focus on applications in astronomy, sampling mechanisms, the statistical foundations of data mining, the problem of missing data, and outlier detection. We will discuss classification techniques such as Support Vector Machines, Neural Networks, and Decision Trees, as well as clustering techniques including k-means, self-organizing maps, and the Expectation Maximization algorithm. Furthermore, the course includes a practical component using open source software. Excludes COIS 4400H.

Academic Level
Graduate

AMOD5450H - Intro. to Databases

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
This course introduces database systems and their use in the management of large quantities of data. The objectives are to gain an understanding of the information modeling and representation, the essential concepts, principles, techniques, and mechanisms for the design, analysis, use, and implementation of computerized database systems, and to gain experience in implementing and accessing relational databases using MySQL. At the end of this course, a student will be able to understand and apply the fundamental concepts required for the design, use and optimization of database management systems.

AMOD5460H - Data Science With Python

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
Introduction to Data Science develops a solid foundation in the main concepts of data science and programming in Python. Core topics include repetition and selection structures, algorithm design techniques, file types, Big Data, Data Mining and Data Visualization.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5470H - Artificial Intelligence

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
This course covers intelligent agents, search algorithms, constraint satisfaction, reasoning under uncertainty, and foundational machine learning techniques. Students will also explore deep learning, generative models, and their applications, gaining theoretical insights and practical experience to solve complex problems across diverse domains.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5510H - Linear Programming

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
Introduction to the concepts, techniques and applications of linear programming and discrete optimization, Topics include the simplex method, duality, game theory and integer programming.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5520H - Mathematical Finance Modelling

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
This course covers the basic mathematical theory and computational techniques used to price a variety of stock and interest rate options using both discrete time models, such as binomial probability trees, and continuous time models, such as the Black Scholes model. Elementary concepts from stochastic calculus will be introduced. Computational techniques will be emphasized with implementation of models in Maple and Excel.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5530H - Portfolio & Risk Management

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
Basic mathematical theory and computational techniques for how financial institutions can quantify and manage risks in portfolios of assets. Topics include: mean-variance portfolio analysis, the capital asset pricing model and Value at Risk (VaR).

Academic Level
Graduate

Credit Value

:
0.5

AMOD5540H - Financial Econometrics

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
This course will integrate economic and financial market theory, applied mathematics, and probability and statistics to study econometric methods that are designed to deal with the unique features and characteristics of financial market data. Topics will include multiple regression, time-series analysis, time-varying volatility models, switching models, and limited dependent variable models.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5550H - Numerical Methods

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
This course covers commonly used numerical techniques for solving differential equations including adaptive, multi-step and finite difference methods. Numerical stability, convergence and the issue of solution consistency would also be covered. Computational implementation will be emphasized with Matlab/Octave.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5560H - Financial Management

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
This course introduces core concepts central to financial management and firm value maximization. You will learn the basic methods of valuing corporate securities, estimating cash flows, and making investment decisions. Introduction to portfolio management theory, cost of capital, and raising capital will round out the course.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5570H - Quantamental Investing & AI

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
This course explores the integration of artificial intelligence, quantitative models, and fundamental analysis in modern investing. Students will examine how in combination fundamentals, mathematical approaches and AI-driven insights enhance decision-making, from market analysis to portfolio construction and risk management. Topics may include alternative data sources, market structure, macroeconomic trends, and techniques for identifying market regimes. Emphasizing practical applications, the course provides a strong foundation for understanding how AI is shaping the future of quantamental investing.

AMOD5610Y - Big Data Major Research Paper

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
One of the requirements to complete the Big Data Analytics M.Sc. program is that the student must complete a research project. Each student independently studies an area of Big Data Analytics under the guidance of a faculty supervisor, culminating in a research paper and a final presentation on the topic. A grade will be assigned based on the research project.

Academic Level
Graduate

Credit Value

:
1

AMOD5620Y - Big Data Financial Analytics Research

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
One of the requirements to complete the Big Data Financial Analytics MSc program at Trent University is that each student enrolled in the program must do a research project in Financial Analytics. Each student independently studies an area of Financial Analytics under the guidance of a faculty supervisor, culminating in a research paper and a final presentation on the topic. A grade will be assigned based on the research paper and the presentation.

Academic Level
Graduate

Credit Value

:
1

AMOD5630Y - Major Research Project

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
One of the requirements to complete the Big Data Analytics and Big Data Financial Analytics M.Sc. program is that the student must complete a research project. Each student independently or in a team studies an area of Analytics under the guidance of a faculty supervisor, culminating in a research paper and a final presentation or poster presentation on the topic. A grade will be assigned based on the research project.

Academic Level
Graduate

AMOD5640Y - Data Science and Analytics Practicum

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
Students will complete a research project in data science and analytics with an external partner (e.g., community organization and/or business). Projects vary year-to-year, but along with a classroom component, the course provides students with a field-based professional learning experience and an opportunity to develop their professional skills in data science and analytics.

AMOD5901H - 1st Seminar on Applications of Modelling

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
Each student makes one presentation per year on his/her research, with emphasis on the assumptions, methodology and analysis of the models used. These presentations are attended and graded by her/his Supervisory Committee. Attendance is compulsory. The course will be given a pass/fail grade based on the presentations, attendance and participation by the student. This course represents the first of two presentations and is expected to be about 10-15 minutes in length.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5902H - 2nd Seminar on Applications of Modelling

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
As with AMOD 5901H, this course represents the second of two presentations required by each student in the program on his/her research. The length of this presentation is expected to be about 25 minutes. As with the first presentation, it will be attended and graded by her/his Supervisory Committee. Attendance is compulsory. The course will be given a pass/fail grade based on the presentations, attendance and participation by the student.

Academic Level
Graduate

Credit Value

:
0.5

AMOD5903H - Project Seminar on Applications of Modelling

Overview

Department(s)
Applied Modelling & Quantitati

Contact Department ('not set' refers to cross-listed depts)
Applied Modelling & Quantitati - 100%

Course Description
Each student in a course-based stream will present his or her work on the research project, with emphasis on the assumptions, methodology and analysis of the models used. Attendance is compulsory. The course will be given a pass/fail grade based on the presentations, attendance and participation by the student. The presentation is expected to be about 10-15 minutes in length.

ANTH1001H - Introduction to Anthropology

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Anthropology is the study of humankind and anything to do with humans across time and space. This course surveys anthropology as a whole, emphasizing how biological, archaeological, linguistic, and cultural anthropology's topics, methods, and findings combine to create a holistic understanding of humanity's origins, prehistory, languages, and ways of life. Not open to students with credit for ANTH 1010H or 1020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ANTH1002H - Applied Anthropology

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
This course surveys uses of anthropology to solve problems and achieve goals in business, sustainability, technology, development, health, education, forensics, politics, and careers. It explores ways anthropological research can improve the effectiveness of anything people set out to achieve, since humans are always part of the process. Offered only at Trent University Durham GTA.

0.5

ANTH1030H - Archaeology 1: Accessing the Past

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-1030H

Course Description
Explores the origin, development, challenges, and lessons of archaeological practice around the world, with a focus on specific, illustrative case studies drawn from the history of the discipline. Equivalent to AHCL 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH1200H - The Trojan War: An Epic of Archaeology

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-1200H

Course Description
Provides an introduction to the study of Classical archaeology through the story of the Trojan War, focusing on such topics as the nature of epic, the archaeology of the Bronze Age, and the reception and transmission of the Trojan War story in Greek and Roman art and literature. Not open to students with credit for AHCL 1401H or 1402H. Equivalent to AHCL 1200H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2001H - Ethnography and Culture

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
An introduction to the history, theory, methods, and findings of cultural anthropology and the ethnographic study of contemporary peoples' ways of living and thinking. Through in-depth encounters with several of the world's cultures through ethnographies, this course provides a cross-cultural understanding of humankind. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2003H - Morphology

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Cross-Lists
LING-2003H

Course Description
An intermediate course, designed to broaden students' knowledge of morphology and morphological analysis in English and other languages. Topics include methods of morphological analysis, morphophonology, derivation and inflection, the role of the lexicon, and morphosyntax. Prerequisite: LING 1000Y or 1001H. Not open to students with credit for LING 2001H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2004H - Phonology

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Cross-Lists
LING-2004H

Course Description
An intermediate course, designed to broaden students' knowledge of phonology and phonological analysis in English and other languages. Topics include phonemic analysis, syllables, morphophonemics, rules and rule ordering, opacity, and tone. Prerequisite: LING 1000Y or 1001H. Not open to students with credit for LING 2001H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2010H - Phonetics

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Cross-Lists
LING-2010H

Course Description
An overview of articulatory and instrumental phonetics, including the mechanics of speech production, the accurate transcription of speech in any language, and the use of instruments to study the physical nature of speech sounds. Students learn all characters and values of the International Phonetic Alphabet, an indispensable tool for linguistic study and research. Prerequisite: LING 1000Y or 1001H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2020H - Historical Linguistics: How Language Changes

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Cross-Lists
LING-2020H

Course Description
An overview of the field of historical linguistics. Students are exposed to the principles and methods of historical research on languages, including topics related to language change and the reconstruction of extinct languages from their known daughter languages. Prerequisite: LING 1000Y or 1002H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2030H - Technology and Humanity

Overview

Department(s)
Anthropology, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-2030H

Course Description
An introduction to the origin, development, and diversity of technologies in human prehistory and ethnology. Includes archaeological, biological, cultural, and linguistic anthropological perspectives on the role of technologies in human evolution and culture change. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2040H - Law and Order in Ancient and Contemporary Cultures

Overview

Department(s)
Anthropology, Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Policing & Community Wellbeing - Not Set

Cross-Lists
PLCW-2040H

Course Description
An examination of social control and organization and the development of laws in past and present societies around the world. Anthropological approaches and evidence are combined to understand the range of political and justice systems created as ways of defining and solving human problems. Prerequisite: ANTH 1001H or 3.0 university credits. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2121H - Foragers to Farmers: The Archaeology of Early Societies

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Archaeology aims to reconstruct and explain the evolution of cultural behaviour in humans. This course surveys major topics in archaeology beginning with the earliest records of human culture to the emergence and expansion of agricultural societies.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH2122H - Farms to Empires: the Archaeology of Complexity

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
A comparative survey of how archaeologists have documented and interpreted the evidence related to the emergence of proto-urban and urban settlements, city-states, and empires. Major themes addressed include political and social organization, craft production, art, religion, trade and exchange, social elites, and military power.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH2123H - Archaeology 2: Methods of Analysis

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Introduces students to the ways archaeologists obtain data to build knowledge of the past. Students are provided with a critical appreciation and understanding of a representative range of methods used in archaeological survey, excavation and in post-excavation analysis.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH2150H - Archaeological Science 1: Introduction to Archaeological Science

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
An exploration of archaeological science (dating techniques, isotopic analysis, ancient DNA, material characterization) through case studies with an emphasis on the articulation of scientific techniques and archaeological research questions. Themes explored include human origins, diet, migration, status, and trade. Prerequisite: 4.0 university credits. Offered only at Trent University Peterborough.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH2201H - Introduction to Egyptian Archaeology from the Pharaohs to the Romans

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AHCL-2201H, AGRS-2201H

Course Description
The methods and achievements of archaeologists and the art history of Egypt from the period of the Pharaohs, through the Persians and the Greeks to the Romans. Prerequisite: 4.0 university credits. Equivalent to AHCL 2201H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2205H - Archaeology and Art History of Ancient Greece

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-2205H

Course Description
An introduction to the major sites, monuments, and artefacts of ancient Greece from the Bronze Age through the Hellenistic Period, focusing on how material remains are used to reconstruct various aspects of ancient society. Topics include art and architecture, trade and exchange, religion, burial customs, economy, and state formation. Prerequisite: 4.0 university credits. Equivalent to AHCL 2205H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2206H - Archaeology and Art History of Ancient Rome

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-2206H

Course Description
An introduction to Roman material culture from the Iron Age through the Late Empire. Topics include the development of a distinctively Roman culture, the influence of the Greek world, the spread of Roman imperialism, the impact of Christianity, and the continuing relevance of Roman institutions in modern society. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2311H - Linguistic Anthropology

Overview

Department(s)
Anthropology, Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Languages & Linguistics - Not Set

Cross-Lists
LING-2311H

Course Description
The course examines human expression--verbal and nonverbal--as communicative practices that connect persons together to form a common culture. Discussions may include case studies of communicative practices and the cultures that emerge in the modern world. Topics covered may include the precursors, forms, common characteristics, dynamics, diversity of languages. Prerequisite: 3.0 university credits. Recommended: ANTH 1001H. Equivalent to ANTH 2002H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2312H - Anthropology of Media

Overview

Department(s)
Anthropology, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Media Studies - Not Set

Cross-Lists
MDST-2312H

Course Description
A cross-cultural comparative anthropological exploration of how people's ideas about different media shape the ways they use these media. Prerequisite: 3.0 university credits. Not open to students with credit for ANTH-MDST 3312H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2410H - Biological Anthropology: Darwin, Death, and Disease

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Students learn how evolution, disease, and death shape human and non-human primate biology, behaviour, and distribution. Weekly labs provide opportunities to work with casted materials/fossils, develop and apply knowledge, learn research methods and skills in the subfields. Topics covered include primate origins and evolution, health/disease, growth/development and skeletal anatomy. Prerequisite: ANTH 1001H (or 1010H) or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH2450H - Plagues and People

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Focuses on the origins of plagues and the biological and social impact of major epidemics, past and present, on human societies. Themes explored include the role of human behaviour in the outbreak of disease, responses to epidemics, and human evolution and disease. Prerequisite: ANTH 2410H or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH2470H - Primate Behaviour

Overview

Department(s)
Anthropology, Biology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Biology - Not Set

Cross-Lists
BIOL-2470H

Course Description
A general survey of the Order Primates, focusing on their history, classification, distribution, ecology, and behaviour within an evolutionary/adaptive context, with emphasis on the comparisons of non-human primates with the human species. Prerequisite: ANTH 1001H (or 1010H). Not open to students with credit for ANTH-BIOL 3470H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH2490H - Contemporary Human Variation and Evolution

Overview

Department(s)
Anthropology, Biology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Biology - Not Set

Cross-Lists
BIOL-2490H

Course Description
This course explores the relationship of genes and the environment in shaping variation in human biology and morphology within and across populations. Tutorials acquaint students with genetics of families and populations. Specific topics include: the history of evolutionary theory, mating systems, microevolution, phenotypic variation, 'race,' and ethnicities. Prerequisite: ANTH 1001H or permission of instructor. Recommended: ANTH 2410H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH2500H - The World Food System

Overview

Department(s)
Global Justice & Development, Environment, Geography, Sociology, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Environment - Not Set, Geography - Not Set, Sociology - Not Set, Anthropology - Not Set

Cross-Lists
GDST-2500H, GEOG-2500H, SAFS-2500H, SOCI-2500H

Course Description
An interdisciplinary and comparative analysis of the impact of transformations in the world food system on contemporary agrarian societies. Prerequisite: 4.0 university credits. Equivalent to IDST 2500H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2530H - Wonders of the Ancient World

Overview

Department(s)
Ancient Greek & Roman Studies, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, Anthropology - Not Set

Cross-Lists
AGRS-2530H

Course Description
An examination of The Seven Wonders of the Ancient World, exploring the literary and material evidence for these monuments, their enduring cultural impact, and why the list includes some famous monuments but excludes many others.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH2600H - Peasants, Food, and Agrarian Change

Overview

Department(s)
Global Justice & Development, Environment, Sociology, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Environment - Not Set, Sociology - Not Set, Anthropology - Not Set

Cross-Lists
GDST-2600H, SAFS-2600H, SOCI-2600H

Course Description
An examination of the impact of processes of commodification, market integration, and globalization on the social organization of food-producing rural communities in developing countries. Prerequisite: 4.0 university credits or permission of instructor. Equivalent to IDST 2600H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3000Y - Field Methods and Techniques in Anthropology

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
An introduction to methods and techniques of discovery, analysis, and interpretation in a field situation in any one sub-discipline (archaeology, cultural, physical, or linguistic anthropology). Summers only--confirm with the department office. Limited enrolment. Prerequisite: Permission of instructor.

ANTH3001H - Applied and Environmental Geophysics

Overview

Department(s)
Anthropology, Forensic Science, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Forensic Science - Not Set, Environment - 100%

Cross-Lists
EGEO-3001H, FRSC-3001H, GEOG-3001H

Course Description
Geophysics is the study of geologic properties, processes and phenomena using non-destructive physical and mathematical methods, including reflection and refraction seismology, gravity and magnetics, and electrical and electromagnetic methods. This course emphasizes how geophysical techniques can be used for resource and archeological exploration, climate change detection, and environmental investigations. Prerequisite: PHYS 1000H or 1001H or 1.0 MATH credit. Typically offered every other year.

ANTH3003H - Syntax and Semantics

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Cross-Lists
LING-3003H

Course Description
An intermediate/advanced course, designed to broaden students' knowledge of syntax, syntactic analysis, and semantics, primarily in English but with reference to other languages. Topics include phrase structure and tree drawing, structural relations, X-bar theory, raising, movement, binding, and minimalism, as well as related topics in lexical and formal semantics. Prerequisite: LING 1000Y or 1001H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3007H - Buddhism, Culture, and Society

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Buddhism is based in a canonical tradition. Buddhist practice, however, is embedded in--transformed by and transforming--local contexts. We explore ethnographic accounts of how the ideas of Siddhartha (The Buddha) variously exist in different cultural and social contexts. Prerequisite: ANTH 2001H or permission of instructor.

0.5

ANTH3030H - Anthropology of AI

Overview

Department(s)
Anthropology, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-3030H

Course Description
This course explores artificial intelligence (AI) through the interpretive framework of sociocultural anthropology. This course covers theoretical topics in Science and Technology Studies (STS) and anthropological methodologies for studying AI technologies. Students learn to critically evaluate the claims and motivations of the scientists and entrepreneurs of Silicon Valley. Prerequisite: 5.0 university credits. Recommended: ANTH-AIST 2030H. Offered only at Trent University Durham GTA.

ANTH3070H - Sociolinguistics: Language in Society

Overview

Department(s)
Languages & Linguistics, Anthropology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set, Sociology - Not Set

Cross-Lists
LING-3070H, SOCI-3070H

Course Description
An introduction to the study of language in use in society. Topics include varieties of language; pragmatics; ethnographic approaches; discourse analysis; multilingualism; pidgins and creoles; sexist language; language in education; and language policy and planning. Students investigate how language is shaped by factors such as region, sex/gender, age, and identity. Prerequisite: 4.0 university credits or permission of instructor. Recommended: LING 1000Y or 1002H.

Academic Level
Undergraduate

Credit Value
:
0.5

ANTH3080H - Anthropology of Travel and Tourism

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Cross-culturally, people voluntarily go on journeys. In this course we consider the range, reasons, and cultural contexts of these journeys. Prerequisite: ANTH 2001H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3101H - Anthropology of Gifts and Commodities

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Explores classic and contemporary anthropological discussions of the relationship between gifts and commodities. We explore a wide range of topics from personhood, identity, labour/work, gender, class, nature, and love, and examine how each of these are implicated in and constituted by the production, exchange and consumption of gifts, commodities and gift-commodity hybrids. Prerequisite or co-requisite: ANTH 3991H or permission of instructor. Not open to students with credit for ANTH-SOCI 4100H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3112H - North American Archaeology

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Covers the archaeology of North America, from Paleoindians through the nineteenth century. Subjects include the shift from hunting and foraging to agriculture, the development of complexity, trade relationships and interregional interaction, shifting religious beliefs and practices, and the consequences of European contact and settlement. Prerequisite: ANTH 2121H and 2122H or permission of instructor.

ANTH3121H - Archaeology of Ancient Mesoamerica

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
A survey of the ancient Native civilizations of Mexico and Central America from the earliest settlement to the European conquest. Includes a study of Aztecs, Maya, Olmec, and other societies of Mesoamerica. Prerequisite: ANTH 2121H and 2122H or permission of instructor. Not open to students with credit for ANTH 4120Y.

:
0.5

ANTH3123H - Archaeology 3: Theory, Practice and Application

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Examines the history of archaeological thought and practice, in addition to addressing archaeology's role in the contemporary world. Topics may include those related to evolution, the environment, health, identity, race, ethnicity, gender, urbanism, repatriation, and ethics, in addition to current and emerging debates in the discipline. Prerequisite: ANTH-AGRS 1030H and ANTH 2123H or permission of instructor. Not open to students with credit for ANTH 3100Y.

Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH3151H - Lab Methods 1: Reductive Technologies

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
A hands-on course providing training in archaeological techniques for formally recording and analyzing artifacts adapted from raw materials and potentially ecofacts that attest food preparation and consumption. Approaches may include experimental archaeology to gain insight into reductive processes. Prerequisite: 1.0 credit from ANTH 2121H, 2122H, or 2123H, or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH3152H - Lab Methods 2: Transformative Technology

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Introduces students to basic methods for analysis of archaeological artifacts created through the transformation of raw materials into new substances, such as ceramics, glass, and/or metal. Prerequisite: 1.0 credit from ANTH 2121H, 2122H, or 2123H, or permission of instructor.

ANTH3153H - Archaeological Science 2: Ancient Biomolecules

Overview

Department(s)
Anthropology, Biology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Biology - Not Set, Forensic Science - Not Set

Cross-Lists
BIOL-3153H, FRSC-3153H

Course Description
Ancient biomolecules (proteins, lipids, DNA), the conditions under which they preserve, how they are isolated and analyzed. Topics include stable isotopes, ancient DNA, proteomics, and organic residue analysis. Labs provide students with hands-on experience with techniques commonly used in archaeological science (emphasis on bone chemistry). Prerequisite: ANTH 2150H or three of BIOL 1020H, BIOL 1030H, CHEM 1000H, CHEM 1010H, GEOG-EGEO 1040H, or PHYS 1001H. Offered only at Trent University Peterborough.

ANTH3160H - Peoples of Pacific Oceania

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
From tiny coral atolls to lush jungles to vast deserts, this course explores the diverse peoples of Polynesia, Micronesia, Melanesia, and Australia. Topics include the prehistoric occupation of the islands, regional patterns in human biology, language, and culture, and the ethnography of several specific groups. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3165H - Maritime Archaeology

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
This course introduces students to the archaeology of human interaction with water. Topics include the archaeology of waterside settlements, inundated and maritime landscapes, as well as the archaeology of small watercraft, ships, and related infrastructure including wharfs, docks, and harbours. Methodological and theoretical approaches are equally emphasized. Prerequisite: ANTH-AGRS 1030H or permission of instructor.

Academic Level
Undergraduate

ANTH3175H - The Archaeology of Natural Disasters

Overview

Department(s)
Anthropology, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set, Geography - Not Set

Cross-Lists
ERSC-3175H, GEOG-3175H

Course Description
Lectures explore the science of natural disasters, and issues relating to resilience and risk management in the contemporary world. Seminars focus on the archaeology of natural disasters, with particular emphasis on how human conceptions of the environment condition people's perceived vulnerability, and eventually their responses, to sudden environmental changes. Prerequisite: 10.0 university credits or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

ANTH3185H - The Archaeology of Climate Change

Overview

Department(s)
Anthropology, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set, Geography - Not Set

Cross-Lists
ERSC-3185H, GEOG-3185H

Course Description
Lectures and readings examine the science of climate change, outline how climate change influenced cultural development in the past, and assess how human perceptions of the environment conditioned the varying responses to climate change. Seminars focus on key methodological and/or theoretical issues, and specific case studies from the archaeological record. Prerequisite: 10.0 university credits or permission of instructor.

ANTH3190H - Ancient Anatolia

Overview

Department(s)
Ancient Greek & Roman Studies, Anthropology, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, Anthropology - Not Set, History - Not Set

Cross-Lists
AGRS-3190H, HIST-3190H

Course Description
A study of Anatolia in Antiquity. Topics include Lydian, Achaemenid, Seleucid, and Roman Empires, urbanism, roads, local languages and cultures, including Lycia, Isauria, and Pontus, as well as village life and cities such as Sagalassus, Ephesus, Sinop, and Euchaita. Prerequisite: 4.0 university credits. Equivalent to AHCL 3190H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3221H - State Religion in Ancient Greece and Rome

Overview

Department(s)
Anthropology, History, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, History - Not Set, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-3221H, HIST-3221H

Course Description
Offers critical examination of the structure, function, and practices of official religion between the late Iron Age and the rise of monotheism in the late antique Mediterranean. Archaeological remains and ancient texts demonstrate how state-sponsored cults served to bind the populace and codify social and political behaviour. Prerequisite: 8.0 university credits including one of AGRS-HIST 2103H (or AHCL 2103H), ANTH-AGRS 2205H or 2206H. Equivalent to AHCL 3221H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3222H - Mystery Cults and Restricted Rituals in the Ancient Mediterranean

Overview

Department(s)
Anthropology, History, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, History - Not Set, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-3222H, HIST-3222H

Course Description
In ancient Greece and Rome, exclusionary rituals and secretive initiation cults like those of Dionysos, Mithras, Isis, and Christianity overturned entrenched social norms and threatened the cohesion of the state. Archaeological and written evidence provide evidence for the origins, impact, and legacy of such practices in the ancient Mediterranean. Prerequisite: 8.0 university credits including one of AGRS-HIST 2103H (or AHCL 2103H), ANTH-AGRS 2205H or 2206H. Equivalent to AHCL 3222H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3230H - Meaning and Materiality

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
The study of material signs in their social context, including all forms of nonverbal human communication. Topics include any material objects as signs, including houses, commodities, embodied performances and rituals; anything that can be considered to act as a sign. Current topic: the semiotics of human-plant interactions and gardens. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3240H - Etruscan Archaeology, ca. 1000-200 BCE

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-3240H

Course Description
The material culture of the Etruscans, who rivalled the major Mediterranean powers in trade and warfare and whose art, architecture, and beliefs profoundly influenced ancient Roman culture. Prerequisite: 4.0 university credits including ANTH-AGRS 2205H or 2206H. Equivalent to AHCL 3240H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3250H - Aegean Bronze Age Archaeology

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-3250H

Course Description
An exploration of the material culture of the Aegean Basin from the Neolithic Period through the Late Bronze Age (ca. 8000-1100 BCE), focusing on such topics as the built environment, art and symbolism, trade and exchange, religion and burial customs, and social stratification and state formation. Prerequisite: ANTH-AGRS 2205H. Equivalent to AHCL 3250H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3251H - The Archaeology of Ancient Athens

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-3251H

Course Description
An exploration of the material culture of ancient Athens from the Neolithic Period to the Slavic Invasions in the sixth century CE, focusing on changes in the socio-political structure of the city throughout its history by exploring art and architecture, trade and exchange, ritual and mortuary customs, and state formation. Prerequisite: ANTH-AGRS 2205H. Equivalent to AHCL 3251H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3255H - Current Topics in Mediterranean Archaeology

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-3255H

Course Description
A focused study of a particular topic in the study of Mediterranean archaeology. Topics change from year to year but will focus on some aspect of the material record of the cultures surrounding the Mediterranean Basin from the end of the Late Bronze Age to the fall of the Roman Empire. Prerequisite: ANTH-AGRS 2205H. Equivalent to AHCL 3255H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH3260H - Culture and Mortality

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Although cultures are diverse, people of all cultures die. We explore the questions of death from the perspectives of many cultures as interpreted by anthropologists. In light of this cross-cultural examination, we ask what it means to be "mortal." Prerequisite: ANTH 2001H or permission of instructor

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3270H - Anthropology of Religion

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
An exploration of how anthropologists have approached phenomena such as witchcraft, shamanism, ritual, and myth as a way of understanding the epistemologies and cosmologies of people in diverse cultural contexts. Prerequisite: ANTH 2001H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3275H - Cultural Identity and Ancient North Africa

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set, History - Not Set

Cross-Lists
AGRS-3275H, HIST-3275H

Course Description
By critically comparing archaeological and textual evidence with scholarly publications, we examine attitudes toward culture and self-identification in ancient North Africa (ca. 700 BCE-450 CE), as expressed by both ancient peoples and scholars of the past circa 150 years, a period of tremendous change in political and academic thought. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3311H - Anthropology of Language

Overview

Department(s)
Anthropology, Media Studies, Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Media Studies - Not Set, Languages & Linguistics - Not Set

Cross-Lists
LING-3311H, MDST-3311H

Course Description
Covers the basic issues involved in situating diverse languages within diverse cultures and societies, placing the study of genres or ways of speaking in socio-cultural contexts of use, attending to the way people's ideas about what language is and what it is for shape the ways they speak. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3333H - Ecological Anthropology

Overview

Department(s)
Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set

Cross-Lists
ERSC-3333H

Course Description
Examines human participation in ecosystems, including how people and cultures cause and react to environmental challenges. We explore interdependence among humans and the rest of nature, how people in various cultures and times conceptualize and interact with their environment, and ways to identify and promote cultures of sustainability.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ANTH3404H - Human Osteology 1

Overview

Department(s)
Anthropology, Biology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Biology - Not Set, Forensic Science - Not Set

Cross-Lists
BIOL-3404H, FRSC-3404H

Course Description
A lab-based introduction to human osteology. Students learn basic skeletal and dental anatomy in order to identify bone and tooth and side the bones of the skeleton. Students learn bone biology and development, and the functional morphology of bones. Prerequisite: 3.0 science credits.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ANTH3405H - Forensic Anthropology

Overview

Department(s)
Anthropology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Forensic Science - Not Set

Cross-Lists
FRSC-3405H

Course Description
An introduction to forensic anthropology. Focuses on the methods used by forensic anthropologists to analyze unidentified skeletal remains, including sex determination, age estimation, stature estimation, assessment of ancestry, and identification of trauma and pathology. Prerequisite: ANTH-BIOL-FRSC 3404H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ANTH3460H - Biocultural Explorations of the Human Life Course

Overview

Department(s)
Anthropology, Biology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Biology - Not Set

Cross-Lists
BIOL-3460H

Course Description
A survey of the human life course through a bio-cultural lens, focusing on life history theory, demography, growth and development, adaptive human biology, determinants of health, and aging. The human species on the individual and population levels is seen as a product of evolutionary and biological forces, and of culture and society. Prerequisite: ANTH 1001H (or both 1010H and 1020H) or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ANTH3535H - The Anthropology of Death

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
This course focuses on death and the various human practices surrounding death. While all living things experience death, humans are unique in how this experience is prepared for, experienced, celebrated, and mourned. Specific topics to be covered include biological death, medicine and death, non-human primate death, grief, and mourning. Prerequisite: 3.0 ANTH credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3540H - Mortuary Archaeology

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Course Description
Examines the act of burial from an archaeological perspective. We focus on temporal trends in mortuary customs from Neandertals to modern humans. Gender, age, ethnic, and social differences in burial patterns are also explored. Prerequisite: ANTH 2001H or 2410H or both 2121H and 2122H, or permission of instructor. Not open to students with credit for ANTH-AHCL 4410H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH3550H - Hunters-Gatherers

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Examines variability within and between hunter-gatherer groups and sees how differences can be understood in an ecological and social perspective. To illustrate the diversity of hunter-gatherer adaptations, this course draws on case studies from Europe, Asia, the Americas, and Oceania. Prerequisite: ANTH 1001H (or both 1010H and 1020H).

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3560H - Aliens, Atlanteans, and Ancient Apocalypses

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
This course examines the popularity of pseudoarchaeology in modern society. Through an investigation of case studies, we explore the foundation on which archaeological conspiracy theories are founded, apply critical thinking and the scientific method to evidence cited to support them, and consider the factors that drive modern fascination with them. Prerequisite: 8.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3650H - Landscape and Settlement Archaeology

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Explores the spatial dimension of archaeological data and its relationship to ecology and human behaviour. Approaches to the distributions of artifacts and sites, the organization of buildings and settlements, and the interactions between cultures are discussed. Both techniques of analysis and interpretative concepts are presented. Prerequisite: ANTH 2121H and 2122H or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH3680H - Environmental Archaeology

Overview

Department(s)
Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set

Cross-Lists
ERSC-3680H

Course Description
Focuses on the concepts and methods used by archaeologists to investigate the long-term interactions between humans and the environment. Explores the wide diversity of approaches (geomorphology, paleobotany, archaeozoology, paleoentomology, and isotopic analyses) developed over the years in order to sharpen our understanding of past human-environment dynamics. Prerequisite: ANTH 1001H (or both 1010H and 1020H); or ERSC 1010H and 1020H; or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH3731H - Archaeozoology

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Introduces the analysis and interpretation of animal remains in archaeological sites. Students become familiar with the interpretation of faunal assemblages and learn through hands-on practice and discussions to think critically about the implications that can be drawn from these remains. Limited enrolment. Prerequisite: ANTH 2121H or 2122H or 2410H or permission of instructor. Offered only at Trent University Peterborough.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH3740H - Anthropology of Performance

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
An exploration of a central theme in anthropology--ritual and similar performances--from both linguistic and cultural perspectives. Topics covered include rituals as collective representations, interactional rituals, ritual and drama, ritual language, and poetics. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3745H - Virtual Worlds: The Anthropology of Online Communities

Overview

Department(s)
Anthropology, Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Computer Science - Not Set, Media Studies - Not Set

Cross-Lists
COIS-3745H, MDST-3745H

Course Description
Focuses on worlds creating in playable media (games), including both massively multiple online games (MMOGs) and tabletop role-playing games. "Virtual" society is now an increasingly taken-for-granted aspect of everyday sociality. This course develops tools and theories for the study of virtual worlds, online and offline. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3746H - Anthropology of Drinks and Drinking

Overview

Department(s)
Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set

Cross-Lists
SAFS-3746H

Course Description
Drinks and drinking as meaningful and material forms pervade all social life. This course explores ethnographically the way the materiality of specific drinks--water (tap, mineral, purified), coffee, gin, wine, vodka, beer--serves as a social medium in specific times and places. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3748H - Anthropology of Animation

Overview

Department(s)
Anthropology, Media Studies, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Media Studies - Not Set, Culture, Arts, and Media - Not Set

Cross-Lists
CUST-3748H, MDST-3748H

Course Description
Explores anthropologically the concept of animation--the attribution of human agency and life to nonhumans or media forms that create such an "illusion of life"--covering animated nonhumans from religious images, dolls, puppets, automatons, and robots to animated characters and brand mascots across different animated media (cel animation, rotoscopy, stop-motion, puppetry). Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3749H - Contemporary Legends and Other Stories

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Contemporary ("urban") legends are just one of many genres of storytelling analyzed by anthropologists and folklorists across cultures. This course uses linguistic anthropology to locate contemporary legends in relation to other narrative genres of folklore, including myths and fairytales, and new media forms, including the folklore of the internet. Prerequisite: 4.0 university credits.

ANTH3770Y - Society, Culture, and Development in Africa

Overview

Department(s)
Global Justice & Development, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Anthropology - Not Set

Cross-Lists
GDST-3770Y

Course Description
The historical dimensions of socio-cultural diversity in sub-Saharan Africa are examined, along with the changing economic relationship of the area with the global economy; the politics of sub-regional conflict and continental and regional integration; trends towards democratization; and the strengthening of civil society. Offered only in Ghana. Equivalent to IDST 3760Y.

Academic Level
Undergraduate

Credit Value

:
1

ANTH3780H - Topics in Religion and Culture

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
A focused study of a particular topic in the study of religion and culture. Topics change from year to year. Prerequisite: ANTH 2001H or permission of instructor. Not open to students with credit for ANTH 4270H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3781Y - Ghana Seminar

Overview

Department(s)
Global Justice & Development, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Anthropology - Not Set

Cross-Lists
GDST-3781Y

Course Description
Contemporary Ghana is examined in the light of its historical background and its patterns of stratification, religion, ethnicity, and gender. Processes of structural change, including economic policy, social and political movements are explored. Not open to students with credit for IDST 3780Y. Offered only in Ghana. Equivalent to IDST 3781Y.

Academic Level
Undergraduate

Credit Value

:
1

ANTH3790Y - Local Dynamics of Change

Overview

Department(s)
Global Justice & Development, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Anthropology - Not Set

Cross-Lists
GDST-3790Y

Course Description
The social, political, and economic conditions that encourage or block micro-level improvements are examined, as are the role of women's organizations and other local institutions and their relations with local District Assemblies and other government authorities. Offered only in Ghana. Equivalent to IDST 3790Y.

ANTH3810H - Monsters: Societies Seen Through Their Others

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Examines the linguistic, semiotic, and cultural constitution of figures of otherness or "alterity" that both define the boundaries and provide inverted images of societies and languages, paying particular attention to figures of monstrous alterity, both physical and linguistic monstrosity, and various dimensions of difference. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3811H - Multispecies Ethnography

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Multispecies ethnography moves anthropology beyond the human to study the nonhuman organisms whose lives and deaths are linked to, and are part and parcel of, human social worlds, and how the "more-than-human" anthropological study of human societies must attend to social relations with non-human others. Prerequisite: 4.0 university credits. Recommended: ANTH 3312H.

Undergraduate

Credit Value

:
0.5

ANTH3820H - Culture and Food

Overview

Department(s)
Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set

Cross-Lists
SAFS-3820H

Course Description
Examines classic issues in the anthropology of food. We focus on etiquette of food consumption, food and sex, food and religion and morality, food exchange and preparation, vegetarianism and meat eating, and cannibalism. Prerequisite: ANTH 2001H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3821H - Anthropology of Work

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
This course explores labor in cobalt mines, cell phone factories, oil extraction, and junk yards, and how this kind of labour facilitates office work in other parts of the world. We also study how animals and insects are often collaborators in human work. Prerequisite: ANTH 2001H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3825H - Anthropology of Mobilities

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Explores a practice at the center of human life everywhere: mobility. Explores how practices of mobility vary widely according to culture and historical period. Considers how people use their bodies as vehicles, and other vehicles and infrastructures of movement or its obstruction. Prerequisite: ANTH 2001H.

Academic Level
Undergraduate

ANTH3850Y - Field Course in Ancient Mediterranean Archaeology

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Course Description
A field course in archaeological methods and/or laboratory techniques at a Classical or Near Eastern site in the Mediterranean. Spring/summers only-confirm with the department office. Prerequisite: Permission of instructor and 1.0 credit from ANTH-AGRS 2205H, ANTH-AGRS 2206H, ANTH 2121H, or ANTH 2122H. Limited enrolment. Equivalent to AHCL 3850Y, 3851H.

ANTH3852Y - Trent Bioarchaeology Field School - Fortress of Louisbourg

Overview

Department(s)
Anthropology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Forensic Science - Not Set

Cross-Lists
FRSC-3852Y

Course Description
This course provides an introduction to bioarchaeological and forensic anthropology field methods at the Fortress of Louisbourg National Historic Site of Canada. The emphasis of the course is on the ethical handling of human skeletal remains, skeletal excavation methods/techniques for individual, comingled, and disturbed burials, and field data recording. Prerequisite: Permission of instructor.

ANTH3860H - Field Methods in Linguistics

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Course Description
An introduction to linguistic fieldwork. Students work either individually or in groups with a native language informant in the local community or, by special arrangement, in a remote location. Students develop a research question and complete a final report that focuses on phonetics/phonology, morphology, and/or syntax. Prerequisite: LING 1000Y or 1001H. Highly recommended: LING 2002H, 2003H, or 2010H.

0.5

ANTH3891H - Latin American Economies, Cultures, and Societies

Overview

Department(s)
Global Justice & Development, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Anthropology - Not Set

Cross-Lists
GDST-3891H

Course Description
An examination of the processes of social, cultural, and economic change in Latin America. Topics explored include colonialism, formations of states, production systems, inequality, gender, indigeneity, and livelihoods as well as political struggles against and for development. Prerequisite: 4.0 university credits or permission of instructor. Not open to students with credit for IDST-ANTH 3890Y.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3932H - Sex, Gender, and Science

Overview

Department(s)
Gender & Social Justice, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Anthropology - Not Set

Cross-Lists
GESO-3932H

Course Description
An interdisciplinary introduction to the topic of women and gender in science. How is gender difference understood within scientific disciplines? Why are women under-represented in various science and technological fields? How are women, and feminist scholarship, changing science? Prerequisite: 6.0 university credits including 1.0 GESO or WMST credit at the 2000 level, or permission of instructor. Not open to students with credit for GESO-ANTH 4932H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3991H - Theories of Society and Culture

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Structured thematically, this course surveys the principal theoretical developments in the discipline. Prerequisite: ANTH 2001H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH3992H - Ethnographic Methods and Ethics

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Covers research design, field methods, ethics, styles of ethnographic writing, and ongoing critical debates about methodology. Prerequisite: ANTH 2001H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4004H - Research Seminar

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
An advanced research seminar in which students engage and contribute to a research question or theme defined by the course instructor. Topics vary by year and instructor. Prerequisite: 10.0 university credits and permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4005H - Research Seminar

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)

Undergraduate

Credit Value

:
0.5

ANTH4010Y - Honours Thesis

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
ANTH 4020D is a double credit in Anthropology. ANTH 4010Y is a single credit because the same thesis is submitted to the other department/program in a joint-major. Students undertake a specific research project and write a thesis of 12,000 to 15,000 words on a well-defined topic. Arrangements begin with the chair of the department March 1 of the preceding academic year and departmental approval must be completed before March 31. Prerequisite: 9.0 university credits including ANTH 3123H (3100Y) or 3991H; courses directly relevant to the thesis topic; and a minimum 80% cumulative average in ANTH courses completed.

ANTH4145H - Cultural Heritage: Threats and Responses

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-4145H

Course Description
The cultural identity of living peoples and the appreciation of the human past rely on the safeguarding of tangible heritage, yet physical remains of the past are under constant threat of destruction, disappearance, or distortion. What underlies these threats, and how effectively are legal and professional standards addressing them? Prerequisite: 8.0 university credits. Equivalent to AHCL 4145H.

Undergraduate

Credit Value

:
0.5

ANTH4153H - Methods in Stable Isotope Science

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Explores the fundamental principles underlying the application of stable isotopes in biological systems: analytical substrates, fractionation, isotopic mixing, quantitative interpretation, quality control, and new methodological frontiers in isotope science. Lectures provide a thorough grounding in key concepts and seminars explore relevant case studies drawn from archaeology, ecology, palaeontology, and forensics. Prerequisite: 70% or higher in ANTH-BIOL-FRSC 3153H.

Academic Level
Undergraduate

ANTH4155H - Great Lakes Archaeology

Overview

Department(s)
Anthropology, Canadian Studies, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Canadian Studies - Not Set, Indigenous Studies - Not Set

Cross-Lists
CAST-4155H, INDG-4155H

Course Description
A critical review of the archaeology of the Great Lakes region of North America, from the earliest evidence of human presence to European colonization. Seminars address the long-term historical and evolutionary nature of landscapes and societies, focusing on environmental change and population history, technology, subsistence, settlement, trade and exchange, and socio-political organization. Prerequisite: ANTH 2121H and 2122H or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH4170H - Archaeology and Popular Culture

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Provides a critical assessment of ways in which archaeology and archaeologists are portrayed in various forms of popular culture, including films, television dramas, documentaries, cartoons, fiction novels, magazines, video and board games, and science fiction. Prerequisite: ANTH 2121H, 2122H, and one of ANTH 3000Y or 3123H (3100Y), or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4180H - Collapse of Complex Societies

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set, Environment - Not Set

Cross-Lists
AGRS-4180H, ERSC-4180H

Course Description
Using anthropological theory and archaeologically-generated data sets, this course explores the characteristics of, and reasons for, the "collapse" of complex societies. The focus is on the last two phases of the "Adaptive Cycle": release and reorganization. Implications for the contemporary world are also discussed. Prerequisite: 10.0 university credits or permission of instructor. Equivalent to AHCL 4180H.

Academic Level
Undergraduate

Course Designation
Science

ANTH4185H - Human Impact on Ancient Environments

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set, Environment - Not Set

Cross-Lists
AGRS-4185H, ERSC-4185H

Course Description
Using archaeological and environmental theory and diverse data sets, lectures and student research projects explore human impacts on ancient environments. The focus is on the first two phases of the "Adaptive Cycle": exploitation and conservation. Seminars concentrate on contemporary environmental issues. Prerequisite: 10.0 university credits or permission of instructor. Equivalent to AHCL 4185H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH4195H - Comparative Urban Traditions

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Using archaeological and historical datasets, this course examines pre-industrial cities and urban communities across time and space. Lectures and seminars focus on the diverse ways that urban spaces can be structured, and the nature of early urban lived experiences. Prerequisite: ANTH 2122H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ANTH4260H - Advanced Topics in Culture and Mortality

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
A continuation of Culture and Mortality in which we explore in-depth selected topics relating to death; topics based on student interest. Prerequisite: ANTH 3260H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4285H - Dreaming and Culture

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
This course explores how dreaming and culture shape one another, including scientific and diverse ethnic perspectives from biological, archaeological, linguistic, and cultural anthropology. Dreaming is a window on the brain's process of learning culture, including beliefs about dreams themselves that differently shape dream experiences, explanations, and uses. Prerequisite: 7.0 university credits. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4290H - Anthropology of the City

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
An anthropological introduction to the broad dynamics of urbanization, especially the emergence of the "modern" city, which shapes, and is shaped by, a variety of social phenomena. Special emphasis is placed on the use of ethnographic analysis to understand how processes of urban society manifest themselves in everyday life. Prerequisite: 4.0 university credits. Not open to students with credit for ANTH 3390H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4291H - Senses and Culture

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Considers the senses as culturally mediated, and culture as sensually mediated. Examines a diversity of historical and contemporary sensoria, and how these relate to social life, experience of the world, and claims to knowledge. Prerequisite: ANTH 2001H or 2002H or permission of instructor. Not open to students with credit for ANTH 3290H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4350H - Origins and Spread of Agriculture

Overview

Department(s)
Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set

Cross-Lists
SAFS-4350H

Course Description
Provides students with a critical understanding of the theoretical models and archaeological evidence for the origins and spread of agricultural societies. The course explores evolutionary, ecological and social theories and reviews genetic, linguistic, archaeobotanical, zooarchaeological and settlement data from Southwest and Southeast Asia, Europe, and the Americas. Prerequisite: 9.0 university credits including ANTH 2121H and 2122H, or permission of the instructor.

ANTH4361H - Indigenous Communities and Cultural Heritage

Overview

Department(s)
Indigenous Studies, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Anthropology - Not Set

Course Description
Aims to generate an understanding of the complex issues that surround the processes of cultural heritage management with regard to relationships with Indigenous peoples, their communities, and belief systems. Highlights community-based approaches, with, by, and for Indigenous and local communities. Prerequisite: 9.0 university credits including INDG 1001H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4420H - Paleopathology

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Focuses on the study of disease in human skeletal remains. Emphasis is placed on the description and diagnosis of bone pathology, theoretical issues underlying the reconstruction of the health of past populations, and recent molecular and microscopic approaches to the study of disease in bone. Prerequisite: ANTH-BIOL-FRSC 3404H and ANTH-FRSC 3405H or permission of instructor.

ANTH4512H - Global Health and Human Rights

Overview

Department(s)
Global Justice & Development, Sociology, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Sociology - Not Set, Anthropology - Not Set

Cross-Lists
GDST-4512H, HURI-4512H, SOCI-4512H

Course Description
This course examines key global health challenges of the twenty-first century and how global institutions respond to them. Drawing on public health, political economy, biopolitics, and human rights, it explores how health is shaped by structural inequalities, governance regimes, and rights frameworks that define access to care, state obligations, and accountability. Prerequisite: 14.0 university credits including 1.0 ANTH, GDST, HURI, and/or SOCI credit at the 2000 level or permission of instructor. Equivalent to IDST 4512H.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4710H - The Maya

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Survey of the ancient and modern Maya of Central America. Examines the culture of the contemporary Maya, one of the largest Indigenous groups of the Americas, as well as the archaeology of pre-Columbian Maya civilization. Prerequisite: ANTH 2121H and 2122H or permission of instructor. Not open to students with credit for ANTH 3710H.

Academic Level
Undergraduate

0.5

ANTH4720H - Colliding Worlds: Re-Examining the "Conquest" of Mexico

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
This course re-examines accounts of the discovery and conquest of Mexico to understand the misconceptions and misrepresentations inherent them, and the reasons these were created. It uses recent studies along with Indigenous historical texts (codices and lienzos) to re-evaluate this event from a non-Eurocentric perspective. Offered only at Trent University Durham GTA. Prerequisite: ANTH 2121H, 2123H, or 3121H, or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4747H - Writing Systems

Overview

Department(s)
Anthropology, Media Studies, Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Media Studies - Not Set, Languages & Linguistics - Not Set

Cross-Lists
LING-4747H, MDST-4747H

Course Description
Explores primarily non-alphabetic writing systems from linguistic and anthropological perspectives, including ancient writing systems (Sumerian, Egyptian, Anatolian, Mycenean, Mayan, Olmec) and contemporary ones, the transition from writing lists to linguistic texts, and the different social roles of writing from clay accounting tablets of early state bureaucracies to bamboo love letters. Prerequisite: 4.0 university credits.

ANTH4750H - Ethnicity, Political Conflict, and Genocide

Overview

Department(s)
Global Justice & Development, Sociology, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Sociology - Not Set, Anthropology - Not Set

Cross-Lists
GDST-4750H, HURI-4750H, SOCI-4750H

Course Description
An examination of ethnic consciousness and identity formation through theoretical and ethnographic case studies in a variety of settings. Themes include politicization of ethnicity in situations of conflict or political transition, genocide, and the articulation of ethnicity with gender, class, kinship, nationalism, and other markers of social and cultural difference. Prerequisite: 14.0 university credits including one of HURI 2005H, ANTH 2001H, ANTH 2002H, GDST-HURI 2010H (GDST 2001H), or SOCI 3661H, or permission of instructor. Equivalent to IDST 4750H.

ANTH4770H - Anthropology of Colonialism

Overview

Department(s)
Anthropology, Indigenous Studies, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Indigenous Studies - Not Set, Global Justice & Development - Not Set

Cross-Lists
GDST-4770H, INDG-4770H

Course Description
Provides an historical anthropological exploration of colonialism. Drawing on case studies from Eurasia, North America, the Middle East, Asia, and Africa, it focuses on the colonial construction of categories of language, race, ethnicity, gender, and sexuality, and how such cultural categories have been transformed and/or reproduced in the postcolonial present. Prerequisite: Prerequisite: ANTH 3123H or 3991H.

Academic Level
Undergraduate

ANTH4780H - Beyond Death: Advanced Topics on First Nations and Inuit Reincarnation

Overview

Department(s)
Indigenous Studies, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Anthropology - Not Set

Cross-Lists
INDG-4780H

Course Description
Advanced seminar on First Nations and Inuit teachings of reincarnation, rebirth, and eschatology. Through oral traditions, ethnography, and critical anthropology, students examine identity, kinship, memory, and spiritual continuity while analyzing how colonialism and scholarly interpretation shape understandings of personhood, the afterlife, and the return of the spirit. Prerequisite: 9.0 university credits including INDG 1001H or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4820H - Anthropology of Technology

Overview

Department(s)
Anthropology, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Media Studies - Not Set

Cross-Lists
MDST-4820H

Course Description
Takes a critical anthropological perspective on the category of technology in its historical and social/cultural contexts. Explores the social/cultural life of technological artifacts from steam engines to the Internet, with an emphasis on media technologies. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ANTH4830H - Anthropology of Food Politics

Overview

Department(s)
Anthropology, Political Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Political Studies - Not Set, Environment - Not Set

Cross-Lists
POST-4830H, SAFS-4830H

Course Description
Explores moral and ethical dimensions of food production and circulation. The politics of excess and want, national cuisines, reactions to industrial and fast food (the Slow Food movement, culinary connoisseurship). Food distribution, from home to restaurants and fast food joints, is examined in the context of changing demands of work. Prerequisite: ANTH 2001H or permission of instructor.

ANTH5153Y - Lab Methods in Stable Isotope Science

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
This course provides an in-depth examination of the application of stable isotope techniques in archaeology and related disciplines through a mixture of lecture, discussion, and a practical lab project. The collaborative lab project will address a methodological research question related to the application of stable isotope analysis in archaeology.

Academic Level
Graduate

Credit Value

:
1

ANTH5163Y - Stable Isotope Lab Practicum

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
Students work in collaboration with the instructor to complete a laboratory based research project in stable isotope science that addresses a methodological problem. Projects vary year-to-year but typically focus on methods related to the extraction and purification of bone collagen from archaeological contexts.

ANTH5325Y - Problems in SE Asian Archaeology

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
This course provides an introduction to preindustrial Southeast Asia by fostering engagement with a range of archaeological, historical, and environmental sources. The topical focus will vary from year to year based on the interests of staff and students.

Academic Level
Graduate

Credit Value

:
1

ANTH5350H - Archaeological Data Analysis

Overview

Department(s)
Anthropology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%

Course Description
This course is a focused study of the theory, method, and application of quantitative analysis as applied to archaeological data. The emphasis is on developing practical understanding of a suite of statistical methods useful for identifying patterns and processes in archaeological phenomena. Practical knowledge development will be emphasized through analysis of data drawn from a range of case studies appropriate to student interests.

ARTM5702H - Arts Leadership in Canada

Overview

Department(s)
Canadian & Indigenous Studies, Canadian Studies, Arts Management

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - 100%, Canadian Studies - Not Set, Arts Management - Not Set

Cross-Lists
CSID 5702H, CAST 6702H

Course Description
Arts leadership goes beyond day-to-day management of institutions and positions. It involves navigating the tensions between immediate realities and long-term goals to realise a leader's vision for institutional, professional, and social change. While all arts leaders internationally respond to common challenges in pursuing their visions (such as funding and institutional structures), there is a uniquely Canadian social and political context for arts leadership which informs both the difficult institutional realities that arts face and the potential for the arts within civic society. Readings and case studies in this course will explore key issues and case studies in Canadian and global arts leadership. Students who have taken CSID 5702H cannot take CAST 6702H.

Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An introduction to ASL for students with no or minimal previous background. Develops basic proficiency in and understanding of the principles of ASL and encourages basic communicative competence in a second-language setting. Prerequisite: ASLA 1001H or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ASLA2001H - Intermediate American Sign Language 1

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An intermediate course in ASL for students who have completed the introductory courses. Enables students to rehearse previously learned conversational strategies and be able to correct information to minimize misunderstandings. Topics progress from talking about oneself and the immediate environment, to talking about others and one's community. Prerequisite: ASLA 1002H or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ASLA2002H - Intermediate American Sign Language 2

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
A continuing ASL course for students who have completed the first three courses in the language. This course builds on previously learned conversational strategies and the ability to minimize misunderstandings. Students continue to develop language to maintain a comfortable and successful communication. Prerequisite: ASLA 2001H.

BEMA5000H - Principles of EMA I

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course will introduce students to the basic principles of environmental monitoring and assessment. Students will learn about contemporary theory in environmental science, environmental ethics, fundamental scientific principles, societal constraints on environmental values, monitoring techniques used for biotic and abiotic parameters, and systems analysis in environmental monitoring and forecasting.

Academic Level
Graduate

Credit Value

:
0.5

BEMA5001H - Topics in EMA

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course will provide students with the opportunity to learn about current environmental monitoring and assessment issues and challenges faced by environmental professionals in the field. This course will be comprised of seminars led by instructors, guest lecturers from university and industry, and students.

Academic Level
Graduate

Credit Value

:

BEMA5002H - Principles of EMA II

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course will introduce information on stakeholder perspectives, land-based considerations (e.g., public vs. private lands, Indigenous land claims), environmental law, repair and remediation, as well as the role of environmental impact and action plans. Students should expect to gain a better understanding of key regulating and administrative bodies within the environmental sector; and know methods, considerations and key components used in assessments of current or future-impacted environmental systems. Prerequisite: BEMA 5000H or permission of the instructor.

Academic Level
Graduate

0.5

BEMA5003H - Data Analysis for Env Professionals

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course will expose students to statistical approaches and tests that are especially relevant to uncontrolled environmental research, including how to conduct original analysis and inference from messy data. Students will gain the ability to quickly,efficiently and correctly determine what analysis to use for a given scenario and how to ensure that the analysis is robus and defensible, develop skills in translating statistical results to environmental inference, and develop familiarity with the open-access R statistical software platform.

BEMA5004H - Communicating Science for Environmental

Overview

Department(s)
Bioenvironmt'l Monit. & Assess, Sustainability Studies

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%, Sustainability Studies - Not Set

Cross-Lists
SUST-5004H

Course Description
This course will cover effective writing and presentation of scientific information for both scientific and non-scientific audiences. Issues regarding authorship, language and selection of reputable references will be covered in detail. Students will learn strategies and styles for effective writing and presenting and will learn how to effectively interpret scientific information for non-scientific audiences.

BEMA5005H - Geomatics I

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course will provide an introductory overview of the geomatics discipline in the context of bioenvironmental monitoring, including geographical information systems (GIS), remote sensing, geomorphometry, and geospatial analysis and modelling. Students will be introduced to analytical operations in vector, raster and integrated environmental datasets, with practical applications learned through lab exercises, online discussions, and both individual and group project activities. Recommended: BEMA 5003H or permission of the instructor.

BEMA5006H - Genome-based Envtl Monitoring

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course provides insight into how DNA is being used to surveil terrestrial and aquatic wildlife, track environmental contaminants and disease, and monitor the quality of water and food using leading-edge technologies. The content ranges from foundational genetics concepts relevant to how DNA is collected, extracted and analyzed to high-throughput sequencing, metabarcoding and gene editing. Assignments include practical applications of various DNA sequence analyses and presentations of case studies.

Academic Level
Graduate

BEMA5007H - Geomatics II

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course involves comprehensive study in applied problem-solving in the science of geomatics and the creation of a unique geomatics application (or geo-app). Students will have an opportunity to engage in-depth with theories and applications in earth observation, geospatial database development, and spatial analysis. A student-led and designed project will lead to a geo-app for applied environmental research, monitoring and assessment outputs for mapping and analysis.

BEMA5008H - Sampling Design in Envt'l Research

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course will introduce students to a variety of quantitative techniques used to make predictions and assessments regarding environmental health and viability. Students will learn how to quantify changes in environmental parameters, model species distributions and population changes, determine the long-term viability of existing populations, and make predictions regarding the fate of ecological communities and ecosystems

BEMA5009H - Environmental Policy

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course covers key environmental laws and policies related to environmental protection, land use, and natural resource management and conservation. Students will gain an understanding of jurisdiction, how to navigate and interpret legislation, and will review environmental legislation that establishes rules, standards, permitting, compliance, and enforcement mechanisms. Commonly incorporated key principles will be discussed, including public participation, impact assessment, mitigation, and risk management.

Academic Level
Graduate

Credit Value

:
0.5

BEMA5010H - Landscape Ecology

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course will provide students with a solid foundation in landscape ecology including new approaches to resource management and conservation that consider ecosystem processes in large spatial and temporal scales. Important concepts central to landscape ecology research such as dispersal, connectivity, and habitat fragmentation will be examined in detail, as well as the current methods used in landscape ecology research design and analysis. . Prerequisite: BEMA 5003H or permission of the instructor.

Academic Level
Graduate

Credit Value

:
0.5

BEMA5011H - Population Viability Analysis

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course will introduce students to quantitative and contemporary methods in population viability analysis (PVA). Students will develop skills for robust analysis of a range of plant and animal data to determine rates of change and its variation, extinction time and probability, and population sensitivity to various forms of intervention. Prerequisite: BEMA 5003H or permission of the instructor.

Academic Level
Graduate

Credit Value

:
0.5

BEMA5012H - Landscape Genetic Data Analy. w R

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course introduces students to a wide range of quantitative methods used in landscape genetics using R. While this course focuses on data analysis, a companion course (DGS Landscape Genetics) discusses the underlying biology. Students should either enroll in both courses or at least read the textbook of the companion course (Balkenhol et al. 2015: Landscape Genetics - Concepts, Methods, Applications; Wiley).

0.5

BEMA5013C - BEMA Placement

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course will consist of a 15-week placement experience with a government agency, industry, or non-governmental agency, or related laboratory or work unit, on themes and principles learned during coursework associated with the M.BEMA degree. Students will work closely with the instructor and placement host to determine deliverables that will be presented to various stakeholders, as technical report(s) and/or presentation(s).

BEMA5014H - BEMA Capstone

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course will consist of a 1-week capstone experience located at the Trent Peterborough campus that will provide students with the opportunity to present their placement work to peers, participate in professional skills workshops, complete an e-portfolio to showcase their work, and prepare an application for certification as an Environmental Professional in Training (EPt) from ECO Canada.

BEMA5016H - Indigenous Knowledge, Science the Envt

Overview

Department(s)
Bioenvironmt'l Monit. & Assess

Contact Department ('not set' refers to cross-listed depts)
Bioenvironmt'l Monit. & Assess - 100%

Course Description
This course explores interactions between Indigenous Knowledge and Western Scientific knowledge systems for environmental management and assessment. Through article review and reflections, case studies, and guest content from Indigenous and non-Indigenous experts, students examine ontological, epistemological, and ethical considerations, and innovative approaches to learning from multiple knowledges for environmental management and assessment.

BIOC2010H - Communicating Conservation Biology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Conservation is only as effective as it is communicated. In this course, students are introduced to storytelling to convey scientific knowledge. With emphasis on writing, students learn to express themselves with clarity and economy, to present themselves professionally in the workplace, and practise the skills of explaining and synthesizing peer-reviewed science to specialist and non-specialist audiences. Prerequisite: 60% or higher in BIOL 1020H and 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOC4100H - Advanced Communicating Conservation Biology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
The users of the knowledge of conservation biology are diverse: government practitioners, NGOs, policymakers, Indigenous groups, media, and the public. In this advanced course, students develop skills for speaking to the media and politicians, giving compelling presentations, crafting op-eds and press releases, using social media, and engaging in other forms of public outreach. Prerequisite: BIOC 2010H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL1001H - Understanding Biology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
A course for non-Biology majors curious about biology and, more broadly, science. It illustrates the scientific process by exploring topics from "What is evolution?" to "Is global warming real?" Using both chronological narratives and active learning to demystify science, the course aims to improve scientific literacy through an understanding of biology. Not open to students enrolled in or with credit for BIOL 1020H, 1030H, or BIOM 1000H. Not for credit toward a major or minor in Biology.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL1020H - Foundations of Biodiversity

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An examination of the biological principles underlying questions concerning biodiversity and evolution. Begins with a discussion of biodiversity and the implications of its loss. This is followed by consideration of the evolution of life on earth, exploring the underlying processes of natural selection and ecological interactions. Prerequisite: 4U Biology or its equivalent.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL1030H - Foundations of Cellular and Molecular Biology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Designed to explore the role of selected cellular and physiological systems in the maintenance of homeostasis in animals under varying environmental conditions, as well as the molecular basis of hereditary and environmental variation. Prerequisite: 4U Biology or its equivalent. Not open to students with credit for BIOM 1000H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL1060H - Physics for the Life Sciences

Overview

Department(s)
Physics & Astronomy, Biology

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Biology - Not Set

Cross-Lists
PHYS-1060H

Course Description
An exploration of basic biophysical concepts for students in the life sciences. Physical concepts such as force, pressure, buoyancy, mass transport, and temperature are explored through life regimes at various size scales. Time is taken to develop related mathematical skills. Not for credit toward a major or minor in Physics.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL1500H - Human Anatomy and Physiology 1

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Designed to introduce the structure (anatomy) and function (physiology) of the human body using a cell to systems approach. Focus is on understanding the interdependence of anatomical and physiological systems by learning about the senses, nervous system, endocrine system, reproductive system, integumentary system, and immune system. Prerequisite: 4U Biology and Chemistry. Recommended: 4U Kinesiology. Not for credit toward a major or minor in Biology. Not open to students with credit for BIOL 1050H or 1051H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

BIOL1501H - Human Anatomy and Physiology 2

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Designed to introduce the structure (anatomy) and function (physiology) of the human body, with a focus on understanding the systems involved in support and movement (skeletal and muscular systems), transport of vital materials (circulatory system), and flow of energy, gases, and wastes (digestive, urinary, respiratory systems). Prerequisite: 4U Biology and Chemistry. Highly recommended: BIOL 1500H. Recommended: 4U Kinesiology. Not for credit toward a major or minor in Biology. Not open to students with credit for BIOL 1050H or 1051H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

BIOL2000H - Methods of Biological Inquiry

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Provides experience in asking and answering questions in biology, exploring the power of the scientific method, and the importance of critical analysis. Examples involve a wide diversity of organisms and approaches, involving the use of a variety of statistical tools. Prerequisite: 60% or higher in each of BIOL 1020H and 1030H, or 60% or higher in BIOM 1000H and one of BIOL 1020H, 1050H, 1051H, 1500H, or 1501H. Not open to students with credit for FRSC 2020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

BIOL2001H - Field Methods

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Ecological research involves getting out into the natural environment, following protocols, and collecting data. This course provides students with the knowledge and skills to collect many different types of data in a meticulous and confident manner. Students spend extended periods outdoors on campus, in the Trent Nature Areas, and other nature areas in Peterborough. Prerequisite: 4.0 university credits including 60% or higher in BIOL-ERSC 2260H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

BIOL2050H - Introduction to Genetics

Overview

Department(s)
Biology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Forensic Science - Not Set

Cross-Lists
FRSC-2050H

Course Description
Develops a basic understanding of genetics. Mendelian inheritance, chromosome structure, genetic recombination, mutation, the structure of DNA, the nature of genes, and current topics in genetics are investigated using examples from plants, animals, insects, bacteria, fungi, and viruses. Prerequisite: 60% or higher in each of BIOL 1020H and 1030H; or 60% or higher in BIOM 1000H and one of BIOL 1020H, 1050H, 1051H, 1500H, or 1501H; or 60% or higher in each of BIOL 1030H and FRSC 1030H (or 1011H).

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL2070H - Cell Biology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An introduction to cell structure and function, including the organization, physiology, architecture, and interactions of cells. Cellular mechanisms of differentiation, development, cancer, and the immune response are explored. Prerequisite: 60% or higher in each of BIOL 1020H and 1030H, or 60% or higher in BIOM 1000H and one of BIOL 1020H, 1050H, 1051H, 1500H, or 1501H. Recommended: CHEM 1000H and 1010H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL2100H - Biology of Invertebrates

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An introduction to the diversity of invertebrate animals, emphasizing their evolutionary relationships and functional, behavioural, and ecological aspects of their biology. An emphasis is also placed on field techniques of collection and identification of various invertebrate groups. Prerequisite: 60% or higher in each of BIOL 1020H and 1030H, or 60% or higher in BIOM 1000H and one of BIOL 1020H, 1050H, 1051H, 1500H, or 1501H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL2260H - Introductory Ecology

Overview

Department(s)
Biology, Environment

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Environment - Not Set

Cross-Lists
ERSC-2260H

Course Description
An examination of the interactions between organisms and their environment at the levels of the population, community, and ecosystem. Covers basic concepts, theories, and methods used in ecology and the application of these to ecological and environmental problems. Prerequisite: 60% or higher in each of BIOL 1020H and 1030H, or 60% or higher in BIOL 1020H and one of ERSC 1010H or 1020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL2300H - Biochemical Concepts

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
CHEM-2300H

Course Description
Introduces key molecules and concepts in biochemistry. Topics include the properties of water, the thermodynamics of biological systems, and the behaviour of biomolecules in water. Focuses on each of the four major classes of biomolecules--proteins, nucleic acids, carbohydrates, and lipids--as they apply to biological systems. Prerequisite: CHEM 1000H and 1010H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

BIOL2350H - Ecological Agriculture

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
ERSC-2350H, SAFS-2350H

Course Description
An exploration of the scientific basis and ecology of agriculture. Abiotic and biotic factors influencing crop productivity, species interactions, energetics, nutrient cycling, cropping systems management and landscape diversity are considered. Traditional, conventional, and intense systems are reviewed in the context of sustainability. Prerequisite: BIOL 1020H or both ERSC 1010H and 1020H. Recommended: SAFS 1001H, BIOL 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

BIOL2470H - Primate Behaviour

Overview

Department(s)
Anthropology, Biology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Biology - Not Set

Cross-Lists
ANTH-2470H

Course Description
A general survey of the Order Primates, focusing on their history, classification, distribution, ecology, and behaviour within an evolutionary/adaptive context, with emphasis on the comparisons of non-human primates with the human species. Prerequisite: ANTH 1001H (or 1010H). Not open to students with credit for ANTH-BIOL 3470H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL2490H - Contemporary Human Variation and Evolution

Overview

Department(s)
Anthropology, Biology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Biology - Not Set

Cross-Lists
ANTH-2490H

Course Description
This course explores the relationship of genes and the environment in shaping variation in human biology and morphology within and across populations. Tutorials acquaint students with genetics of families and populations. Specific topics include: the history of evolutionary theory, mating systems, microevolution, phenotypic variation, 'race,' and ethnicities. Prerequisite: ANTH 1001H or permission of instructor. Recommended: ANTH 2410H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL2600H - Evolution

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
A study of the pattern of the evolution of life over the past billion years focusing on key events and transitions, and the underlying processes that made them happen. Prerequisite: 60% or higher in BIOL 2050H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL2701H - Environmental Education: Biological Issues

Overview

Department(s)
Environment, Education, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Education - Not Set, Biology - Not Set

Cross-Lists
EDUC-2701H, ERSC-2701H

Course Description
Not for credit toward a major or minor in Biology. The science behind environmental issues that are primarily biological in nature, including biodiversity, habitat loss, invasive species, and toxicity. Intended for prospective educators, natural area interpreters, and environmental communicators. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL2702H - Environmental Education: Fostering Stewardship and a Sustainable Future

Overview

Department(s)
Environment, Biology, Education

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Education - Not Set

Cross-Lists
EDUC-2702H, ERSC-2702H

Course Description
Not for credit toward a major or minor in Biology.The science behind environmental issues that are primarily physical or chemical in nature, including energy conservation, global warming, and air and water pollution. Intended for prospective educators, nature interpreters, and others interested in working with the public on environmental stewardship and sustainability initiatives. Prerequisite: 4.0 university credits. ERSC-BIOL 2701H highly recommended.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL3000H - Laboratory DNA Forensics

Overview

Department(s)
Forensic Science, Biology

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%, Biology - Not Set

Cross-Lists
FRSC-3000H

Course Description
Examines the theoretical foundations and techniques of DNA analysis with leading-edge technology in light of forensic cases. Students learn the theory and practice of generating forensic DNA evidence. Prerequisite: FRSC-BIOL 2050H, FRSC-BIOL 3700H, BIOL 3080H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL3040H - Histology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
A study of the four basic animal tissue types and how these tissues are subsequently organized into organ systems. An important emphasis is the relation of tissue form to function. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL 2070H and an additional 0.5 credit at the 2000 level in BIOL or BIOC.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL3050H - Limnology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
A study of the ecology of freshwater ecosystems, biology, geochemistry, and physics of freshwater lakes, rivers, and streams. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL-ERSC 2260H and an additional 0.5 credit at the 2000 level in BIOL, BIOC, CHEM, ERSC, or GEOG. Recommended: CHEM 1000H and 1010H.

BIOL3051H - River and Stream Biology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Explores the ecological properties of rivers and streams. Theoretical concepts of river function are used as foundations for developing knowledge of aquatic communities. Also considers problems in conservation and management of river and stream ecosystems, and addresses how ecological principles are applied to these problems. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL-ERSC 2260H and an additional 0.5 credit at the 2000 level in BIOL or BIOC. Recommended: CHEM 1000H and 1010H.

BIOL3080H - Molecular Biology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Fundamental concepts in molecular biology with emphasis on the exploration of structure, function, and cellular synthesis of DNA and RNA. Techniques in recombinant DNA technology as well as their applications in biomedical, forensic, and pharmaceutical research are discussed. Basic techniques in molecular biology and scientific calculations are also introduced. Prerequisite: 8.0 university credits including a pass in both CHEM 1000H and 1010H and 60% or higher in each of BIOL 2050H and an additional 0.5 credit at the 2000 level in BIOL or BIOC. Recommended: BIOL 2070H.

BIOL3090H - Biology of Insects

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An introduction to the organization and diversity of insects. Lectures emphasize insect physiology, ecology, and behaviour. An insect collecting kit for making a required insect collection will be available to borrow from the Biology Department beginning in April preceding the beginning of the course. Prerequisite: 8.0 university credits including 60% or higher in 1.0 BIOL and/or BIOC credit at the 2000 level.

Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL3111H - Comparative Vertebrate Anatomy

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An introduction to the diversity of vertebrate animals, emphasizing their evolutionary relationships and functional, behavioural, and ecological aspects of their biology. Required dissections. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL 2070H and 2600H. Not open to students with credit for BIOL 2110H.

Credit Value

:
0.5

BIOL3120H - Infectious Disease Biology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An examination of the epidemiological and biological theory that advances our understanding of the spread and impact of infectious diseases in populations. Use host-pathogen theory to demonstrate how variation and heterogeneity influence disease dynamics at all scales. Topics include outbreaks, zoonotic diseases, public health, and disease prevention and control strategies. Prerequisite: 8.0 university credits including at least 60% in each of BIOL 2070H and 2600H. Not open to students with credit for BIOL 4110H.

Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL3140H - Fish Ecology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
The biology of fishes with emphasis on biotic and abiotic factors that affect their life histories, distribution, population dynamics, feeding, and growth. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL-ERSC 2260H and an additional 0.5 credit at the 2000 level in BIOL or BIOC.

BIOL3153H - Archaeological Science 2: Ancient Biomolecules

Overview

Department(s)
Anthropology, Biology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Biology - Not Set, Forensic Science - Not Set

Cross-Lists
ANTH-3153H, FRSC-3153H

Course Description
Ancient biomolecules (proteins, lipids, DNA), the conditions under which they preserve, how they are isolated and analyzed. Topics include stable isotopes, ancient DNA, proteomics, and organic residue analysis. Labs provide students with hands-on experience with techniques commonly used in archaeological science (emphasis on bone chemistry). Prerequisite: ANTH 2150H or three of BIOL 1020H, BIOL 1030H, CHEM 1000H, CHEM 1010H, GEOG-EGEO 1040H, or PHYS 1001H.

BIOL3170H - Plant Evolution and Diversity

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Examines major transitions in the evolution of terrestrial plants with a focus on the evolutionary relationships among the main lineages of the flowering plants and the mechanisms underlying the tremendous diversity of this group. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL 2600H and an additional 0.5 credit at the 2000 level in BIOL or BIOC.

BIOL3180H - Plants in Action

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Due to a sessile nature, plant functioning is unique and highly dynamic. Emphasizing the flowering plants, this course provides an introduction to plant anatomy, physiology, and molecular biology. It examines the mechanisms by which plants work and survive in their role as energy providers to the biosphere. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL 1020H and 1.0 BIOL credit at the 2000 level. Strongly recommended: BIOL 3170H. Not open to students with credit for BIOL-SAFS 3530H.

BIOL3190H - Wild Plants of Ontario

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An introduction to Ontario's remarkable plant diversity, with emphasis on the study of common flowering plant families. Examines the natural history of plants in the Ontario flora, highlighting key concepts in plant evolution, ecology, and reproductive biology. This is a field course, and a separate course fee to cover transportation and accommodation will be levied. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL 1020H and 1.0 BIOL credit at the 2000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL3200H - Fungi: Functions, Friends, Foes

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
As the Hidden Kingdom, fungi are covert, critical players in life processes. This course examines unique anatomical, cellular, biochemical and ecological processes by which fungi function as energy salvagers, earth makers, life enablers and pathogenic killers. It further explores applications of mind alteration, body healing, materials, foods, and environmental remediation. Prerequisite: 8.0 university credits including 60% or higher in BIOL 2070H and 60% or higher in an additional 0.5 BIOL credit at the 2000 level.

Academic Level
Undergraduate

Course Designation
Science

BIOL3210H - Principles of the Nervous System

Overview

Department(s)
Biology, Psychology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Psychology - Not Set

Cross-Lists
PSYC-3210H

Course Description
An intensive coverage of the central nervous system, its anatomy, and physiological interactions. Emphasizes subcortical and cortical brain structures and their functional characteristics. Prerequisite: 8.0 university credits including 60% or higher in one of BIOL 2070H, 3111H (2110H), 3840H, or PSYC 2200H, and 60% or higher in an additional 0.5 credit at the 2000 level in BIOL or PSYC.

BIOL3220H - Neuropsycology

Overview

Department(s)
Psychology, Biology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%, Biology - Not Set

Cross-Lists
PSYC-3220H

Course Description
An examination of the relationship between brain function and psychological processes, drawing heavily from contemporary research involving humans and animals and describing the neural bases for such psychological processes as learning, memory, language, and emotion. Special attention is given to behavioural abnormalities resulting from brain pathology. Prerequisite: 8.0 university credits including PSYC 2200H or PSYC-KINE 2210H or PSYC-BIOL 3210H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL3240H - Agricultural Entomology

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
SAFS-3240H

Course Description
Looks at how integrated pest management methods (IPM) are applied to agricultural insect pests. Students will examine the principles of IPM, the role of insects in soil ecology, insects as allies in pest management and as pollinators, monitoring and sampling, and control methods (pesticide and organic). Prerequisite: 9.0 university credits including BIOL 1020H. Equivalent to SAFS-BIOL 3110H.

Academic Level
Undergraduate

Science

Credit Value

:
0.5

BIOL3250H - Microbiology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An introduction to microbiology with consideration given to the diversity of microscopic forms, their presence in various habitats, and their impact on humanity. Heavy emphasis is placed on laboratory work. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL 2070H and an additional 0.5 BIOL or BIOC credit at the 2000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

BIOL3260H - Applied Biomonitoring

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
ERSC-3260H

Course Description
Exploration of the scientific basis and practical need for biomonitoring frames the field application of biomonitoring protocols for community clients in terrestrial and aquatic environments. Prerequisite: ERSC 2240H or 2230H or equivalent or ERSC-BIOL 2260H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

0.5

BIOL3310H - Protein Chemistry and Enzymology

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
CHEM-3310H

Course Description
The structure and function or proteins, key protein biophysical methods, and enzyme mechanisms are treated in detail. Students use web-based resources such as ExPASy and the Protein Data Bank, and gain practical laboratory experience in bioseparations and the determination of enzyme rate parameters. Prerequisite: CHEM-BIOL 2300H and one of CHEM 2100H or 2110H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL3320H - Metabolism

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
CHEM-3320H

Course Description
The key topics are biological processes that produce and use high-energy biomolecules. These include membrane transport, multienzyme pathways, and their regulation. With their skills acquired in CHEM-BIOL 3310H, students are given more freedom for independent laboratory work in devising and executing their own enzyme purification scheme. Prerequisite: CHEM-BIOL 3310H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

0.5

BIOL3330H - Forensic Entomology

Overview

Department(s)
Biology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Forensic Science - Not Set

Cross-Lists
FRSC-3330H

Course Description
Many insect species associated with the process of decay of corpses and their maggots have been used as an important tool for identifying both the timing and location of death. This course explores the relationship between insects and the decay of corpses. Prerequisite: 8.0 university credits including 60% or higher in 1.0 BIOL and/or BIOC credit at the 2000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL3340H - Herpetology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An introduction to the biology of amphibians and reptiles. Includes an overview of past and current diversity, the use of amphibians and reptiles as model organisms for biological research, the importance of these animals in ecological communities, and issues in conservation and management. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL-ERSC 2260H and BIOL 2600H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL3360H - Behavioural Ecology

Overview

Department(s)
Biology, Psychology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Psychology - Not Set

Cross-Lists
PSYC-3360H

Course Description
An introduction to the ecological, physiological, and evolutionary mechanisms which influence the behaviour of animals, with emphasis on social relations, mating systems, selection, and co-evolution. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL-ERSC 2260H and BIOL 2600H.

0.5

BIOL3370H - Organic Agriculture: Principles and Practices

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
ERSC-3370H, SAFS-3370H

Course Description
Focuses on farming methods and requirements for organic production. The importance of ecological processes, biodiversity, rotation, and organic amendments in organic crop production will be discussed. The standards, certification, packaging, and diversity of markets for organic foods will be emphasized. Mandatory field trips to organic farms. Prerequisite: SAFS 1001H and SAFS-BIOL-ERSC 2350H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

0.5

BIOL3380H - Advanced Ecology

Overview

Department(s)
Biology, Environment

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Environment - Not Set

Cross-Lists
ERSC-3380H

Course Description
Examines current theoretical and applied problems in ecology. Emphasis is placed on developing problem-solving skills, critical evaluation of ecological studies, modelling, and an in-depth look at recent advances in theories and laboratory and field techniques used in solving problems in individual, population, community, and ecosystem ecology. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL-ERSC 2260H and an additional 0.5 credit at the 2000 level in BIOL, BIOC, or ERSC.

Academic Level
Undergraduate

Course Designation
Science

BIOL3460H - Biocultural Explorations of the Human Life Course

Overview

Department(s)
Anthropology, Biology

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Biology - Not Set

Cross-Lists
ANTH-3460H

Course Description
A survey of the human life course through a bio-cultural lens, focusing on life history theory, demography, growth and development, adaptive human biology, determinants of health, and aging. The human species on the individual and population levels is seen as a product of evolutionary and biological forces, and of culture and society. Prerequisite: ANTH 1001H (or both 1010H and 1020H) or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:

BIOL3510H - Astrobiology: Life in the Universe

Overview

Department(s)
Physics & Astronomy, Biology

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Biology - Not Set

Cross-Lists
PHYS-3510H

Course Description
An examination of the prospects for extraterrestrial life, based primarily on material from astronomy, biology, and planetary science. Topics include the origin and evolution of life on Earth, extremophiles, the habitability of Mars and Jovian moons, the nature and habitability of exoplanets, SETI, the Drake equation, and the Fermi paradox. Prerequisite: 5.0 university credits including at least one of BIOL 1020H, BIOL 1030H, BIOM 1000H, PHYS 1510H, or PHYS 1520H. Not for credit toward a major or minor in Physics.

BIOL4030H - Research Design and Data Analysis

Overview

Department(s)
Biology, Environment

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Environment - Not Set

Cross-Lists
ERSC-4030H

Course Description
Theoretical and practical instruction in design of research projects, with emphasis on appropriate statistical methods through the use of the statistical program R. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including 1.0 BIOL and/or ERSC credit at the 3000 level and one of MATH 1052H or GEOG-ERSC 2080H. Not open to students with credit for ADMN 3610H.

Academic Level
Undergraduate

BIOL4040D - Project Course in Biochemistry (double credit)

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
CHEM-4040D

Course Description
At least 16 hours per week; otherwise as CHEM 4030Y. May not be combined with any other project courses for credit toward the Biochemistry & Molecular Biology degree. Prerequisite: An average of 75% in all previous Chemistry courses and permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
2

BIOL4060H - The Geochemistry of Natural Waters

Overview

Department(s)
Environment, Biology, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Geography - Not Set

Cross-Lists
EGEO-4060H, ERSC-4060H, GEOG-4060H, WASC-4060H

Course Description
Examines the chemistry of freshwater systems. Chemical and physical processes that lead to changes in water quality are discussed. The emphasis is on the concentrations and distributions of contaminants. Topics include watershed contributions of chemicals, acidification and the carbonate system, weathering, redox chemistry, trace metals, and synthetic organic contaminants. Prerequisite: ERSC 2230H or ERSC-CHEM 2620H.

Academic Level
Undergraduate

Course Designation
Science

:
0.5

BIOL4070H - The Fate of Contaminants in the Aquatic Environment

Overview

Department(s)
Environment, Biology, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Geography - Not Set

Cross-Lists
EGEO-4070H, ERSC-4070H, GEOG-4070H, WASC-4070H

Course Description
Discusses approaches to predicting the fate of contaminants in aquatic systems. Basic assumptions and algorithms of fate models for toxic metals and organic xenobiotics are examined and students get hands-on experience in applying recent models to case studies. Prerequisite: ERSC-GEOG-BIOL 4060H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL4080H - Developmental Biology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An exploration of the cellular and molecular bases of embryonic development. Emphasis is placed on how the intricate and diverse processes of embryogenesis are dependent on common mechanisms, including cell division, cell death, adhesion, migration, gene expression, and intra- and inter-cellular signalling. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL 2070H, 3080H, and an additional 0.5 BIOL credit at the 3000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL4130H - Human Cell Biology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Focuses on fundamental aspects of human cell biology ranging from organelle function to intercellular communication. Recent technological advances in the field are also discussed. The goal of this course is to develop a holistic view of the cell to enable an understanding of its importance to life and human disease. Prerequisite: Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL 2070H, 3080H, and an additional 0.5 BIOL credit at the 3000 level.

Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL4140H - Ornithology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An introduction to the study of birds. Covers broad areas in ornithology, including field identification, systematics, ecology, behaviour, anatomy, physiology, management, and conservation. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL 3111H (2110H) and 0.5 additional BIOL credit at the 3000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL4160H - Immunology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An introduction to the immune system, including a discussion of the organs, cells, and molecules that constitute, as well as regulate, the immune system. Health-related aspects of the immune system, such as immunodeficiency, tumour immunology, and allergies are also explored. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL 2070H and 1.0 BIOL credit at the 3000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL4180H - Mammalogy

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An exploration of the evolution, anatomy, ecology, behaviour, and management of terrestrial mammals. Labs are devoted to field techniques and species identification, with emphasis on Canadian forms. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL-ERSC 2260H, BIOL 3111H (2110H), and 0.5 additional BIOL credit at the 3000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

BIOL4230H - Mathematical Biology

Overview

Department(s)
Mathematics & Statistics, Biology

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Biology - Not Set

Cross-Lists
MATH-4230H

Course Description
Covers classic topics in mathematical biology, including population biology, epidemiology, and mathematical ecology of a single or interacting species. The course addresses modeling of life-science problems by using difference/differential equations and applications of dynamical systems theories. Prerequisite: MATH-PHYS 3150H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

BIOL4240H - Fisheries Assessment and Management

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
ERSC-4240H

Course Description
Principles and practices of fisheries assessment and management, including an examination of management problems in freshwater and marine fisheries from ecological, socio-economic, and policy perspectives. Topics include stock assessment techniques, stocking and fertilization, management of warmwater and coldwater species, and local management initiatives. Prerequisite: 9.0 university credits including one of BIOL 2260H or ERSC 2240H and one of ERSC 2080H or MATH 1051H. Recommended: One of ERSC 3510H or BIOL 3050H or 3140H. Students who have successfully completed ERST-CAST 2520H and 2525H may take the course, but must be prepared to do additional background reading.

0.5

BIOL4250H - Cellular and Molecular Biology of Aging

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Explores the cellular and molecular mechanisms that drive tissue and organismal aging. Topics include mechanisms of aging, animal model systems used to study aging, putative anti-aging therapies (e.g., senolytics), and age-dependent diseases related to the musculoskeletal, cardiovascular, and immune systems. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL 3080H and 0.5 additional BIOL credit at the 3000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL4260H - Virology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Discusses current virology topics with a particular emphasis on the impact of viruses on society. The biology and biochemistry of animal viruses are examined with analysis of selected topics including emerging viral diseases, viral gene therapy, viruses and immune system, viruses and cancer, and bioterrorism. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL 2070H and 1.0 BIOL credit at the 3000 level.

Academic Level
Undergraduate

Course Designation
Science

0.5

BIOL4270H - Nutrient Cycling in Ecosystems

Overview

Department(s)
Environment, Geography, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set, Biology - Not Set

Cross-Lists
ERSC-4270H, GEOG-4270H, SAFS-4270H

Course Description
Examines plant nutrition, soil fertility, and fertilizer management, with a focus on essential macronutrients. Topics include biogeochemical cycling of nitrogen, phosphorus, potassium, calcium, magnesium, and sulphur in crop production. Sustainable management of nutrients for optimum productivity and minimum impact on the environment will be discussed. Prerequisite: SAFS-ERSC-GEOG 3560H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL4300H - Bioinorganic Chemistry

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
CHEM-4300H

Course Description
The essential biological roles of metals are usually acknowledged but seldom discussed in most biochemistry courses. Includes an introduction to coordination chemistry and a survey of the roles of metals in enzyme catalysis, oxygen transport, photosynthesis, cell mobility, gene expression, and environmental toxicity. Prerequisite: CHEM-BIOL 3310H and 3320H; or CHEM 2200H and CHEM-BIOL 2300H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL4310H - Current Topics in Biochemistry

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
CHEM-4310H

Course Description
A survey of the questions that are of greatest interest to biochemists. Relies extensively on reading and understanding primary literature sources published within the last four years. Students give presentations in class as part of the course evaluation. Prerequisite: CHEM-BIOL 3310H and 3320H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

BIOL4320H - Pharmacology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An introduction to human pharmacology divided into two sections: pharmaco-kinetics and pharmacodynamics. Drugs to be studied include mainstream medications such as antibiotics, ethanol, and drugs used in the treatment of pain, high blood pressure, asthma, ulcers, and depression, as well as a brief discussion of alternative medications. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including both CHEM 1000H and 1010H, one of BIOL 3830H or 3840H, and 0.5 additional BIOL credit at the 3000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

BIOL4330H - Global Change of Aquatic Ecosystems

Overview

Department(s)
Biology, Environment

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Environment - Not Set

Cross-Lists
ERSC-4330H

Course Description
Emphasizes the causes and consequences of global environmental change and their interactions with ecological processes in freshwater ecosystems. Issues such as biodiversity, population growth and water use, global warming, land use, emergent diseases, dams, aquaculture, fisheries, water supply, and sustainability are discussed. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including MATH 1052H, one of BIOL 2000H or BIOL-ERSC 2260H, and 1.0 BIOL and/or ERSC credit at the 3000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

BIOL4340H - Biological Stoichiometry

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Biological stoichiometry is the study of balance of energy and multiple chemical elements in living systems including its effects on organismal biochemistry, nutrition, physiology, and ecological dynamics. This course focuses on the principles, application, and recent advances in the field of biological stoichiometry. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including one of BIOL 2070H or BIOL-ERSC 2260H and 1.0 BIOL credit at the 3000 level.

Undergraduate

Course Designation
Science

Credit Value
:
0.5

BIOL4355H - Pathophysiology of Disease

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Introduces the symptoms of various diseases and the disordered physiological processes that cause these symptoms. Seminars examine specific diseases through discussion of case studies. By the end of the course, students should be able to understand and describe how physiological processes are altered in various common diseased states. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including one of BIOL 1051H, 1500H, or 1501H and 1.0 BIOL credit at the 3000 level, or one of BIOL 3830H or 3840H and 0.5 additional BIOL credit at the 3000 level.

BIOL4370H - The Gut Microbiome

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
You are a superorganism whose body hosts more gut microbes than human cells. How do these microbes colonize us and subsequently impact our health, metabolism, and even brain function? How are our gut microbes affected by antibiotics? This course explores how our gut microbial ecosystem can impact our body. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL 3250H and 0.5 additional BIOL credit at the 3000 level.

Academic Level
Undergraduate

Course Designation
Science

:
0.5

BIOL4380H - Research and Methods in Gene Expression

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
All cells in multi-cellular organisms including humans contain the same DNA, but the control of genes determines the function and identity of each cell type. This course discusses mechanisms controlling gene expression at the transcriptional, post-transcriptional, and epigenetic levels in prokaryotes and eukaryotes, and explains relevant laboratory techniques. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL 3080H and 0.5 additional BIOL credit at the 3000 level.

Academic Level
Undergraduate

Course Designation

0.5

BIOL4400Y - Placement in Conservation Biology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
An apprenticeship at a collaborating agency working in biological conservation. Students assist in a project pertaining to research and conservation of living things for the equivalent of approximately six hours per week. Evaluation is based on a written appraisal from the agency, as well as a written report and an oral presentation. Course is graded on a pass/fail basis. Open only to Honours students in Biology or Conservation Biology. Prerequisite: A minimum cumulative average of 75% and 13.5 university credits including BIOL-ERSC 2260H, BIOL 3391H, and BIOL 3600H. Enrolment is limited and competitive. Students must apply in the academic year before enrolment in the course. Application forms may be obtained from the department website at trentu.ca/biology/experience and must be submitted to the placement officer. BIOL 4400Y may be taken jointly with BIOL 4010Y where the project warrants, but the student may not receive credit for a single-credit thesis in another department or program.

BIOL4410H - Urban Ecology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Urban ecology is a unique branch of ecology that focuses on heavily altered environments and their distinct communities that include humans. Course subjects include nature in the city, the urban environment, and nature connectedness. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL-ERSC 3380H and 0.5 additional BIOL credit at the 3000 level.

BIOL4510H - Species-at-Risk Biology and Policy

Overview

Department(s)
Biology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Forensic Science - Not Set

Cross-Lists
FRSC-4510H

Course Description
Examines the quantitative assessment of biological parameters impacting species and populations at risk under governmental species-at-risk legislation. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including 0.5 BIOL credit at the 3000 level and one of BIOL-FRSC 2050H or BIOL 2260H. Recommended: BIOL 3391H.

BIOL4550H - One Health

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
The interdependence of the health of humans, animals, and ecosystems is a foundational pillar of One Health, an integrated framework approach to solving problems such as climate change, pandemics, the provision of safe and nutritious food, and the need for clean water. In this course, health is explored from scientific and socio-cultural perspectives. Prerequisite: A minimum overall average of 75% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including: BIOL 1020H, 2050H, 2070H, and 2600H; one of BIOL 1030H or BIOM 1000H; one of BIOL 2000H, GEOG-ERSC 2080H, MATH 2560H, PSYC 2018H, or PSYC 2019H; and 2.0 BIOL credits at the 3000 level.

BIOL4570H - Microbial Forensics

Overview

Department(s)
Forensic Science, Biology

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%, Biology - Not Set

Cross-Lists
FRSC-4570H

Course Description
Students gain knowledge of microbes and other biological agents used in criminal endeavours and an overview of the methods used to detect crimes involving biological agents and link them to individual perpetrators. Bioterrorism and agricultural bioterrorism are discussed. Prerequisite: 60% or higher in FRSC 2030H and a pass in one of FRSC 3000H, FRSC 3111H, BIOL 3080H, or BIOL 3250H.

Academic Level

Undergraduate

Course Designation
Science

Credit Value

:
0.5

BIOL4610H - Evolutionary Ecology

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Explores the processes shaping adaptive evolution and key aspects of organismal fitness, including life spans, sex, and gender. Seminars reinforce lecture material, but also cover additional topics. Two writing assignments provide opportunities for independent study. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL-ERSC 2260H, BIOL 2600H, and 1.0 BIOL credit at the 3000 level.

BIOL4630H - Epigenetics

Overview

Department(s)
Biology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%

Course Description
Epigenetics is the study of gene functions that are mitotically and/or meiotically heritable, but which do not entail a change in the sequence of DNA. This course reviews these epigenetics mechanisms and discusses how they influence cellular identity, development, predisposition to disease, tumorigenesis, and onset of neurological disorders. Prerequisite: A minimum overall average of 65% in completed BIOL/BIOC/BIOM courses and 12.0 university credits including BIOL 3080H and 0.5 additional BIOL credit at the 3000 level.

BIOL4840H - Neuroendocrinology of Stress

Overview

Department(s)
Biology, Psychology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Psychology - Not Set

Cross-Lists
PSYC-4840H

Course Description
Explores the interactions between the central nervous and endocrine systems, focusing on the hypothalamic-pituitary-adrenal axis. Examines the control of hormone release, including neurotransmitter modulation and steroid feedback during both homeostatic and stressor-induced states. Also, the interaction among stressors, behaviour, the endocrine system, and disease is considered. Prerequisite: 12.0 university credits including 65% or higher in one of BIOL-PSYC 3210H, BIOL 3840H, PSYC-BIOL 3220H, or PSYC 4225H.

BIOM1000H - Foundations in Biomedical Science

Overview

Department(s)
Biomedical Science

Contact Department ('not set' refers to cross-listed depts)
Biomedical Science - 100%

Course Description
Examines mechanisms and determinants of health and disease by focusing on molecular and cellular processes. Students are introduced to theories and research techniques in cellular and molecular biology, genetics, microbiology, biochemistry, physiology, and psychology. Open only to students in the Biomedical Science program. Not open to students with credit for BIOL 1030H.

BIOM4450Y - Placement in Biomedical Science

Overview

Department(s)
Biomedical Science

Contact Department ('not set' refers to cross-listed depts)
Biomedical Science - 100%

Course Description
A placement in a medically or health related setting for the equivalent of six hours a week for 24 weeks (BIOM 4450Y) or 12 weeks (BIOM 4451H). Students are required to write a report on their placement. Course is graded on a pass/fail basis. Open only to students in the Biomedical Science program. Prerequisite: A minimum cumulative average of 75% and 14.0 university credits including BIOL 3040H, BIOL 3080H, one of BIOL 3830H or 3840H, and an additional 0.5 BIOL credit at 3000 level or beyond. The deadline for students to secure placements is August 10. Application forms may be obtained from the Biology website under forms at trentu.ca/biology/experience and must be submitted before April 15 in the year prior to enrolment. Students may not apply retroactively. Students may take only one of BIOM 4450Y, 4451H, or 4460H for credit.

BIOM4460H - Internship in Medical Sciences

Overview

Department(s)
Biomedical Science

Contact Department ('not set' refers to cross-listed depts)
Biomedical Science - 100%

Course Description
A placement in a hospital, human, or animal health-care setting (e.g., dental or veterinary clinic) for at least three hours a week for 12 weeks. Students are assigned practical readings and background theory from their preceptor(s). Course is graded on a pass/fail basis. Open only to students in the Biomedical Science program. Prerequisite: A minimum cumulative average of 80% and 14.0 university credits including BIOL 3040H, BIOL 3080H, one of BIOL 3830H or 3840H, and an additional 0.5 BIOL credit at the 3000 level or beyond. Enrolment is limited and competitive. The minimum averages for acceptance may be higher than those required to apply for the internship, especially for an internship at a hospital. Students must apply in the year before anticipated enrolment in the course. The deadline for students (regardless of which term the internship is in) to submit all required paperwork, including confirmation of all required vaccinations and police check, is August 10. Application forms may be obtained from the Biology website under forms at trentu.ca/biology/experience and must be submitted before April 15. Students may not apply retroactively. Students may take only one of BIOM 4460H, 4450Y, or 4451H for credit.

CAST1104H - Local Lives: Everyday Dimensions of Canadian Life

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
While often imagined as a national construct, everyday Canadians' lives are largely organized at the local level. This course explores the local, focusing upon the key social organizations and institutions that shape the real experience of ordinary Canadians, especially with the urban experience.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST1105H - Hockey and Canada

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
Invites students to explore contemporary Canadian social, cultural, and ecological issues through the lens of hockey.

CAST2011H - Governing Canada: Issues and Challenges

Overview

Department(s)
Political Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set

Cross-Lists
POST-2011H

Course Description
Provides a systematic introduction to the core institutions and processes of Canadian government such as the Canadian constitution, Parliament, the civil service, the electoral system, policy-making, political parties, interest groups, and social movements. Examines how well these institutions and processes function to promote democratic governance. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2012H - Democratizing Canada: Contemporary Issues

Overview

Department(s)
Political Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set

Cross-Lists
POST-2012H

Course Description
Provides a systematic introduction to Canadian democracy, examining political relationships between citizens and state, and in turn, relating these to broader patterns and politics for democratic change in Canadian society. Examines the demands for democratic change made by key groups and the politics of those demands. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2021H - French Colonialism in Canada, 1500-1763

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
HIST-2021H

Course Description
Provides an introductory survey of French colonialism in North America, from the first French incursions on the continent to the cession of its colonies to Britain in 1763. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2043H - Canada the Land Before 1885

Overview

Department(s)
Canadian Studies, Environment, Geography, Education, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Environment - Not Set, Geography - Not Set, Education - Not Set, Political Studies - Not Set

Cross-Lists
EDUC-2043H, ERST-2043H, GEOG-2043H, POST-2043H

Course Description
An inquiry into the emergence of the Canadian nation-state in the context of Indigenous North America. An exploration of how different peoples have tried and sometimes failed to live together. A story whose outcome depends on our capacity to build meaningful relationships with one another and with the land itself. Prerequisite: 3.0 university credits. Not open to students with credit for CAST-ERST-GEOG-INDG 2040Y or 2041H.

Academic Level
Undergraduate

Credit Value
:
0.5

CAST2044H - Canada the Land After 1885

Overview

Department(s)
Canadian Studies, Environment, Geography, Education, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Environment - Not Set, Geography - Not Set, Education - Not Set, Political Studies - Not Set

Cross-Lists
EDUC-2044H, ERST-2044H, GEOG-2044H, POST-2044H

Course Description
An inquiry into the emergence of the Canadian nation-state in the context of Indigenous North America. An exploration of how different peoples have tried and sometimes failed to live together. A story whose outcome depends on our capacity to build meaningful relationships with one another and with the land itself. Prerequisite: 3.0 university credits. Not open to students with credit for CAST-ERST-GEOG-INDG 2040Y or 2042H.

Academic Level
Undergraduate

Credit Value
:
0.5

CAST2090H - Canada and the Role of Law

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
Explores the relationship between Canadian law and society. Provides a foundation for understanding how the Canadian legal system is structured, how it works, and what role it plays in domestic and international relations. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2211H - Violence and the Project of Canada: From Spectacular Punishment to Genocide, 1600s to 1800s

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
HIST-2211H

Course Description
Seeks to destabilize conventional narratives of pre-twentieth-century Canadian history, which tend to present the region's history as characterized by peaceful accommodation and "progress." Instead, it looks at how violence was deeply ingrained in the colonial project of what would become Canada, and profoundly influenced social, political, racialized, class-based, and gender relations. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2215H - Ontario Before 1945

Overview

Department(s)
Canadian Studies, History, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set, Political Studies - Not Set

Cross-Lists
HIST-2215H, POST-2215H

Course Description
A study of Ontario as a political, economic, and cultural region. Topics may include provincial political culture and state formation; writers and artists; farms, factories, and cities; education policy; First Nations; the provincial north; Ontario in the Great Depression; Ontario and Canada. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2225H - Ontario Since 1945

Overview

Department(s)
Canadian Studies, History, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set, Political Studies - Not Set

Cross-Lists
HIST-2225H, POST-2225H

Course Description
Transformations in Ontario politics and culture from the Second World War to the present. Topics may include immigration, human rights, Toronto's growth, the Ontario north, economic restructuring from the Autopact to USMCA, health, education, and social policy. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2236H - Rebellions and Responsible Government: Canada, 1832-1849

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
The origins and history of the rebellions of 1837 and 1838 in Upper and Lower Canada and the fight over democracy and responsible government in British North America in the 1840s. Course operates in conjunction with Season One of the audio podcast series 1867 & All That and students learn to create and edit podcast episodes in a flipped classroom with an intensive writing focus. Prerequisite: 3.0 university credits or permission of the instructor. Not open to students with credit for CAST-HIST 2235H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2237H - The Kingdom of Canada: Canada, 1850-1867

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
Examines the political origins of Canada in the midst of religious and ethnic violence in the 1850s and 1860s. Instead of a regular essay, students create an audio podcast episode as the major course assignment. Course operates in conjunction with Season Two of the audio podcast series 1867 & All That. Prerequisite: 3.0 university credits. Not open to students with credit for CAST-HIST 2235H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2245H - Contemporary Canadian Immigration

Overview

Department(s)
Political Studies, Canadian Studies, Gender & Social Justice, Geography

Contact Department ('not set' refers to cross-listed depts)
Political Studies - Not Set, Canadian Studies - 100%, Gender & Social Justice - Not Set, Geography - Not Set

Cross-Lists
GEOG-2245H, POST-2245H, GESO-2245H

Course Description
The contemporary context for Canada's policy of immigration and the political and economic consequences of immigration in Canada using gender, class, and race analysis. Immigration policy and experiences of immigrant resettlement in the most diversified period of Canadian immigration. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2250H - Introduction to Democratic Leadership

Overview

Department(s)
Political Studies, Canadian Studies, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Philosophy - Not Set

Cross-Lists
PHIL-2250H, POST-2250H

Course Description
Introduces students to the field of political leadership. Some classic texts on the challenges of leadership are engaged. The course focuses on key ethical dilemmas and strategic choices that leaders face in the real world, considers the complexity of leadership in a globalized world, and surveys the role of trust in positive, transformational leadership. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2256H - The Histories of Indigenous Peoples in Canada

Overview

Department(s)
Canadian Studies, History, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set, Indigenous Studies - Not Set

Cross-Lists
HIST-2256H, INDG-2256H

Course Description
A study of Indigenous involvement in the fur trade and imperial politics of the eighteenth century, the development of European "civilizing" policies, and the growth and ideology of the modern Indigenous political movement. Prerequisite: 3.0 university credits, including 1.0 CAST, HIST, and/or INDG credit at the 1000 level with a minimum of 60%. Not open to students with credit for CAST-HIST-INDG 2255Y.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2285H - Canada in the 1960s

Overview

Department(s)
Canadian Studies, History, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set, Political Studies - Not Set

Cross-Lists
HIST-2285H, POST-2285H

Course Description
Explores this revolutionary decade in Canada's history. Topics may include youth culture and the counterculture, the Cold War, the Vietnam War, Canadian nationalism, the rise of Quebec separatism and terrorism, and transformative liberal reforms including health care, divorce, and laws relating to human sexuality. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2320H - Lands and Environments of the Circumpolar North

Overview

Department(s)
Geography, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
ERST-2320H, GEOG-2320H

Course Description
Explores the lands and environments that define the Circumpolar region and identifies the key issues involving interaction between humans and their environments, examining climate change and its impacts on landscapes, biodiversity, and ecological systems. Provides a broad foundation for the study of circumpolar peoples, economies, landscapes, communities, and adaptation to climate change.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2330H - Changing Resources of the Circumpolar North

Overview

Department(s)
Geography, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
ERST-2330H, GEOG-2330H

Course Description
Provides students with an in-depth understanding of the key issues which define the future of resources and resource use in the Circumpolar North. Focuses upon the challenges of resource management for governments and communities, and assesses the potential conflicts derived from resource use. Prerequisite: GEOG 1045H and GEOG-ERST 2320H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2331H - The Making of Canada to 1873

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
HIST-2331H

Course Description
War, politics, and society in Canada from first encounters between Europeans and Indigenous peoples to the period of Confederation. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2360Y - Canadian History Through Murder, Execution, Assassination, and Suicide from Confederation to the War on Terror

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
HIST-2360Y

Course Description
Was Louis Riel a traitor who deserved to be executed? Did diplomat Herbert Norman kill himself because of American accusations that he was a Communist? Was the bombing of Air India Flight 182 "Canada's 9/11"? This course uses such episodes to explore political, social, economic, and cultural changes in Canada. Prerequisite: 3.0 university credits or permission of the chair. Students may take only one of HIST-CAST 2350Y, 2360Y, or 2361H for credit.

Academic Level
Undergraduate

Credit Value

Undergraduate

Credit Value

:
0.5

CAST2452H - Civilisation québécoise / Quebec Civilization

Overview

Department(s)
French & Francophone Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%, Canadian Studies - Not Set

Cross-Lists
FREN-2452H

Course Description
A survey of the development of a culture from la Nouvelle-France to present-day Quebec and French Canada. Prerequisite: FREN 1102H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2485H - Indigenous Women's Creative Non-Fiction

Overview

Department(s)
Canadian Studies, Indigenous Studies, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Indigenous Studies - Not Set, Gender & Social Justice - Not Set

Cross-Lists
GESO-2485H, INDG-2485H

Course Description
Focuses on creative non-fiction by Indigenous women, including autobiography, life-writing, memoir, mixed-genre essays, and family/community stories revisiting the oral tradition. Emphasizes work published in Canada; includes some "border-crossing" work published in the United States. Prerequisite: 4.0 university credits including one of CAST 1101H, GESO 1001H, or INDG 1001H. Not open to students with credit for CAST-INDG-WMST 3480Y.

Academic Level
Undergraduate

Course Designation
Indigenous Course Requirement

Credit Value

CAST2520H - Natural Resource Management: Theory and Comparative Cases

Overview

Department(s)
Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set

Cross-Lists
ERST-2520H

Course Description
Canadian natural resource management is examined with attention to the context within which management occurs, and the requirement to address different interests, understandings, and issues. Prerequisite: 4.0 university credits including 1.0 ERSC credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2525H - Critical Environmental Thinking: Political Economy and Policy Process

Overview

Department(s)
Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set

Cross-Lists
ERST-2525H

Course Description
The context of market theory and ecological/resource economics is used to provide environmental students with experience in critical thinking. Objectives are to understand the framework of political economy, particularly Canadian, that informs contemporary political and economic practice, and to master basic elements of critical research and writing. Prerequisite: 4.0 university credits including 1.0 ERSC/T or CAST credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2600Y - Documenting Canada

Overview

Department(s)
Canadian Studies, Gender & Social Justice, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Gender & Social Justice - Not Set, Media Studies - Not Set

Cross-Lists
WMST-2600Y

Course Description
Documentary film, music, and poetry as modes of inquiry into contemporary Canadian life. Topics may include gender and the arts; community and memory; climate change and the "Anthropocene"; ecological ethics; the politics of indigeneity; cultural approaches to addiction and education; grief and emotional renewal. Prerequisite: 3.0 university credits. Students may take only one of CAST-GESO-MDST 2600Y or 2601H for credit.

Academic Level
Undergraduate

Credit Value

:
1

CAST2710H - Cities: an Introduction to Urban Geography

Overview

Department(s)
Geography, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
ERST-2710H, GEOG-2710H

Course Description
Cities are dynamic and contradictory spaces. Focusing on the lived spaces of the city, the course explores the ideologies, practices, and geographical processes shaping the transformation of cities. Special attention is made to integrate urban theory with the everyday uses of urban space. Prerequisite: 4.0 university credits including GEOG-ERST-SAFS 1030H.

Academic Level
Undergraduate

Credit Value

0.5

CAST2711H - Acting Up! Feminism and History in Canada

Overview

Department(s)
History, Gender & Social Justice, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - Not Set, Gender & Social Justice - 100%, Canadian Studies - Not Set

Cross-Lists
GESO-2711H, HIST-2711H

Course Description
An overview of the history of feminist ideas, strategies, and actions in Canada. We explore the diversity and distinctiveness of Canadian feminism at different historical moments, celebrating the strength and creativity of organized and individual forms of resistance, while also probing the complicated, difficult, and sometimes "messy" workings of feminism. Prerequisite: 4.0 university credits including 0.5 GESO, WMST, CAST, or HIST credit at the 1000 level, or permission of instructor. Equivalent to WMST 2711H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2755H - Women in Canada: Women and the Arts

Overview

Department(s)
Canadian Studies, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Gender & Social Justice - Not Set

Cross-Lists
GESO-2755H

Course Description
Selected studies in Canadian women's artistic expression, exploring a variety of art forms and genres. Includes fiction about gender and the arts in Canada. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST2810H - Canada's People and Places

Overview

Department(s)
Geography, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set

Cross-Lists
GEOG-2810H

Course Description
Explores the geography of Canada and its peoples and places. Examines the development of Canada's cultural landscapes and regions, and the social, economic, and political development of the Canadian nation-state. Canada's geography is explored as an east-west nation under increasing pressure from globalization and new national agendas. Prerequisite: GEOG 1030H.

Academic Level
Undergraduate

Credit Value

CAST3031H - TV Guide: Television in Canada

Overview

Department(s)
Canadian Studies, Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Culture, Arts, and Media - Not Set, Media Studies - Not Set

Course Description
An introduction to television in Canada focusing on issues, content, and regulation from the 1950s until current day, including the impact of digital and Internet broadcasting. Themes include race, politics, region, and identity in the context of Canadian TV culture. Prerequisite: 4.0 university credits including 1.0 CAST or CUST credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3041H - The Changing Land

Overview

Department(s)
Canadian Studies, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Environment - Not Set, Geography - Not Set

Cross-Lists
EDUC-3041H, ERST-3041H, GEOG-3041H

Course Description
This course invites students to think of climate change as a communication event between human beings and the earth. It tasks them with re-establishing a reciprocal relationship with a specific place. There is an outdoor component to this course. Prerequisite: One of CAST-ERST-GEOG-INDG 2041H, CAST-ERST-GEOG-INDG 2042H, CAST-EDUC-ERST-GEOG 2043H, or CAST-EDUC-ERST-GEOG 2044H.

CAST3042H - Reading the Wilderness in Canada

Overview

Department(s)
Canadian Studies, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Environment - Not Set, Geography - Not Set

Cross-Lists
ERST-3042H, GEOG-3042H

Course Description
An examination of shifting ideas of nature and wilderness in the work of a number of contemporary Canadian artist-thinkers. Special emphasis is placed on ecological literacy, or in learning to read the land as an "ultra-primary" text. Prerequisite: 9.0 university credits including one of CAST-ERST-GEOG-INDG 2041H, CAST-ERST-GEOG-INDG 2042H, CAST-EDUC-ERST-GEOG 2043H, or CAST-EDUC-ERST-GEOG 2044H.

CAST3043H - Magic, Myths, and Monsters of Canada

Overview

Department(s)
Canadian Studies, Education

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Education - Not Set

Cross-Lists
EDUC-3043H

Course Description
An inquiry into the supernatural in Canadian intellectual and artistic traditions. An exploration of the different frameworks of knowledge Indigenous and non-Indigenous peoples bring to their encounters with non-ordinary phenomena. A study of the protocols that safeguard the relationship between human and more-than-human worlds. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3061H - Trudeau's Canada

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
HIST-3061H

Course Description
Examines the first Trudeau era and its enduring legacy vis-à-vis Canadian politics, culture, and society. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST-CAST 4061H. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3071H - Public History

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
HIST-3071H

Course Description
The art of bringing history to a wider public. This course explores issues of memory, commemoration, heritage preservation and interpretation that face historic sites, museums, heritage societies, and archives in Canada and throughout the world. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST-CAST 4071H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3091H - Law and Constitutional Issues

Overview

Department(s)
Canadian Studies, Political Studies, Criminology

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Political Studies - Not Set, Criminology - Not Set

Cross-Lists
CRIM-3091H, POST-3091H

Course Description
Examines the way the Canadian constitution both constrains and opens up possibilities for political change. Includes consideration of formal constitutional interpretation and the politics of the judicial process. Looks at important issues such as the federal-provincial division of powers, secession, Senate reform, and Indigenous self-determination. Prerequisite: 7.0 university credits. Recommended POST-CAST 2011H, POST-CAST 2012H, or PHIL-POST 2150H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3092H - Law and the Charter of Rights & Freedoms

Overview

Department(s)
Political Studies, Canadian Studies, Criminology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Criminology - Not Set

Cross-Lists
CRIM-3092H, POST-3092H

Course Description
Examines key Supreme Court decisions on the Charter of Rights and Freedoms pertaining to fundamental freedoms, democratic rights, legal rights, and equality rights. Assesses the role of the Charter in advancing the struggles of groups such as women, racialized communities, LGBTQ persons, and people with disabilities. Prerequisite: 7.0 university credits. Recommended POST-CAST 2011H, POST-CAST 2012H, or PHIL-POST 2150H.

Undergraduate

Credit Value

:
0.5

CAST3094H - Public Leadership in Action

Overview

Department(s)
Canadian Studies, Communications

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Communications - Not Set

Cross-Lists
COMM-3094H

Course Description
Empowers students with the unique knowledge and concrete skills to channel their inner leader and advocate, organize people and communities in campaigns for change, and mobilize power to ensure sustained impacts. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3103H - Screen Shots: Indigenous Documentaries and Cinematic Storytelling

Overview

Department(s)
Indigenous Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Canadian Studies - Not Set

Cross-Lists
INDG-3103H

Course Description
Designed to allow students to examine the representation of Indigenous peoples via the narrative storytelling medium of documentary and cinematic films. The course specifically looks at how the National Film Board of Canada (NFB) has served as cultural platforms for storytelling about Indigenous peoples and also storytelling by Indigenous peoples.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3120H - Canadian Environmental Policy

Overview

Department(s)
Environment, Political Studies, Forensic Science, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Political Studies - Not Set, Forensic Science - Not Set, Canadian Studies - Not Set

Cross-Lists
ERST-3120H, FRSC-3120H, POST-3120H

Course Description
An interdisciplinary inquiry into how environmental policies in Canada are developed, implemented, and improved, applying political, economic, legal, scientific, Indigenous, and moral perspectives. Focus is on federal, provincial, and municipal contexts, recognizing that the environment does not respect jurisdictions. Topics include energy and materials use, biodiversity, toxic substances, waste management, and land use. Prerequisite: 1.0 ERST, CAST, POST, and/or ADMN credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3141H - Gender, Health, and Environments

Overview

Department(s)
Gender & Social Justice, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
ERST-3141H, GESO-3141H

Course Description
Examines feminist engagements, in theory and practice, with environmental movements, issues, and health concerns, primarily in North America but with attention to north/south interconnections. Topics may include ecological feminisms, environmental justice, gender and climate change, environmental links to breast cancer and reproductive health, green consumerism, and gendered food politics. Prerequisite: 7.0 university credits including 0.5 GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for WMST-CAST-ERST 3140Y. Equivalent to WMST 3141H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3161H - Gender and Colonialism: Canada Before the Twentieth Century

Overview

Department(s)
Gender & Social Justice, Canadian Studies, History

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, History - Not Set

Cross-Lists
HIST-3161H, GESO-3161H

Course Description
Examines gender disruptions and relations in the early colonial period of Canada's history. Students analyze how gender, together with class, race, and language, informed early relationships between Turtle Island's First Peoples, newcomers to this land, and the settler colonial state. Topics may include slavery, treaties, white settler societies, law, labour, education, and political and social organizing. Prerequisite: 1.0 GESO, WMST, and/or HIST credit with a minimum 60% grade, or permission of instructor. Not open to students with credit for GESO-HIST-CAST 3160Y or 4160Y. Equivalent to WMST 3161H.

Academic Level
Undergraduate

Credit Value
:
0.5

CAST3162H - Modernizing Women: Twentieth-Century Canada

Overview

Department(s)
Canadian Studies, History, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set, Gender & Social Justice - Not Set

Cross-Lists
GESO-3162H, HIST-3162H

Course Description
Focusing on Canadian women in the twentieth century, this course studies women's political organizing; feminism; women's experience of war; paid and unpaid work; immigrant experiences; sexuality; and modern colonialism. Emphasizes how class, race, language and culture create a diversity of women's histories that were both distinct, but always closely interrelated. Prerequisite: 1.0 GESO, WMST, and/or HIST credit with a minimum 60% grade, or permission of instructor. Not open to students with credit for GESO-HIST-CAST 3160Y or 4160Y. Equivalent to WMST 3162H.

Academic Level
Undergraduate

Credit Value
:
0.5

CAST3170H - Trump, Trudeau, Trees, Trade and Other Stuff: Contemporary Canada and the United States

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
HIST-3170H

Course Description
How do we understand our complex and quickly changing twenty-first century world? This course examines contemporary issues in Canada and the United States in historical perspective by utilizing flashpoint issues, individuals, and events to explain longer trends and developments within a continental, cross-border analytical framework. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3210H - Ordering World Politics 2: Canadian Foreign Policy in the Twentieth Century and Beyond

Overview

Department(s)
Political Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set

Cross-Lists
POST-3210H

Course Description
Provides a critical perspective on the efforts to construct and regulate the global order represented by Canadian foreign policy. A theoretically informed review of the historical record is used to achieve an understanding of current trends. Prerequisite: 2.0 POST credits at the 2000 level or permission of instructor. Recommended: POST 2200Y.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3220H - Gender, Society, and Space

Overview

Department(s)
Geography, Gender & Social Justice, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Gender & Social Justice - Not Set, Canadian Studies - Not Set

Cross-Lists
GEOG-3220H, GESO-3220H

Course Description
Selected themes and topics examining the relationship between gender and spatial organization. Themes include the nature of domestic space; gendered use of public, private, and urban space; and the intersections between gender, sexuality, racism, and cultural difference. Prerequisite: 1.0 GEOG and/or GESO credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3231H - Théâtre québécois / Quebecois Theatre

Overview

Department(s)
French & Francophone Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%, Canadian Studies - Not Set

Cross-Lists
FREN-3231H

Course Description
A survey of the beginnings and evolution of Quebec theatre, concentrating on twentieth-century work and beyond. Prerequisite: FREN 2051H and 2452H, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3232H - Poésie québécoise / Quebecois Poetry

Overview

Department(s)
French & Francophone Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%, Canadian Studies - Not Set

Cross-Lists
FREN-3232H

Course Description
A survey of the beginnings and evolution of Quebec poetry, from patriotic poetry to contemporary forms. Prerequisite: FREN 2051H and 2452H, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3233H - Contes, légendes et chansons québécoises / Quebec Folktales, Legends, and Songs

Overview

Department(s)
French & Francophone Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%, Canadian Studies - Not Set

Cross-Lists
FREN-3233H

Course Description
An introduction to folktales, legends, and songs from Quebec, from oral tradition to the "Renouveau du conte québecois contemporain" (renewal of storytelling). Prerequisite: FREN 2051H and 2452H, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3237H - Littératures Francophones de L'amérique du Nord / Francophone Literatures of North America

Overview

Department(s)
French & Francophone Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%, Canadian Studies - Not Set

Cross-Lists
FREN-3237H

Course Description
Focuses on significant works of francophone literature of North America and studies them in their historical, political, sociological, and cultural context. Prerequisite: FREN 2051H and 2452H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3243H - The Contemporary Canadian North in a Circumpolar Context

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
Explores issues in the contemporary Canadian North with a focus on social, political, economic, and environmental issues. Students are encouraged to critically examine Canada's Northern strategies and compare these to the social and economic priorities of Arctic leaders and Indigenous Peoples living in remote Northern communities. Prerequisite: 6.0 university credits or permission of the instructor. Not open to students with credit for CAST-HIST 3240Y.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3330H - Protected and Conserved Areas Management

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
ERST-3330H, GEOG-3330H

Course Description
An overview of the fundamental theoretical and applied components of protected area management, including the history, planning, and management of parks and protected areas with a focus on Canadian federal, provincial, territorial and Indigenous contexts. Lectures, case studies, seminars and assignments engage students in the exploration of current protected area topics and issues. Prerequisite: GEOG 2310H; or one of GEOG-CAST-ERST-EDUC 2043H, 2044H, GEOG-CAST-ERST-INDG 2041H, 2042H, or 2040Y; or both ERST-CAST 2520H and 2525H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3335H - First Nations and the Canadian State in the Twentieth Century

Overview

Department(s)
Canadian Studies, History, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set, Indigenous Studies - Not Set

Cross-Lists
HIST-3335H, INDG-3335H

Course Description
The relationship between First Nations and the Canadian state in the twentieth century. Topics include health, social welfare interventions, unemployment, population growth, community development, and education. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3341H - The Canadian Food System: Community Perspectives and Experiences

Overview

Department(s)
Environment, Canadian Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set, Sociology - Not Set

Cross-Lists
ERST-3341H, SAFS-3341H, SOCI-3341H

Course Description
The history of Canada's food and agricultural system is the backdrop to this interdisciplinary course on community development of the system's social, economic, and environmental sustainability. Production, distribution, processing, consumption, and regulatory issues are addressed. Community-based research projects are undertaken with local food and agricultural organizations. Prerequisite: 9.0 university credits. Recommended: CAST-ERST-GEOG-INDG 2041H, 2042H, GDST-ANTH-GEOG-SAFS-SOCI 2500H, and SAFS-GDST-ANTH 2600H. Equivalent to SAFS-CAST-ERST 3340H.

Undergraduate

Credit Value

:
0.5

CAST3370H - Geography of Tourism

Overview

Department(s)
Geography, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set

Cross-Lists
GEOG-3370H

Course Description
A critical perspective is used to explore the geographies of tourism-related industries and workplaces and the social and environmental impacts of tourism in urban and rural settings. Special attention is given to the Canadian experience. Prerequisite: GEOG 2310H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3390H - Creating Modern Capitalism: Cases in Global and Canadian Perspective

Overview

Department(s)
History, Business, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Business - Not Set, Canadian Studies - Not Set

Cross-Lists
ADMN-3390H, HIST-3390H

Course Description
Capitalism and globalization shape our world in profound ways. Utilizing a "glocal" approach that combines global and Canadian cases within a transnational context, this course seeks to interrogate and understand the evolution and development of modern capitalism and globalization from the late nineteenth century into the early twenty-first. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3422H - Dimensions of Poverty

Overview

Department(s)
Political Studies, Canadian Studies, Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Sociology - Not Set, Criminology - Not Set

Cross-Lists
CRIM-3422H, POST-3422H, SOCI-3422H

Course Description
Poverty is a persistent social problem. In this course students are introduced to the dynamics of poverty in Canada, the USA, and Britain, learn how poverty affects people's lives, and become familiar with the dominant sociological perspectives that inform people's opinions about poverty and poverty-related policies and programs. Prerequisite: 7.0 university credits including 1.0 POST, CAST, CRIM, and/or SOCI credit at the 2000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3431H - Growing Gap: Gender (In)Justice in Canada

Overview

Department(s)
Gender & Social Justice, Canadian Studies, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, Political Studies - Not Set

Cross-Lists
GESO-3431H, POST-3431H

Course Description
An intersectional feminist analysis of social welfare issues and policies in Canada. Focusing on topics including poverty, homelessness, childcare, and employment, we examine historical roots and contemporary contexts shaping the lives of women and marginalized groups bearing the brunt of the growing income gap and neoliberal threats to equality. Prerequisite: 6.0 university credits including 1.0 GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO-CAST-POST 4431H or 4430Y. Equivalent to WMST 3431H.

CAST3450H - The Sociology of Communication and Media in Canada

Overview

Department(s)
Canadian Studies, Media Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Media Studies - Not Set, Sociology - Not Set

Cross-Lists
SOCI-3450H, MDST-3450H

Course Description
Introduces the structure of the Canadian mediascape with a focus upon film, radio, television, and newer information and communication technologies. Sociological issues related to the production of these media and their reception by audiences are also addressed. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI and/or CAST at the 2000 level or CUST-MDST 2035Y or 2535H.

Academic Level
Undergraduate

Credit Value

CAST3481H - Indigenous Fiction

Overview

Department(s)
Canadian Studies, English Literature, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, English Literature - Not Set, Indigenous Studies - Not Set

Cross-Lists
ENGL-3481H, INDG-3481H

Course Description
Considers the expectations and functions of narrative, and examines the ways in which the fictions of Indigenous authors draw on, extend, and defy white European literary traditions, and incorporate narrative methods of their own traditions. Fictions by authors in both Canada and the United States will be included. Prerequisite: 4.0 university credits.

CAST3615H - Introduction to Black Politics in Canada

Overview

Department(s)
Canadian Studies, Political Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Political Studies - Not Set, Sociology - Not Set

Cross-Lists
POST-3615H, SOCI-3615H

Course Description
An introduction to the political experiences and guiding ideologies of the Black population in Canada. Decidedly contemporary in nature and approach, the course critically examines the contributions of Blacks to the politics of Canada and how these contributions continue to shape and reshape Canadian Identity. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3620H - Canada in the World

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
Introduces concepts important for understanding the dynamics of international relations and situates Canada within this complex system. Explores key structures of the international system and assesses a number of critical issues to assess how Canada has interacted with these international relations. Prerequisite: 3.0 university credits including CAST 1103H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3621H - The Critical Place of Law in Canadian Society

Overview

Department(s)
Canadian Studies, Geography, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Geography - Not Set, Political Studies - Not Set

Cross-Lists
GEOG-3621H, POST-3621H

Course Description
An exploration of the critical places and spaces of law in the making of Canadian identity. Discusses issues such as treaties and rights under the law and within Canadian society. Prerequisite: 6.0 university credits. Not open to students with credit for CAST-INDG-WMST 3480Y or CAST-GEOG-POST 4621H.

0.5

CAST3665H - Canada: State, Society, Power

Overview

Department(s)
Canadian Studies, Political Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Political Studies - 100%, Sociology - Not Set

Cross-Lists
POST-3665H, SOCI-3665H

Course Description
Interrogates the political economy tradition in Canada from its roots to more contemporary approaches, examining the dynamics of Canadian economic, political, and social development. Addresses issues associated with the development of a resource-based and branch-plant economy, globalization and continental integration, and inequality, discrimination, and social justice. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3672H - Gender, Diversity, and Intersectionalities

Overview

Department(s)
Political Studies, Canadian Studies, Gender & Social Justice, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Gender & Social Justice - Not Set, Sociology - Not Set

Cross-Lists
GESO-3672H, POST-3672H, SOCI-3672H

Course Description
Examines issues of diverse intersectional gender identities and gender experiences, including Indigeneity, (dis)ability, race, class, LBTQ, and fat, and provides socio-political perspectives to understand activism, community building, and possibilities for socio-political and policy change. Prerequisite: 7.0 university credits including 1.0 POST, CAST, GESO, and/or SOCI credit at the 2000 level, or permission of instructor. Recommended: POST-CAST 2011H and/or 2012H. Not open to students with credit for POST-CAST-WMST 3670Y.

Academic Level
Undergraduate

Credit Value

Undergraduate

Credit Value

:
0.5

CAST3720H - Urban Environments

Overview

Department(s)
Geography, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
ERST-3720H, GEOG-3720H

Course Description
This interdisciplinary course is designed to explore critical and practical perspectives on urban environments. The theme of water and infrastructure networks (i.e., canals, rivers, waterfronts) guides a critical exploration of the historical and symbolic dimensions of our built environment and the eco-future of our urban spaces. Prerequisite: One of GEOG-CAST 2710H, GEOG-CAST-ERST- INDG 2040Y, 2041H, or 2042H.

Academic Level
Undergraduate

Credit Value
:
0.5

CAST3730H - Social Geography

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
ERST-3730H, GEOG-3730H

Course Description
Explores the social structures of contemporary Western cities and communities by examining how social relations, social identities, and social inequalities are produced, and the role of space in constructing them. Geographical perspectives on gender, occupation, ethnicity, age, disability, poverty, health, and sexuality are emphasized. Prerequisite: 9.0 university credits including 1.0 GEOG and/or ERST credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value
:
0.5

CAST3740H - The Politics of Legal Rights, Criminal Law, and the Canadian Judicial Process

Overview

Department(s)
Political Studies, Canadian Studies, Criminology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Criminology - Not Set, Sociology - Not Set

Cross-Lists
CRIM-3740H, HURI-3740H, POST-3740H, SOCI-3740H

Course Description
An exploration of the politics of the Canadian criminal process. Examines legal rights under the Charter of Rights and Freedoms and critiques of the inequities of the Canadian criminal justice system. Also looks at key political issues in the making of criminal law, its enforcement, and the criminal trial process. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

0.5

CAST3745H - Peoples and Cultures of the Circumpolar World

Overview

Department(s)
Canadian Studies, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Indigenous Studies - Not Set

Cross-Lists
INDG-3745H

Course Description
An introduction to historic traditional cultures and contemporary peoples through both traditional Indigenous and Western perspectives. Identifies the broad and basic understanding of the histories and experiences of the peoples of the Circumpolar North, and the development of northern cultures. Explores and defines the cultural diversity present in the Circumpolar North with reference to environments, contact, and economic processes.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3750H - Language, Culture, Identity, and the Circumpolar World

Overview

Department(s)
Canadian Studies, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Indigenous Studies - Not Set

Cross-Lists
INDG-3750H

Course Description
A broad examination of circumpolar peoples in North America, Russia and northern Asia, Greenland, and northern Scandinavia. Notions of identity, culture, language, and self-determination are discussed, similarities and differences of northern peoples and cultures are examined, and their adaptations to change and roles as agents of change explored.

CAST3758H - History of Western Canada

Overview

Department(s)
Canadian Studies, History

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set

Cross-Lists
HIST-3758H

Course Description
A history of the Canadian West from its Aboriginal origins to the present focusing on the political, cultural, and economic transitions between the many different "wests," which may include Aboriginal space, fur-trade society, resource frontier, and hotbeds of both Canadian conservatism and socialism. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3760H - The Geography of Beer

Overview

Department(s)
Geography, Business, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Business - Not Set, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
ADMN-3760H, ERST-3760H, GEOG-3760H, SAFS-3760H

Course Description
Designed around a term-long research project, this course explores themes such as tourism, built heritage, and post-industrial design associated with the production of craft beer. Students learn how to examine land-use patterns, built form, and branding techniques in one locale. Emphasis is placed on in-class participation and experiential learning. Prerequisite: GEOG-ERST 2510H, GEOG- CAST 2710H, SAFS 1001H, or ADMN 2080H.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3780H - Canadian Renewable Resource Economics and Project Planning

Overview

Department(s)
Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set

Cross-Lists
ERST-3780H

Course Description
Introduces students to the economic theory of renewable resources in the Canadian social, political, and regulatory context, and also to professional project planning and management. Students are introduced to project components such as scoping, scheduling, budgeting, communications, team and risk management, and environmental sustainability. Prerequisite: 1.0 ERST and/or CAST credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3785H - Canada in the 1980s: Culture and Conflict

Overview

Department(s)
Canadian Studies, Political Studies, History

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Political Studies - Not Set, History - Not Set

Cross-Lists
HIST-3785H, POST-3785H

Course Description
The 1980s in Canada were a time of tremendous change. Exploring the cultural, economic, political, and social transformations of the decade, this course examines a diversity of issues, which may include, for example, MuchMusic's impact, constitutional battles, free trade, the "new" West's emergence, and the Oka Crisis. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST3810Y - Community-Based Research Project

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
Students are placed in research projects with community organizations usually in the Peterborough or Haliburton area. Each placement is supervised jointly by a faculty member and a representative of a community organization. For details see Community-Based Research Program. Prerequisite: 10.0 university credits and a minimum 75% cumulative average.

CAST4951H - Special Topic: Canadian Childhoods Today

Overview

Department(s)
Canadian Studies, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Gender & Social Justice - Not Set

Cross-Lists
GESO-4951H

Course Description
Examines Canadian childhoods from the 1960s to the present. Topics include theories and constructions of childhood, sport and recreation, consumer cultures, technology's impacts, health, images and literary representations, gender and sexualities, resistances and rebellions, Indigenous experiences, and work. Prerequisite: 14.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST4953H - Special Topic: the Changing Arctic

Overview

Department(s)
Canadian Studies, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Anthropology - Not Set

Cross-Lists
ANTH-4953H

Course Description
Examines historical and contemporary issues in Arctic Canada with an eye to environmental, economic, and social changes affecting the region. Students engage with readings and discussions of the "North." Prerequisite: 14.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST4955H - Special Topic: Contemporary Canadian Life Writing and Auto/Biographical Fiction

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
Focuses on the transformative processes that have acted upon individuals and cultures in the imagining of Canada as a multicultural society. The site of study is contemporary autobiography, memoir, fiction, poetry, and film studied in the context of cultural formation, reformation, and resistance. Prerequisite: 14.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CAST4960Y - Ordinary (Canadian) Lives: Autobiography, Orality, and Local History

Overview

Department(s)
Canadian Studies, History

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set

Cross-Lists
HIST-4960Y

Course Description
Through autobiography and oral data relative to "place," this course explores the transformative processes at work in the creation of a multicultural society, principally the revitalizing consequences inherent in immigration and migration to a new place, the role of resistance, and the persistence of cultural practices in that national formulation. Prerequisite: 14.0 university credits.

1

CAST4970Y - Canada Since 1945

Overview

Department(s)
Canadian Studies, History

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set

Cross-Lists
HIST-4970Y

Course Description
Examines the history of Canada since the Second World War with an emphasis on political history. Topics include the post-World War II economic boom, the social transformations of the long 1960s, Quebec and English Canadian nationalism, Americanization, and the policies of key prime ministers including St. Laurent, Diefenbaker, Pearson, Trudeau, and Mulroney. Mandatory weekend retreat/workshop. Prerequisite: 14.0 university credits. Students may take only one of CAST-HIST 4970Y or 4971H for credit.

CAST4975H - The History of the Self

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
Traces the history of the concept of the self in Western culture, with a special focus on Canada. Examines key debates about the idea of the self through interdisciplinary readings in philosophy, sociology, cultural studies, politics, and history. Includes questions as to the concept's historicity, modernity, and its connections to modern debates about identity politics and political correctness. Prerequisite: 14.0 university credits.

CAST6102H - Culture, Heritage & the Arts

Overview

Department(s)
Canadian & Indigenous Studies, Canadian Studies, English Literature, Arts Management

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - 100%, Canadian Studies - Not Set, English Literature - Not Set, Arts Management - Not Set

Cross-Lists
CSID-ENGL-ARTM 5202H

Course Description
This course will critically explore selected theoretical, empirical, and creative constructions, contestations and celebrations of Canadian culture(s). Course content ranges from the national to the local, examining cultural communities and identities, intellectual traditions, cultural policies, museums and galleries, and cultural expression in film, theatre and literature.

Academic Level
Graduate

Credit Value

0.5

CAST6171H - Indigenous Settler Relations

Overview

Department(s)
Canadian & Indigenous Studies, Sustainability Studies, History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - 100%, Sustainability Studies - Not Set, History - Not Set, Canadian Studies - Not Set

Cross-Lists
CSID-5171H, HIST-5171H, SUST-5171H

Course Description
This course explores the evolution of Indigenous settler relations in Canada, tracing how they are are shaped by economic, social, cultural, religious, political and military factors, and how they differ across regions and First Nations. Themes include comparative imperial policies; treaties, land and space; law and Aboriginal- settler relations; education; religion; the state and policy development; political organization and resistance; gender, familial and sexual relations. Not open to students with credit for INDG 4201H.

Academic Level
Graduate

Credit Value

:
0.5

CAST6201H - Environment & Place

Overview

Department(s)
Canadian & Indigenous Studies, Canadian Studies, Sustainability Studies, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - 100%, Canadian Studies - Not Set, Sustainability Studies - Not Set, Culture, Arts, and Media - Not Set

Cross-Lists
CSID-5401H, CUST-5401H, SUST-5401H

Course Description
This course explores human-environmental relationships from a variety of perspectives using both academic and public policy debates as source material. Selected topics will draw from historical and political ecology, environmental protection and activism, heritage law, land tenure and land rights, tourism, public parks, and notions of wilderness in Canadian identities.

Academic Level
Graduate

Credit Value

:
0.5

CAST6210H - Perspectives on the Canadian North

Overview

Department(s)
Canadian Studies, Canadian & Indigenous Studies, Sustainability Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - Not Set, Canadian & Indigenous Studies - 100%, Sustainability Studies - Not Set

Cross-Lists
CSID-5210H

Course Description
This course explores historical and contemporary perspectives on the Canadian North, focusing on aspects of how Indigenous and non-Indigenous peoples experience and frame the region. It critically examines how environmental, economic, social, cultural, political, legal, and military factors have (re)shaped the region. Themes include Indigenous and Euro-Canadian concepts of North; the frontier/homeland dichotomy; legal systems; sovereignty and security issues; colonialism and state control; land claims and co-management; climate change; and Canada's Northern strategies.

Academic Level
Graduate

Credit Value

:
0.5

CAST6301H - Policy, Economy & the State

Overview

Department(s)
Canadian & Indigenous Studies, Canadian Studies, History

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - 100%, Canadian Studies - Not Set, History - Not Set

Cross-Lists
CSID-5301H, HIST-5301H

Course Description
This course explores the political economy tradition in Canada, and specifically the complex relationship between the state, economy, society, politics, and culture. The course content will provide essential grounding in the approaches, methods,and themes that have been critical to the ongoing development of this Canadian tradition.

Academic Level
Graduate

Credit Value

:
0.5

CAST6400H - Law and Policy in Canadian Postsecondary Education

Overview

Department(s)
Education, Canadian & Indigenous Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Education - 100%, Canadian & Indigenous Studies - Not Set, Canadian Studies - Not Set

Cross-Lists
CSID-EDUC 5400H

Course Description
This course explores legal and policy issues in Canadian postsecondary education, focusing on court decisions and emerging challenges. It connects cases to statute and human rights law. Students will develop analytical skills through examining legal cases and engaging in research activities to better understand educational and legal frameworks.

Academic Level
Graduate

Credit Value

:
0.5

CAST6401H - Identities & Social Movements

Overview

Department(s)
Canadian & Indigenous Studies, Canadian Studies, English Literature

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - 100%, Canadian Studies - Not Set, English Literature - Not Set

Cross-Lists
CSID-5501H, ENGL-5501H

Course Description
The course directly addresses a wave of identity politics and its controversial place even within seemingly identity-based movements. Readings on gender, queer theory and politics, disability, aging, and race will come from sociology and political science as well as cultural, literary and film studies.

Academic Level
Graduate

Credit Value

:
0.5

CAST6501H - Feminist, Gender & Women's Studies

Overview

Department(s)
Canadian & Indigenous Studies, Canadian Studies, History, Sustainability Studies, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - 100%, Canadian Studies - Not Set, History - Not Set, Sustainability Studies - Not Set, Culture, Arts, and Media - Not Set

Cross-Lists
CSID-5701H, CUST-5701H, HIST-5701H, SUST-5701H

Course Description
This course explores the scholarly interpretations, debates, and theories that have shaped our understanding of women and gender in the Canadian and North American context. The historical and social construction of gender identity, culture, and sexualities are explored, and topics such as work, reproduction, 'race, ' colonialism, political engagement and social movements.

Academic Level
Graduate

Credit Value

0.5

CAST6550H - Environmental Policy Analysis

Overview

Department(s)
Sustainability Studies, Interdisciplinary Social Rsrch, Canadian Studies, Canadian & Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Sustainability Studies - 100%, Interdisciplinary Social Rsrch - Not Set, Canadian Studies - Not Set, Canadian & Indigenous Studies - Not Set

Cross-Lists
CSID 5550H, IDSR 6550H, SUST 5550H

Course Description
This course explores environmental policy analysis and development in the Canadian context. We cover methods of analyzing environmental policy responses across a range of issues, including stakeholder engagement, policy tool selection and development, evaluation, and communication of policy aims to diverse audiences.

Academic Level
Graduate

Credit Value

:
0.5

CAST6606H - Ph.D. Directed Reading Course

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
Reading and research tutorials. A program of research and written work in an area not covered by an existing graduate seminar. Approval of Program Director required.

Academic Level
Graduate

Credit Value

:
0.5

CAST6702H - Arts Leadership in Canada

Overview

Department(s)
Canadian Studies, Canadian & Indigenous Studies, Arts Management

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - Not Set, Canadian & Indigenous Studies - 100%, Arts Management - Not Set

Cross-Lists
CSID-ARTM 5702H

Course Description
Arts leadership goes beyond day-to-day management of institutions and positions. It involves navigating the tensions between immediate realities and long-term goals to realise a leader's vision for institutional, professional, and social change. While all arts leaders internationally respond to common challenges in pursuing their visions (such as funding and institutional structures), there is a uniquely Canadian social and political context for arts leadership which informs both the difficult institutional realities that arts face and the potential for the arts within civic society. Readings and case studies in this course will explore key issues and case studies in Canadian and global arts leadership. Students who have taken CSID 5702H cannot take CAST 6702H.

Academic Level
Graduate

Credit Value

:
0.5

CAST6801H - Aging, Health and Society

Overview

Department(s)
Canadian Studies, Canadian & Indigenous Studies, Sustainability Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - Not Set, Canadian & Indigenous Studies - 100%, Sustainability Studies - Not Set

Cross-Lists
CSID-5801H, SUST-5801H

Course Description
This interdisciplinary course examines aging in Canadian society from a critical perspective. The course traces the evolving conceptualizations of aging, old age and the life course, and their role in understanding the processes, outcomes and representations of aging and their implications for the development of critically-informed discourse and policy.

Academic Level
Graduate

Credit Value

:
0.5

CAST6902H - Special Topics

Overview

Department(s)
Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%

Course Description
Courses may be offered in a variety of areas as a way of introducing students to new subject matter, research techniques or methodologies.

Academic Level
Graduate

Credit Value

:
0.5

CHEM1000H - Introductory Chemistry I

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Essential aspects of general, molecular, and intermolecular chemistry. Topics include atomic structure, bonding, equilibrium, acids-bases, gases, liquids, solutions, and the solid state. Emphasis is on the relation between molecular and physical properties. Prerequisite: 4U Chemistry or equivalent or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM1010H - Introductory Chemistry II

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Essential aspects of physical, inorganic, organic, and biological chemistry. Topics include redox chemistry, kinetics, thermodynamics, and an introduction to inorganic, environmental, organic, and biological chemistry. Prerequisite: CHEM 1000H or equivalent, or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM2100H - Introductory Organic Chemistry 1

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
An introduction and overview of organic molecules are presented, and the concepts of stereochemistry are introduced. This course also serves as an introduction to organic reactions and their driving forces. The application of IR and NMR spectroscopy in the structural determination of organic compounds is introduced. Prerequisite: CHEM 1000H and 1010H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM2110H - Introductory Organic Chemistry 2

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
An in-depth survey of the organic reactions of alkenes and alkynes is presented. The concept of aromaticity is introduced, as are the reactions of aromatic molecules. The reactivity of carbonyl containing compounds is introduced. Prerequisite: CHEM 2100H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM2200H - Transition Metal Chemistry

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
The bonding and structure of coordination compounds of the d-block transition metals; mechanisms of ligand exchange and redox reactions; physical and chemical properties of d-block elements. Prerequisite: CHEM 2500H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM2300H - Biochemical Concepts

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
BIOL-2300H

Course Description
Introduces key molecules and concepts in biochemistry. Topics include the properties of water, the thermodynamics of biological systems, and the behaviour of biomolecules in water. Focuses on each of the four major classes of biomolecules--proteins, nucleic acids, carbohydrates, and lipids--as they apply to biological systems. Prerequisite: CHEM 1000H and 1010H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM2410H - Introductory Analytical Chemistry 1

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Introduces the theory and practice of analytical analysis from qualitative and quantitative perspectives. Topics include experimental methods and data treatment in analytical analyses, experimental error and quality assurance, and traditional benchtop methods of analysis. Particular emphasis is placed on the laboratory component of the course and laboratory skills development. Prerequisite: CHEM 1000H and 1010H. Not open to students with credit for CHEM 2400H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM2420H - Introductory Analytical Chemistry 2

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
An introduction to the fundamental theories and applications of modern instrumentation for qualitative and quantitative analysis emphasizing separations techniques, spectroscopic analysis, and electroanalytical methods. Specific focus is placed on the continued development of laboratory skills in the context of instrumental analyses. Prerequisite: CHEM 2410H. Not open to students with credit for CHEM 2400H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM2500H - Quantum Chemistry

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
An introduction to the properties of atoms and molecules, and the theory and practice of chemical reaction kinetics. Prerequisite: CHEM 1000H and 1010H, and one of MATH 1122H (recommended), MATH 1120H, or MATH 1121H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM2620H - Environmental Chemistry

Overview

Department(s)
Chemistry, Environment

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%,
Environment - Not Set

Cross-Lists
ERSC-2620H

Course Description
An introduction to environmental chemical processes and the impacts of humankind's activities on the natural environment, including the atmosphere, hydrosphere, and terrestrial compartment. Examples of topics are ozone synthesis/ destruction, the chemistry of global climate, aquatic chemistry, water pollution, water treatment chemistry, soil formation, and chemistry of solid waste. Prerequisite: ERSC 2220H or both CHEM 1000H and 1010H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM2810H - Chemical Process Analysis and Design

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Introduction to tools for analysis and design of chemical processes. Includes flow of energy and materials through various processes and production of energy and mass balances as well as vapour-liquid equilibria. A major component of the course is a team-based design project of a manufacturing process. Prerequisite: CHEM 2500H. Only open to students in the Trent/Swansea dual degree program in Chemistry and Chemical Engineering or to students in Chemistry-associated programs (Chemistry, Biochemistry & Molecular Biology, Chemical Physics, Environmental Chemistry, or Forensic Chemistry).

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM3102H - Advanced Synthetic Organic Chemistry

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
The reactions of enolates are introduced as well as conjugate addition reactions. Organic reaction mechanisms are studied in detail, and the multistep synthesis of industrially important organic molecules is considered. Prerequisite: CHEM 2100H and 2110H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM3110H - Advanced Synthetic Organic Chemistry: Biological Applications

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Strategies in multistep organic synthesis involving protecting groups are considered. Pericyclic reactions are introduced. Retrosynthetic strategies are presented in the total synthesis of organic targets. Prerequisite: CHEM 3102H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM3120H - Computational Chemistry

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Theory and application of molecular mechanics, semi-empirical and ab initio methods in the investigation of molecular structure, properties, and reactivity. Includes a computer lab component using modern research-level software. Prerequisite: CHEM 2100H, 2110H, and 2500H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM3200H - Chemistry of the Main-Group Elements

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Structure and bonding in compounds of the main group elements, including symmetry, correlation of physical and chemical properties with electronic structure, crystalline solids, and band theory. Qualitative comparison of the second-row elements with the heavier elements in the group. Prerequisite: CHEM 2200H and 2500H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM3310H - Protein Chemistry and Enzymology

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
BIOL-3310H

Course Description
The structure and function or proteins, key protein biophysical methods, and enzyme mechanisms are treated in detail. Students use web-based resources such as ExPASy and the Protein Data Bank, and gain practical laboratory experience in bioseparations and the determination of enzyme rate parameters. Prerequisite: CHEM-BIOL 2300H, and one of CHEM 2100H or 2110H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM3320H - Metabolism

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
BIOL-3320H

Course Description
The key topics are biological processes that produce and use high-energy biomolecules. These include membrane transport, multienzyme pathways, and their regulation. With their skills acquired in CHEM-BIOL 3310H, students are given more freedom for independent laboratory work in devising and executing their own enzyme purification scheme. Prerequisite: CHEM-BIOL 3310H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM3400H - Chromatography

Overview

Department(s)
Chemistry, Environment, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Environment - Not Set, Forensic Science - Not Set

Cross-Lists
ERSC-3400H, FRSC-3400H

Course Description
Theory and practice of chromatography, sampling, and quality control. Particular emphasis is placed on applications in environmental analysis. Prerequisite: CHEM 2400H or 2420H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM3410H - Methods of Spectral Analysis

Overview

Department(s)
Chemistry, Environment, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Environment - Not Set, Forensic Science - Not Set

Cross-Lists
ERSC-3410H, FRSC-3410H

Course Description
Modern analytical spectroscopic instrumentation, techniques, and application to the analysis of organic, inorganic, and biochemical contaminants, with a particular focus on the forensic and environmental fields. Prerequisite: CHEM 2400H or 2420H. Strongly recommended: CHEM 2100H and 2110H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM3520H - Thermodynamics

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
An introduction to the first and second laws of thermodynamics. The properties of gases, thermochemistry, principles of chemical equilibrium, and the phase diagrams of typical materials. Prerequisite: CHEM 1000H and 1010H, and one of MATH 1122H (recommended), MATH 1120H, or MATH 1121H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

CHEM3610H - Chemical Limnology and Oceanography

Overview

Department(s)
Chemistry, Environment

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%,
Environment - Not Set

Cross-Lists
ERSC-3610H

Course Description
Focuses on the parameters controlling the natural water chemistry in surface and subsurface systems. These key processes involve chemical reactions and kinetics, pH control of equilibria, chemical speciation, and photochemical processes. Combines theory and environmental applications. Prerequisite: CHEM-ERSC 2620H; and either CHEM 2400H or 2410H or both ERSC 2220H and 2230H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4010Y - Project Course in Chemistry

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Study, usually involving experimental research, under the supervision of a faculty member; includes two seminars and a written thesis. At least eight hours per week. Pre- or co-requisites: Two Chemistry lecture half-courses at the 4000 level; an average of 75% in all previous Chemistry courses; and permission of instructor. Contact coordinator as soon as possible and no later than the end of the preceding Winter term.

CHEM4011H - Project Course in Chemistry

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Study, usually involving experimental research, under the supervision of a faculty member; includes two seminars and a written thesis. At least eight hours per week. Pre- or co-requisites: Two Chemistry lecture half-courses at the 4000 level; an average of 75% in all previous Chemistry courses; and permission of instructor. Contact coordinator as soon as possible and no later than the end of the preceding Winter term.

Academic Level
Undergraduate

CHEM4020D - Project Course in Chemistry (double credit)

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Approximately 16 hours per week; otherwise, as CHEM 4010Y. Pre- or co-requisites: Two Chemistry lecture half-courses at the 4000 level; an average of 75% in all previous Chemistry courses; and permission of instructor.

Academic Level
Undergraduate

CHEM4030Y - Project Course in Biochemistry

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Study, usually involving experimental research, under the supervision of a faculty member; includes two seminars and a written thesis. At least eight hours per week. Pre- or co-requisites: Two CHEM or BIOL lecture half-courses at the 4000 level; an average of 75% in all previous Chemistry courses; and permission of the instructor. Contact coordinator as soon as possible and no later than the end of the previous Winter term. Only available to students who are pursuing the Biochemistry & Molecular Biology degree and may not be combined with more than 1.0 credit in a project course in any other dicipline.

CHEM4040D - Double Credit Project Biochemistry

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
BIOL-4040D

Course Description
At least 16 hours per week; otherwise as CHEM 4030Y. May not be combined with any other project courses for credit toward the Biochemistry & Molecular Biology degree. Prerequisite: An average of 75% in all previous Chemistry courses and permission of instructor.

Academic Level
Undergraduate

CHEM4110H - Medicine and Chemistry: the Design, Synthesis, and Analysis of Drugs

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Medicinal and pharmaceutical chemistry are highly interdisciplinary areas of practical and applied chemistry that are adjoined with chemical and structural biology and flank areas such as biochemistry, molecular biology, pharmacology, toxicology, and veterinary and human medicine. This course presents the design, synthesis, and analysis of pharmaceutical and bio-active molecules. Prerequisite: CHEM 2300H, 3102H, and 3110H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4130H - Applications of NMR Spectroscopy

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Focuses on the practical employment of NMR within organic and biochemical fields. Provides a review of the basic theory and instrumentation of NMR, introduces simple 1D, followed by more complex 2D and 3D spectral acquisition and interpretation techniques, and includes heteronuclear elements. Prerequisite: CHEM 2500H and 3102H. Highly recommended: CHEM 3410H. Equivalent to CHEM 4430H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4140H - Polymeric Materials

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Polymers are one of the most far-reaching chemical developments in everyday life. This course explores the chemistry of polymer materials including their synthesis, characterization, and applications, with a focus on the major classes of polymers and recent advances in polymer materials. Prerequisite: CHEM 2100H and 2110H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4150H - Green Chemistry and Sustainable Synthesis

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Introduces synthetic organic chemical processes and products that are benign by design. Concepts of ACS 12 principles of green chemistry and the ISO life-cycle analysis metrics are introduced to assess sustainability of chemical processes and products. Prerequisite: CHEM 2500H and 3102H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4200H - Organometallic Chemistry

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Chemistry of organic and inorganic ligands at metallic centres, including the carbon-metal bond, catalysis, organic ligand transformations, and reactions at metallic centres. Prerequisite: CHEM 2200H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4220H - Inorganic Materials

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Structure and bonding theory in inorganic molecules is expanded for extended structures (clusters and solids). Topics include band structures in metals, semiconductors, and insulators; superconductors and nanoscale materials. Prerequisite: CHEM 3200H or both CHEM 2200H and 4200H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4300H - Bioinorganic Chemistry

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
BIOL-4300H

Course Description
The essential biological roles of metals are usually acknowledged but seldom discussed in most biochemistry courses. Includes an introduction to coordination chemistry and a survey of the roles of metals in enzyme catalysis, oxygen transport, photosynthesis, cell mobility, gene expression, and environmental toxicity. Prerequisite: CHEM-BIOL 3310H and 3320H; or CHEM 2200H and CHEM-BIOL 2300H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4310H - Current Topics in Biochemistry

Overview

Department(s)
Chemistry, Biology

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Biology - Not Set

Cross-Lists
BIOL-4310H

Course Description
A survey of the questions that are of greatest interest to biochemists. Relies extensively on reading and understanding primary literature sources published within the last four years. Students give presentations in class as part of the course evaluation. Prerequisite: CHEM-BIOL 3310H and 3320H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4400H - Mass Spectrometry

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
An introduction to the principles and modern applications of mass spectrometry in chemical analysis. Topics include fundamentals of ion chemistry, ionization techniques, mass-analyzer and detector design, and applications of hybrid and tandem instrumental design in analytical and organic chemistry and biochemistry. Prerequisite: CHEM 2500H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4410H - Fundamentals and Applications of ICP-MS

Overview

Department(s)
Chemistry, Environment

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%,
Environment - Not Set

Cross-Lists
ERSC-4410H

Course Description
Theory of spectrometric techniques for elemental analysis. Students become acquainted with the current literature and research in analytical/environmental chemistry. Prerequisite: CHEM-ERSC 3400H or 3410H, or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4422H - Other Analytical Methods

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
This course concerns methods of qualitative chemical analysis and structure characterization: spectroscopy (IR, Raman, NMR, X-ray); thermal analytics; and surface analysis. The theory, instrumentation, and operating practice of each method are addressed, with an emphasis on practical applications and hands-on experience. Prerequisite: 75% or higher in CHEM 3410H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4500H - Photochemistry

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Introduction to theory and practice of photochemistry. Topics include interaction of matter with light, unimolecular decomposition, energy transfer processes, photochemical activation, and organic photochemistry, as well as applications in environmental and industrial processes. Prerequisite: CHEM 2500H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4515H - Chemical Thermodynamics and Reaction Kinetics

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Modern chemical thermodynamics and kinetics. Introduction to statistical thermodynamics: molecular interpretation of entropy and internal energy. Reaction rate theories: gas phase and solution reaction dynamics. Prerequisite: CHEM 2500H, CHEM 3520H, and MATH 1120H; or permission of instructor. Recommended: MATH 2110H and 2120H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4530H - Principles of Electrochemistry

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
This course introduces the key fundamental principles that control electrochemical systems, including thermodynamics, kinetics, and transport phenomena. These concepts are then linked to electrochemical methods, such as potentiometry, amperometry, coulometry, and voltammetry, as well as to real world technologies, such as batteries, fuel cells, and electrochemical sensors. Prerequisite: CHEM 2200H and 3520H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CHEM4710H - Molecules of Murder

Overview

Department(s)
Forensic Science, Chemistry

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%, Chemistry - Not Set

Cross-Lists
FRSC-4710H

Course Description
Provides a chemical perspective of molecules related to death and poisoning. A wide range of both natural and synthetic classes are explored with respect to their synthesis/extraction, toxicology, use within chemical poisonings and chemical warfare, and their analytical detection and quantification. Prerequisite: CHEM 2300H and one of CHEM 3400H or 3410H. Recommended: FRSC 3800H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

CHEM4900Y - Reading Course

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
Topics from one of the following fields: analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, physical chemistry and theoretical chemistry. Project work outside the laboratory may be involved. Offered only by prior arrangement through department office.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:

CHIN1000Y - Introduction to Chinese

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An introduction to the Chinese language for beginners. Covers the phonology, elementary syntax, and characters of Chinese, and develops cultural awareness. Students receive training in listening and speaking, in recognizing both simplified and traditional Chinese characters, and in using Pin Yin and Chinese character dictionaries. Students whose level of Chinese is judged by the instructor to be too advanced may not receive credit for this course. Not open to students with credit for CHIN 1001H or 1002H. Offered only in the summer.

Academic Level
Undergraduate

Credit Value

:
1

CHIN1001H - Introduction to Chinese 1

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An introduction to the Chinese language for beginners. Covers the phonology, elementary syntax, and characters of Chinese, and develops cultural awareness. Students receive training in listening and speaking, in recognizing both simplified and traditional Chinese characters, and in using Pin Yin and Chinese character dictionaries. Students whose level of Chinese is judged by the instructor to be too advanced may not receive credit for this course. Not open to students with credit for CHIN 1000Y.

Academic Level
Undergraduate

Credit Value

:
0.5

CHIN1002H - Introduction to Chinese 2

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An introduction to the Chinese language for beginners. Covers the phonology, elementary syntax, and characters of Chinese, and develops cultural awareness. Students receive training in listening and speaking, in recognizing both simplified and traditional Chinese characters, and in using Pin Yin and Chinese character dictionaries. Students whose level of Chinese is judged by the instructor to be too advanced may not receive credit for this course. Prerequisite: CHIN 1001H. Not open to students with credit for CHIN 1000Y.

Undergraduate

Credit Value

:
0.5

CHIN2100H - Oral Proficiency Through Chinese Films

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
This course is designed for those who have some background in the Chinese language and who want to further their Chinese oral proficiency. Students are exposed to language and culture with authentic Chinese materials selected from a wide range of Chinese films and dramas. Prerequisite: CHIN 1002H or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CHIN2111H - Chinese Culture at a Glance

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
This course offers a hands-on introduction to Chinese culture, including basic Chinese thought (with a discussion of Confucianism), Chinese culture in action (martial arts, operas, calligraphy), Chinese language, geomancy, and Chinese customs. No prerequisite. Taught in English.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS1000H - Introduction to Child and Youth Studies

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Students are introduced to the field of child and youth studies. Key topics such as the history of childhood, theories of children and youth, the home and family, socialization, victimization, and protection are explored from a variety of disciplines (e.g., psychology, sociology, and education).

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS1001H - Child & Youth: Identity Theory & Voice Studies

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Students explore a variety of identity developmental theories and examine the identity formation process in relation to key interrelated factors such as biological, psychological, and sociocultural processes. The relationship between identity and various child and youth developmental outcomes (e.g., academic success, intimate relationships, and self-esteem) are also explored.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS1002H - The Significance of Play in the Lives of Children and Youth

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Critically examines the relationship between childhood, development, and play using a multidisciplinary framework. An exploration of play theories, issues of identity and inequality, the environment, public policy and service delivery, trauma, therapy and resilience, and citizenship rights.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS2001H - Child and Youth Rights and Legal Issues

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Surveys legal issues and the Canadian legal framework as they intersect with and impact the lives of children and youth. Rights and obligations with respect to education, criminal justice, health care, discipline, child protection, and custody are among legal areas reviewed and discussed. Prerequisite: 3.0 university credits including 1.0 CHYS credit at the 1000 level with a minimum 60% average.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS2003H - Children: Learning Through the Arts

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Taking an interdisciplinary approach, this course examines child development within the areas of music, creative movement, the visual arts, and drama, and language arts. Prerequisite: 1.0 CHYS credit.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS2004H - Children and Youth's Perceptions of and Experiences With Legalized Substances

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Examines issues related to children and youth's perceptions and attitudes toward legalized substances in Canada. Students explore various perspectives on the causes and consequences of substance use among children and adolescents. In addition, risk and protective factors associated with youth's substance use and abuse are discussed. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS2005H - Child and Adolescent Development

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Examines theories in the area of child and youth development that attempt to account for changes in cognitive, social, and emotional development, and explore how inequitable resources and opportunities (e.g., social and economic factors) can impact development. Prerequisite: 3.0 university credits including 1.0 CHYS credit.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS2006H - Indigenous Knowledge for Children and Youth

Overview

Department(s)
Child & Youth Studies, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%, Indigenous Studies - Not Set

Cross-Lists
INDG-2006H

Course Description
Students have the opportunity to explore how Indigenous knowledge informs child and youth development, learning, relationships, and care. Course content draws upon decolonizing theories and methodologies, epistemologies of the land, oral storytelling traditions, and contemporary art and culture. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Course Designation
Indigenous Course Requirement

Credit Value

:
0.5

CHYS2007H - Children and Youth's Residential Services: Continuum of Care

Overview

Department(s)
Child & Youth Studies, Social Work

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%, Social Work - Not Set

Cross-Lists
SWRK-2007H

Course Description
Explores children's out-of-home placements, including kinship, customary care, foster care, residential treatment, and secure treatment. The vulnerabilities of children in care and mental health services will be examined. Mechanisms to protect children's rights will be studied in the context of legislated complaint procedures and quality assurance measures. Prerequisite: 4.0 university credits including 1.0 CHYS credit or SWRK 1000H and 1001H.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS2010H - Introduction to Research Methods

Overview

Department(s)
Child & Youth Studies, Communications

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%, Communications - Not Set

Cross-Lists
COMM-2010H

Course Description
Students are introduced to research design and methods commonly used in social science research. Topics include epistemology; theory and hypothesis development; variables; operational definitions; ethics, reliability, and validity; qualitative and quantitative study design. Prerequisite: 3.0 university credits including 1.0 COMM credit or a minimum 60% average in 1.0 CHYS credit at the 1000 level. Not open to students with credit for CHYS-COMM 2000H, CCTH 2000H, PLCW 2100H, or SOCI 2151H.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS2020H - Applications of Quantitative Research Methods and Statistics

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Introduces research and statistical methods commonly used in the social sciences. Topics include descriptive statistics, inferential statistics, and correlational designs, distribution, standardized scores, hypothesis testing procedures (t-tests, one-way ANOVA) as well as correlation, chi-square, and regression. Prerequisite: 4.0 university credits including 60% or higher in CHYS 2010H.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3001H - Case Studies of Professional Ethics and Risk Management

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Through lecture- and problem-based learning, this course examines risk management and ethical issues relating to children and youth. Topics discussed include professional relationships, working with diverse communities, assessing risk, and self-care. Students are asked to reflect on how professional practice is situated within a wider social context. Prerequisite: 7.0 university credits including 60% or higher in CHYS 2001H.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3002H - Playful Contexts of Children, Youth, and Learning

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Children and youth learn in a wide range of formal and informal settings. Contexts to be examined include immediate surroundings (e.g., home, school, neighbourhood) and extended environments (e.g., museums, nature, technology-mediated settings). This course inquires into the many contexts of play and the learning generated from engaging in play activities. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3003H - Arts: Theory to Practice

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Participants in this course use an interdisciplinary approach to examine child development within the areas of the arts. Students learn how to empower children as creative individuals. The critical role played by the arts in cognitive and social-emotional development and in creating community is also examined. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3004H - Equity and Identity in the Lives of Children and Youth

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Designed to examine the ways in which identity and social inequities faced by children and youth are shaped by factors such as race, indigeneity, gender, class, exceptionalities, and sexual orientation. Topics explored include identity formation, structural inequities, and discrimination. Prerequisite: 7.0 university credits including 1.0 CHYS credit.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3006H - Métis Child & Youth Well-Being Through Culture and Identity

Overview

Department(s)
Child & Youth Studies, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%, Indigenous Studies - Not Set

Cross-Lists
INDG-3006H

Course Description
Considers Métis-specific socio-political issues that impact Métis children and youth. Historic and current colonial systems that perpetuate the colonial marginalization of Métis families and communities are examined. The ways in which Métis communities work to heal from colonization are explored. Prerequisite: 7.0 university credits including CHYS-INDG 2006H.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3007H - Children's Knowledge of Death, Dying, and Bereavement

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Designed to provide a comprehensive introduction to theories and empirical findings on children and youth's understanding of death, dying, and bereavement. The course explores a range of current topics such as suicide, bereavement theories, and the needs of dying children and youth. Prerequisite: 7.0 university credits including 1.0 CHYS credit.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3008H - Young Canadians: Exploring the Lives of Immigrant and Refugee Children and Youth

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
An exploration of global migration, multiculturalism, and both the immigration and refugee process in Canada. Critical examination of the specific experiences of immigrant and refugee children and youth in relation to the law, settlement services, identity, education, health care, poverty, and social exclusion. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3009H - Policy and Participation for Children and Youth

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Students examine Canadian policies for children and youth, including health, poverty, and education. Focus is placed on the extent to which young people participate in the creation and development of policy. Prerequisite: 7.0 university credits including CHYS 2001H.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3010H - Global Child Rights

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Students will develop a multi-disciplinary approach to the study of global child rights. Child rights themes and issues to be examined include participation, education, violence, juvenile justice, health, alternative care, culture, Indigeneity, labour, migration, poverty, and resource exploitation. Prerequisite: 7.0 university credits including CHYS 2001H.

0.5

CHYS3011H - Infant and Toddler Development

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Major theoretical frameworks and prominent empirical research in infant and toddler development are examined. Topics include prenatal development and physical, language, socio-emotional, and cognitive changes. The roles of parenting and culture are examined, as well as developmental psychopathology. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3880H - Career Development Through Community Service Learning

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Provides students with the necessary foundations for career development and future planning. A focus is placed on professional and personal preparedness for individuals seeking work-integrated learning opportunities such as field placements, capstone projects, and community-based research. Prerequisite: A minimum 70% cumulative average, 10.0 university credits,and for non- Child & Youth Studies majors, permission of the course administrator.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3881H - Career Development Through Community Service Learning

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Provides students with the necessary foundations for career development and future planning. A focus is placed on professional and personal preparedness for individuals seeking work-integrated learning opportunities such as field placements, capstone projects, and community-based research. Prerequisite: A minimum 70% cumulative average, 10.0 university credits,and for non- Child & Youth Studies majors, permission of the course administrator.

0.5

CHYS3900H - Reading Course

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
A course of individual study supervised by a faculty member exploring advanced topics in child and youth studies. The proposed syllabus requires approval of the instructor and the program coordinator prior to registering in the course. Proposals should be submitted by March 31 for reading courses to begin in the following Fall term, and by November 30 for reading courses due to be taken in the Winter term. Prerequisite: 9.0 university credits including 1.5 CHYS credits at the 2000 level and a minimum cumulative average of 70%.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3905H - Research Practicum

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Designed to allow students to pursue research activities under the direction of a department faculty member, normally within the faculty/supervisor's ongoing research program. Prerequisite: 9.0 university credits including 70% or higher in CHYS 2010H (or 2000H), a minimum cumulative average of 70%, and permission of the program coordinator and course instructor. Open only to Child & Youth Studies majors. Students may take a maximum of 1.5 credits from CHYS 3905H, 3906H, 4880H, 4881H, 4882Y, 4905H, or 4906H.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS3906H - Research Practicum

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Designed to allow students to pursue research activities under the direction of a department faculty member, normally within the faculty/supervisor's ongoing research program. Prerequisite: 9.0 university credits including 70% or higher in CHYS 2010H (or 2000H), a minimum cumulative average of 70%, and permission of the program coordinator and course instructor. Open only to Child & Youth Studies majors. Students may take a maximum of 1.5 credits from CHYS 3905H, 3906H, 4880H, 4881H, 4882Y, 4905H, or 4906H.

CHYS4000H - Contemporary Issues in Child & Youth Studies

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Provides a critical perspective on contemporary issues, policy, and practice relating to children and youth. Topics explored include child poverty, immigrant and refugee youth, consumerism, racism, advocacy, sexuality, and gender issues. Students reflect on how the lives of young people are shaped by intersecting social factors. Prerequisites: A minimum cumulative average of 65% and 13.0 university credits including 1.0 CHYS credit at the 3000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS4001H - Youth Offending and Youth Justice

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Students are introduced to various topics relating to youth justice in Canada. We examine how young offenders have been constructed and responded to over time, with a focus on the Youth Criminal Justice Act. Special issues addressed include youth gangs, Indigenous youth, criminalized girls, homelessness, and restorative justice. Prerequisite: A minimum cumulative average of 65% and 13.0 university credits including 1.0 CHYS credit at the 3000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS4003H - Inclusion and Diversity in Children and Youth

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Students explore the construction of disability in children and youth. Topics include historical and current state of inclusion and belonging in a variety of formal and informal play contexts, social and medical models of disability, and the role of universal design and universal design for creating equitable play opportunities. Prerequisite: 12.0 university credits including 1.5 CHYS credits at the 3000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS4004H - Pathways to Wellness (Mino Bimaadsiwin) with Indigenous Children and Youth

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Explores the collective traumas and complex grief experienced by Indigenous youth by looking at critical pathways to wellness--i.e., the use of culture, land, and shifting social policies--and utilizing Indigenous pedagogies, self-reflexive learning, anti-oppressive anti-racist approaches to deepen awareness of contemporary colonial-Indigenous relations and Indigenous-led responses. Prerequisite: 12.0 university credits including 1.5 CHYS credits at the 3000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS4006H - Health Inequalities Among Children and Youth

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Comparisons of structural and social inequalities in health across Canada and globally. Focus on local, national, and international determinants of health in the lives of children and youth, and how key factors (e.g., national policies, income inequality, household dynamics, global occurrences) impact their development and health outcomes. Prerequisite: 13.0 university credits including 1.0 CHYS credit at the 3000 level and a minimum cumulative average of 65%.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS4007H - Rights Based Community Engagement With Children and Youth

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Students explore theoretical perspectives and best practices pertaining to community engagement with children and youth. Students engage children and young people through facilitating a children's rights workshop to elicit their insights on a rights-based topic. Prerequisite: A minimum cumulative average of 70% and 13.0 university credits including 1.5 CHYS credits at the 3000 level including 70% or higher in CHYS 3001H.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS4008H - Foundations of Counselling and Communication Skills

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Students develop core conversational techniques and counselling micro-skills, with an emphasis on practical strategies and interventions tailored to children and youth. Topics include the development of therapeutic relationships, application of therapeutic modalities, conceptualization of child and adolescent psychopathology through therapy modalities and theories, and the integration of ethical guidelines and culturally responsive practices. Prerequisite: A minimum cumulative average of 65% and 13.0 university credits including 1.5 credits at the 3000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CHYS4010Y - Independent Honours Thesis

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Conducted under the supervision of departmental faculty, the Honours thesis requires students to plan, execute, and report satisfactorily a substantial and well-designed piece of novel research based on careful study of a topic relevant to child and youth studies. CHYS 4020D is a double credit for Child & Youth Studies majors; CHYS 4010Y is a single credit involving submission of the same thesis to the other department/ program of a joint-major. Prerequisite: An average of 75% or higher in all CHYS courses completed; 14.0 university credits including a minimum 75% in CHYS 2020H; and permission of the department.

Academic Level
Undergraduate

Credit Value

:
1

CHYS4020D - Independent Honours Thesis

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Conducted under the supervision of departmental faculty, the Honours thesis requires students to plan, execute, and report satisfactorily a substantial and well-designed piece of novel research based on careful study of a topic relevant to child and youth studies. CHYS 4020D is a double credit for Child & Youth Studies majors; CHYS 4010Y is a single credit involving submission of the same thesis to the other department/ program of a joint-major. :
2

CHYS4800Y - Independent Research Studies

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
Students have the opportunity to apply the theoretical and practical concepts acquired throughout the Child & Youth Studies program through an advanced review and critical analysis of research literature as it applies to an area of personal interest. Prerequisite: 12.0 university credits including 60% or higher in CHYS 2020H and a minimum 70% cumulative average. Open only to Child & Youth Studies majors.

Academic Level
Undergraduate

Credit Value

:
1

CHYS4880H - Placement - Field Based Learning

Overview

Department(s)
Child & Youth Studies

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%

Course Description
This placement allows students the opportunity to gain practical experience in settings such as foster homes, shelters, residential treatment facilities, and community outreach programs. During the placement, coursework lends support to the field experience. Prerequisite: 12.0 university credits including 70% or higher in CHYS 3001H, a minimum cumulative average of 70%, and permission of the program coordinator. The deadline for securing a Fall/Winter placement is June 10. Open only to Child & Youth Studies majors. Students may take a maximum of 1.5 credits from CHYS 3905H, 3906H, 4880H, 4881H, 4882Y, 4905H, or 4906H.

Academic Level

CLIM1060H - Introduction to Climate Change

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
ERSC-1060H, GEOG-1060H

Course Description
Examines the scientific foundation of climate change, including the evidence for past and future changes to the climate and the biophysical and social impacts from climate change. Climate solutions and advocacy are explored. By bringing together science, impacts, technologies, and politics, the complexity of climate change is introduced. Equivalent to CLIM-ERSC 1050H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CLIM2050H - Climate Data and Analytics

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - Not Set

Cross-Lists
GEOG-2050H

Course Description
An introduction to the practices and concepts of data analytics applied to climate science and policy. Students learn about different types of climate data, approaches for gathering and organizing data, and tools for data analysis. Approaches for effectively presenting and communicating data are covered. Prerequisite: 4.0 university credits including CLIM-ERSC-GEOG 1060H (CLIM-ERSC 1050H), GEOG 1040H, MATH 1005H, and MATH 1051H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CLIM3005H - Climate and Energy Economics

Overview

Department(s)
Environment, Economics

Contact Department ('not set' refers to cross-listed depts)
Environment - Not Set, Economics - Not Set

Cross-Lists
ECON-3005H

Course Description
Examines economic approaches in shaping climate policies. Students learn about the challenges of applying conventional economic analysis to climate change, climate damage estimation and the social cost of carbon, mitigation costs, the application of economic instruments, the structure of energy markets, and methods for assessing low-carbon energy projects. Prerequisite: 9.0 university credits including CLIM 2050H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CLIM3470H - Climate Change and Its Impacts

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
ERSC-3470H, GEOG-3470H

Course Description
This course examines human influence on the climate system and future changes to the climate system, and assesses the impacts of climate change on our physical and biological world. Prerequisite: 9.0 university credits including GEOG-ERSC 2080H and 2460H. Equivalent to GEOG 3410H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

CLIM4001H - Applied Climate Models

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%,
Geography - Not Set

Course Description
Examines how models are used to assess the risk, impacts, and mitigation of climate change. Quantitative models to assess future climate scenarios are introduced. The course focuses on the application of climate models of varying complexity, their limitations and uncertainties under a variety of emission scenarios. Prerequisite: 10.0 university credits including CLIM 2050H, 3005H, and GEOG 3410H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

CLIM4002H - Carbon Accounting and Management

Overview

Department(s)
Environment, Economics

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Economics - Not Set

Course Description
Examines the measurement, monitoring, and verification of greenhouse gases in sectors such as forestry, energy, buildings, agriculture, transportation, banking, and government. Exercises using inventory tools and techniques are applied to national inventories, organizational inventories, carbon offsetting protocols, cap-and-trade programs, environmental product declarations, and carbon tax programs. Prerequisite: 10.0 university credits including CLIM 3005H and ERSC 2300H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

CLIM4003H - Low Carbon Technologies

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Examines a range of innovative technologies that may enable a low-carbon transition, including renewable energy, conservation, electrification, energy storage, nuclear energy, carbon capture and storage, and negative emissions technologies. Students learn to assess the merits and drawbacks of these technologies using a range of environmental, economic, and socio-technical techniques. Prerequisite: 9.0 university credits including ERSC 2300H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS1000H - Introduction to Artificial Intelligence

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-1000H

Course Description
A basic overview and introduction to the key concepts, history, applications, logic, ethics and current topics of artificial intelligence. Concepts such as machine learning, deep learning, and neural networks are discussed.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

COIS1010H - The Digital World

Overview

Department(s)
Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Media Studies - Not Set

Cross-Lists
MDST-1010H

Course Description
Digital systems have redefined how we work, communicate, and play-just think about the World Wide Web, mobile camera phones, video games, and e-business. Core topics examine the underlying technologies of both computing and information systems and how they have become an integral and indispensable part of our daily lives.

:
0.5

COIS1020H - Programming for Computing Science

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Programming for computer science requires a solid foundation in the software development process, including algorithmic design, abstraction, implementation, testing, and documentation. Core topics include sequencing, selection, iteration, simple data types, expressions, and arrays, as well as the object-oriented notions of classes, methods, inheritance, and polymorphism. Pre- or co-requisite: COIS 1010H or PHYS 1001H or MATH 1110H. Students without prior programming experience should take COIS 1010H as a prerequisite.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

COIS1400H - Introduction to Data Science

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-1400H

Course Description
Develops a solid foundation in the main concepts of data science and programming in Python. Core topics include repetition and selection structures, algorithm design techniques, file types, big data, data mining, and data visualization. Prerequisite: COIS 1020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS1620H - Introduction to Information Systems

Overview

Department(s)
Computer Science, Business

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Business - Not Set

Cross-Lists
ADMN-1620H

Course Description
Wherever and whenever information is required, an information system is also required. Core topics include the use of information systems for strategic advantage, their basic underlying technologies, the types of information systems and how they are constructed, managed, and replaced, as well as their ethical and legal use. Prerequisite: COIS 1010H.

Academic Level
Undergraduate

Course Designation
Science

:
0.5

COIS2020H - Data Structures and Algorithms

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Data structures define how data are represented. Algorithms define how data structures are manipulated. Using more advanced programming language features, core topics include arrays, linked lists, hash tables, binary heaps, and binary search trees. Prerequisite: COIS 1020H. Recommended: MATH 1350H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS2040H - Object Oriented Programming

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
The C++ language is utilized to examine object-oriented concepts. These concepts can include classes, objects, inheritance, encapsulation, polymorphism, class deviation, abstract classes, interfaces, static class members, object construction and destruction, exceptional handling, function overloading and overriding, overload resolution, container classes, and/or template classes. Also includes an introduction to Git and GitHub. Prerequisite: COIS 1020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS2240H - Software Design and Modelling

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Good software design and modelling is a necessary prerequisite for the production of software which is correct, robust, and maintainable. Using the standard Unified Modeling Language (UML) to specify design, core topics include use cases; classes and class membership; aggregation, composition, and inheritance; virtual functions and polymorphism; state diagrams; and design patterns. The course also covers object-oriented concepts using the Java language. Prerequisite: COIS 1020H or COIS-ADMN 2620H.

Science

Credit Value

:
0.5

COIS2250H - Electronics

Overview

Department(s)
Physics & Astronomy, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Computer Science - Not Set

Cross-Lists
PHYS-2250H

Course Description
An applied course in the electronic circuits most commonly used in laboratory sciences. Circuit theory, test instruments, operational amplifiers, semiconductor theory, measurement sensors, power control, digital circuits, computer process-control and data collection, AC circuit theory, filters, DC power supplies, RC timing circuits, amplifiers, oscillators. Prerequisite: 60% or higher in each of PHYS 1002H and MATH 1120H or 1121H, or permission of the department.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS2300H - Computer Organization

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Computer organization is the level of abstraction between the digital logic and the operating system. At this level, computing subsystems refer to hardware pieces built from lower-level building blocks. Core topics include the central processing unit, memory hierarchy, and input/output organization. Topics are supplemented with assembly language programming. Prerequisite: COIS 1020H or 1520H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS2320H - Digital Logic

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Digital logic describes how computer hardware actually works at the logic gate and circuit level. Core topics include Boolean algebra, Karnaugh maps, the minimization of Boolean functions and the design of combinational and sequential circuits, including adders, decoders, multiplexers, flip-flops, and memory circuits. Prerequisite: COIS 1020H or 1520H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS2400H - R in Data Science

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
An introduction to the programming language R and its applications in data science. A wide range of topics are covered, with emphasis on techniques for data gathering, cleaning and manipulation, text and numerical analysis, and visualization to provide relevant applications in data science. Prerequisite: COIS 1400H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS2410H - Symbolic Logic

Overview

Department(s)
Philosophy, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set

Cross-Lists
PHIL-2410H

Course Description
An introductory study of formal logical systems, together with their use in the analysis of various types of arguments. Prerequisite: 4.0 university credits or permission of department chair.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS2430H - Web Development 1: Front-End

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Front-end web development requires a strong understanding of the technologies used on the client side of a web application. Topics include front-end languages HTML, CSS, and JavaScript, as well as important concepts like responsive design, accessibility, usability, version control, and regular expressions. Prerequisite: COIS 1020H or 1400H. Not open to students with credit for COIS 3420H.

0.5

COIS2520H - Professionalism and Ethics in Computing

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Identifies and explores some of the fundamental social, legal, and ethical issues inherent in the discipline of computing. Topics include social context, analytical tools, professional ethics, intellectual property, privacy and civil liberties, professional communication, and equity issues. Pre- or co-requisite: COIS 1020H or COIS-ADMN 1620H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS2600H - Discrete 1: Structures

Overview

Department(s)
Mathematics & Statistics, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Computer Science - Not Set

Cross-Lists
MATH-2600H

Course Description
Mathematics related to computer science, including propositional logic, sets and relations, proofs, counting techniques and recursive relations, trees and networks (graphs); applications. Prerequisite: MATH 1350H and either 1120H or 1121H; or COIS 1020H, MATH 1350H, and one of MATH 1005H, 1110H or 1111H.

0.5

COIS2620H - Systems Analysis and Design

Overview

Department(s)
Computer Science, Business

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Business - Not Set

Cross-Lists
ADMN-2620H

Course Description
Systems analysis and design identifies the informational needs/ resources of an organization and specifies appropriate information systems to meet the needs and exploit the resources for strategic advantage. Core topics include the current methodologies, techniques, and tools used for both the analysis and design. Managerial and organizational issues are also discussed. Prerequisite: COIS-ADMN 1620H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS2750H - Computer Crime and Forensics

Overview

Department(s)
Computer Science, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Forensic Science - Not Set

Cross-Lists
FRSC-2750H

Course Description
Computer crime is the fastest-growing area of illegal activity in the world. Users beware! After some background information (how computers work, number systems, information-hiding algorithms), we examine the schemes and techniques used by computer criminals, the forensic techniques used to catch the criminals, and ways to prevent victimization. Recommended prerequisite: COIS 1010H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS2800H - Digital Culture

Overview

Department(s)
Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Media Studies - Not Set

Cross-Lists
MDST-2800H

Course Description
Interactive digital technology and the convergence of computing, communications, public media, and entertainment have had profound cultural implications. Core topics address current concerns such as the World Wide Web, multimedia design, virtual spaces, social domains, and the blogosphere. Recommended prerequisite: COIS 1010H. This course cannot be counted as a science credit.

Academic Level
Undergraduate

Credit Value

:
0.5

COIS2830H - Multimedia and Design

Overview

Department(s)
Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Media Studies - Not Set

Cross-Lists
MDST-2830H

Course Description
Multimedia concepts such as photo and video editing, visual effects, 3D assets, and even writing style serve as tools to explore concepts and challenges in modern user experience design, with a focus on web pages, game design, and user interfaces. Principles of design covers core concepts such as the discoverability of features, understanding diverse human users, complexity of feedback, and how computer systems interpret and react to human actions. Recommended prerequisite: COIS 1010H.

Academic Level
Undergraduate

Course Designation
Science

:
0.5

COIS3020H - Data Structures and Algorithms 2

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
A continuation of COIS 2020H, this course introduces more complex data structures and algorithmic techniques. Core topics include adjacency matrices and lists, randomly built binary search trees, augmented data structures, tries, binomial heaps, B-trees, disjoint sets, and quad trees. Prerequisite: COIS 2020H. Recommended: COIS-MATH 2600H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

COIS3030H - Software Specification and Development

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
The development of large software systems relies on sound methodologies and techniques to manage the inherent complexity and to produce quality software which satisfies the client or customer. Core topics include various software development paradigms and their usage, as well as the importance of feasibility studies, requirements analysis, and specification. Prerequisite: COIS 2240H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

COIS3040H - Advanced Software Architecture and Design

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Software architecture is concerned with the highlevel design, interface, and relationships among the components that make up a software system. Testing ensures that these components work properly on their own and within an integrated system. Core topics include architecture description languages, as well as maintenance strategies and various testing methodologies. Prerequisite: COIS 2020H and 3030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3050H - Formal Languages and Automata

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Formal languages and automata are the underlying theoretical foundations of computer science. Core topics include regular languages and finite automata, context-free languages and pushdown automata, the Turing machine and its languages. Real world applications, unsolvable problems, and their relevance to the semantics of programming are also discussed. Prerequisite: COIS 1020H. Recommended: COIS-MATH 2600H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3060H - Software Processes

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Introduces students to software processes, project management practices, and software design methodologies such as waterfall, iterative and agile approaches. Taken in preparation for Software Engineering co-op work terms. Prerequisite: 5.0 COIS credits including COIS 2040H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3065H - Cross-Platform Application Development

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
This course provides students insight--both applied and theoretical--into the field of cross-platform application development. Emphasis is placed on the qualities of good interface design and the processes, tools, and frameworks required to develop applications for current and emerging mobile and desktop environments. Prerequisite: COIS 2040H and 2430H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3180H - Numerical and Computational Methods

Overview

Department(s)
Mathematics & Statistics, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Computer Science - Not Set

Cross-Lists
MATH-3180H

Course Description
Error analysis, nonlinear equations, linear systems, interpolation methods, numerical differentiation and integration and initial value problems. Prerequisite: MATH 2110H. Not open to students with credit for MATH-COIS 2180H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

COIS3200Y - Electricity and Magnetism

Overview

Department(s)
Physics & Astronomy, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Computer Science - Not Set

Cross-Lists
PHYS-3200Y

Course Description
Electrostatics, magnetostatics, electric and magnetic properties of matter, Maxwell's equations, electromagnetic wave propagation. Prerequisite: 60% or higher in PHYS 1002H or permission of the department; PHYS-MATH 2150H, MATH 2110H, and 2120H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
1

COIS3270H - Philosophy of Artificial Intelligence

Overview

Department(s)
Philosophy, Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set, Artificial Intelligence - Not Set

Cross-Lists
AIST-3270H, PHIL-3270H

Course Description
An examination of philosophical questions pertaining to artificial intelligence (AI) and the role AI plays in society. The first part treats the history, nature, and limits of AI. The second part turns to more applied questions related to ethics, and the social and political implications of AI. Prerequisite: 7.0 university credits or permission of the department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

COIS3320H - Fundamentals of Operating Systems

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
An operating system is the software component of a computing system which is responsible for the management and accessibility of the hardware resources. Core topics include process management, synchronization, processor allocation, primary and secondary storage management, file management, security, and user interfaces. Topics are illustrated using contemporary operating systems. Prerequisite: COIS 2020H and 2300H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3350H - Linear Programming

Overview

Department(s)
Mathematics & Statistics, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Computer Science - Not Set

Cross-Lists
MATH-3350H

Course Description
An introduction to the concepts, techniques, and applications of linear programming and discrete optimization. Topics include the simplex method, duality, and integer programming. Prerequisite: MATH 1350H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

COIS3360H - Social Media Ethics

Overview

Department(s)
Philosophy, Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set, Media Studies - Not Set

Cross-Lists
MDST-3360H, PHIL-3360H

Course Description
An examination of the moral challenges raised by social media, including echo chambers, cancel culture, hate speech, privacy, manipulation, misinformation, and digital addiction. The course explores how social media reshapes our notions of friendship, community, responsibility, and freedom. Prerequisite: 7.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value
:
0.5

COIS3370H - Cyberethics

Overview

Department(s)
Philosophy, Media Studies, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Media Studies - Not Set, Computer Science - Not Set

Cross-Lists
MDST-3370H, PHIL-3370H

Course Description
Enables students to develop their own positions about the most important social and moral problems raised by computer use and technologies, including the fragmentation of society into computer "haves" and "have-nots," Internet censorship, pornography, intellectual property rights, and software piracy. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

COIS3380H - Systems Programming in C

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Systems programming produces software which provides services to the computer hardware. Using systems programming techniques in a Unix-style environment and using machine-oriented programming languages such as C/C++, core topics include procedural programming, shell programming, pipes, file processing, system calls, signals, and basic network programming. Prerequisite: COIS 2020H or 2300H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3400H - Database Management Systems

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
A database is a structured collection of data, whereas a database management system facilitates the creation, querying, and maintenance of databases. Core topics include the relational model, entity-relationship diagrams, relational algebra, SQL, database application development, storage and indexing, and normalization. Topics are illustrated using a relational DBMS. Prerequisite: COIS 1020H or COIS-ADMN 2620H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3410H - Non-Classical Logic

Overview

Department(s)
Philosophy, Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set, Artificial Intelligence - Not Set

Course Description
Building on classical propositional and first-order logic, this course introduces students to a variety of non-classical logics including modal logic, intuitionistic logic, and many-valued logic, as well as fuzzy logic. Prerequisite 7.0 university credits including PHIL 2410H or COIS 2320H.

Academic Level
Undergraduate

Credit Value

:
0.5

COIS3430H - Web Development 2: Server-Side and Frameworks

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Following the foundations set in COIS 2430H, this course encourages the exploration of more advanced topics in web applications, including design patterns, server-side programming, database integration, APIs, security, and front-end frameworks, along with development processes like build tools, testing and CI/CD. Prerequisite: COIS 2430H or 3420H. Pre- or co-requisite: COIS 3400H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3510H - Data Visualization

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Data visualization is a main step in the analysis of data in a wide range of scientific research areas as well as business applications. We discuss general approaches, tools, and techniques for the visualization of various types of data, including spatial data, graph data, and time series data. Prerequisite: 10.0 university credits or permission of instructor. Recommended: COIS 1020H or 1520H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3533H - Game Studies

Overview

Department(s)
Culture, Arts, and Media, Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Computer Science - Not Set, Media Studies - Not Set

Cross-Lists
CUST-3533H, MDST-3533H

Course Description
An introduction to game studies that explores the implications of games and play. What can games tell us about what we value, how we think, and who we are? Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

COIS3550H - Applied Artificial Intelligence and Machine Learning

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-3550H

Course Description
Fundamental artificial intelligence (AI) and machine learning concepts, algorithms, and techniques. The focus is on why and what can be done, along with available tools and applications in solving real-world problems, rather than the finer details of how it could be built. The course uses TensorFlow with provided Python code. Prerequisite: COIS 1020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3560H - Human-Computer Interaction

Overview

Department(s)
Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Media Studies - Not Set

Cross-Lists
MDST-3560H

Course Description
The study of human-computer interaction incorporates ideas from computer science, behavioural science, and design to improve interaction between people and computers. Core topics include multidisciplinary, intuitive design, computer-supported co-operative education/work, ubiquitous computing, prototyping, collaboration, social interaction, augmented reality, haptics, heuristics, interfaces, workstation independence. Prerequisite: 5.0 university credits.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3570H - LLM and Natural Language Processing

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-3570H

Course Description
Introduces the Large Language Models (LLMs), their impact, and application on natural language processing (NLP). Machine learning approaches are discussed. Students will learn how to build computational models for NLP, how to custom and fine-tune LLMs and how to optimize their performance. Prerequisite: COIS 2020H and AIST-COIS 3550H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3745H - Virtual Worlds: The Anthropology of Online Communities

Overview

Department(s)
Anthropology, Media Studies, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Media Studies - Not Set, Computer Science - Not Set

Cross-Lists
ANTH-3745H, MDST-3745H

Course Description
Focuses on worlds creating in playable media (games), including both massively multiple online games (MMOGs) and tabletop role-playing games. "Virtual" society is now an increasingly taken-for-granted aspect of everyday sociality. This course develops tools and theories for the study of virtual worlds, online and offline. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

COIS3750H - Principles of Online Marketing

Overview

Department(s)
Computer Science, Business

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Business - Not Set

Cross-Lists
ADMN-3750H

Course Description
Businesses today must effectively leverage the Internet and develop an online strategy which complements their traditional business practices. Core topics include website best practices, online marketing and customer relationships, positioning businesses online, and social networking for small and large enterprises. Topics are consolidated with a professional business proposal. Prerequisite: COIS-ADMN 1620H or ADMN 1000H or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3820H - History and Impact of Computing

Overview

Department(s)
Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Media Studies - Not Set

Cross-Lists
MDST-3820H

Course Description
The history of digital computation is relatively recent, but all around us. By introducing the key people whose insight, inventiveness, and industry have defined the digital world, a framework is developed within which all students can appreciate the fundamental milestones of computing and their impact on the world. Prerequisite: 5.0 university credits.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

COIS3850H - Fundamentals of Project Management

Overview

Department(s)
Computer Science, Business

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Business - Not Set

Cross-Lists
ADMN-3850H

Course Description
Good project management focuses on the practical realities of getting things done with limited time and resources according to specifications determined by others--with successful outcomes. This course prepares students to write the professional certification exams offered by the Project Management Institute and the Project Management Association of Canada. Prerequisite: 10.0 university credits or COIS 2240H or COIS-ADMN 2620H or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

COIS3860H - Internship Project

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Students work at a site external to the department for 80-120 hours. In recognition of the scope of possible projects, this work can either be performed during 2-3 one-week (not necessarily consecutive) sessions, or during 10-15 full-day sessions in consecutive weeks. Students meet on a regular basis with their faculty mentor. Prerequisite: A minimum 75% cumulative average and 10.0 university credits including 5.0 COIS credits.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS3901H - Reading Course

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Students are required to submit a course proposal and have it approved by the departmental curriculum committee before enrolling.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS4000Y - Software Engineering Project

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
This capstone course provides students with hands-on experience in the analysis, design, implementation, testing, and documentation of a real-world software product. Working in teams with clients, the project integrates theoretical knowledge acquired in all previous COIS courses. Prerequisite: 65% or higher in each of COIS 2020H, 2240H, and 3040H, and 65% or higher in COIS 2430H or 3400H. Pre- or co-requisite: COIS-ADMN 3850H. Not open to students with credit for COIS 4850H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
1

COIS4010H - Current Topics in Data Science

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Provides an overview of the current status of data science in a variety of focus fields and guides the students in the preparation for their COIS 4020H project. Students discuss and present current research, evaluation methods, data set characteristics and tools from their chosen areas. Prerequisite: 10.0 university credits and two of COIS 2020H, 3510H, or 4400H, or permission of the instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS4020H - Data Science Project

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
This course guides students in the implementation of their capstone data science project. Under faculty supervision, students propose, develop, implement, and evaluate a data science solution. Prerequisite: COIS 4010H. Open only to students in the Data Science program.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS4050H - Advanced Algorithms

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Algorithmic techniques provide generalized approaches to solving a wide variety of problems. Algorithmic analysis provides the basis of comparison among different solutions. Core topics include the algorithmic techniques of divide-and-conquer, dynamic programming, greedy algorithms, approximation algorithms, and string matching as well as the analytical techniques of problem classification, asymptotic analysis, amortized analysis, and recurrence relations. Prerequisite: COIS 2020H and COIS-MATH 2600H. Recommended: COIS 3020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS4100H - Comparative Programming Languages

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Evaluating and selecting the most appropriate programming language for an application is a critical step in software development. Core topics include the types of programming languages as well as the principal design and implementation issues for control structures, data types, subprograms, exception handling, and concurrency. Prerequisite: COIS 2020H and 1.0 COIS credit at the 3000 or 4000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS4310H - Computer Networks

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
A computer network links together two or more computers to enable the transfer of data. Core topics include data communication, network hardware and software, network architecture and protocols, local area and wide area networks, end-to-end routing protocols, wireless networks, Quality of Service, multimedia support, and network management. Prerequisite: COIS 3320H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS4350H - High Performance Computing

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
High performance computing is the use of advanced computer architectures to solve problems which require significant processing power, memory access, or storage. Core topics include advanced computer architectures, programming for shared and distributed memory machines, networking issues, caching, performance evaluation, and parallel algorithms. Topics are supplemented with case studies. Prerequisite: COIS 3320H or COIS 3380H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS4370H - Computer and Information Security

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Security of data and information systems is a vital component of an organization's infrastructure. Core topics include the key concepts and legal implications of information security, risk and security management, asset security, and principles and policies for securing data. Attention is given to the methods of confirming and monitoring compliance to agreed-upon policies. Prerequisite: COIS 3320H or COIS 3380H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS4400H - Data Mining

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-4400H

Course Description
Data mining is the extraction of previously unknown and potentially useful patterns from large data sets. Core topics include the statistical foundations of data mining, sampling mechanisms, missing data, clustering, classification, and outlier detection. Case studies cover a wide variety of applications such as astronomy and marketing. Prerequisite: 1.0 COIS credit at the 3000 or 4000 level and one of COIS 2020H or COIS-ADMN 2620H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS4450H - Big Data

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Big data applications are encompassing commercial and scientific, moving towards exascale analytics. Students from a variety of disciplines are introduced to the challenges and opportunities in this field, with the goal of providing them with theoretical and hands-on experience in the area of big data analytics. Prerequisite: COIS 3380H and 3510H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS4470H - Modelling and Simulation

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Modelling and simulation enables us to construct mathematical or computer-based representations of real-world phenomena. Three steps are typically followed: modelling the key parameters, implementing a program to simulate behaviour, and analyzing the results. Core topics include pseudo-random number generation, discrete-event and next-event simulation, output analysis, and queuing thoery. Prerequisite: MATH 1550H and COIS 2020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

COIS4480H - Computer Graphics

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
Computer graphics are everywhere, from computeranimated movies and games to virtual reality and telepresence. This course introduces the fundamental mathematical and computational concepts of computer graphics. Topics include hardware, the OpenGL suite, line drawing, two-dimensional transformations, two-dimensional clipping algorithms, three-dimensional representations, three-dimensional clipping, line removal techniques, splines, and ray tracing. Prerequisite: COIS 2020H and MATH 1350H. Recommended: MATH 1110H.

COIS4550H - Artificial Intelligence

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-4550H

Course Description
Artificial intelligence is the study of those techniques which create perceptions of "machine intelligence" and "intelligent agents." Topics may include but are not limited to expert systems, various evolutionary learning systems such as genetic algorithms, genetic programming, and neural networks. The impact and ethics of artificial intelligence are also examined. Prerequisite: 10.0 university credits including COIS 2020H.

COIS4570H - Deep Learning

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-4570H

Course Description
This course introduces students to the industry-shaping field of deep learning. The course covers deep directly connected artificial neural networks, CNNs, RNNs, LSTMs, and Attention-based neural networks. Students also learn about explainable AI techniques such as LIME, and advanced methods such as zero-shot, one-shot, and few-shot learning. Prerequisite: MATH 1110H, 1350H, and 1550H; and one of AIST 2010H or AIST-COIS 3550H.

COIS4850H - Information Systems Project

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
A capstone course which provides students with the practical experience in the analysis and design (but not implementation) of a real-world information system. Working as a team with clients, the project draws substantially on the theoretical knowledge gained in all previous COIS courses. Prerequisite: COIS-ADMN 2620H, COIS 3030H, and COIS 3850H. Recommended: COIS 3400H. Not open to students with credit for COIS 4000Y.

COIS4851H - AI in Information Systems

Overview

Department(s)
Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-4851H

Course Description
A capstone course providing students with the practical experience in the analysis and design (but not implementation) of a real-world information system. The idea is to customize the general information systems of COIS 4850H to AI related systems which has a wide range of selections with today's extensive applications of AI techniques. Prerequisite: COIS 2020H. Not open to students with credit for COIS 4000Y or 4850H.

COIS5210H - Advanced Topics in Software Engineering

Overview

Department(s)
Computer Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%

Course Description
This course delves into advanced software engineering topics, such as software modeling, mining software repositories, empirical methods in software engineering, AI for Software Engineering (AI4SE), software testing, and quality assurance. The course will involve reading the latest research papers, delivering presentations, and hands-on work on software engineering projects.

COMM1000H - Introduction to Communications

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
An introduction to the study of various aspects of human communication. Consideration of the forms, formats, settings, and infrastructure of communication practices and the communications industry. Quantitative and qualitative approaches to understanding our engagements with various forms of communication. Equivalent to CCTH 1000H.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM1001H - Introduction to Public Speaking

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Provides students with an introduction to public speech composition and presentation with an emphasis on techniques for informing and persuading audiences. Students learn the process of researching, writing, and delivering various types of speeches with each major assignment culminating in a presentation. Not open to students with credit for COMM 1000H (2021FA or 2022FA).

Academic Level
Undergraduate

Credit Value

:
0.5

COMM2001H - Communication Theory

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Examination and assessment of key Communications theories and theorists. Includes a history of key theories that have contributed to the development of Communication Studies. Application of theories to historical and contemporary examples of communication drawn from both mass-mediated and non-mass-mediated forms of communication. Prerequisite: COMM 1000H (or CCTH 1000H).

Academic Level
Undergraduate

Credit Value

:
0.5

COMM2002H - Foundations of Public Relations

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Provides students with an overview of the history, theory, and practice of public relations. Introduces students to various areas of practice within public relations along with some of the foundational strategies and processes associated with it. Students also learn how to craft basic public relations materials of various types. Pre- or co-requisite: COMM 1000H or permission of the instructor.

Academic Level
Undergraduate

:
0.5

COMM2003H - Becoming Digital: Reading, Writing, and Creating

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Provides students with the tools they need to navigate the changes to thought and communication that digital technology has wrought. This course not only offers insight into how technology has changed how we read and write, but also how we change with it. Students also engage in making the digital media/objects they study. Equivalent to CCTH 2003H.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM2005H - Writing for the Communications Industry

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
This course provides students with a strong foundation in both technical and creative writing for the communications industries. Through application of communications theory, rigorous case study analysis, and weekly writing assignments, students will develop a holistic writing skill set aimed at improving craft, style, professionalism, clarity, and adaptability across mediums. Prerequisite: 2.0 university credits including COMM 1000H.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM2006H - Broadcast Journalism

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
This course examines core practices of broadcast journalism in a platform-driven news environment. Students find and verify stories, pitch and plan coverage, conduct effective interviews, and produce ethical, audience-centred journalism across audio, video, and social-first formats. Lectures and workshops develop writing for ear and screen, recording and editing, and multimedia story construction. Prerequisite: 2.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM2007H - Research and Interviewing for Journalism

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Focuses on developing basic research and interviewing skills for journalism and news reporting. Students develop the practical research skills required to produce journalistic work in a variety of formats. Students also learn about the theory and practice of interviewing and working with a range of different sources and subjects. Prerequisite: 2.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM2008H - Communications for Environmental and Social Change

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
This course focuses on mobilizing scientific knowledge using effective communication. Students will analyze the strategies behind local and global environmental and social justice campaigns while developing practical skills to create impactful, solution-focused narratives for diverse audiences. The curriculum prepares students to serve as effective agents of change in professional and public spheres. Prerequisite: COMM 1000H or 2.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM2010H - Introduction to Research Methods

Overview

Department(s)
Child & Youth Studies, Communications

Contact Department ('not set' refers to cross-listed depts)
Child & Youth Studies - 100%, Communications - Not Set

Cross-Lists
CHYS-2010H

Course Description
Students are introduced to research design and methods commonly used in social science research. Topics include epistemology; theory and hypothesis development; variables; operational definitions; ethics, reliability, and validity; qualitative and quantitative study design. Prerequisite: 3.0 university credits including 1.0 COMM credit or a minimum 60% average in 1.0 CHYS credit at the 1000 level. Not open to students with credit for CHYS-COMM 2000H, CCTH 2000H, PLCW 2100H, or SOCI 2151H.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3000Y - Communications Capstone

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
In this project-based course, students conduct research on a specific issue or question related to Communications. Students are expected to respond to this issue or question by synthesizing their previous learning and experience in the program. Students work in teams and with faculty members and community organizations. Prerequisite: COMM 1000H, 2002H, and 2010H; or permission of instructor. Students may take only one of COMM 3000Y or 4000Y for credit.

Academic Level
Undergraduate

Credit Value

:
1

COMM3001H - Event Management

Overview

Department(s)
Communications, Business

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%, Business - Not Set

Cross-Lists
ADMN-3001H

Course Description
An introduction to the field of events management. Students learn about planning and managing events from conception to actualization. Includes topics related to planning, marketing, media relations, budgeting, human resource management, logistics, risk management, sustainability, and post-event analysis. Prerequisite: 7.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3002H - Media Relations

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Offers an advanced curriculum in the theory and practice of working with and through the media in strategic communications. Students learn the primary strategies and tactics involved in working with the media, as well as the critical tools and activities involved in media relations. Prerequisite: COMM 2002H or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3003H - Digital Storytelling

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Offers students an introduction to basic visual design and data storytelling principles and practices used in business and strategic communication. Students learn the theory and practice of telling stories through visual design. They also practice creating and presenting a variety of digital products. Prerequisite: 7.0 university credits or permission of instructor. Not open to students with credit for COMM 2004H.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3004H - Artificial Intelligence in Communication

Overview

Department(s)
Communications, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-3004H

Course Description
Artificial intelligence (AI) is increasingly involved in digital communication, media, and public relations. This course explores the theoretical foundations and practical applications of AI in various communication domains. The challenges and ethical implications of the evolving role of AI in communication and media are also examined. Prerequisite: 7.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3005H - Social Media Management

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Provides students with a comprehensive understanding of the theory and practice of strategic social media programming. Topics covered include strategies and tactics for social media programming, content creation and curation, performance measurement, the assessment of an organization's social media needs, and the development of effective plans and schedules. Prerequisite: COMM 2002H or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3006H - Environmental Journalism

Overview

Department(s)
Communications, Environment

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%, Environment - Not Set

Cross-Lists
ERST-3006H

Course Description
This course explores the role of journalism in highlighting environmental challenges and uncovering paths forward. Students develop the skills to translate scientific data into compelling written and visual narratives, engage in investigative research, and report from the field. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3094H - Public Leadership in Action

Overview

Department(s)
Canadian Studies, Communications

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Communications - Not Set

Cross-Lists
CAST-3094H

Course Description
Empowers students with the unique knowledge and concrete skills to channel their inner leader and advocate, organize people and communities in campaigns for change, and mobilize power to ensure sustained impacts. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3501H - Environment and Communication: Oral and Visual Presentation

Overview

Department(s)
Environment, Communications

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Communications - Not Set

Cross-Lists
ERST-3501H

Course Description
Intended to develop skills for the oral and visual presentation of scientific information to interdisciplinary non-expert audiences. Students work with real scientific data to design and present the findings. Prerequisite: 9.0 university credits including 1.0 ERSC/T credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3502H - Climate and Environmental Communications

Overview

Department(s)
Environment, Communications

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Communications - Not Set

Cross-Lists
ERST-3502H

Course Description
This course brings students into current debates and evolving techniques of communicating climate and environmental science to a variety of social groups and cultural contexts. Students learn best practices and complete projects in rhetoric, data visualization, and journalistic reporting on both the physical and social sciences. No prior scientific background is required. Prerequisite: 9.0 university credits including 1.0 ERSC/T credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3700H - Advanced Topics in Communications

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Provides students with an opportunity to undertake an upper-level course in a specific communications subject area or discipline selected by a Communications faculty member. Prerequisite: COMM 1000H or 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3701H - Advanced Topics in Communications

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Provides students with an opportunity to undertake an upper-level course in a specific communications subject area or discipline selected by a Communications faculty member. Prerequisite: COMM 1000H or 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM3702H - Advanced Topics in Communications

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Provides students with an opportunity to undertake an upper-level course in a specific communications subject area or discipline selected by a Communications faculty member. Prerequisite: COMM 1000H or 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM4000Y - Communications Capstone

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
In this project-based course, students conduct research on a specific issue or question related to Communications. Students are expected to respond to this issue or question by synthesizing their previous learning and experience in the program. Students work in teams and with faculty members and community organizations. Prerequisite: COMM 1000H, 2002H, and 2010H; or permission of instructor. Students may take only one of COMM 3000Y or 4000Y for credit.

Academic Level
Undergraduate

Credit Value

:
1

COMM4001H - Crisis Communication

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
Consideration of each stage of crisis communication--prevention/planning, response, and recovery--with particular emphasis on response. Examines major streams of thought in the field, including case studies from Canada. Addresses social media and crisis, considering the impact of social media in amplifying traditional crises and creating new crises with new rules of engagement. Prerequisite: COMM 1000H (or CCTH 1000H).

Academic Level
Undergraduate

Credit Value

:
0.5

COMM4800Y - Communications Field Placement

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
In the course's first half, students learn how to find and apply for positions in the Communications field. In the second half, students gain professional experience by working with a partnering organization. The details of each student's placement are determined through consultation with the placement supervisor, the instructor, and the student. Prerequisite: A minimum 70% cumulative average and 10.0 university credits. Open only to students in the Communications program or with permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
1

COMM4801H - Communications Internship

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
This half-year internship allows students the opportunity to gain practical experience in professional communications settings. During the internship, coursework lends support to the field experience. Students wishing to enrol must secure their own internships and have their participation in the course approved by the deadline. Available in fall or winter.
Prerequisite: A minimum 70% cumulative average and 10.0 university credits. Open only to students in the Communications program or with permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

COMM4901H - Directed Reading Course

Overview

Department(s)
Communications

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%

Course Description
A course of individual study supervised by a faculty member. The proposed syllabus requires permission of the instructor and the chair of the department prior to registering in the course. Proposals should be submitted by March 31 for reading courses to begin in the following Fall term, and by November 30 for reading courses due to be taken in the Winter term.
Prerequisite: 10.0 university credits including 2.0 COMM or CCTH credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

COOP2000H - Foundations for Co-op Success

Overview

Department(s)
Arts & Science

Contact Department ('not set' refers to cross-listed depts)
Arts & Science - 100%

Course Description
A foundational career development course to prepare co-op students for first work terms. Designed to support student professional development through career exploration, skill-building, and self-reflection. Topics include resumes, cover letters, labour market information, job search strategies, interviews, networking, EDI, professionalism, and the co-operative education process. Open only to students in a co-op program. Students must achieve a minimum 70% in COOP 2000H to remain in their co-op program.

Academic Level
Undergraduate

Credit Value

:
0.5

COOP2100P - Work Term 1

Overview

Department(s)
Arts & Science

Contact Department ('not set' refers to cross-listed depts)
Arts & Science - 100%

Course Description
COOP 2100P Work Term 1 is the first work term for students in a registered co-op program. This non-credit course is designed to support student career development through goal setting, performance evaluations, and reflective writing about their work term experience. Open only to students registered in a co-op program. Prerequisite: COOP 2000H with a minimum grade of 70% (for applicable programs), and minimum university credits by program: 12.0 university credits: Accounting & Economics, Artificial Intelligence, Business - Accounting, Chemistry, Kinesiology, Psychology, Software Engineering. 10.0 university credits: Ancient Greek & Roman Studies, Anthropology, Archaeology, Arts & Science, Canadian Studies, Communications, Criminology, Cultural Studies, English Literature, Financial Science, French Studies, Gender & Social Justice, Global Development Studies, History, Human Rights & Global Justice, Indigenous Environmental Studies, Indigenous Studies, Media Studies, Philosophy, Political Studies, Sociology. 8.0 university credits: Business, Computer Science, Conservation Biology, Economics.

Undergraduate

Credit Value

:
0

COOP3100P - Work Term 2

Overview

Department(s)
Arts & Science

Contact Department ('not set' refers to cross-listed depts)
Arts & Science - 100%

Course Description
COOP 3100P is the second work term for students in a registered co-op program. This non-credit course is designed to support student career development through goal setting, performance evaluations, and reflective writing about their work term experience. Open only to students registered in a co-op program. Prerequisite: COOP 2100P.

Academic Level
Undergraduate

Credit Value

:
0

COOP4000H - Pathways for Career Success

Overview

Department(s)
Arts & Science

Contact Department ('not set' refers to cross-listed depts)
Arts & Science - 100%

Course Description
A capstone co-op course that supports students in integrating their co-op experiences to navigate the labour market and the workforce upon graduation. Students further build transferable skills essential for workplace success and focus on advanced networking strategies, personal branding, post-work term support, full-time job search support, and skills development. Open only to students registered in a co-op program. Prerequisite: 65% or higher in COOP 2000H and successful completion of three co-op work terms.

Academic Level
Undergraduate

Credit Value

:
0.5

COOP4100P - Work Term 3

Overview

Department(s)
Arts & Science

Contact Department ('not set' refers to cross-listed depts)
Arts & Science - 100%

Course Description
COOP 4100P is the third work term for students in a registered co-op program. This non-credit course is designed to support student career development through goal setting, performance evaluations, and reflective writing about their work term experience. Open only to students registered in a co-op program. Prerequisite: COOP 3100P.

Academic Level
Undergraduate

Credit Value

:
0

COOP5000H - Professional Foundations

Overview

Department(s)
Arts Management,
Instrumental Chemical Analysis

Contact Department ('not set' refers to cross-listed depts)
Arts Management - 100%,
Instrumental Chemical Analysis - Not Set

Course Description
A foundational course designed to provide students with the knowledge needed for their co-op work term. This course offers the opportunity for career exploration, work term preparation and critical inquiry into the field of career development. Topics include resumes, cover letters, job search strategies, interviews and the co-operative education process.

Academic Level
Graduate

:
0.5

CRIM1615H - Introduction to Criminology

Overview

Department(s)
Criminology

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%

Course Description
Students are introduced to criminology as a field of study. Key topics include fear and moral panics, deterrence, 'the science of morality,' the roles of strain, social reactions, and power / risk in constructing crime, and modern approaches to addressing crime, such as restorative justice.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM2001H - Restorative Justice

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
PLCW-2001H

Course Description
Compares and contrasts restorative justice and Canada's criminal justice system, focusing on punitive versus restorative justice practices. Overviews Indigenous roots of restorative justice practices and the role of community in achieving justice for all. Introduces students to contemporary restorative justice practices. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM2005H - Law, Violence, and Transitional Justice

Overview

Department(s)
Global Justice & Development, Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Sociology - Not Set, Criminology - Not Set

Cross-Lists
GDST-2005H, HURI-2005H, SOCI-2005H

Course Description
Investigates the relationship between law and violence in contexts of conflict and repression. Analyzes mechanisms of transitional justice, including criminal prosecution, truth commissions, and reparations, and their effectiveness in confronting past injustices and advancing human rights. Prerequisite: HURI 1001H and 1002H or 4.0 university credits or permission of instructor. Equivalent to HURI 2001H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM2010H - Conflict Resolution

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
PLCW-2010H

Course Description
Examines different approaches to analyzing the causes, dynamics, and consequences of conflict, and subsequently designing interventions with the aim of resolving such conflicts peacefully and justly. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM2011H - Wrongful Convictions

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
PLCW-2011H

Course Description
Examines the causes and consequences of wrongful convictions in Canada. Particular attention is placed on role of criminal justice actors (police, courts, juries, lawyers), eyewitness testimony, false confessions, forensic misconduct, and DNA exonerations. The impact of wrongful convictions on the accused, victims, and the justice system is highlighted. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

CRIM2616H - Monsters and Misfits: History of Criminological Theories

Overview

Department(s)
Criminology

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%

Course Description
The history of criminalization and punishment introduces students to the historical context of nineteenth and twentieth century criminology and the rise of the modern prison as a response to the rise of industrial capitalism and colonization. Prerequisite: 60% or higher in CRIM 1615H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM2617H - Criminology Research Methods

Overview

Department(s)
Criminology

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%

Course Description
Introduces students to research design and ethical debates in the study of crime and punishment. Students work with reports provided by national and international think tanks, as well as scholarly empirical articles, to critically assess knowledge production on crime and punishment. Prerequisite: 4.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM2618H - Responding to Violence

Overview

Department(s)
Criminology, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%,
Philosophy - Not Set

Cross-Lists
PHIL-2618H

Course Description
A critical examination of social and legal responses to violence. Specific attention is paid to legal punishment as a response to violence, and punishment as a form of violence. Retributive and restorative conceptions of justice are considered. Prerequisite: 4.0 university credits including CRIM 1615H, or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM2619H - Families of Prisoners

Overview

Department(s)
Criminology

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%

Course Description
Reviews the impact of incarceration, and the criminal justice system more broadly, on the family members of the incarcerated. Concepts of stigma, prisonization, the pains of imprisonment, and institutionalization are explored, as will the 'collateral consequences' of mass incarceration on communities. Prerequisite: 4.0 university credits including CRIM 1615H, or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3002H - Mental Health and Addictions in the Community

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
PLCW-3002H

Course Description
Focuses on mental health and addiction and their impacts on community safety and well-being. Explains these disorders using real case scenarios. Students will become aware of victimization and stigma associated with mental health and substance abuse disorders, and have a better understanding of the etiology of addictions and mental health problems. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3010H - Policing Youth Crime and Justice

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
PLCW-3010H

Course Description
Examines the role of policing in youth justice in Canada by exploring historical and contemporary perspectives on policing youth and youth justice. Considers the impact of policing practices on young people, particularly those from marginalized communities through discussion of police discretion, bias, and alternatives to traditional policing practices involving youth. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3091H - Law and Constitutional Issues

Overview

Department(s)
Political Studies, Canadian Studies, Criminology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Criminology - Not Set

Cross-Lists
CAST-3091H, POST-3091H

Course Description
Examines the way the Canadian constitution both constrains and opens up possibilities for political change. Includes consideration of formal constitutional interpretation and the politics of the judicial process. Looks at important issues such as the federal-provincial division of powers, secession, Senate reform, and Indigenous self-determination. Prerequisite: 7.0 university credits. Recommended POST-CAST 2011H, POST-CAST 2012H, or PHIL-POST 2150H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3092H - Law and the Charter of Rights & Freedoms

Overview

Department(s)
Political Studies, Canadian Studies, Criminology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Criminology - Not Set

Cross-Lists
CAST-3092H, POST-3092H

Course Description
Examines key Supreme Court decisions on the Charter of Rights and Freedoms pertaining to fundamental freedoms, democratic rights, legal rights, and equality rights. Assesses the role of the Charter in advancing the struggles of groups such as women, racialized communities, LGBTQ persons, and people with disabilities. Prerequisite: 7.0 university credits. Recommended POST-CAST 2011H, POST-CAST 2012H, or PHIL-POST 2150H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3115H - Citizenship Rights and Development

Overview

Department(s)
Global Justice & Development, Sociology, Criminology, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Sociology - Not Set, Criminology - Not Set, Political Studies - Not Set

Cross-Lists
GDST-3115H, HURI-3115H, POST-3115H, SOCI-3115H

Course Description
An analysis of the concept of citizenship and rights and their role in social and political transformation. Includes social justice and citizenship struggles; critical perspectives on power and various citizenship regimes; and their implementation on national and global levels. Prerequisite: 7.0 university credits including 1.0 GDST/IDST, POST, and/or SOCI credit at the 1000 level and 1.0 GDST/IDST, POST, and/or SOCI credit at the 2000 level, or permission of instructor. Equivalent to IDST-CRIM-SOCI 3120H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3121H - Human Rights: Law and Institutions

Overview

Department(s)
Global Justice & Development, Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Sociology - Not Set, Criminology - Not Set

Cross-Lists
GDST-3121H, HURI-3121H, SOCI-3121H

Course Description
This course examines the legal and institutional frameworks for protecting and promoting human rights at national and international levels. Students explore the main treaties, and the role of courts, tribunals, and other mechanisms in enforcing human rights standards. Prerequisite: HURI 2005H, GDST-HURI 2010H (GDST 2001H), GESO 2151H, POST 2232H, or SOCI 2110H, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3250H - Understanding Homelessness

Overview

Department(s)
Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Criminology - Not Set

Cross-Lists
SOCI-3250H

Course Description
Critically examines homelessness as a social issue, applying sociological perspectives and a Canadian focus. Topics may include mobility and containment, families and youth, employment and migration, the criminalization of homelessness, shelters and poor houses, masculinities and femininities on the street, and homelessness in their city. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI and/or CRIM at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3420H - Perspectives on Poverty and Protest

Overview

Department(s)
Political Studies, Criminology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Criminology - Not Set, Sociology - Not Set

Cross-Lists
POST-3420H, SOCI-3420H

Course Description
Explores intersection of poverty and power--relations of ruling--through an examination of anti-poverty activism. Students analyze dominant strategic mobilizing approaches and investigate select case-studies of anti-poverty activism related to welfare, homelessness, migration, and drugs. The role of institutional advocates in the mobilization process is also scrutinized. Prerequisite: 7.0 university credits including 1.0 POST, ADMN, ANTH, CHYS, CRIM, ECON, GDST/IDST, IESS, INDG, PLCW, SOCI, and/or SWRK credit at the 2000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3422H - Dimensions of Poverty

Overview

Department(s)
Political Studies, Canadian Studies, Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Sociology - Not Set, Criminology - Not Set

Cross-Lists
CAST-3422H, POST-3422H, SOCI-3422H

Course Description
Poverty is a persistent social problem. In this course students are introduced to the dynamics of poverty in Canada, the USA, and Britain, learn how poverty affects people's lives, and become familiar with the dominant sociological perspectives that inform people's opinions about poverty and poverty-related policies and programs. Prerequisite: 7.0 university credits including 1.0 POST, CAST, and/or SOCI credit at the 2000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3600H - Criminalizing the Colonized

Overview

Department(s)
Criminology, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%, Indigenous Studies - Not Set

Cross-Lists
INDG-3600H

Course Description
Examines the criminalization and punishment of Indigenous peoples as inter-related and overlapping forms of colonial violence. Explores an emerging Indigenous criminology, linkages between residential schools and incarceration of Indigenous peoples, and implications of the intersections of race, class and gender in crime control. Prerequisite: 7.0 university credits including 60% or higher in CRIM 2616H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3617H - Criminological Data Analysis

Overview

Department(s)
Criminology

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%

Course Description
An introduction to basic statistics and their application in criminological research. Prerequisite: CRIM 2617H. Not open to students with credit for SOCI 3160H, ECON-ADMN 2200H, GEOG-ERSC-BIOL 2080H, MATH 1051H, MATH 1052H, PSYC 2019H, PSYC 3015Y, or PSYC 3016H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3625H - Gender-Based Violence: Reactions, Responses, and Responsibilities

Overview

Department(s)
Criminology, Gender & Social Justice, Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%, Gender & Social Justice - Not Set, Policing & Community Wellbeing - Not Set

Cross-Lists
GESO-3625H, PLCW-3625H

Course Description
A critical look at gender-based violence as a political and legal construct. Topics may include missing and murdered Indigenous women, legalization debates regarding sexed work, hegemonic masculinities and violence. Prerequisite: 7.0 university credits including 60% or higher in CRIM 2616H or GESO 2141H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3640H - The Politics of Incarceration

Overview

Department(s)
Criminology

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%

Course Description
Examining trends and issues within Canada's correctional system related to the historical and contemporary context of correctional practices. Topics include punishment, human rights, pre-trial detention, race and incarceration, drugs, mental health, the role of correctional officers, families and incarceration, parole and release from prison, and prison tourism. Prerequisite: 7.0 university credits including 60% or higher in CRIM 2616H. Not open to students with credit for PLCW-CRIM 4002H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3650H - Doing Crime and Doing Time: Advanced Research Design

Overview

Department(s)
Criminology

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%

Course Description
How do criminologists research experiences of being policed, criminalized, and punished? Using various methodologies such as critical ethnography, archival research, and the penal press to explore life on the run and life inside, students build a research project aimed at capturing the human experience of criminalization and punishment. Prerequisite: 7.0 university credits including 60% or higher in CRIM 2616H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3660H - Policing and Punishing Poverty

Overview

Department(s)
Criminology, Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%, Policing & Community Wellbeing - Not Set

Cross-Lists
PLCW-3660H

Course Description
This course critically interrogates policing, punishment, and criminalization in ways that extend beyond common-sense knowledge claims, by situating how and why they are delimited by the material conditions characteristic of neoliberal capitalism. Prerequisite: 5.0 university credits including 1.0 CRIM and/or PLCW credit at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3740H - The Politics of Legal Rights, Criminal Law, and the Canadian Judicial Process

Overview

Department(s)
Political Studies, Canadian Studies, Criminology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Criminology - Not Set, Sociology - Not Set

Cross-Lists
CAST-3740H, HURI-3740H, POST-3740H, SOCI-3740H

Course Description
An exploration of the politics of the Canadian criminal process. Examines legal rights under the Charter of Rights and Freedoms and critiques of the inequities of the Canadian criminal justice system. Also looks at key political issues in the making of criminal law, its enforcement, and the criminal trial process. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3962H - Gender, Sexualities, and the Law

Overview

Department(s)
Gender & Social Justice, Political Studies, Sociology, Canadian Studies, Criminology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Political Studies - Not Set, Sociology - Not Set, Canadian Studies - Not Set, Criminology - Not Set

Cross-Lists
CAST-3962H, GESO-3962H, POST-3962H, SOCI-3962H

Course Description
Explores key issues, theories, and debates concerning gender, feminism, and the law, primarily in Canada. Approaching law as a site of regulation and constraint and drawing upon restorative justice pedagogies and decolonial methodologies, the course examines issues such as family, sexuality, violence, pornography, prostitution, poverty, employment, and immigration. Prerequisite: 1.0 GESO, WMST, CAST, CRIM, POST, and/or SOCI credit, or permission of instructor. Equivalent to WMST 3962H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3965H - Gender-Based Violence: Issues, Impacts, and Resistance

Overview

Department(s)
Gender & Social Justice, Criminology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Criminology - Not Set

Cross-Lists
GESO-3965H

Course Description
Examines how gender-based violence impacts individuals, communities, and societies, and applies an intersectional lens to consider differences in experiences, interventions, and acts of resistance. This course assesses responses to gender-based violence at the community, institutional, and policy levels, and critically reflects on strategies required to make change. Prerequisite: 6.0 university credits including GESO 1001H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM3966H - Criminalizing Women

Overview

Department(s)
Gender & Social Justice, Canadian Studies, Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, Sociology - Not Set, Criminology - Not Set

Cross-Lists
CAST-3966H, GESO-3966H, SOCI-3966H

Course Description
A criminological analysis of women in trouble from early to late modernity to the present moment, with specific analysis of the disciplining and incarceration of cisgender women and trans women. Focuses on the Canadian criminal justice system, with analysis of its racist, colonial, patriarchal, homophobic, ableist legacies. Prerequisite: 1.0 GESO, WMST, CAST, CRIM, and/or SOCI credit, or permission of instructor. Equivalent to WMST 3966H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM4002H - Prisons and Punishment

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
PLCW-4002H

Course Description
Exploration of trends and approaches within the correctional system in Canada, including the historical and contemporary context of correctional practices. Attention is paid to the differential impact of Canadian corrections on Aboriginal people and other minority groups. Prerequisite: 12.0 university credits. Not open to students with credit for CRIM 3640H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM4007H - Policing and Controlling Drugs in Canada

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
PLCW-4007H

Course Description
Examines drug regulation and the management of drug users across social institutions. Focus will be given to the definition of drugs, the rise and implications of the war on drugs, and how the role that the war on drugs leads to mass incarceration of racialized groups in Canada. Prerequisite: 12.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM4009H - Surveillance and Technology Studies

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
PLCW-4009H

Course Description
Examines the nature and dynamics of surveillance in different settings (family, policing, consumerism, the workplace, etc.) by highlighting the challenges that technological advancements have placed on our privacy and our risk of being victimized. It considers how social institutions use surveillance and how surveillance is used to hold institutions accountable. Prerequisite: 12.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM4100H - The Politics of Crime Prevention

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
PLCW-4100H

Course Description
Examines the crime prevention enterprise. Crime prevention initiatives and models are reviewed, including crime prevention through environmental design (CPTED); "broken windows" policing; neighbourhood watch; and CCTV surveillance. Considers the role of police and other community stakeholders in designing, implementing, and evaluating these initiatives to improve community safety and well-being. Prerequisite: 12.0 university credits. Not open to students with credit for PLCW 4008H.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM4110H - Legal Research Methods

Overview

Department(s)
Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Criminology - Not Set

Cross-Lists
SOCI-4110H

Course Description
An applied research methods course specifically focused on how to conduct case law data collection and analysis using online legal databases. Topics covered may include Charter cases, human rights tribunal cases, and criminal trial/sentencing decisions. Prerequisite: 10.0 university credits including one of SOCI 3151H or CRIM 3650H and 2.0 additional credits at the 3000 level of which at least 1.0 must be SOCI and/or CRIM.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM4220H - Deconstructing the "Ideal Victim"

Overview

Department(s)
Criminology, Policing & Community Wellbeing, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%, Policing & Community Wellbeing - Not Set, Forensic Science - Not Set

Cross-Lists
FRSC-4220H, PLCW-4220H

Course Description
Using a critical victimological approach, this course explores criminological and legal conceptions of victimization and victimhood alongside socio-political meanings of the victims' rights movement. Topics include media representations of victimization, harm reduction discourses, gender-based violence, environmental crime, and cybercrime in contemporary intersectional and carceral contexts. Prerequisite: 10.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM4230H - Selected Topics in Criminology

Overview

Department(s)
Criminology

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%

Course Description
Topics may include the border and migrant criminology, public criminology, aging in prison, abolition, penal tourism, and prisoner re-entry. Prerequisite: 10.0 university credits. Open only to Criminology majors.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM4240Y - Applied Criminology Virtual Practicum

Overview

Department(s)
Criminology

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%

Course Description
Virtual group collaborations helping community partners investigate solutions for real-world Criminology issues, such as in corrections, policing, law, non-profit, and victim advocacy. Since many problems are systemic issues, the intent is not to solve them outright but rather to offer unique viewpoints grounded in the academic literature and group collaboration. Prerequisite: A minimum 70% average over all CRIM credits completed and 10.0 university credits including 2.5 credits at the 3000 level. Open only to students in the Criminology program.

Academic Level
Undergraduate

Credit Value

:
1

CRIM4270H - Sociology of Law

Overview

Department(s)
Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Criminology - Not Set

Cross-Lists
SOCI-4270H

Course Description
Explores the law and society relationship, the power of law as a tool for social change, and the practice of law. Topics may include miscarriages of justice, critical socio-legal studies of equality, Indigenous peoples, human rights, and youth justice. Prerequisite: 10.0 university credits including one of SOCI 2110H or CRIM 2616H; one of SOCI 3151H or CRIM 3650H, and 2.0 additional credits at the 3000 level of which at least 1.0 must be SOCI and/or CRIM.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM4950H - Special Topic: Criminology Field Placement

Overview

Department(s)
Criminology

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%

Course Description
This course is a competitive entry 40-hour placement in criminology workplaces. Students who are interested in this opportunity must submit an application package as outlined on the Criminology website (trentu.ca/criminology). Open only to students in the fourth year of the Honours program in Criminology. Prerequisite: A minimum 80% cumulative average and 12.0 university credits including 2.0 CRIM credits at the 3000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CRIM4951H - International Comparative Criminology

Overview

Department(s)
Criminology

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%

Course Description
This course uses a Collaborative Online International Learning (COIL) framework to promote an understanding of comparative criminology. Students partner with international peers to examine and participate in the practice of comparative criminology, critically understand the strengths and weaknesses of the methods and practices involved and explore case study examples of comparative criminology. Open only to students in the Criminology program. Prerequisite: A minimum 70% cumulative average and 12.0 university credits including CRIM 2617H and 2.0 CRIM credits at the 3000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

CSAS5000H - Foundations in Interdisc. Aging Studies

Overview

Course Description
This interdisciplinary graduate course examines aging from a critical perspective. The course traces the evolving conceptualizations of aging, old age and life course and their role in understanding the processes, outcomes and representations of aging.

Academic Level
Graduate

Credit Value

:
0.5

CSID5000Y - Core Colloquium

Overview

Department(s)
Canadian & Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - 100%

Course Description
This required course is intended to introduce students to a fundamental principle which underlies the Frost Centre MA: that all students critically engage with the fields of Indigenous Studies and Canadian Studies. It will also create a context for developing of the thesis/MRP proposal for MA students and build a strong scholarly and collegial community among MA students.

CSID5305H - Community-Based Participatory Research

Overview

Department(s)
Canadian & Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - 100%

Course Description
Through this course, students will engage in Community-Based Research in partnership with community agencies, under the direction of Faculty and with the assistance of the Trent Community Research Centre. Students will undertake a research project in response to community-identified priorities, applying community-based models to address challenges or opportunities with action-oriented results with the Canadian context. In partnering with a community organization, students will also develop project management skills required to successfully navigate a collaborative and interdisciplinary research environment with culturally diverse populations.

CSID5452H - Trust and Leadership in Parliament

Overview

Department(s)
Canadian & Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - 100%

Course Description
Explores the role of trust in the exercise of leadership with respect to Canada's Prime Minister and the House of Commons. Concentrating on legislative leadership the course examines how and why, in the face of declining trust and rising unwarranted distrust, the political executive aims to exercise leadership. Not open to students with credit for POST-CAST 4452H.

CSID5626H - Harvesting Indigenous Language

Overview

Department(s)
Canadian & Indigenous Studies, Sustainability Studies, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - Not Set, Sustainability Studies - Not Set, Indigenous Studies - 100%

Cross-Lists
SUST 5626H, INDG 6626H

Course Description
This graduate topics course is designed to facilitate engagement with an Indigenous language through weekend intensive cultural immersion. Located in culturally significant sites within the Kawarthas, the course will focus on language and culture as it relates to the fall cycle within the Natural World. Students will explore the connections between language and identity, worldview, orality, as well as recovery and revitalization. The intensive weekends will provide an immersive experience from which to think about the interplay between culture and language and how language can help us to understand the world better in a contemporary sense.

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - Not Set, Indigenous Studies - 100%, Sustainability Studies - Not Set

Cross-Lists
INDG 6627H, SUST 5627H

Course Description
This graduate topic course is designed to facilitate engagement with an Indigenous language through weekend intensive cultural immersion. Located in culturally significant sites within the Kawarthas, the course will focus on language and culture as it relates to the Winter cycle within the Natural World. The course operates from the position that language provides a foundational framework for understanding the world. Students are not expected to be fluent in an Indigenous language but should have enough familiarity to work in a culturally immersive environment. Students will explore the connections between language and identity, worldview, orality, as well as recovery and revitalization. The intensive weekends will provide an immersive experience from which to think about the interplay between culture and language and how language can help us to understand the world better in a contemporary sense. Topics covered in the course include discussion of oral and writing systems, narrative and stories, performance, songs, chants, dances, conveyed through action (physical activities, movement, dancing, practices) that facilitate the development of positive relationships with the natural World (i.e. land, waters, trees, plants, animals, spiritual beings, ancestors etc.) Course fee is $170.00.

CSID5702H - Arts Leadership in Canada

Overview

Department(s)
Canadian & Indigenous Studies, Canadian Studies, Arts Management

Contact Department ('not set' refers to cross-listed depts)
Canadian & Indigenous Studies - 100%, Canadian Studies - Not Set, Arts Management - Not Set

Cross-Lists
ARTM 5702H, CAST 6702H

Course Description
Arts leadership goes beyond day-to-day management of institutions and positions. It involves navigating the tensions between immediate realities and long-term goals to realise a leader's vision for institutional, professional, and social change. While all arts leaders internationally respond to common challenges in pursuing their visions (such as funding and institutional structures), there is a uniquely Canadian social and political context for arts leadership which informs both the difficult institutional realities that arts face and the potential for the arts within civic society. Readings and case studies in this course will explore key issues and case studies in Canadian and global arts leadership. Students who have taken CSID 5702H cannot take CAST 6702H.

0.5

CUST2572H - Workshop: Theatre and Community

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
The practice of any theatre involves ideas of community, both in its internal work practices and in its relationships to an audience. The course focuses this theme through the ideas of Augusto Boal, the Brazilian theorist and activist, and tests them against a range of theatre work from Shakespeare and Chekhov to the present day in Peterborough. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST2574H - Workshop: Storytelling and Theatre

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
Addresses the emergence in the twentieth century of various forms of storytelling theatre in which the role of the narrator is central. Focuses on the epic plays of Bertolt Brecht and the subsequent writing of Wole Soyinka and Caryl Churchill. A combination of practical experimentation and critical analysis each week. Prerequisite: 4.0 university credits or permission of the instructor. Not open to students with credit for CUST 3572H.

Academic Level
Undergraduate

Credit Value

CUST3129H - Workshop: Worldbuilding

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3129H

Course Description
This course examines the concept and practice of worldbuilding via group projects in the design and creation of storyworlds, metanarratives, and storyworld objects in different media, as well as participation in storyworld games. Prerequisite: 4.0 university credits or permission of instructor. Not open to students with credit for ENGL 4703H.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3133H - Workshop: Game Design

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3133H

Course Description
Drawing on readings from game studies, students engage the conceptual issues and practical details of player experience and design by analyzing and creating a wide range of games. Students leave the class with a playable prototype for an analog or digital game. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

CUST3142H - Workshop: Experimental Music

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3142H

Course Description
Experimental music is composed and performed. Neither genre nor technique, experimental music is constantly pushing at boundaries. Special attention is paid to John Cage and musicians he influenced, together with post-punk and various current DIY practices. No previous experience with making music is required. Prerequisite: 4.0 university credits including 1.0 CUST credit or permission of instructor. Not open to students with credit for CUST 3146Y.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3143H - Workshop: Electronic Music

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3143H

Course Description
Students learn the basics of software music production, generate one or more pieces of music, and explore the media critically in discussions of both theoretical and practical texts. Music and songwriting skills are developed in conjunction with software learning. No previous training in music making is required. Prerequisite: 4.0 university credits including 1.0 CUST credit or permission of instructor. Not open to students with credit for CUST 3146Y.

Academic Level
Undergraduate

Credit Value

0.5

CUST3176H - Workshop: Making Theatre

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
The aim of this studio course is to introduce students to general theatre practice and to encourage them to find their own creative voices. Through improvisation, character development and monologue work the students will explore how to create theatre while basing their performances in a place of authenticity and originality. Limited enrolment. Prerequisite: 4.0 university credits including 1.0 CUST credit or permission of instructor. Not open to students with credit for CUST 3175Y.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3177H - Workshop: Making the Play

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
The aim of this studio course is to introduce students to the art of play-making and communal artistic creation through scene study, improvisation and creative writing. Scenes from the modern theatre era will be analyzed and performed leading to the students creating, staging and performing their own group-created theatre piece. Workshop fee: $50. Limited enrolment. Prerequisite: 4.0 university credits including 1.0 CUST credit or permission of instructor. Not open to students with credit for CUST 3175Y.

Academic Level
Undergraduate

Credit Value

Undergraduate

Credit Value

:
0.5

CUST3524H - Storyworlds Across Media

Overview

Department(s)
Culture, Arts, and Media, English Literature, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, English Literature - Not Set, Media Studies - Not Set

Cross-Lists
ENGL-3524H, MDST-3524H

Course Description
This course frames media and genre as determinate factors in the creation of fictional worlds. It elaborates the political resonance such imaginary places have with the real world. Through the interpretation of comics, criticism, tabletop games, music, novels, and theory, students learn the influence of media on narrative. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 4535H.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3525H - Writing the World: Contemporary Fiction in Translation

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
A survey of influential recent fiction in translation from across the globe, focusing on questions of media and technology, sexuality, colonial legacies, economic inequality, and the environmental crisis. Explores the evolution of the novel, short story, and graphic novel forms against the tremendous socio-historical upheavals of the millennium's turn. Prerequisite: 4.0 university credits.

Undergraduate

Credit Value

:
0.5

CUST3526H - Cli-Fi: Climate Change Fiction

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
A study of novels, graphic novels, films, and other media that explore the before, during, and after of climate change. Themes include science, technology, capitalism, survival, and the shifting relationship between the human and non-human worlds. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 4526H.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3530H - Social Media and Power

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3530H

Course Description
Examines social media experiences with a focus on perspectives from critical theory. Covers a breadth of topics in the subject area, from doomsurfing and slacktivism to platform politics and cyberwar, and encourages students to adopt key methodologies and critical approaches, including ethnography, discursive and rhetorical analysis, semiotics, science and technology studies, and the critique of ideology. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3531H - War and Media

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3531H

Course Description
Critically examines historical, visual, and narrative approaches to war and media from around the world, with a focus on propaganda images, war reporting and photojournalism, surveillance, biopolitics, cyberwar, and platform activism. Prerequisite: 4 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3532H - Issues in Global Media

Overview

Department(s)
Culture, Arts, and Media, Global Justice & Development, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Global Justice & Development - Not Set, Media Studies - Not Set

Cross-Lists
GDST-3532H, MDST-3532H

Course Description
Critically examines the uses of media for development, with a focus on hyperlocal news, journalistic empires from the Global South, global audiences, media infrastructures, environmental monitoring, and the politics of e-waste. Prerequisite: 4.0 university credits. Not open to students with credit for CUST-IDST 3032Y.

Undergraduate

Credit Value

:
0.5

CUST3533H - Game Studies

Overview

Department(s)
Culture, Arts, and Media, Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Computer Science - Not Set, Media Studies - Not Set

Cross-Lists
COIS-3533H, MDST-3533H

Course Description
An introduction to game studies that explores the implications of games and play. What can games tell us about what we value, how we think, and who we are? Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3535H - Television Studies

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3535H

Course Description
An introduction to television studies with an emphasis on the historical transformations of TV from the 1950s to the YouTube era. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3538H - Radio Studies

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3538H

Course Description
Introduction to the history and theory of radio broadcasting from the early twentieth century to the age of the Internet. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3542H - Music Studies: the Black Atlantic 1

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
"The Black Atlantic" refers to the radically complex, open-ended cultures of West Africa, the Americas, and Western Europe that formed in the wake of colonialism and the Atlantic slave trade. We consider their musics, including blues, R&B, jazz, funk, soul, Afrobeat, juju, rumba, salsa, reggae, dancehall, and various further hybrids. Prerequisite: 4.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3544H - Music Studies: the Black Atlantic 2

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
Using Paul Gilroy's assertion that the radically hybrid culture given rise to by the Atlantic slave trade is the "counterculture of modernity," Black Atlantic 2 engages Jamaican, international hip-hop, and electronic dance music, created from about 1974 to the present. Prerequisite: 4.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3545H - Music and Media - An Archaeology

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3545H

Course Description
Explores the various functions of music in drama, film, television, and computer games, and considers how media adapt and adapt to a way of communicating that is (at least) as old as human civilization. Prerequisite: 4.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3547H - Music and Politics

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
Charts the philosophical heritage of music and community, examines the practical roles of music, musicians, and listeners, and details the rise of music genres based in class, gender, nationality, ethnicity, and other indices of political community. Prerequisite: 4.0 university credits or permission of the instructor; CUST 2545H recommended. Not open to students with credit for CUST 4547H.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3549H - Producing Punk

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3549H

Course Description
A critical exploration of punk rock, punk culture, and punk politics, and their relationship to the various media through which they have been transmitted, including fashion, zines, radio, vinyl, cassettes, film, videos, television, newspapers, and music magazines. Prerequisite: 4.0 university credits or permission of the instructor. Not open to students with credit for ENGL-MDST 3607H.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3550H - Studies in Cultural Theory

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
This seminar reflects on issues in cultural theory. Specific focus will depend on instructor. Prerequisite: 4.0 university credits or permission of the instructor. Not open to students with credit for CUST 3050Y, 4050Y, or 4550H.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3556H - Workshop: Place Matters

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
The course addresses the question, "What is a place?" with the approach of critical topography as a workshop pedagogy that calls on the student to study a specific place informed by lectures, readings, works of art, film and photography, field excursions, and techniques of documentation including journals, mapping, and image. A fee of $75 for field excursions. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 3056Y or 4556H.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3571H - Arts and Culture Enacting Social and Political Change

Overview

Department(s)
Political Studies, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Culture, Arts, and Media - Not Set

Cross-Lists
POST-3571H

Course Description
Political questions are always posed in a cultural context, but culture itself is a socio-political question and enactment. This course examines the importance of culture through the arts for political change. Vibrant examples of intersectional (race, queer, trans, etc.) Black, Indigenous, Persons of Colour (BIPOC) and Disability arts are considered. Prerequisite: 7.0 university credits including 1.0 POST and/or CUST credit, or permission of instructor. Not open to students with credit for POST-CUST 3570Y.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3580H - Text and Image

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3580H

Course Description
Considers the relationship between word and image in a range of media objects, including comics, graphic novels, visual essays, graffiti, novels, paintings, and cinema. Also engages the long philosophical tradition of thinking about the relationship between seeable and sayable in such thinkers as Horace, Gotthold, Lessing, Freud, and Foucault. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 3080Y, 4080Y, or 4580H.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3581H - World Cinema 1: Experiment and Innovation

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3581H

Course Description
Explores experiments and innovations in European and American cinemas in their relation to film cultures elsewhere, focusing on the aesthetics and politics of cinematic form. How does the way a film is made influence its meaning and reception? Features films from Africa, Latin America, West Asia, and other regions. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 3081Y.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3582H - World Cinema 2: Images of Globalization

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-3582H

Course Description
Considers the problematic of world cinema in contemporary film from the perspective of the impact of globalization on film production internationally. Themes addressed include colonialism and neocolonialism, the national and the postnational, the political economy of film production, film language and cultural authenticity, and feminism and sexuality. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 3081Y.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3590H - Climate Change and Culture

Overview

Department(s)
Culture, Arts, and Media, Environment

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Environment - Not Set

Cross-Lists
ERST-3590H

Course Description
Examines how climate change comes to matter within different social groups, to different degrees of urgency. Examines how climate as an everyday concern is mobilized or elided across racial, classed, and subcultural contexts as well as how a more diverse climate movement might productively reframe the issue. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3601H - Modern Theory and Criticism

Overview

Department(s)
English Literature, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%, Culture, Arts, and Media - Not Set

Cross-Lists
ENGL-3601H

Course Description
Examines some of the major critical approaches to literature and interpretation in the twentieth century: formalism, structuralism and semiotics, reader-response criticism, new historicism, psychoanalytic criticism, deconstruction, and feminism. Prerequisite: 4.0 university credits. Not open to students with credit for ENGL 3600Y.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST3748H - Anthropology of Animation

Overview

Department(s)
Anthropology, Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Culture, Arts, and Media - Not Set, Media Studies - Not Set

Cross-Lists
ANTH-3748H, MDST-3748H

Course Description
Focuses on worlds creating in playable media (games), including both massively multiple online games (MMOGs) and tabletop role-playing games. "Virtual" society is now an increasingly taken-for-granted aspect of everyday sociality. This course develops tools and theories for the study of virtual worlds, online and offline. Prerequisite: 4.0 university credits.

CUST4111H - Workshop: Advanced Research-Creation

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
Advanced interdisciplinary workshop course focusing on contemporary art practices with an emphasis on new artwork, contemporary theory, and the development of professional practice in research-creation. Students should have existing art practices in any artistic field (including sound, installation, film, video, new media, painting, drawing, photography, printmaking, fibre arts, and sculpture). Prerequisite: 10.0 university credits including 3.0 CUST credits including at least one workshop course in CUST (CUST 2114H, 2186H, 2511H, 3111Y, 3142H, 3143H, 3184H, 3186H, 4136H, or 4586H), or permission of the instructor.

CUST4142H - Workshop: Sound Art

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
Introduces a varied array of experimental practices that focus on sound, yet are thought of as being distinct from music. While sound installation, sculpture, and performance are considered, the course focuses on work that emerges from the creative use of recording technology and the manipulation and presentation of recorded sounds. Prerequisite: 10.0 university credits.

CUST4241H - Desiring Development: Psychoanalysis, Capitalism, and Global Futures

Overview

Department(s)
Global Justice & Development, Culture, Arts, and Media, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Culture, Arts, and Media - Not Set, Political Studies - Not Set

Cross-Lists
GDST-4241H, POST-4241H

Course Description
Introduces psychoanalysis as a critical lens for understanding global development. Explores how unconscious forces such as desire, fantasy, and enjoyment shape ideas of progress, inequality, race, and globalization. Considers how media and ideology sustain these visions and examines possibilities for alternatives and transformation in contemporary global contexts. Prerequisite: 10.0 university credits including 1.0 GDST, CUST, or POST credit.

CUST4523H - Shapeshifters: Narrative Adaptations Across Media

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-4523H

Course Description
Engages specific "cases" of adaptations across media, including "Snow White," Pride and Prejudice, and The Walking Dead, to explore contemporary issues in adaptation studies such as the nature of the object; the question of "fidelity"; and the formal and material conditions of narrative production related to different media. Prerequisite: 10.0 university credits including 3.0 CUST credits; or CUST-MDST 1535H, COIS-MDST 1010H, and either CUST-MDST 2035Y or 2535H; or permission of instructor.

CUST4529H - Advanced Studies in Science Fiction

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
Examines representations of the subject constituted in Western techno culture, including post-human configurations such as the robot, the cyborg, and artificial and virtual intelligence. Fictional and critical/theoretical speculations examine changing understandings of subjectivity, agency, the body, and community in the context of advanced technologies. Prerequisite: 10.0 university credits including 3.0 CUST credits or permission of instructor. Not open to students with credit for CUST 4029Y.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST4535H - Contemporary Topics in Media Studies

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
MDST-4535H

Course Description
Theoretical and critical perspectives on the history, economy, and politics of selected aspects of mass media and popular culture. Previous topics have included zines, underground culture, social media, and the work of scholars like Pierre Bourdieu and Michel Foucault. Prerequisite: 10.0 university credits including 3.0 CUST credits; or CUST-MDST 1535H, COIS-MDST 1010H, and either CUST-MDST 2035Y or 2535H; or permission of instructor. Not open to students with credit for CUST 4035Y.

CUST4538H - Media Ecologies

Overview

Department(s)
Culture, Arts, and Media, Media Studies, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set, Political Studies - Not Set

Cross-Lists
MDST-4538H, POST-4538H

Course Description
Examines some theories and practices for the analysis of media ecologies. "Media ecologies" refers to the worlds, sensibilities, and perceptibilities that our interactions with media enable. Detailed attention is given to media objects, the role of the culture-maker, and the critical political analysis of human/non-human entanglement(s). May include a course fee: $50. Prerequisite: 10.0 university credits including 3.0 CUST credits; or CUST-MDST 1535H, COIS-MDST 1010H, and either CUST-MDST 2035Y or 2535H; or permission of instructor.

CUST4547H - Music and Politics

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
Charts the philosophical heritage of music and community, examines the practical roles of music, musicians, and listeners, and details the rise of music genres based in class, gender, nationality, ethnicity, and other indices of political community. Prerequisite: 10.0 university credits including 3.0 CUST credits or permission of instructor; CUST 2545H recommended. Not open to students with credit for CUST 3547H.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST4550H - Advanced Studies in Cultural Theory

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
This seminar reflects on issues in cultural theory. Specific focus will depend on instructor. Prerequisite: 10.0 university credits including 3.0 CUST credits or permission of the instructor. Not open to students with credit for CUST 3050Y, 3550H, or 4050Y.

Academic Level
Undergraduate

Credit Value

0.5

CUST4552H - The Culture of Fascism

Overview

Department(s)
Culture, Arts, and Media, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Political Studies - Not Set

Cross-Lists
POST-4552H

Course Description
A survey of theoretical approaches to fascism in all its guises. Particular emphasis is placed on the critical tradition. Prerequisite: 10.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST4556H - Workshop: Place Matters

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
The course addresses the question, "What is a place?" with the approach of critical topography as a workshop pedagogy that calls on the student to study a specific place informed by lectures, readings, works of art, film and photography, field excursions, and techniques of documentation including journals, mapping, and image. A fee of $75 for field excursions. Prerequisite: 10.0 university credits including 3.0 CUST credits or permission of the instructor. Not open to students with credit for CUST 3056Y or 3556H.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST4558H - Popular Music and the Cultural Politics of Desire

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
This course, drawing extensively on criticism from the last thirty years, examines popular music from the 1920s to the 2020s as a cultural space where repressive sexual and gender norms have been routinely contested, frequently and violently reasserted, and very occasionally overcome. Prerequisite: 10.0 university credits including 3.0 CUST credits.

Academic Level
Undergraduate

Credit Value

:
0.5

CUST4565H - Psychoanalysis and Cultural Studies

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
Psychoanalysis is a major discourse of our modernity; it has massively influenced how we study and engage with culture. How does the unconscious mediate human creativity? We address the question by staging encounters with cutting-edge thinkers who bring psychoanalytic insights to bear on culture in fresh and exciting ways. Prerequisite: 10.0 university credits including 3.0 CUST credits or permission of instructor. Not open to students with credit for CUST 4065Y.

Academic Level
Undergraduate

Credit Value

CUST5311H - Black Lives Matter

Overview

Department(s)
English Literature, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%, Culture, Arts, and Media - Not Set

Cross-Lists
ENGL 5311H

Course Description
This course examines the Black Lives Matter movement as the most recent form of collective social protest against state-sanctioned racial violence. The course looks at the influence of earlier civil rights movements on contemporary forms of protest, the theoretical parameters behind the movement, the "racial formations" (the prison complex, racial justice activism, the Obama presidency) from which the movement emerged, as well as recent literary accounts of the movement.

CUST5315H - Arts of Conflict: Violence, Art, and the Irish Troubles

Overview

Department(s)
Culture, Arts, and Media, English Literature

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - Not Set, English Literature - 100%

Cross-Lists
ENGL-5315H

Course Description
This course will explore practical and theoretical conflicts between public violence and its cultural artifacts, including literature, film, murals, sculpture and parades. Our focus will be on twentieth- and twenty-first-century texts, images and public displays from Ireland, usually relating to the Irish Republican Army. We will question why modern cultural formations and political structures condemn violence even as they rely on it; and we will ask what place public violence has in a modern culture defined by its faith in the possibility of reasoning and debating all conflicts away. (Excludes CUST-4512H.)

CUST5401H - Environment & Place

Overview

Department(s)
Culture, Arts, and Media, Canadian Studies, Sustainability Studies, Canadian & Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - Not Set, Canadian Studies - Not Set, Sustainability Studies - Not Set, Canadian & Indigenous Studies - 100%

Cross-Lists
CSID 5401H, SUST 5401H, CAST 6201H

Course Description
This course explores human-environmental relationships from a variety of perspectives using both academic and public policy debates as source material. Selected topics will draw from historical and political ecology, environmental protection and activism, heritage law, land tenure and land rights, tourism, public parks, and notions of wilderness in Canadian identities.

CUST5504H - Subjects of Desire

Overview

Department(s)
Culture, Arts, and Media, English Literature

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, English Literature - Not Set

Cross-Lists
ENGL 5504H

Course Description
This course examines theories of subjectivity that have informed work in cultural studies, media studies, and related disciplines. What is the relation between the desiring function of subjectivity and the forces of construction and production variously attributed to power, discourse, or society? How do we conceive of the limits of determination and of the possibility of freedom and agency?

CUST5505H - Futurities: Centring Difference & World

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
This course explores the interdisciplinary practice and knowledges of political theory, including futurities. Contemporary critical thinkers traversing disciplinary boundaries (e.g. Indigenous, Critical Race Theory, Feminism, Queer, Disability, Aging) and theoretical trajectories (e.g. structuralism, post-structuralism, new materialism) will povide insight into crises of our time and (re)imagined possibilities and worlds.

CUST5511H - Experiments in Historical Fiction

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
"Where has all the clarity gone, all the naturalness and purity of that connection between life and history?" (Friedrich Nietzsche, On the use and abuse of history for life)

"...thanks to the occult tyrannies of those blandly saluting clocks I had been mysteriously handcuffed to history, my destinies indissolubly chained to those of my country" (Saleem Sinai, protagonist of Salman Rushdie's Midnight's Children)

We will examine at the outset how the genre of "historical fiction" has traditionally and self-consciously followed particular (realist) conventions about the relationships between the past and the present, about the distance between historical and fictional figures, and about the objective character of the historical record. This sets the stage for our reading of four postmodern (American, Czech, Chilean, and German) novels, each of which deconstructs these conventions and opens up an array of complex and controversial issues concerning the nature of what many thinkers assert is the "natural" connection between history and storytelling. Some knowledge of the historical and political contexts of the primary texts will be useful (Communist Eastern Europe and the Cold War in the cases of Kundera and Wolf, the Pinochet dictatorship in the case of Allende; general historical reference points by all of the writers), but the main object of study is the literary engagement with the nature of history as it relates to such things as desire, memory, politics, and the literary tradition.

CUST5514H - Place, Site, Critical Topography

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
The course addresses the question of place in its variety of forms: "What place is this?" "Where is this?" "What is a place?" Drawing on readings including Sophocles, Leibniz, von Humboldt, Freud, Simmel, Benjamin and Deleuze, the seminar works at the intersection of cultural studies and the environmental humanities.

CUST5530H - Popular Music in Theory

Overview

Department(s)
Culture, Arts, and Media, English Literature

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, English Literature - Not Set

Cross-Lists
ENGL 5530H

Course Description
Popular music started to attract scholarly attention in the 1940s. Most of that attention was negative. Since then, however, a vast amount has been written about the meaning, uses, perils, and possibilities of popular music. Philosophers, musicologists, ethnographers, anthropologists, sociologists, cultural theorists, and literary scholars have all weighed in. In this course we will consider (a selection of) their contributions to our understanding of popular music and its relationship to commodification, mass culture, political agency, technology, subcultural formations, memory and a range of other topics.

CUST5540H - Order and Disorder

Overview

Department(s)
Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%

Course Description
The fundamental distinction between order and disorder has been an obsession among cultural theorists for more than a generation, affecting debates over artistic research, technology and culture, politics, environment, and the media. As we head into a future that many perceive to be marked by growing disorder, there is a corresponding demand to supplement our methods of evaluating relations of power and control beyond conventional solutions and beyond seemingly inevitable violence. This course examines order and disorder from a selection of texts by key thinkers in the field.

ECON3050H - Islamic Finance and Economics

Overview

Department(s)
Economics, Business

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Business - Not Set

Cross-Lists
ADMN-3050H

Course Description
The study of Islamic finance and economics introduces students to financing using alternatives to the interest rate. The course explores the principles governing Islamic finance, banking, insurance, money and capital markets. It examines Islamic finance and banking in the global economy, with attention to the Canadian financial environment. Prerequisite: ECON 1010H and 1020H.

Academic Level
Undergraduate

Credit Value

:
0.5

ECON3100H - Economic Growth

Overview

Department(s)
Economics

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%

Course Description
An exploration of the underlying determinants of economic growth, including factor accumulation and technological progress. Considers the importance of political and social institutions for the process of economic development. Topics include capital accumulation, human capital acquisition, technological change, commodity and factor flows, income inequality, climate change, and government policies. Prerequisite: ECON 1010H and 1020H.

Academic Level
Undergraduate

Credit Value

:
0.5

ECON3110H - International Trade

Overview

Department(s)
Economics, Business

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Business - Not Set

Cross-Lists
ADMN-3110H

Course Description
Topics include theories of world trade and the analysis of trade policy and trade relationships in the world economy; the theory and practice of protectionism and preferential trade arrangements; the political economy of trade policy; the role and performance of international organizations; environmental aspects of trade; and international labour standards and trade. Prerequisite: ECON 1010H and 1020H.

ECON3470H - Managerial Economics

Overview

Department(s)
Economics, Business

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Business - Not Set

Cross-Lists
ADMN-3470H

Course Description
A study of the various ways in which microeconomic principles and quantitative tools can be used to aid managers in making sound decisions. Topics include forecasting consumer demand, production and cost analysis, optimal pricing and production decisions, optimal hiring and investment decisions, and capital budgeting. Prerequisite: ECON 1010H and 1020H. Equivalent to ECON 3400H.

Academic Level
Undergraduate

Credit Value

:
0.5

ECON3500H - Economics of Industrial Relations

Overview

Department(s)
Economics, Business

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Business - Not Set

Cross-Lists
ADMN-3500H

Course Description
Topics include employer-employee relations, human resource management, theory and practice of collective bargaining, strikes, economic aspects of unions, and economics of labour policy. Prerequisite: ECON 1010H and 1020H.

Academic Level
Undergraduate

Credit Value

:
0.5

ECON3510H - Labour Economics

Overview

Department(s)
Economics

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%

Course Description
The economic theory of labour markets used to understand their outcomes and evaluate policies. Topics include wage determination, minimum wages, human capital theory, returns to schooling, optimal compensation, and unemployment. Prerequisite: ECON 2000H.

ECON4870H - Field Placement 1

Overview

Department(s)
Business, Economics

Contact Department ('not set' refers to cross-listed depts)
Business - 100%, Economics - Not Set

Cross-Lists
ADMN-4870H

Course Description
Bridges academic theory with field-based learning. Working with local employers in the community, students combine field experience with reflective practice. Students interview for various placements identified by the School of Business, or if approved by the School of Business, students may secure their own learning opportunity. The application deadline for Fall term placements is July 15; for Winter term placements the deadline is October 15; for Summer term placements the deadline is March 15. Prerequisite: A minimum 72% cumulative average; 12.0 university including 5.0 ADMN credits, or 12.0 university credits including 4.0 ECON credits and 2.0 ADMN credits; and permission of course administrator. Recommended: ADMN 2410H. Open only to students in the Business Administration, Economics, Accounting & Economics, or Mathematical Economics degree programs. Not open to co-op students.

Academic Level
Undergraduate

ECON4890Y - Business Internship

Overview

Department(s)
Economics, Business, Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Business - Not Set, Supply Chain Management - Not Set

Cross-Lists
ADMN-4890Y, LSCM-4890Y

Course Description
Designed for students interested in gaining in-depth, practical industry experience, while enhancing their classroom knowledge with real-world, paid industry positions. Students spend 6, 8, 12, or 16 months working full time in industry and return to Trent for a final term. Students apply, interview, and compete for limited positions. Course is graded on a pass/fail basis. Application deadline: October 15 of third year. Business Administration prerequisite: A minimum 75% cumulative average and 14.5 university credits including ADMN and ECON credits required for a single major in years 1-3, or permission of the director. Economics prerequisite: A minimum 75% cumulative average and 14.5 university credits including ECON credits required for a single major in years 1-3 and 2.0 ADMN credits, or permission of the director. Supply Chain Management prerequisite: A minimum 75% cumulative average and 14.5 university credits including LSCM, ADMN, and ECON credits required for years 1-3, or permission of the director. Accounting & Economics prerequisite: A minimum 75% cumulative average and 14.5 university credits including ADMN and ECON credits required for years 1-3, or permission of the director. Mathematical Economics prerequisite: A minimum 75% cumulative average and 14.5 university credits including ECON and MATH credits required for years 1-3, or permission of the director. Recommended prerequisite: ADMN 2410H. Open only to students in the single-major Honours programs in Business Administration, Economics, Supply Chain Management, Accounting & Economics, or Mathematical Economics. Not for credit toward a major in Business Administration, Economics, Accounting & Economics, or Mathematical Economics. Supply Chain Management students may take LSCM 4890Y in lieu of LSCM 4500Y. Not open to co-op students or students in the General programs in Business Administration or Economics.

EDUC3050H - Literacies, Languages, and Schooling

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Considers new approaches to thinking about literacy for twenty-first century educators. Students explore literacy learning and human interaction, challenging the monomodality of conventional school-based forms of learning to read and write as literacy. Students will encounter a range of learning theories related to literacy and language across the curriculum, embedded in the socio-cultural turn in literacy education. Prerequisite: 60% or higher in EDUC 2050H (or 2950H), or a pass in EDUC-INDG 1030H. Not open to students with credit for EDUC 3010H.

Academic Level
Undergraduate

Credit Value

EDUC4050H - Mathematics and Steam Driven Classroom

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
This course considers both subject and pedagogical knowledge related to mathematics and STEAM within the context of the elementary and intermediate ages. Active exploration of the mathematical and STEAM (science/technology/engineering/arts/math) knowledge necessary to effectively support mathematics, science, and technology development for learners. An exploratory approach to teaching and learning is supported through interaction and frequent collaboration. Prerequisite: 60% or higher in EDUC 3050H (or 3010H); or successful completion of a year abroad program and 60% or higher in EDUC 2050H (or 2950H); or a pass in EDUC-INDG 1030H. Not open to students with credit for EDUC 4010H or 4020H.

EDUC4051H - Field Experience in Teacher Education Stream 3

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Field experience in the Teacher Education Stream is designed as an opportunity for consolidation and enrichment of educational perspectives and inquiry through placement in an education related setting. This course is designed to augment the learning in the companion course, EDUC 4050H. Prerequisite: 60% or higher in EDUC 3050H and a pass in EDUC 3051H; or 60% or higher in EDUC 3010H. Not open to students with credit for EDUC 4010H or 4020H.

0.5

EDUC4100H - Supporting Literacy and Learners with Special Needs Placement (P/J)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
A field placement experience connected to EDUC 4133H that further develops the concepts and application of current educational research, theory, and professional practice regarding literacy instruction and learning diversity in supporting learners with special needs. Students will develop empathy and understanding for learners faced with a variety of learning challenges. Co-requisite: EDUC 4133H.

EDUC4121H - Creating a Positive Learning Environment Through the Theoretical and Practical Approaches to Classroom Management (P/J)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Examines current theories of instructional design and classroom management as they interact to create a positive learning environment in the Primary/Junior context. Students examine and critically assess contemporary models of design and management to develop personal philosophies related to their own teaching.

Academic Level
Undergraduate

Credit Value

:
0.5

EDUC4133H - Supporting Literacy and Learners with Special Needs (P/J)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
An introduction to current educational research, theory, and professional practice regarding literacy instruction and learning diversity in supporting learners with special needs and culturally and linguistically diverse (CLD) learners.
Asset-oriented principles and models of inclusion informed by critical disabilities studies are explored. Provides a sound introduction to differentiated instruction and teachers' legal and ethical responsibilities towards diverse and multi-language learners. Co-requisite: EDUC 4100H.

EDUC4170Q - Investigating the Relationship Between Assessment and Evaluation and its Application to Practice (P/J)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Building on the Assessment Framework in Growing Success from year 1, this course examines the relationship between assessment and evaluation and explores in depth the implementation of the Assessment Framework from Growing Success.

Academic Level
Undergraduate

Credit Value

:
0.25

EDUC4180H - Sociocultural Perspectives on Human Development and Learning (P/J)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Offers a critical approach to the understanding of sociocultural and cognitive theories of human development. Examines how these theories apply to multiple contexts of education, including systemic processes, classroom practices, and embodied teaching and learning. Explores identity, learning, and educational experiences through culturally responsive pedagogies.

Academic Level
Undergraduate

Credit Value

:
0.5

EDUC4561H - Mathematics (P/J)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Focuses on developing a community of mathematics learners. Current theories related to teaching and learning mathematics are examined within the context of rich mathematical investigations. A variety of manipulatives and technologies are explored as tools for learning and assessment.

Academic Level
Undergraduate

Credit Value

:
0.5

EDUC4563H - Science and Technology (P/J)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Teacher candidates critically assess the learning opportunities offered by science and technology. They experience how fundamental attributes of science can be explored through the elementary curriculum and the role that inquiry plays in this. The importance of pedagogy for science, technology, the environment, and society is emphasized.

Academic Level
Undergraduate

Credit Value

:
0.5

EDUC4564H - Social Studies (P/J)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Critically examines how children's developing sense of place is reflected in the Ontario curriculum. Teacher candidates will encounter opportunities to develop meaningful learning that leads to a deeper understanding of self; raised awareness of eco-social justice issues; and an understanding of Canada's place in the world.

Academic Level
Undergraduate

:
0.5

EDUC4571H - Language and Literacy (P/J)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
This course prepares teacher candidates for planning, teaching and assessing comprehensive balanced literacy programs in the Primary and Junior divisions. Candidates will recognize how theories of language and literacy development and instructional methodologies can be effectively applied to classroom practice.

Academic Level
Undergraduate

Credit Value

:
0.5

EDUC4573H - Integrated Arts in the Elementary Classroom (P/J)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Teacher candidates learn how to integrate the arts into the elementary classroom. Drawing on current theory and practice in arts education, candidates focus on how children learn, create, and express ideas through the arts and consider ways that the arts can enrich learning across subject areas.

Academic Level
Undergraduate

Credit Value

:
0.5

EDUC4574H - Health, Physical Education, and Dance in the Elementary Classroom (P/J)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Approaches to movement education incorporating theories of kinaesthetic learning in physical education. Teacher candidates engage with foundations of movement to develop comfort and confidence in integrating health and movement concepts into classroom practice. Understanding of child/youth mental health concerns and awareness of community mental health services are developed.

Academic Level
Undergraduate

Credit Value

:
0.5

EDUC4661Y - Biology (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Examines contemporary learning theory pertaining to Biology education. Teacher candidates explore the philosophical basis of appropriate teaching and assessment methodologies to facilitate pupil learning and understanding. The unifying principles of the life sciences will form a framework for the course.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4662Y - Chemistry (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Teacher candidates investigate theories of instructional practice supporting student learning in Chemistry. The foundational concepts of chemical science will be linked to contemporary theories of assessment and evaluation of pupil performance to develop effective teaching and learning models.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4663Y - Computer Studies (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Topics include the study of hardware and software design applications, their impact on society, including cyberbullying; effective online research; and the importance of creating an appropriate digital footprint. Teacher candidates use a variety of Web 2.0 tools to create effective educational resources.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4664Y - Mathematics (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Focuses on pupil construction of mathematical concepts and skills through engagement as a community of learners. Exploration of current pedagogical theory in Mathematics, teaching practices, assessment techniques, and the skills and content areas of the curricula are critically examined.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4665Y - Physics (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Students will explore contemporary research and theoretical foundations of Physics instruction, focusing on pupil construction of knowledge. They will apply these theories in designing effective physics courses which incorporate a wide range of teaching practices and assessment techniques to engage all learners.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4671Y - Dramatic Arts (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Students will critically examine current theory and practice of teaching Dramatic Arts in the Intermediate and Senior divisions. They apply educational theory and pedagogy in exploring a variety of teaching and assessment strategies for developing effective drama programs.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4672Y - English (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Investigates the theoretical foundations for teaching oral communication, reading, writing, and media studies in the Intermediate and Senior divisions. Teacher candidates apply research and theory in planning a balanced curriculum, evaluating student performance, preparing students to meet literacy expectations, and modifying programs according to individual needs.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4673Y - French as a Second Language (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Explores current pedagogical research and theory that supports the teaching/learning of listening, speaking, reading and writing in French as a Second Language. Focuses on the models for the integration of language skills and culture and investigates a variety of instructional and assessment approaches for creating effective lessons and teaching units.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4674Y - History (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Provides the fundamentals in contemporary theory and practice of teaching History to pupils in the Intermediate and Senior divisions. Students will be given opportunities to study the research and theoretical foundations for various models of history instruction, methods of assessment and evaluation of pupils and effective course design.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4675Y - Visual Arts: Theory and Practice (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Students engage in a critical exploration of visual art. Students take part in studio activities while they explore art history, aesthetics, and art criticism, balancing practical creation with considerations of the object, its role in society, and its relevance to the individual and to the larger community.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4676Y - Health and Physical Education (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
This course provides a theoretical and practical foundation in health and physical education. Topics include trends in health and physical education, motor skill development, coaching, fundamental movement skills, building a community through co-operative games, strategies for integration, dance and safety. Students experience practices and strategies for planning, instruction, and assessment.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4681Y - Geography (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Provides the professional skills necessary for effective teaching of Geography at the Intermediate and Senior levels. Through a variety of teaching strategies and reflective practice, candidates will investigate contemporary research, theories and methods of teaching Geography and assessing student learning in the subject area.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4682Y - First Nations, Métis, and Inuit Studies (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Explores theoretical foundations for teaching First Nations, Metis, and Inuit Studies in Intermediate and Senior classrooms. They will apply these theories to a critical examination of a variety of teaching and assessment practices appropriate to the subject area.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4683Y - Native Languages: Anishinaabemowin (Ojibwe) (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
An examination of second language learning and teaching of the Ojibwe language is investigated, related to content learning, analytic skills, and literature appreciation. Areas of study include, but are not limited to: pronunciation, reading, writing, understanding the language, becoming acquainted with several methods of teaching and assessment, and cultural enrichment.

Academic Level
Undergraduate

Credit Value

:
1

EDUC4684Y - Environmental Science (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
At a time of unprecedented environmental change, this course examines contemporary research and learning theory pertaining to environment science education. The links between environmental science and Indigenous education are strong; the content, philosophy and methods of this course will honour, respect, and utilize these links to ensure synergistic benefits.

Academic Level

EDUC4705Q - The Philosophical, Historical, and Curricular Context of Ontario Catholic Education (P/J and I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Explores the legal, historical, and theological foundations and distinctive character of curriculum and the learning environment in the Ontario Catholic school system. Candidates develop the skills and attitudes to build effective classroom communities by exploring theories and practices of instructional design and the operational traditions of Catholic schools. Excludes EDUC 4343H.

EDUC4801H - Practicum Year 1: Developing Teaching Identity, Knowledge, and Skill (I/S)

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Teacher candidates reflect upon personal identity, and how individual experiences and values impact teaching practice. We examine the importance of making meaningful observations of students; comprehensive planning (including individual lesson planning and unit planning using backward design); assessment for, of, and as learning; and strategies to create an engaging, exciting classroom environment.

EDUC5310H - Leadership, Literacy and Inclusion

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Students examine leadership as it relates to literacy and inclusion. The course focuses on the development of professionals who lead in creating inclusive environments. Participants will explore aspects of literacy and inclusion and ways of furthering their ability to be leaders in their fields.

Academic Level
Graduate

Credit Value

:
0.5

EDUC5320H - Education & Leadership

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
This course is designed to enable students to identify contemporary and classic theories of leadership, and to apply these theories to problems of practice in education-relevant professional contexts. The course will focus on interdisciplinary theoretical and analytical perspectives with origins in psychology, sociology, social anthropology, business administration, community development and others. In addition, more recent perspectives emerging from feminist, indigenous, cross-cultural, critical and other contexts will be considered.

EDUC5430H - Values & Ethics in Educational Practice

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
This course will include an examination of ethical principles related to education, including values frameworks, power dynamics, moral responsibility, and ethical dilemmas. The course will include a review and critique of literature related to teaching ethics, ethical decision-making, student moral development, and personal values in educational practice.

Academic Level
Graduate

Credit Value

:
0.5

EDUC5510H - Gender, Sexuality and Education

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Students consider how gender and sexuality influence contexts of learning, broadly defined. Topics include the role of body, identity, community, curriculum, and policy in how students, educators, and community members experience education. Several theoretical lenses are introduced, such as feminist and queer pedagogies, anti-racist education, critical disability and transgender studies.

EDUC5740H - Race, Ethnicity and Education

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Students will have the opportunity to explore how pedagogical curriculum and policy are shaped by cultural values. The colonial Canadian context, immersed in multicultural ideals, will be highlighted, as well as the utilization of anti-racist education as a theorectical framework.

Academic Level
Graduate

Credit Value

:
0.5

EDUC5810H - Well-Being, Sustainability & Experimental Learning I

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
Well-being, for all, forever' is a definition of sustainability used by Hopkins (2013) in a report for UNESCO. How can education be repurposed so that it contributes to this goal, both through the endeavors of the schooling system and beyond? The course will start by considering O'Brien's concept of 'sustainable happiness', one that brings together the idea of sustainability and evidence from the field of positive psychology concerning what makes us truly happy. Using this concept as a lens, during the rest of the course we will explore the role of experiential learning as a vehicle for sustainability education in the local community. With a range of activities, readings, visits and guest speakers, we will critically explore the true meaning of sustainability education and raise fundamental questions about the purpose of education.

0.5

EDUC5820H - Well-Being, Sustainability & Experimental Learning II

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
This course extends EDUC-5810H: Wellbeing, Sustainability and Experiential Learning, but it also stands alone and it is not necessary to have taken the course. The courses may also be taken in reverse order. We will examine the affective impact of experiential learning in natural and built settings and consider E.O. Wilson's concept of biophilia in the context of O'Brien's theory of sustainable happiness. Examples of attempts to immerse children and adults in nature, such as forest schools and forest bathing, will be explored. Guest speakers and field visits will enable students to experience local initiatives to connect people with the natural environment, the potential benefits of doing so, and the goals of those providing the opportunities.

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Cross-Lists
GEOG-3002H

Course Description
Examines the genesis of rock units and the causes and outcomes of subsequent deformation. Students are introduced to the different geologic structures and methods to describe them. Emphasis is the structural relevance to hydrogeology, mineralogy, and natural resources, as well as subsurface contamination migration. Required field trips. Prerequisite: EGEO-GEOG 2001H. Typically offered every other year.

EGEO3003H - Field Methods in Environmental Geoscience

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
ERSC-3003H, GEOG-3003H

Course Description
Students learn essential field skills, including designing a field study, mapping, and measurement techniques. The geology of Central Ontario and its mining industry are examined along with the potential for environmental impacts. Most instruction takes place during required field trips with students documenting their work in technical reports. Prerequisite: EGEO-GEOG 2001H or EGEO-GEOG-ERSC 2401H. Not open to students with credit for EGEO-ERSC-GEOG 2000H.

EGEO3530H - Hydrology

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
ERSC-3530H, GEOG-3530H, WASC-3530H

Course Description
Study of the movement of water through the environment with emphasis on terrestrial aspects including interception, infiltration, soil moisture, groundwater, surface runoff, and stream-flow, also covering human impact on hydrological processes. Prerequisite: 9.0 university credits including GEOG-BIOL-ERSC 2080H and one of GEOG 2460H, GEOG-EGEO 2540H, or GEOG 3440H.

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
ERSC-3560H, GEOG-3560H, SAFS-3560H

Course Description
Soils represent one of the most important natural resources from the point of view of sustainable agriculture and forestry, and protection of habitat. This course explores the scientific basis and management options for conservation of soil resources. Prerequisite: GEOG-ERSC 2080H and one of ERSC 2240H or GEOG 2540H.

EGEO3590H - Sedimentary Processes

Overview

Department(s)
Geography

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%

Cross-Lists
GEOG-3590H

Course Description
An advanced treatment of sedimentary processes and related stratigraphic features that occur in a wide range of environmental contexts inclusive of benthic, coastal, and dryland systems. An emphasis is placed upon field and laboratory techniques for measurement, and on case studies. Prerequisite: One of GEOG-EGEO-ERSC 2401H, GEOG-EGEO 2540H, or GEOG 3520H.

EGEO4020D - Honours Thesis

Overview

Department(s)
Geography

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%

Course Description
Design, implementation, and dissemination of a major research project in environmental geoscience featuring independent work under the supervision of a faculty supervisor. This research must be based on at least one foundational geoscience field, including geoscience fieldwork, mineralogy, petrology, sedimentary processes, geochemistry, hydrology/hydrogeology, geomorphology, and soil science. Prerequisite: 14.0 university credits and a minimum cumulative average of 75%. Students must find a faculty member who is agreeable to supervise their project. Applications are available from the Trent School of the Environment Office, and should be submitted in the academic year before enrolment in the course.

EGEO4060H - The Geochemistry of Natural Waters

Overview

Department(s)
Environment, Biology, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Geography - Not Set

Cross-Lists
BIOL-4060H, ERSC-4060H, GEOG-4060H, WASC-4060H

Course Description
Examines the chemistry of freshwater systems. Chemical and physical processes that lead to changes in water quality are discussed. The emphasis is on the concentrations and distributions of contaminants. Topics include watershed contributions of chemicals, acidification and the carbonate system, weathering, redox chemistry, trace metals, and synthetic organic contaminants. Prerequisite: ERSC 2230H or ERSC-CHEM 2620H.

EGEO4080H - Hydrogeology

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
GEOG-4080H, WASC-4080H

Course Description
Examines the nature, occurrence, and movement of water in soil and groundwater systems. Physical and chemical aspects of groundwater are addressed, and the use of field techniques and mathematical models in the study of groundwater movement and contamination are emphasized. Prerequisite: 9.0 university credits including GEOG-EGEO-ERSC 3530H. Strongly recommended: Grade 12U Calculus and Vectors.

ENGL1001H - Truth, Lies, and Storytelling

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
When we tell stories, whether in song, poetry, drama, film, or prose, are we telling lies? How do literary fictions in any genre engage, reflect, distort, or heighten the truth? Can words get in the way of the truth? These questions will provide entrances into the texts in this course.

ENGL1003H - Revolution!

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
Revolution is variously defined as a) a drastic and far-reaching change in ways of thinking and behaving, b) the overthrow of a government by those who are governed, and c) rotation: a single complete turn. This course looks at how authors create and respond to the revolutions that turn our world upside down and then, sometimes, back around again.

ENGL2709H - Graphic Fiction

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
A survey of graphic fiction and its subgenres. Topics may include the graphic novel, superheroes, comix, and manga. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ENGL2751H - Literature and Sports

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
The main goal of this course is to examine the various literary renditions of the world's most popular sports. Discover, for instance, hockey's dependence on violence, football's ties to war culture, and baseball's troubling national fantasies--all by reading an eclectic collection of plays, poems, novels, and short stories. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

ENGL2811H - Children's Literature: Poetry, Picture Books, and Plays

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
Focuses on poetry, stories, picture books, and theatre for children: the emphasis will be placed upon oral narratives, graphic culture, and performance. Texts include nursery rhymes, Where the Wild Things Are, Peter Pan, and Disney's Pinocchio. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ENGL2851H - Introductory Prose Writing Workshop

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
An introduction to the practice of writing prose, both fiction and non-fiction, this course asks students to experiment with a variety of contemporary prose forms. The course will benefit both those interested in pursuing writing careers and those intending to be teachers who hope to incorporate creative writing in their teaching practices. Prerequisite: 4.0 university credits including ENGL 1851H (or permission of the department). Not open to students with credit for ENGL 2859H.

Academic Level
Undergraduate

Credit Value

:
0.5

ENGL2853H - Introductory Poetry Writing Workshop

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
A broad introduction to the practice of writing poetry, this course asks students to experiment with poetic creation in a variety of contemporary modes, forms, and contexts. Weekly writing and editing tasks are required, as is a careful consideration of poetic concepts, modes of working, assigned readings, and poetics. Prerequisite: 4.0 university credits including ENGL 1851H (or permission of the department). Not open to students with credit for ENGL 2859H.

Academic Level
Undergraduate

Credit Value

:
0.5

ENGL2855H - Introductory Creative Non-Fiction Workshop

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
This introductory class on creative non-fiction exposes students to the variety of texts grouped in this genre (personal essay, memoir, journalistic essay, case study, and hybrids), through discussion, practice, and workshop. Students consider issues such as audience, literary strategies, diction, voice, tone, and ethical responsibilities to living subjects. Prerequisite: 0.5 ENGL credit. ENGL 1851H is strongly recommended. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
0.5

ENGL2857H - Introductory Scriptwriting Workshop

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
A broad introduction to the practice of writing scripts, this course asks students to learn the fundamentals of dramatic scripts and scriptwriting. Frequent writing and editing tasks are required, as is thoughtful engagement with assigned material and ongoing projects. Prerequisite: 4.0 university credits including ENGL 1851H (or permission of the department).

Academic Level

ENGL3151H - Staging Race in the Early Modern Theatre

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
This course considers early modern plays in conjunction with insights from the field of premodern critical race studies to explore the role that the English commercial theatre industry played in establishing, perpetuating, and occasionally challenging emerging notions of racial difference in the late-sixteenth and early-seventeenth centuries. Prerequisite: One of ENGL 2123H, 2151H, 2152Y/2153H, or 3153H.

ENGL3153H - The Renaissance Theatre

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
The popular medium of Renaissance theatre offered one of the first outlets for a new breed of writer--the "professional." We explore the plays of several of Shakespeare's contemporaries (Marlowe, Jonson, Webster, and others) both as literary texts and theatrical events. Prerequisite: 4.0 university credits.

0.5

ENGL3155H - Sex and Politics in Elizabethan Literature

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
Popular and aristocratic literary forms collided and intermixed in the English Renaissance, producing some of the greatest poetry and drama in English, and fascinating experiments in the new genre of prose fiction. We examine a range of Renaissance bestsellers, considering how writers and editors courted the reading public. Prerequisite: 4.0 university credits.

ENGL3403H - Those Wild Victorians

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
The term "Victorian" often denotes inhibition, prudery, or narrow-mindedness. This course tests such stereotypes by unearthing facets of Victorian culture that signify a "wild" refusal or inability to be governed by norms commonly associated with the era. Through close analysis of selected texts, we will uncover the fears, desires, and tensions that subvert and disrupt the era's staid self-projections. Prerequisite: 4.0 university credits. Not open to students with credit for ENGL 3402Y, 3405H, or 3407H.

ENGL3755H - Literature and Mysticism

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
Despite the fact that mystical experience has traditionally been deemed "ineffable," or indescribable, volumes of literature have been written describing and reflecting on it. This course examines such texts in the English literary tradition with an eye to uncovering the ways in which language is used to say the unsayable. Prerequisite: 4.0 university credits. Offered only at Trent University Durham.

ENGL5207H - Imagining Immunity

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
This course explores the role of immunity (in both its interlocking legal and biological senses) in shaping a sense of collectivity and community both in literary and political discourse. Of particular interest will be the medical rhetoric informing contemporary debates on vaccination and other public health interventions.

ENGL5209H - Materiality and the Text

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
What happens to the study of the materiality of texts when a screen replaces the paper or parchment, and the stability of the written or printed signs is no longer guaranteed? Topics include: paratexts and metadata, archival theory, the Digital Humanities, hypertexts, technology, and the book as fetish.

ENGL5307H - Aging, Disability & Care in Literature & Culture

Overview

Department(s)
English Literature, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%, Culture, Arts, and Media - Not Set

Cross-Lists
CUST 5307H

Course Description
This course will explore depictions of care for older adults in literary, film, public policy, and popular culture texts to show how care is not just economic nor merely medical. Students will reconceive care as cultural and articulate the publics created through the different media.

ENGL5308H - Keywords

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
This course explores terms and concepts that graduate students in the humanities will encounter in their research. Many students enter graduate school without knowing these terms, or being intimidated by them. "Keywords" will give them a chance to work together and understand and potentially transform these key concepts.

ENGL5310H - Photography in Postmodern Literature

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
An overview of theoretical and literary representations of pre-digital photography in postmodern literature, this course investigates intersections between visual culture, subjective interpretation, personal and formal memory, artistic production, and objectivity. Theoretical and postmodern literary texts will be examined alongside historic photographs, photographic practices, and both public and private histories.

ENGL5311H - Black Lives Matter

Overview

Department(s)
English Literature, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%, Culture, Arts, and Media - Not Set

Cross-Lists
CUST 5311H

Course Description
This course examines the Black Lives Matter movement as the most recent form of collective social protest against state-sanctioned racial violence. The course looks at the influence of earlier civil rights movements on contemporary forms of protest, the theoretical parameters behind the movement, the "racial formations" (the prison complex, racial justice activism, the Obama presidency) from which the movement emerged, as well as recent literary accounts of the movement.

ENGL5315H - Arts of Conflict: Violence, Art, and the Irish Troubles

Overview

Department(s)
Culture, Arts, and Media, English Literature

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - Not Set, English Literature - 100%

Cross-Lists
CUST-5315H

Course Description
This course will explore practical and theoretical conflicts between public violence and its cultural artifacts, including literature, film, murals, sculpture and parades. Our focus will be on twentieth- and twenty-first-century texts, images and public displays from Ireland, usually relating to the Irish Republican Army. We will question why modern cultural formations and political structures condemn violence even as they rely on it; and we will ask what place public violence has in a modern culture defined by its faith in the possibility of reasoning and debating all conflicts away. (Excludes CUST-4512H.)

ENGL5330H - Musical Thinking

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
This course examines representations of music on the early modern English stage. Drawing on literary analysis, musicology, and cognitive theory, students will explore music's role in the "cognitive ecology" of the theatre where it enabled complex, collaborative thinking about cosmology, religion, politics, class, sex, gender, and bodies. No music theory knowledge required.

ENGL5340H - Politics of Black Art

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
This course investigates how twentieth- and twenty-first century African American authors have critically reflected upon the political function of artistic production. Among other topics, it questions how art interlinks the private and public spheres of life and explores art's contribution to the realization of a more just and ethical world.

ENGL5350H - Public Cultures of Mourning

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
This course explores the complex relationship between grief, creativity, and public protest. Through a combination of literary and theoretical texts and public art installations, we will examine how grief functions as both a personal and political act. What role do public memorials, protests, and cultural practices of mourning play in challenging state-sanctioned narratives of loss, erasure, and violence?

ENGL5504H - Subjects of Desire

Overview

Department(s)
English Literature, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
English Literature - Not Set, Culture, Arts, and Media - 100%

Cross-Lists
CUST 5504H

Course Description
This course examines theories of subjectivity that have informed work in cultural studies, media studies, and related disciplines. What is the relation between the desiring function of subjectivity and the forces of construction and production variously attributed to power, discourse, or society? How do we conceive of the limits of determination and of the possibility of freedom and agency?

ENGL5530H - Popular Music in Theory

Overview

Department(s)
Culture, Arts, and Media, English Literature

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, English Literature - Not Set

Cross-Lists
CUST 5530H

Course Description
Popular music started to attract scholarly attention in the 1940s. Most of that attention was negative. Since then, however, a vast amount has been written about the meaning, uses, perils, and possibilities of popular music. Philosophers, musicologists, ethnographers, anthropologists, sociologists, cultural theorists, and literary scholars have all weighed in. In this course we will consider (a selection of) their contributions to our understanding of popular music and its relationship to commodification, mass culture, political agency, technology, subcultural formations, memory and a range of other topics.

ENLS5026H - Wetland Restoration & Creation

Overview

Department(s)
Environmental & Life Sciences

Contact Department ('not set' refers to cross-listed depts)
Environmental & Life Sciences - 100%

Course Description
This is a seminar course that explores the global literature on wetland restoration and creation. The course will compare explicitly the technological and ecological experiences with different wetland types and situations, in order to determine opportunities and limitations. At least one field trip will be required. The course assumes a basic knowledge of wetland ecology and is designed for students who have taken a first course in wetland biology or who have equivalent experience.

ENLS5028H - Communicating Science

Overview

Department(s)
Environmental & Life Sciences

Contact Department ('not set' refers to cross-listed depts)
Environmental & Life Sciences - 100%

Course Description
Science exists only because scientists are writers and speakers. In this course, students will hone their skills at writing and presenting science with clarity and economy. In class, students will present science, in oral and written form, and evaluate the quality of that communication. We will emphasize that conveying science is storytelling, that modeling good writing can improve one's own writing, and that making science accessible means dispensing with jargon. Enrollment is limited.

ENLS5050H - Directed Research

Overview

Department(s)
Environmental & Life Sciences

Contact Department ('not set' refers to cross-listed depts)
Environmental & Life Sciences - 100%

Course Description
This course is available for graduate students who wish to develop their knowledge and skills in a more discipline-specific area by undertaking a small research project or targeted exercises requiring the collection and analysis of original data. The format of the course and associated activities are designed by the student in consultation with the instructor. The research project can entail unpublished data, data from public repositories, a meta-analysis of published data, new data from small lab- or field-based project(s) collected within the timeframe of a half-credit course. Data analyzed from this course cannot be used as part of the student's thesis.

ENLS6100H - Ph.D. Candidacy Exam

Overview

Department(s)
Environmental & Life Sciences

Contact Department ('not set' refers to cross-listed depts)
Environmental & Life Sciences - 100%

Course Description
Students are required to develop a research proposal for the dissertation in conjunction with their supervisory committee. The basis of the proposal is not only major ideas of research but also of broader philisophical, methodological and substantive issues which define the intellectual content of the students' future research activities. Once the proposal is approved by the supervisory committee it is submitted to the program office. The proposal must be submitted between 12 and 16 months after enrolment. A candidacy exam is scheduled once it is approved by the examination committee. It is a closed oral examination in front of the examination committee. A grade of pass, fail, or pass with remediation will be given and will be noted on the transcript. Students who fail the exam will be required to leave the program.

ERSC2220H - Environmental Assessment: Chemical and Laboratory Methods

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Theory and methods for assessing the impacts of contaminants and related stressors in the environment. Emphasized are environmental chemistry and the nature, mobility, and potential impacts of pollutants. Students who have taken CHEM 1000H and 1010H and achieved an average combined grade of at least 70% are exempt from the requirement to take ERSC 2220H. Prerequisite: 4.0 university credits including 1.0 ERSC credit at the 1000 level.

ERSC2230H - Environmental Assessment: Sampling and Analysis

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Theory and application of sampling design, data analysis, and monitoring for environmental assessment of effluent impacts, particularly of industry, municipalities, and agriculture. Prerequisite: ERSC 2220H or a minimum average combined grade of 70% in CHEM 1000H and 1010H.

0.5

ERSC2240H - Ecological Assessment for Natural Resource Management

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Field survey design, techniques, and theory for the assessment of natural resources, including consideration of watershed and local scales, biotic indices, soils, hydrology, and policy/legal issues. Prerequisite: 4.0 university credits including 1.0 ERSC credit at the 1000 level.

Academic Level
Undergraduate

ERSC2260H - Introductory Ecology

Overview

Department(s)
Biology, Environment

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Environment - Not Set

Cross-Lists
BIOL-2260H

Course Description
An examination of the interactions between organisms and their environment at the levels of the population, community, and ecosystem. Covers basic concepts, theories, and methods used in ecology and the application of these to ecological and environmental problems. Prerequisite: 60% or higher in each of BIOL 1020H and 1030H, or 60% or higher in BIOL 1020H and one of ERSC 1010H or 1020H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ERSC2300H - Energy Science and Technology

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
A discussion of the scientific principles of energy and thermodynamics, and the current and future prospects for energy production, conversion, storage, and transmission. Prerequisite: 4.0 university credits including 1.0 ERSC credit at the 1000 level.

Academic Level
Undergraduate

Course Designation
Science

0.5

ERSC2350H - Ecological Agriculture

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
BIOL-2350H, SAFS-2350H

Course Description
An exploration of the scientific basis and ecology of agriculture. Abiotic and biotic factors influencing crop productivity, species interactions, energetics, nutrient cycling, cropping systems management and landscape diversity are considered. Traditional, conventional, and intense systems are reviewed in the context of sustainability. Prerequisite: BIOL 1020H or both ERSC 1010H and 1020H. Recommended: SAFS 1001H, BIOL 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

ERSC2360H - Agriculture and Agricultural Alternatives

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Cross-Lists
SAFS-2360H

Course Description
Focuses on the origins and domestication of crops and livestock, and on the increasingly narrow genetic resources available to modern production systems. Conventional, intensive, and industrial farming systems are considered, as well as alternatives such as organic farming, biodynamics, and the development of niche markets. Farm visits are included. Prerequisite: ERSC 1010H and 1020H. Recommended: SAFS 1001H; BIOL 1020H or 1030H; and ERSC-BIOL-SAFS 2350H.

Academic Level
Undergraduate

0.5

ERSC2401H - Environmental Geology

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
EGEO-2401H, GEOG-2401H

Course Description
Environmental geology examines the interactions between society and the geologic environment. This course begins with an introduction to the fundamental geologic processes and Earth materials, and then focuses on the most pressing geological issues of today, including fossil fuel and mineral extraction, natural hazards, climate change, water resources, and waste disposal. Prerequisite: 4.0 university credits including EGEO-ERSC-GEOG 1040H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

0.5

ERSC2460H - The Global Climate System

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
GEOG-2460H

Course Description
A study of the physical elements of the global climate system. Deals with global and synoptic climatic processes including the structure of the atmosphere, radiation, atmospheric dynamics, general circulation, and the oceans. These concepts are applied to an introduction to the problem of climatic change and its prediction. Prerequisite: ERSC-GEOG-EGEO 1040H or ERSC-CLIM-GEOG 1060H (ERSC-CLIM 1050H).

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC2530H - Water Resources

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
GEOG-2530H, WASC-2530H

Course Description
Uses case studies to examine the principles and processes that control the distribution and uses of water at global, continental, and watershed scales. Prerequisite: 4.0 university credits including GEOG-EGEO-ERSC 1040H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

0.5

ERSC2620H - Environmental Chemistry

Overview

Department(s)
Chemistry, Environment

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Environment - Not Set

Cross-Lists
CHEM-2620H

Course Description
An introduction to environmental chemical processes and the impacts of humankind's activities on the natural environment, including the atmosphere, hydrosphere, and terrestrial compartment. Examples of topics are ozone synthesis/ destruction, the chemistry of global climate, aquatic chemistry, water pollution, water treatment chemistry, soil formation, and chemistry of solid waste. Prerequisite: ERSC 2220H or both CHEM 1000H and 1010H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC2701H - Environmental Education: Biological Issues

Overview

Department(s)
Environment, Biology, Education

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Education - Not Set

Cross-Lists
BIOL-2701H, EDUC-2701H

Course Description
The science behind environmental issues that are primarily biological in nature, including biodiversity, habitat loss, invasive species, and toxicity. Intended for prospective educators, natural area interpreters, and environmental communicators. Prerequisite: 4.0 university credits. Not for credit toward a major or minor in Biology.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC2702H - Environmental Education: Fostering Stewardship and a Sustainable Future

Overview

Department(s)
Environment, Biology, Education

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Education - Not Set

Cross-Lists
BIOL-2702H, EDUC-2702H

Course Description
The science behind environmental issues that are primarily physical or chemical in nature, including energy conservation, global warming, and air and water pollution. Intended for prospective educators, nature interpreters, and others interested in working with the public on environmental stewardship and sustainability initiatives. Prerequisite: 4.0 university credits. ERSC-BIOL 2701H highly recommended. Not for credit toward a major or minor in Biology.

Academic Level
Undergraduate

Science

Credit Value

:
0.5

ERSC3002H - Environmental Implications of Agriculture

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Cross-Lists
SAFS-3002H

Course Description
An introduction to the scientific basis of agriculture and an exploration of the environmental implications of agriculture. Topics include agricultural ecology, soil and moisture management, nutrient management, pest management, energy consumption in the agricultural sector, and the impact on agriculture of ambient environmental conditions, including air pollution and climate change. Prerequisite: ERSC 2220H and 2240H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3003H - Field Methods in Environmental Geoscience

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
EGEO-3003H, GEOG-3003H

Course Description
Students learn essential field skills, including designing a field study, mapping, and measurement techniques. The geology of Central Ontario and its mining industry are examined along with the potential for environmental impacts. Most instruction takes place during required field trips with students documenting their work in technical reports. Prerequisite: EGEO-GEOG 2001H or EGEO-GEOG-ERSC 2401H. Not open to students with credit for EGEO-ERSC-GEOG 2000H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3010H - Fundamentals of Geographical Information Systems Analysis

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
GEOG-3010H

Course Description
Focuses on Geographical Information Systems and analysis in the vector data domain (discrete object representation). It examines the fundamentals of spatial database development and the main analytical operations in vector. Practical application through laboratory exercises with examples from the urban and rural environment is a major component. Prerequisite: ERSC-GEOG-BIOL 2080H and ERSC-GEOG 2090H. Not open to students in the GIS Application Specialist Joint Program with Fleming College. Typically offered every other year.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3020H - Remote Sensing of the Environment

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
GEOG-3020H

Course Description
Introduces the science, technology, and environmental applications of Remote Sensing of a host of environmental variables whether locally, regionally, continentally, or globally. Knowledge about the manner, process, and timing of data capture, processing, and their interpretation for specific purposes are imperatives in modern environmental assessment and monitoring. Prerequisite: GEOG-ERSC 2090H. Typically offered every other year.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3160Y - Community-Based Resource Management

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Examines critically and constructively community-based management of natural resources and the environment. Explores the topic of self-regulation and co-management by resource interest groups, drawing on cases from fisheries, forestry, wildlife, and other sectors. Students are required to complete group projects with community partners. Prerequisite: 9.0 university credits including 1.0 ERSC and/or ERST credit at the 2000 level or beyond. Not open to students with credit for ERSC 3160H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
1

ERSC3175H - The Archaeology of Natural Disasters

Overview

Department(s)
Anthropology, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set, Geography - Not Set

Cross-Lists
ANTH-3175H, GEOG-3175H

Course Description
Lectures explore the science of natural disasters, and issues relating to resilience and risk management in the contemporary world. Seminars focus on the archaeology of natural disasters, with particular emphasis on how human conceptions of the environment condition people's perceived vulnerability, and eventually their responses, to sudden environmental changes. Prerequisite: 10.0 university credits or permission of instructor. Students majoring in Environmental & Resource Studies/ Science may only take one of ERSC-ANTH-GEOG 3175H or 3185H as an ERSC credit.

Academic Level
Undergraduate

Course Designation

ERSC3185H - The Archaeology of Climate Change

Overview

Department(s)
Anthropology, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set, Geography - Not Set

Cross-Lists
ANTH-3185H, GEOG-3185H

Course Description
Lectures and readings examine the science of climate change, outline how climate change influenced cultural development in the past, and assess how human perceptions of the environment conditioned the varying responses to climate change. Seminars focus on key methodological and/or theoretical issues, and specific case studies from the archaeological record. Prerequisite: 10.0 university credits or permission of instructor. Students majoring in Environmental & Resource Studies/ Science may only take one of ERSC-ANTH-GEOG 3175H or 3185H as an ERSC credit.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3200Y - Management of Forest Ecosystems

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Offers an appreciation of the problems in managing forest ecosystems. Looks at the ecological processes which create and maintain forests and at how foresters attempt to manage them, and the environmental consequences of forestry practices; then examines case studies drawn from Ontario and other parts of the world. Prerequisite: ERSC-BIOL 2260H or ERSC 2240H.

Academic Level
Undergraduate

Course Designation
Science

1

ERSC3230H - Environmental Problems and Solutions in Small Island Developing States: a Field Course

Overview

Department(s)
Environment, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Global Justice & Development - Not Set

Cross-Lists
GDST-3230H

Course Description
Barbados, like many islands in the West Indies, is facing a variety of challenges, such as overfishing, pollution, and loss of coral reefs and other habitats. This course, which has a one-week field component and an online component, introduces students to the challenges faced by Barbados and other islands, as well as potential solutions. The default credit for the course is ERSC, but students may take the course as an ERST credit provided this request is made to the instructor prior to the start of the course. Students pay a course fee in addition to travel costs. Prerequisite: ERSC 2230H, ERST-CAST 2520H, or GDST-HURI 2010H (GDST 2001H).

Academic Level
Undergraduate

Course Designation
Science

Credit Value

ERSC3260H - Applied Biomonitoring

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
BIOL-3260H

Course Description
Exploration of the scientific basis and practical need for biomonitoring frames the field application of biomonitoring protocols for community clients in terrestrial and aquatic environments. Prerequisite: ERSC 2240H or 2230H or equivalent or ERSC-BIOL 2260H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ERSC3333H - Ecological Anthropology

Overview

Department(s)
Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set

Cross-Lists
ANTH-3333H

Course Description
This course examines human participation in ecosystems, including how people and cultures cause and react to environmental challenges. We explore interdependence among humans and the rest of nature, how people in various cultures and times conceptualize and interact with their environment, and ways to identify and promote cultures of sustainability.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

0.5

ERSC3370H - Organic Agriculture: Principles and Practices

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
BIOL-3370H, SAFS-3370H

Course Description
Focuses on farming methods and requirements for organic production. The importance of ecological processes, biodiversity, rotation, and organic amendments in organic crop production will be discussed. The standards, certification, packaging, and diversity of markets for organic foods will be emphasized. Mandatory field trips to organic farms. Prerequisite: SAFS 1001H and SAFS-BIOL-ERSC 2350H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ERSC3380H - Advanced Ecology

Overview

Department(s)
Biology, Environment

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Environment - Not Set

Cross-Lists
BIOL-3380H

Course Description
Examines current theoretical and applied problems in ecology. Emphasis is placed on developing problemsolving skills, critical evaluation of ecological studies, modelling, and an in-depth look at recent advances in theories and laboratory and field techniques used in solving problems in individual, population, community, and ecosystem ecology. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL-ERSC 2260H and an additional 0.5 credit at the 2000 level in BIOL, BIOC, or ERSC.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ERSC3391H - Conservation Biology

Overview

Department(s)
Biology, Environment

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Environment - Not Set

Cross-Lists
BIOL-3391H

Course Description
A focus on the causes and consequences of reductions to biodiversity and the strategies to counterbalance these reductions from both their biological and human dimensions. Prerequisite: 8.0 university credits including 60% or higher in each of 0.5 BIOL credit at the 2000 level and 0.5 additional credit at the 2000 level in BIOL or ERSC. Strongly recommended: BIOL-ERSC 2260H. Not open to students with credit for BIOL-ERSC 4390H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3400H - Chromatography

Overview

Department(s)
Chemistry, Environment

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Environment - Not Set

Cross-Lists
CHEM-3400H, FRSC-3400H

Course Description
Theory and practice of chromatography, sampling, and quality control. Particular emphasis is placed on applications in environmental analysis. Prerequisite: CHEM 2400H or 2420H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3410H - Methods of Spectral Analysis

Overview

Department(s)
Chemistry, Forensic Science, Environment

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Forensic Science - Not Set, Environment - Not Set

Cross-Lists
CHEM-3410H, FRSC-3410H

Course Description
Modern analytical spectroscopic instrumentation, techniques, and application to the analysis of organic, inorganic, and biochemical contaminants with a particular focus on the forensic and environmental fields. Prerequisite: CHEM 2400H or 2420H. Strongly recommended: CHEM 2100H and 2110H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3450H - Environmental Air Pollution

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
The sources, distribution, and impacts of atmospheric pollution in urban and rural environments are discussed. Explores atmospheric monitoring, backtrajectory analysis, trends, and meteorology in assessing atmospheric pollution. Emphasis is on using Canadian monitoring data to investigate environmental air pollution. Prerequisite: ERSC 2230H or both CHEM 1000H and 1010H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3470H - Climate Change and Its Impacts

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
CLIM-3470H, GEOG-3470H

Course Description
This course examines human influence on the climate system and future changes to the climate system, and assesses the impacts of climate change on our physical and biological world. Prerequisite: 9.0 university credits including GEOG-ERSC 2080H and 2460H. Equivalent to GEOG 3410H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3510H - Ecology and Management of Wetland Systems

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Involves intensive first-hand study of wetland ecosystems in natural and culturally degraded states. Wetlands occur at the interface of terrestrial and aquatic ecosystems. Wetland management thus requires understanding of overlapping ecological processes and management practices common to most of Canada. Prerequisite: ERSC-BIOL 2260H or ERSC 2240H or both ERST-CAST 2520H and 2525H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3530H - Hydrology

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
EGEO-3530H, GEOG-3530H, WASC-3530H

Course Description
Study of the movement of water through the environment with emphasis on terrestrial aspects including interception, infiltration, soil moisture, groundwater, surface runoff, and stream-flow, also covering human impact on hydrological processes. Prerequisite: 9.0 university credits including GEOG-BIOL-ERSC 2080H and one of GEOG 2460H, GEOG-EGEO 2540H, or GEOG 3440H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ERSC3545H - Applied Plant Ecology

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
BIOL-3545H, SAFS-3545H

Course Description
The mechanisms of plant functioning from the molecular to the whole plant level. Fundamental processes such as photosynthesis, respiration, plant water relations, stomata physiology, mineral nutrition, plant hormone functions, seed germination and dormancy, and environmental stress physiology. Prerequisite: SAFS 1001H or BIOL 1020H. Equivalent to SAFS-BIOL 3530H. Not open to students with credit for BIOL 3180H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ERSC3551H - Pollution Ecology

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%,
Geography - Not Set

Course Description
The ecological and human health effects of environmental contaminants are examined as they relate to water, air, and soil pollution. Emphasis is on science, but social issues are also addressed. Knowledge of biology and chemistry is useful. Prerequisite: One of ERSC 2230H, 2240H, or ERSC-BIOL 2260H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3560H - Soil Science

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
EGEO-3560H, GEOG-3560H, SAFS-3560H

Course Description
Soil is at the heart of terrestrial ecosystems. A sound understanding of soil science is necessary for physical geography, environmental science, engineering, and agriculture. This course describes the mechanisms of soil formation and the physical, chemical, and biological properties of soils, as well as current issues in soil science. Prerequisite: GEOG-ERSC 2080H and one of ERSC 2240H or GEOG 2540H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC3610H - Chemical Limnology and Oceanography

Overview

Department(s)
Chemistry, Environment

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Environment - Not Set

Cross-Lists
CHEM-3610H

Course Description
Focuses on the parameters controlling the natural water chemistry in surface and subsurface systems. These key processes involve chemical reactions and kinetics, pH control of equilibria, chemical speciation and photochemical processes. Combines theory and environmental applications. Prerequisite: CHEM-ERSC 2620H (or 2600Y); and either CHEM 2400H or 2410H or both ERSC 2220H and 2230H. Recommended: CHEM-ERSC 3600H.

ERSC3680H - Environmental Archaeology

Overview

Department(s)
Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%,
Environment - Not Set

Cross-Lists
ANTH-3680H

Course Description
Focuses on the concepts and methods used by archaeologists to investigate the long-term interactions between humans and the environment. Explores the wide diversity of approaches (geomorphology, paleobotany, archaeozoology, paleoentomology, and isotopic analyses) developed over the years in order to sharpen our understanding of past human-environment dynamics. Prerequisite: ANTH 1001H (or both 1010H and 1020H); or ERSC 1010H and 1020H; or permission of instructor.

ERSC3701H - Introduction to Environmental Toxicology and Chemistry

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Introduces students to the chemical, physical, and toxicological properties of organic and inorganic toxicants in aquatic and terrestrial environments. Students are also introduced to the principles of contaminant modelling as tools for predicting the fate and toxic effects of contaminants in the environment. Prerequisite: BIOL 1020H and 1030H; and ERSC 2230H or 1.0 CHEM credit at the 1000 level.

ERSC3710H - Environmental Health

Overview

Department(s)
Environment, Psychology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Psychology - Not Set

Cross-Lists
PSYC-3710H

Course Description
Examines environmental risk factors that affect human health and well-being, including diet and lifestyle, water and food security, exposure to chemicals, climate change, and the relationship between human and environmental health. Some principles of epidemiology are covered. Current topics in environmental health are examined in tutorial sessions. Prerequisite: ERSC 1010H and 1020H and one of ERSC 2230H, ERSC-INDG 2150H, ERST-INDG 2601Y, ERSC-BIOL 2701H; or BIOM 1000H, one of BIOL 1051H, 1500H, or 1501H, and one of BIOL 2000H, PSYC 2018H, or PSYC 2019H.

ERSC3731H - Understanding Indigenous Peoples' Health and the Environment

Overview

Department(s)
Environment, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Indigenous Studies - Not Set

Cross-Lists
ERST-3731H, IESS-3731H, INDG-3731H

Course Description
An introduction to the multidisciplinary field of environmental health and its application to understanding health among Indigenous peoples. Students gain an understanding of the concepts, theories, and methods used in environmental health. This course may be taken as a science credit by successfully undertaking an appropriate technical assignment. Prerequisite: One of ERSC 2240H, ERST-INDG 2601Y, or ERSC-INDG 2150H; or NURS 1000H, 1002H, and 1010H; or BIOM 1000H, PHIL 2390H, and 0.5 INDG credit. Not open to students with credit for ERSC/ERST-IESS-INDG 3730Y.

ERSC3732H - Addressing Indigenous Peoples' Health and the Environment Challenges

Overview

Department(s)
Environment, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Indigenous Studies - Not Set

Course Description
An introduction to the processes of environmental health risk/benefit assessment, management, perception, and communication and their application to addressing environmental health issues in Indigenous communities. Students are introduced to the processes used by communities to understand and address environmental and public health issues in the communities today. This course may be taken as a science credit by successfully undertaking an appropriate technical assignment. Prerequisite: ERSC/ERST-IESS-INDG 3731H. Not open to students with credit for ERSC/ERST-IESS-INDG 3730Y.

ERSC3810H - Environmental Economics

Overview

Department(s)
Economics, Environment

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%, Environment - Not Set

Cross-Lists
ECON-3810H

Course Description
Examines the links between economic activity and environmental degradation. Topics include the valuation of environmental amenities, the use of incentives in regulation, the economics and environmental effects of market failure, and the rationale for government intervention. Prerequisite: ECON 1010H and one of ECON 1020H, MATH 1005H, or MATH 1051H, or permission of instructor.

ERSC3890H - Placement Course

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Course Description
A placement experience with a government agency, industry, or non-governmental agency, or related laboratory or work unit, on themes and principles learned during coursework associated with the Environmental & Resource Science/Studies, Geography, or Sustainable Agriculture & Food Systems programs in the School of the Environment. Students work closely with the instructor and placement host to determine deliverables that will be presented to various stakeholders as technical report(s) and/or presentation(s). Course is graded on a pass/fail basis. Prerequisite: A minimum cumulative average of 75% and 9.0 university credits including 4.0 ERSC credits.

ERSC3906H - Field Research in Environmental Science

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Students learn the skills for field investigations including writing research proposals and project design, and design and carry out research projects in various environmental specializations. Centres on work in the field. Prerequisite: 9.0 university credits including ERSC 1010H and GEOG-ERSC 2080H.

ERSC4002H - Carbon Accounting and Management

Overview

Department(s)
Environment, Economics

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Economics - Not Set

Course Description
Examines the measurement, monitoring, and verification of greenhouse gases in sectors such as forestry, energy, buildings, agriculture, transportation, banking, and government. Exercises using inventory tools and techniques are applied to national inventories, organizational inventories, carbon offsetting protocols, cap-and-trade programs, environmental product declarations, and carbon tax programs. Prerequisite: 10.0 university credits including CLIM 3005H and ERSC 2300H.

ERSC4003H - Low Carbon Technologies

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Examines a range of innovative technologies that may enable a low-carbon transition, including renewable energy, conservation, electrification, energy storage, nuclear energy, carbon capture and storage, and negative emissions technologies. Students learn to assess the merits and drawbacks of these technologies using a range of environmental, economic, and socio-technical techniques. Prerequisite: 9.0 university credits including ERSC 2300H.

ERSC4010Y - Honours Thesis Course

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Design, implementation, and dissemination of a major research project in environmental science or studies featuring independent work under the supervision of a faculty supervisor. ERSC/ERST 4020D is a double credit in ERSC/ERST. ERSC/ERST 4010Y is a single credit because the same thesis is submitted to the other program in a joint-major. Prerequisite: 14.0 university credits and a minimum average of 75%. Students must find a faculty member who is agreeable to supervise their project. Applications are available from the TSE office, and should be submitted in the academic year before enrolment in the course.

ERSC4030H - Research Design and Data Analysis

Overview

Department(s)
Biology, Environment

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Environment - Not Set

Cross-Lists
BIOL-4030H

Course Description
Theoretical and practical instruction in design of research projects, with emphasis on appropriate statistical methods through the use of the statistical program R. Prerequisite: A minimum overall average of 65% in completed BIOL, BIOC, and/or BIOM courses and 12.0 university credits including 1.0 BIOL and/or ERSC credit at the 3000 level and one of MATH 1052H or GEOG-ERSC 2080H. Not open to students with credit for ADMN 3610H.

ERSC4060H - The Geochemistry of Natural Waters

Overview

Department(s)
Environment, Biology, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Geography - Not Set

Cross-Lists
BIOL-4060H, EGEO-4060H, GEOG-4060H, WASC-4060H

Course Description
Examines the chemistry of freshwater systems. Chemical and physical processes that lead to changes in water quality are discussed. The emphasis is on the concentrations and distributions of contaminants. Topics include watershed contributions of chemicals, acidification and the carbonate system, weathering, redox chemistry, trace metals, and synthetic organic contaminants. Prerequisite: ERSC 2230H or ERSC-CHEM 2620H.

Academic Level
Undergraduate

ERSC4070H - The Fate of Contaminants in the Aquatic Environment

Overview

Department(s)
Environment, Biology, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Geography - Not Set

Cross-Lists
BIOL-4070H, EGEO-4070H, GEOG-4070H, WASC-4070H

Course Description
Discusses approaches to predicting the fate of contaminants in aquatic systems. Basic assumptions and algorithms of fate models for toxic metals and organic xenobiotics are examined and students get hands-on experience in applying recent models to case studies. Prerequisite: ERSC-GEOG-BIOL 4060H.

Academic Level
Undergraduate

ERSC4180H - Collapse of Complex Societies

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set, Environment - Not Set

Cross-Lists
AGRS-4180H, ANTH-4180H

Course Description
Using anthropological theory and archaeologically-generated data sets, this course explores the characteristics of, and reasons for, the "collapse" of complex societies. The focus is on the last two phases of the "Adaptive Cycle": release and reorganization. Implications for the contemporary world are also discussed. Prerequisite: 10.0 university credits or permission of instructor. Equivalent to AHCL 4180H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:

ERSC4185H - Human Impact on Ancient Environments

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set, Environment - Not Set

Cross-Lists
AGRS-4185H, ANTH-4185H

Course Description
Using archaeological and environmental theory and diverse data sets, lectures and student research projects explore human impacts on ancient environments. The focus is on the first two phases of the "Adaptive Cycle": exploitation and conservation. Seminars concentrate on contemporary environmental issues. Prerequisite: 10.0 university credits or permission of instructor. Equivalent to AHCL 4185H.

Academic Level
Undergraduate

Course Designation
Science

ERSC4240H - Fisheries Assessment and Management

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
BIOL-4240H

Course Description
Principles and practices of fisheries assessment and management, including an examination of management problems in freshwater and marine fisheries from ecological, socio-economic, and policy perspectives. Topics include stock assessment techniques, stocking and fertilization, management of warmwater and coldwater species, and local management initiatives. Prerequisite: 9.0 university credits including one of BIOL 2260H or ERSC 2240H and one of ERSC 2080H or MATH 1051H. Recommended: ERSC 3510H, BIOL 3050H, or BIOL 3140H. Students who have successfully completed ERST-CAST 2520H and 2525H may take the course but must be prepared to do additional background reading.

ERSC4270H - Nutrient Cycling in Ecosystems For Sustainable Agriculture

Overview

Department(s)
Environment, Biology, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Geography - Not Set

Cross-Lists
BIOL-4270H, GEOG-4270H, SAFS-4270H

Course Description
Examines plant nutrition, soil fertility, and fertilizer management, with a focus on essential macronutrients. Topics include biogeochemical cycling of nitrogen, phosphorus, potassium, calcium, magnesium, and sulphur in crop production. Sustainable management of nutrients for optimum productivity and minimum impact on the environment will be discussed. Prerequisite: GEOG-ERSC-SAFS 3560H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

ERSC4330H - Global Change of Aquatic Ecosystems

Overview

Department(s)
Biology, Environment

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Environment - Not Set

Cross-Lists
BIOL-4330H

Course Description
Emphasizes the causes and consequences of global environmental change and their interactions with ecological processes in freshwater ecosystems. Issues such as biodiversity, population growth and water use, global warming, land use, emergent diseases, dams, aquaculture, fisheries, water supply, and sustainability are discussed. Prerequisite: A minimum overall average of 65% in completed BIOL, BIOC, and/or BIOM courses and 12.0 university credits including MATH 1052H, one of BIOL 2000H or BIOL-ERSC 2260H, and 1.0 BIOL and/or ERSC credit at the 3000 level.

ERSC4410H - Fundamentals and Applications of ICP-MS

Overview

Department(s)
Chemistry, Environment

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%,
Environment - Not Set

Cross-Lists
CHEM-4410H

Course Description
Theory of spectrometric techniques for elemental analysis. Students become acquainted with the current literature and research in analytical/environmental chemistry. Prerequisite: CHEM-ERSC 3400H or 3410H or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERSC4520H - Restoration Ecology

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
The science of restoring and rehabilitating ecosystems. Principles, applications, and practical case studies are covered. No regular field or laboratory work is scheduled but some required field site visits are planned. Prerequisite: 9.0 university credits including 1.0 credit from ERSC 2230H, 2240H, 2260H, or 2350H; and 1.5 ERSC credits at the 3000 level or beyond.

ERSC4640H - Integrated Watershed Management: Approaches and Methods

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
GEOG-4640H

Course Description
Integrated ecosystems management is the focus of this course. It deals, first, with the methodological and practical aspects of watershed assessment, planning, decision-making, and management. Then, it examines comparatively the management of watersheds in the developing world, introducing students to strategies for planning and managing watersheds through case studies. Prerequisite: 9.0 university credits including GEOG-EGEO-ERSC 2090H.

Academic Level
Undergraduate

Course Designation
Science

ERSC4703H - Senior Seminar in Earth and Environmental Science

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
GEOG-4703H, SAFS-4703H, WASC-4703H

Course Description
Students examine the fundamental concepts of scientific research, including the role of research in managing environmental issues. A range of topics will be covered through guest seminars, group discussions, and an individual research project. In the project, students evaluate the scientific literature on an emerging environmental issue of their choosing. Prerequisite: 14.0 university credits including 4.0 ERSC, ERST, GEOG, SAFS, and/or WASC credits.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

ERST2044H - Canada the Land After 1885

Overview

Department(s)
Canadian Studies, Environment, Geography, Education, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Environment - Not Set, Geography - Not Set, Education - Not Set, Political Studies - Not Set

Cross-Lists
CAST-2044H, EDUC-2044H, GEOG-2044H

Course Description
An inquiry into the emergence of the Canadian nation-state in the context of Indigenous North America. An exploration of how different peoples have tried and sometimes failed to live together. A story whose outcome depends on our capacity to build meaningful relationships with one another and with the land itself. Prerequisite: 3.0 university credits. Not open to students with credit for CAST-ERST-GEOG-INDG 2040Y or 2042H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST2100H - Environmental Science and Politics

Overview

Department(s)
Environment, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Political Studies - Not Set

Cross-Lists
POST-2100H

Course Description
The roles of science in current environmental controversies. Topics examine science and environmental ethics, the application of science to natural resource management, the contribution of science to action on international environmental problems such as climate change, and the role of science in making decisions about environmental risks. Prerequisite: 4.0 university credits including 0.5 ERSC or POST credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST2114H - Workshop: Ecological Art

Overview

Department(s)
Culture, Arts, and Media, Environment

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Environment - Not Set

Cross-Lists
CUST-2114H

Course Description
Explores the history, theoretical foundations, and practices of environmental and ecologically attuned art, ranging from 1960s-70s "Earthworks" to place-based and ephemeral eco-art to current bioremedial and trash art. Students create their own "eco" artworks, learning techniques such as pigment-making from local plants, found object sculpture, and weaving using invasive species. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST2320H - Lands and Environments of the Circumpolar North

Overview

Department(s)
Geography, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
CAST-2320H, GEOG-2320H

Course Description
Explores the lands and environments that define the Circumpolar region and identifies the key issues involving interaction between humans and their environments, examining climate change and its impacts on landscapes, biodiversity, and ecological systems. Provides a broad foundation for the study of circumpolar peoples, economies, landscapes, communities, and adaptation to climate change.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST2330H - Changing Resources of the Circumpolar North

Overview

Department(s)
Geography, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
CAST-2330H, GEOG-2330H

Course Description
Provides students with an in-depth understanding of the key issues which define the future of resources and resource use in the Circumpolar North. Focuses upon the challenges of resource management for governments and communities, and assesses the potential conflicts derived from resource use. Prerequisite: GEOG 1045H and GEOG-ERST 2320H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST2510H - Qualitative Methods in Geography and Environmental Studies

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
GEOG-2510H

Course Description
Focuses on social science methods used in geographical and environmental research contexts. Methods examined include surveys, content analysis, interviews, focus groups, participatory action research, and community-based research. Prerequisite: 4.0 university credits including GEOG-ERST-SAFS 1030H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST2520H - Natural Resource Management: Theory and Comparative Cases

Overview

Department(s)
Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-2520H

Course Description
Canadian natural resource management is examined with attention to the context within which management occurs, and the requirement to address different interests, understandings, and issues. Prerequisite: 4.0 university credits including 1.0 ERSC credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST2525H - Critical Environmental Thinking: Political Economy and Policy Process

Overview

Department(s)
Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-2525H

Course Description
The context of market theory and ecological/resource economics is used to provide environmental students with experience in critical thinking. Objectives are to understand the framework of political economy, particularly Canadian, that informs contemporary political and economic practice, and to master basic elements of critical research and writing. Prerequisite: 4.0 university credits including 1.0 ERSC/T or CAST credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST2601Y - Indigenous Knowledge Systems and the Natural Environment

Overview

Department(s)
Indigenous Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Environment - Not Set

Cross-Lists
IESS-2601Y, INDG-2601Y

Course Description
Explores Indigenous worldviews, environmental philosophies, and cultural values through exposure to the perspectives of Indigenous Elders, community people, political leaders, academics, activists, and scholars. Students are introduced to Indigenous knowledge as it pertains to the natural environment. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

Course Designation
Indigenous Course Requirement

Credit Value
:
1

ERST2705H - Literature and the Environment

Overview

Department(s)
English Literature, Environment

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%, Environment - Not Set

Cross-Lists
ENGL-2705H

Course Description
An examination of selected works through a focus on the natural environment, including non-human forms of life. Studies examples of nature and environmental writing, but also brings ecocritical perspectives to a wide range of texts through discussions of the wilderness, gardens, waste, nature, culture, and other topics. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value
:
0.5

ERST2710H - Cities: An Introduction to Urban Geography

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
CAST-2710H, GEOG-2710H

Course Description
Cities are dynamic and contradictory spaces. Focusing on the lived spaces of the city, the course explores the ideologies, practices, and geographical processes shaping the transformation of cities. Special attention is made to integrate urban theory with the everyday uses of urban space. Prerequisite: 4.0 university credits including GEOG-ERST-SAFS 1030H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST2805H - Green Screen: Film and Environmental History

Overview

Department(s)
History, Environment, Media Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Environment - Not Set, Media Studies - Not Set

Cross-Lists
CUST-2805H, HIST-2805H, MDST-2805H

Course Description
Considers feature, documentary, animated, and activist films that engage with critical environmental issues. Topics include popular portrayals of animals and endangered species; histories of environmental injustice; the development of environmentalism; the role of storytelling in history, science, and culture; and the challenges of depicting climate change and the Anthropocene. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST2812H - Northern Research

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
GEOG-2812H

Course Description
Examines the history and the nature of knowledge in northern research, identifying practical and ethical aspects of conducting and reporting in the sciences and humanities. Covers the state of contemporary northern research in a variety of disciplines to achieve a broad understanding of research context, methods and principles, and to develop an awareness and familiarity with key northern research issues and resources.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3000H - Environmental Professional Practice

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
An exploration of the professional and social aspects of environmental and resource sciences and studies through applied problems and projects. Students are introduced to environmental professionals from government, non-profit organizations, and corporations. Students develop professional leadership skills by working in small groups to address a meaningful environmental problem. Prerequisite: 1.0 credit from ERSC 2220H, 2230H, ERST 2240H, 2510H, 2520H, or 2525H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3006H - Environmental Journalism

Overview

Department(s)
Communications, Environment

Contact Department ('not set' refers to cross-listed depts)
Communications - 100%, Environment - Not Set

Course Description
This course explores the role of journalism in highlighting environmental challenges and uncovering paths forward. Students develop the skills to translate scientific data into compelling written and visual narratives, engage in investigative research, and report from the field. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3030H - Eco-Anxiety to Eco-Hope: (Re)Imagining Green Futures Through Dialogue With Diversity

Overview

Department(s)
Political Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Environment - Not Set

Cross-Lists
POST-3030H

Course Description
An interdisciplinary examination of the power of ideas, activating political, economic, sociocultural, gender, justice, and creative lenses to bridge diverse ways of knowing and inspire hope for a better future. Topics include eco-anxiety, environmental justice, attitudes toward nature, ecofeminism, radical environmentalism, sustainability, limits to growth, and perceptions of environmental risk. Prerequisite: 1.0 POST and/or ERST credit or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3041H - The Changing Land

Overview

Department(s)
Canadian Studies, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Environment - Not Set, Geography - Not Set

Course Description
This course invites students to think of climate change as a communication event between human beings and the earth. It tasks them with re-establishing a reciprocal relationship with a specific place. There is an outdoor component to this course. Prerequisite: CAST-ERST-GEOG-EDUC 2041H, 2042H, 2043H, or 2044H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3042H - Reading the Wilderness in Canada

Overview

Department(s)
Canadian Studies, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Environment - Not Set, Geography - Not Set

Cross-Lists
CAST-3042H, GEOG-3042H

Course Description
An examination of shifting ideas of nature and wilderness in the work of a number of contemporary Canadian artist-thinkers. Special emphasis is placed on ecological literacy, or in learning to read the land as an "ultra-primary" text. Prerequisite: 9.0 university credits including one of CAST-ERST-GEOG-INDG 2041H, CAST-ERST-GEOG-INDG 2042H, CAST-EDUC-ERST-GEOG 2043H, or CAST-EDUC-ERST-GEOG 2044H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3081H - Introduction to Waste Management

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Examines ways to address the wastes handled in the municipal waste management system. It includes residential, commercial, institutional, and non-hazardous industrial waste. The philosophy underlying this course is the transformation from a waste management approach to a resource management approach, where "wastes" are seen as "valuable used materials." Prerequisite: 1.0 ERSC and/or ERST credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3082H - Issues in Waste Management

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Examines several major issues in waste management, including extended producer responsibility, radioactive waste, hazardous waste cleanup, agricultural waste management, waste facility siting, waste in developing countries, and waste export and import. Prerequisite: 1.0 ERSC and/or ERST credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3110H - Environmental Impact Assessment: a Case Study Approach

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Environmental impact assessment brings together scientific, economic, social, and political perspectives in an attempt to anticipate and manage environmental impacts. This course examines different approaches to environmental assessment, contrasting federal with provincial and social with biophysical. Prerequisite: 9.0 university credits including 1.0 ERSC and/or ERST credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3120H - Canadian Environmental Policy

Overview

Department(s)
Environment, Canadian Studies, Political Studies, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set, Political Studies - Not Set, Forensic Science - Not Set

Cross-Lists
CAST-3120H, FRSC-3120H, POST-3120H

Course Description
An interdisciplinary inquiry into how environmental policies in Canada are developed, implemented, and improved, applying political, economic, legal, scientific, Indigenous, and moral perspectives. Focus is on federal, provincial, and municipal contexts, recognizing that the environment does not respect jurisdictions. Topics include energy and materials use, biodiversity, toxic substances, waste management, and land use. Prerequisite: 1.0 ERST, CAST, POST, and/or ADMN credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3141H - Gender, Health, and Environments

Overview

Department(s)
Gender & Social Justice, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
CAST-3141H, GESO-3141H

Course Description
Examines feminist engagements, in theory and practice, with environmental movements, issues, and health concerns, primarily in North America but with attention to north/south interconnections. Topics may include ecological feminisms, environmental justice, gender and climate change, environmental links to breast cancer and reproductive health, green consumerism, and gendered food politics. Prerequisite: 7.0 university credits including 0.5 GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for WMST-CAST-ERST 3140Y. Equivalent to WMST 3141H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3230H - Environmental Problems and Solutions in Small Island Developing States: A Field Course

Overview

Department(s)
Environment, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Global Justice & Development - Not Set

Cross-Lists
ERSC-3230H, GDST-3230H

Course Description
Barbados, like many islands in the West Indies, is facing a variety of challenges, such as overfishing, pollution, and loss of coral reefs and other habitats. This course, which has a one-week field component and an online component, introduces students to the challenges faced by Barbados and other islands, as well as potential solutions. The default credit for the course is ERSC, but students may take the course as an ERST credit provided this request is made to the instructor prior to the start of the course. Students pay a course fee in addition to travel costs. Prerequisite: ERSC 2230H, ERST-CAST 2520H, or GDST-HURI 2010H (GDST 2001H).

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

ERST3250H - Introduction to Environmental Law

Overview

Department(s)
Environment, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Forensic Science - Not Set

Cross-Lists
FRSC-3250H

Course Description
A comprehensive overview of environmental law in Canada, examining the key environmental laws and policies at the provincial, federal, and international levels. Prerequisite: 9.0 university credits including GEOG-CLIM-ERSC 1060H (CLIM-ERSC 1050H) or both ERSC 1010H and 1020H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3301H - Environmental Ethics

Overview

Department(s)
Environment, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Philosophy - Not Set

Cross-Lists
PHIL-3301H

Course Description
Provides a consideration of the moral dimensions of human/nonhuman relationships. We critically examine a range of systems of thought that address such ethical questions, including deep ecology, ecofeminism, Indigenous perspectives, and animal rights, with specific cases on each philosophical orientation. Deals explicitly with the ethical dimensions of ecological restoration. Prerequisite: 1.0 ERST and/or PHIL credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3302H - Animals and Society

Overview

Department(s)
Environment, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Philosophy - Not Set

Cross-Lists
PHIL-3302H, SAFS-3302H

Course Description
An introduction to animal studies. Topics considered include the constructed divide between humans and non-human animals, societies' use of animals--for food, clothing, entertainment, companionship, research--and the implications of these relationships. The course also discusses animal rights, animal protection, and posthumanist perspectives. Prerequisite: 1.0 ERST and/or PHIL credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3330H - Protected and Conserved Areas Management

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
CAST-3330H, GEOG-3330H

Course Description
An overview of the fundamental theoretical and applied components of protected area management, including the history, planning, and management of parks and protected areas with a focus on Canadian federal, provincial, territorial and Indigenous contexts. Lectures, case studies, seminars and assignments engage students in the exploration of current protected area topics and issues. Prerequisite: GEOG 2310H; or one of GEOG-CAST-ERST-EDUC 2043H, 2044H, GEOG-CAST-ERST-INDG 2041H, 2042H, or 2040Y; or both ERST-CAST 2520H and 2525H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3341H - The Canadian Food System: Community Perspectives and Experiences

Overview

Department(s)
Environment, Canadian Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set, Sociology - Not Set

Cross-Lists
CAST-3341H, SAFS-3341H, SOCI-3341H

Course Description
The history of Canada's food and agricultural system is the backdrop to this interdisciplinary course on community development of the system's social, economic, and environmental sustainability. Production, distribution, processing, consumption, and regulatory issues are addressed. Community-based research projects are undertaken with local food and agricultural organizations. Prerequisite: 9.0 university credits. Recommended: CAST-ERST-GEOG-INDG 2041H, 2042H, GDST-ANTH-GEOG-SAFS-SOCI 2500H, and SAFS-GDST-ANTH 2600H. Equivalent to SAFS-CAST-ERST 3340H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3390H - Contemporary Issues of the Circumpolar World

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
GEOG-3390H

Course Description
Develops a basic appreciation of the most important contemporary challenges surrounding governance and politics, social issues, education and knowledge systems, and global issues in the circumpolar regions of the North. It explores the complexity and inter-relatedness of governance, social policy, gender, indigeneity, and law. Prerequisite: Permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3490H - Contemporary Issues of the Circumpolar World

Overview

Department(s)
Geography, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
CAST-3490H, GEOG-3490H

Course Description
Develops a basic appreciation of the most important contemporary challenges surrounding governance and politics, social issues, education and knowledge systems, and global issues in the circumpolar regions of the North. It explores the complexity and inter-relatedness of governance, social policy, gender, indigeneity, and law. Prerequisite: Permission of instructor.

0.5

ERST3501H - Environment and Communication: Oral and Visual Presentation

Overview

Department(s)
Environment, Communications

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Communications - Not Set

Cross-Lists
COMM-3501H

Course Description
Intended to develop skills for the oral and visual presentation of scientific information to interdisciplinary non-expert audiences. Students work with real scientific data to design and present the findings. Prerequisite: 9.0 university credits including 1.0 ERSC/T credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3502H - Climate and Environmental Communications

Overview

Department(s)
Environment, Communications

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Communications - Not Set

Cross-Lists
COMM-3502H

Course Description
This course brings students into current debates and evolving techniques of communicating climate and environmental science to a variety of social groups and cultural contexts. Students learn best practices and complete projects in rhetoric, data visualization, and journalistic reporting on both the physical and social sciences. No prior scientific background is required. Prerequisite: 9.0 university credits including 1.0 ERSC/T credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3590H - Climate Change and Culture

Overview

Department(s)
Culture, Arts, and Media, Environment

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Environment - Not Set

Cross-Lists
CUST-3590H

Course Description
Examines how climate change comes to matter within different social groups, to different degrees of urgency. Examines how climate as an everyday concern is mobilized or elided across racial, classed, and subcultural contexts as well as how a more diverse climate movement might productively reframe the issue. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3602H - Environment and Development

Overview

Department(s)
Environment, Global Justice & Development, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Global Justice & Development - Not Set, Political Studies - Not Set

Cross-Lists
GDST-3602H, POST-3602H, SAFS-3602H

Course Description
Examines environmental issues and conflicts in developing countries, applying a critical political ecology perspective to a range of current topics, including oil production, biodiversity conservation, and resource conflicts. There is also a special focus on agriculture and food systems. Prerequisite: ERST-POST 2100H, ERST-CAST 2520H, GDST-HURI 2010H (GDST 2001H), or POST 2200Y.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3604H - Indigenous Knowledges, Water, and the Great Lakes

Overview

Department(s)
Indigenous Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Environment - Not Set

Cross-Lists
IESS-3604H, INDG-3604H

Course Description
Explores water-related Indigenous Knowledges within the Great Lakes basin, and water-related environmental issues impacting Indigenous communities and Nations within this region. Also explores complexities of water governance involving First Nations, Tribes, provinces, states, Canada, and the United States. Course content is presented through lectures, workshops, and applied in case studies. Prerequisite: INDG-ERST-IESS 2601Y or both IESS 1001H and INDG 2100H; or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3631H - Issues in Indigenous Environmental Studies

Overview

Department(s)
Indigenous Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Environment - Not Set

Cross-Lists
IESS-3631H, INDG-3631H

Course Description
EExamines a wide range of contemporary environmental issues, conflicts and solutions in the context of Indigenous peoples and territories. Studies examine issues at local, provincial, and national levels, highlighting the multi-dimensional perspectives of Indigenous peoples in North America. Prerequisite: One of INDG 1001H, INDG 1002H, IESS 1001H, INDG-ERST-IESS 2601Y, or INDG-ERST-IESS 3632H; or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3632H - Global Issues in Indigenous Environmental Studies

Overview

Department(s)
Indigenous Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Environment - 100%

Cross-Lists
IESS-3632H, INDG-3632H

Course Description
Explores the international dimensions of Indigenous Environmental Studies (IES) and examines a wide range of contemporary environmental issues, conflicts, and solutions in the context of Indigenous peoples and territories throughout the Americas and worldwide. Prerequisite: One of INDG 1001H, INDG 1002H, IESS 1001H, INDG-ERST-IESS 2601Y, or INDG-ERST-IESS 3631H; or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3635H - Foodways of Great Lakes Basin Indigenous Peoples 1

Overview

Department(s)
Indigenous Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Environment - Not Set

Cross-Lists
IESS-3635H, INDG-3635H, SAFS-3635H

Course Description
Students explore, through experiential learning and research, a seasonal range (summer-fall) of historical and contemporary foodways/systems of Great Lakes Basin Indigenous Peoples, and the ecosystems that support and the issues that impact these foodways. Recommended studies or science course for the Indigenous Environmental Studies/Sciences program. Course fee: $35. Prerequisite: INDG-ERST 2601Y; or both ERSC 1010H and 1020H; or 10.0 university credits and permission of instructor. Not open to students with credit for INDG-IESS-ERST-SAFS 3634H.

Academic Level
Undergraduate

Credit Value
:
0.5

ERST3636H - Foodways of Great Lakes Basin Indigenous Peoples 2

Overview

Department(s)
Indigenous Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Environment - Not Set

Cross-Lists
ERSC-3636H, IESS-3636H, INDG-3636H, SAFS-3636H

Course Description
Students explore, through experiential learning and research, a seasonal range (summer-fall) of historical and contemporary foodways/systems of Great Lakes Basin Indigenous Peoples, and the ecosystems that support and the issues that impact these foodways. Recommended studies or science course for the Indigenous Environmental Studies/Sciences program. Course fee: $35. Prerequisite: INDG-ERST 2601Y; or both ERSC 1010H and 1020H; or 10.0 university credits and permission of instructor. Not open to students with credit for INDG-IESS-ERST-SAFS 3634H.

ERST3711H - Urban and Regional Planning

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
CAST-3711H, GEOG-3711H

Course Description
Examines the main planning principles which govern the economic, social, and physical development of cities and regions. Topics to be covered include national, provincial, regional, and municipal policies and their impact on urban and rural systems; historical development of planning in North America; and planning in North America; and planning as a profession. Prerequisite: GEOG-CAST-ERST 2710H. Equivalent to GEOG-CAST 3710H.

ERST3720H - Urban Environments

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
CAST-3720H, GEOG-3720H

Course Description
This interdisciplinary course is designed to explore critical and practical perspectives on urban environments. The theme of water and infrastructure networks (i.e., canals, rivers, waterfronts) guides a critical exploration of the historical and symbolic dimensions of our built environment and the eco-future of our urban spaces. Prerequisite: One of GEOG-CAST 2710H, GEOG-CAST-ERST- INDG 2040Y, 2041H, or 2042H.

Academic Level
Undergraduate

ERST3730H - Social Geography

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
CAST-3730H, GEOG-3730H

Course Description
Explores the social structures of contemporary Western cities and communities by examining how social relations, social identities, and social inequalities are produced, and the role of space in constructing them. Geographical perspectives on gender, occupation, ethnicity, age, disability, poverty, health, and sexuality are emphasized. Prerequisite: 9.0 university credits including 1.0 GEOG and/or ERST credit at the 2000 level or beyond.

Academic Level
Undergraduate

0.5

ERST3731H - Understanding Indigenous Peoples' Health and the Environment

Overview

Department(s)
Environment, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Indigenous Studies - Not Set

Cross-Lists
IESS-3731H, INDG-3731H

Course Description
An introduction to the multidisciplinary field of environmental health and its application to understanding health among Indigenous peoples. Students gain an understanding of the concepts, theories, and methods used in environmental health. This course may be taken as a science credit by successfully undertaking an appropriate technical assignment. Prerequisite: One of ERSC 2240H, ERST-INDG 2601Y, or ERSC-INDG 2150H; or NURS 1000H, 1002H, and 1010H; or BIOM 1000H, PHIL 2390H, and 0.5 INDG credit. Not open to students with credit for ERSC/ERST-IESS-INDG 3730Y.

ERST3732H - Addressing Indigenous Peoples' Health the Environment Challenges

Overview

Department(s)
Environment, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Indigenous Studies - Not Set

Cross-Lists
IESS-3732H, INDG-3732H

Course Description
An introduction to the processes of environmental health risk/benefit assessment, management, perception, and communication and their application to addressing environmental health issues in Indigenous communities. Students are introduced to the processes used by communities to understand and address environmental and public health issues in the communities today. This course may be taken as a science credit by successfully undertaking an appropriate technical assignment. Prerequisite: ERSC/ERST-IESS-INDG 3731H. Not open to students with credit for ERSC/ERST-IESS-INDG 3730Y.

ERST3740H - Circumpolar Peoples, Health, and the Environment

Overview

Department(s)
Environment, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Indigenous Studies - Not Set

Cross-Lists
INDG-3740H

Course Description
Introduces students to the multidisciplinary subject area of circumpolar health with an emphasis on environment and its changing nature as a determinant of health for Indigenous and non-Indigenous residents of the North. Prerequisite: GEOG 1045H and INDG 3745H.

Academic Level
Undergraduate

ERST3756H - The Environmental Crisis: From the Atomic Bomb to Global Warming

Overview

Department(s)
History, Environment

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Environment - Not Set

Cross-Lists
HIST-3756H

Course Description
A historical perspective on contemporary environmental problems, both within North America and around the globe. Topics include the impact of environmental thought; toxic threats to human health; landscape photography and media depictions of the environment; the rise of international environmentalism; and the current politics of global warming. Prerequisite: 4.0 university credits or permission of the chair.

0.5

ERST3760H - The Geography of Beer

Overview

Department(s)
Geography, Canadian Studies, Environment, Business

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set, Business - Not Set

Cross-Lists
ADMN-3760H, CAST-3760H, GEOG-3760H, SAFS-3760H

Course Description
Designed around a term-long research project, this course explores themes such as tourism, built heritage, and post-industrial design associated with the production of craft beer. Students learn how to examine land-use patterns, built form, and branding techniques in one locale. Emphasis is placed on in-class participation and experiential learning. Prerequisite: GEOG-ERST 2510H, GEOG- CAST 2710H, SAFS 1001H or ADMN 2080H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3780H - Canadian Renewable Resource Economics and Project Planning

Overview

Department(s)
Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-3780H

Course Description
Introduces students to the economic theory of renewable resources in the Canadian social, political, and regulatory context, and also to professional project planning and management. Students are introduced to project components such as scoping, scheduling, budgeting, communications, team and risk management, and environmental sustainability. Prerequisite: 1.0 ERST and/or CAST credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3790H - Exploring the City

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
GEOG-3790H

Course Description
This course explores the practice of sustainable urban planning though experiential learning. During the field work component, students meet urban planning professionals, research site-specific planning projects, and apply the tools and methods of urban planning to a project-based final research report. Prerequisite: 9.0 university credits including 1.0 GEOG and/or ERST credit at the 2000 level or beyond.

ERST3810H - Environmental Economics

Overview

Department(s)
Economics, Environment

Contact Department ('not set' refers to cross-listed depts)
Economics - 100%,
Environment - Not Set

Cross-Lists
ECON-3810H

Course Description
Examines the links between economic activity and environmental degradation. Topics include the valuation of environmental amenities, the use of incentives in regulation, the economics and environmental effects of market failure, and the rationale for government intervention. Prerequisite: ECON 1010H and one of ECON 1020H, MATH 1005H, or MATH 1051H, or permission of instructor.

ERST3840H - Community-Based Research Project

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Students are placed in research projects with community organizations in the Peterborough or Haliburton area. Each placement is supervised jointly by a faculty member and a representative of a community organization. For details see Community-Based Research Program. Prerequisite: 10.0 university credits and a minimum cumulative average of 75%.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3890H - Placement Course

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
A placement experience with a government agency, industry, or non-governmental agency, or related laboratory or work unit, on themes and principles learned during coursework associated with the Environmental & Resource Science/Studies, Geography, or Sustainable Agriculture & Food Systems programs in the School of the Environment. Students work closely with the instructor and placement host to determine deliverables that will be presented to various stakeholders as technical report(s) and/or presentation(s). Course is graded on a pass/fail basis. Prerequisite: A minimum cumulative average of 75% and 9.0 university credits including 4.0 ERSC/T credits.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST3900Y - Reading Course

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
A research course on a specific topic. Only open to Environmental & Resource Science/Studies majors or joint-majors with at least 2.0 ERSC/ERST credits with a minimum grade of 75%. Written permission must be obtained from the supervising instructor and the TSE director before registration.

ERST3990H - Gender and Environmental Justice

Overview

Department(s)
Gender & Social Justice, Environment

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Environment - Not Set

Cross-Lists
GESO-3990H

Course Description
Examines debates and issues involved in understanding environmental problems from a gender and justice perspective. Students are introduced to environmental justice issues and concepts, feminist approaches and critiques, and explorations of emerging discourses, making links between justice, sustainability, and issues like climate change. Prerequisite: 6.0 university credits including 1.0 GESO, WMST, and/or ERST credit at the 2000 level, or permission of instructor. Not open to students with credit for GESO-ERST 4990H.

ERST4010Y - Honours Thesis Course

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Design, implementation, and dissemination of a major research project in environmental science or studies featuring independent work under the supervision of a faculty supervisor. ERSC/ERST 4020D is a double credit in ERSC/ERST. ERSC/ERST 4010Y is a single credit because the same thesis is submitted to the other program in a joint-major. Prerequisite: 14.0 university credits and a minimum average of 75%. Students must find a faculty member who is agreeable to supervise their project. Applications are available from the TSE office, and should be submitted in the academic year before enrolment in the course.

ERST4140H - Climate and Energy Policy

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
GEOG-4140H

Course Description
An interdisciplinary inquiry into social, political, institutional, and technical change as it relates to climate and energy policy. Themes for inquiry include policy and technology innovation and low-carbon energy transitions. Efforts are made to translate theory into practical action and intervention through community-based study. Prerequisite: One of GEOG 2460H, ERSC 2300H, ERST 2100H, 3120H, or 3250H. Equivalent to ERST 4130H.

Academic Level
Undergraduate

ERST4150Y - Climate Crisis and Radical Hope

Overview

Department(s)
Global Justice & Development, Environment

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Environment - Not Set

Cross-Lists
GDST-4150Y

Course Description
This course analyzes the relationship between fossil capitalism and development in Canada and abroad, including the ongoing violation of human, Indigenous and environmental rights. During the second term we explore radical visions from scholars and activists to build post-carbon futures. Students work cooperatively in groups to build climate activism locally. Prerequisite: 14.0 university credits including 2.0 GDST or IDST credits or permission of the instructor. Equivalent to IDST 4150Y.

Academic Level
Undergraduate

ERST4250H - Environmental Law and Regulation

Overview

Department(s)
Environment, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Forensic Science - Not Set

Cross-Lists
FRSC-4250H

Course Description
Provides students with a practical and detailed examination of the enactment, enforcement, and limitations of environmental law and policy. The course emphasizes Ontario's environmental regime and focuses on a recent case study. Prerequisite: 9.0 university credits including ERST 3250H.

Academic Level
Undergraduate

Credit Value

:
0.5

ERST4610H - Global Environmental Policy

Overview

Department(s)
Environment, Political Studies, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Political Studies - Not Set, Global Justice & Development - Not Set

Cross-Lists
GDST-4610H, POST-4610H, SAFS-4610H

Course Description
Focuses on perspectives, actors, institutions, and economic relationships as they relate to global environmental policy and instruments. The aim is to provide students with a solid understanding of linkages between the global political system and the natural environment. Prerequisite: 9.0 university credits. Recommended: One of ERST-GDST-POST 3602H or POST 2200Y.

Academic Level
Undergraduate

0.5

ERST4630H - Indigenous Environmental Research Protocol and Ethics

Overview

Department(s)
Indigenous Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Environment - Not Set

Cross-Lists
IESS-4630H, INDG-4630H

Course Description
Offers an introductory exploration of research ethics and protocols within the context of Indigenous environmental studies. The course focuses upon the importance of balancing the recognition and protection of Indigenous rights and interests with the promotion of environmental and health research. Prerequisite: INDG 1001H or both ERSC 1010H and 1020H.

Academic Level
Undergraduate

Credit Value

0.5

ERST4670H - Environmental History

Overview

Department(s)
Environment, Canadian Studies, History

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set, History - Not Set

Cross-Lists
CAST-4670H, HIST-4670H

Course Description
Examines how and why our environment and our relationship with it have changed over time. Topics include how to do environmental history, shifts in ideas about natural resources and wilderness, the history of the Trent and Peterborough environments, the urban environment (particularly Toronto), and the history of environmental science and environmental politics. Prerequisite: 9.0 university credits.

Academic Level
Undergraduate

Credit Value

0.5

ERST4730Y - Sustainable Indigenous Communities

Overview

Department(s)
Indigenous Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Environment - Not Set

Cross-Lists
IESS-4730Y, INDG-4730Y

Course Description
A research colloquium course that gives students an opportunity to examine concepts of sustainability, select their own research area, and develop a model for a "sustainable" community. Provides insight into Indigenous understandings and environmental impacts, and encourages a multidisciplinary approach to resolving issues. 10.0 university credits including INDG 1001H or both ERSC 1010H and 1020H, or permission of the instructor. INDG-ERSC/T 3730Y is highly recommended.

ERST4740Y - Critical Investigations in Indigenous Peoples' Health and the Environment

Overview

Department(s)
Indigenous Studies, Environment, Nursing

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Environment - Not Set, Nursing - Not Set

Cross-Lists
ERSC-4740Y, IESS-4740Y, INDG-4740Y, NURS-4740Y

Course Description
Facilitates a critical examination of historical and contemporary issues in Indigenous peoples' health with a particular emphasis on the relation to land and other dynamic environments as a determinant of health status by students. It provides a basic foundation in understanding the key determinants of health for Indigenous peoples in Canada and around the world. Prerequisite: ERSC/ERST-INDG 3731H (or 3730Y) or permission of the instructor

Academic Level
Undergraduate

Credit Value

:
1

ERST4801H - Greening the Campus: Green Infrastructure

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Institutional approaches to sustaining the natural, naturalized, and cultivated environment and their uses at Trent University are investigated through applied field research projects. Prerequisite: 9.0 university credits including ERSC 2240H or ERST-GEOG 2510H.

Academic Level
Undergraduate

0.5

ERST4805H - Indigenous Environmental Knowledge and Traditions

Overview

Department(s)
Indigenous Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Environment - Not Set

Cross-Lists
IESS-4805H, INDG-4805H

Course Description
An opportunity for self-directed research through the re-examination of Indigenous environmental knowledge and traditions. Provides an in-depth engagement with various Indigenous cultural teachings and experiences Students select specific research issues with a focus on applying cultural knowledge to better understand and propose solutions to the issues identified and researched. Prerequisite: 10.0 university credits including IESS 1001H and 2601Y.

FINA4101H - Options and Futures

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Covers the basic mathematical theory and computational techniques used to price a variety of stock and interest rate options using both discrete-time models, such as binomial probability trees, and continuous time models, such as the Black-Scholes model. Elementary concepts from stochastic calculus are introduced. Computational techniques are emphasized with implementation of models in Maple and Excel. Prerequisite: 10.0 university credits or enrolment in the Postgraduate Certificate in Financial Analytics.

Academic Level
Undergraduate

:
0.5

FINA4103H - Financial Econometrics

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Integrates economic and financial market theory, applied mathematics, and probability and statistics in the study of econometric methods that are designed to deal with the unique features and characteristics of financial market data. Topics include multiple regression, time-series analysis, time-varying volatility models, switching models, and limited dependent variable models. Prerequisite: 10.0 university credits or enrolment in in the Postgraduate Certificate in Financial Analytics.

Academic Level
Undergraduate

FREN1101H - Langue et cultures de la francophonie / Language and Cultures of the Francophonie

Overview

Department(s)
French & Francophone Studies

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%

Course Description
An introduction to textual and oral comprehension, providing a basis for the critical appraisal of French and francophone cultural discourse. Includes conversation and review of French grammar. Prerequisite: 4U/M French or FREN 1060H (or 1040H) or permission of instructor. Not open to students with credit for FREN 1100Y.

Academic Level
Undergraduate

Credit Value

:
0.5

FREN1102H - Études francophones dans un environnement canadien / Francophone Studies in a Canadian Environment

Overview

Department(s)
French & Francophone Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-1102H

Course Description
An examination of selected works and excerpts to provide a survey of Quebec and French-Canadian literatures and cultures. FREN4302H - Cinéma francophone / Francophone Cinema

Overview

Department(s)
French & Francophone Studies, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%, Culture, Arts, and Media - Not Set

Cross-Lists
CUST-4302H

Course Description
Examines French-language cinema culture, primarily in Europe, Quebec, the Caribbean, and West Africa. We consider the impact of decolonization and globalization on Francophone cultures, addressing questions of racialization, marginalization, multiculturalism, and bilingualism, while learning about the cinema as a particular medium of artistic expression. Prerequisite: 10.0 university credits, including 3.0 FREN credits beyond the 1000 level, or permission of the department.

Academic Level
Undergraduate

Credit Value

:

FREN4500Y - Étude approfondie de la littérature québécoise / Advanced Study of Quebecois Literature

Overview

Department(s)
French & Francophone Studies

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%

Course Description
Focuses on a specific topic linked to Quebec literature. Advanced study of the corpus based on relevant literary terminology. Prerequisite: 5.0 FREN credits including 4.0 beyond the 1000 level, with a minimum of 60% in each; or permission of the department. Students may take only one of FREN 4500Y or 4501H for credit.

Academic Level
Undergraduate

FREN4611H - Littérature et contestation / Iterature and Contestation

Overview

Department(s)
French & Francophone Studies, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%, Culture, Arts, and Media - Not Set

Cross-Lists
CUST-4611H

Course Description
An advanced interdisciplinary inquiry into French, Francophone, and Quebecois literatures and cultures of the second half of the twentieth century, focusing on texts that challenge the status quo with respect to cultural conventions, political power and class relations, gender roles and sexuality, the institution of the university, and the legacies of French and British colonialisms. Prerequisite: 10.0 university credits, including 3.0 FREN credits beyond the 1000 level, or permission of the department.

Academic Level
Undergraduate

FREN4700Y - Les cultures francophones / Francophone Cultures

Overview

Department(s)
French & Francophone Studies

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%

Course Description
In-depth study of the cultures of the francophone world outside France and Québec/Canada, focusing on the legacies of colonialism and endeavours to move beyond them. Themes considered include multiculturalism, multilingualism and globalization as well as gender and sexuality. Prerequisite: 5.0 FREN credits including 4.0 beyond the 1000 level, with a minimum of 60% in each; or permission of the department.

Academic Level

FRSC1030H - Foundations in Forensic Science

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
This course is designed to provide a broad overview of forensic science and its interdisciplinary nature through an exploration and examination of forensic sub- disciplines including applications within the fields of molecular biology, psychology, toxicology, dentistry, pathology, entomology, among others. Not open to students with credit for FRSC 2030H.

FRSC1100H - Introduction to Canadian Justice

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Introduces students to the Canadian justice system with an emphasis on the criminal justice system. Students are provided opportunities to apply their knowledge through analyzing legal cases and various pieces of legislation, and participating in a mock trial.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC2011H - Introduction to Crime Scene Investigation

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Introduces students to forensic investigations and crime scene processing. Students are instructed how to gather and document scientific evidence while processing crime scenes in the crime scene house, and then present their findings as written reports. Prerequisite: 1.0 MATH credit at the 1000 level, 1.0 BIOL or CHEM credit at the 1000 level, and 60% or higher in each of FRSC 1030H and 1100H. Open only to students in Forensic Science (single- or joint-major), Forensic Biology, Forensic Chemistry, or Forensic Anthropology. Not open to students with credit for FRSC 1010H or FRSC 1011H.

FRSC2030H - Foundations in Forensic Science

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Introduces students to forensic science by exploring multiple disciplines, including forensic psychology, forensic chemistry, forensic entomology, pathology, forensic dentistry, DNA forensics, wildlife forensics, arson investigation, food forensics, and bioterrorism. Students are also instructed in investigative procedures using the crime scene house. Prerequisite: 1.0 MATH credit at the 1000 level, 1.0 BIOL or CHEM credit at the 1000 level, and 60% or higher in each of FRSC 1011H and 1100H. Open only to students in Forensic Science (single- or joint-major), Forensic Biology, or Forensic Chemistry. Not open to students with credit for FRSC 1010H.

FRSC2050H - Introduction to Genetics

Overview

Department(s)
Biology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Forensic Science - Not Set

Cross-Lists
BIOL-2050H

Course Description
Develops a basic understanding of genetics. Mendelian inheritance, chromosome structure, genetic recombination, mutation, the structure of DNA, the nature of genes, and current topics in genetics are investigated using examples from plants, animals, insects, bacteria, fungi, and viruses. Prerequisite: 60% or higher in each of BIOL 1020H and 1030H; or 60% or higher in BIOM 1000H and one of BIOL 1020H, 1050H, 1051H, 1500H, or 1501H; or 60% or higher in each of BIOL 1030H and FRSC 1030H (or 1011H).

FRSC2100H - Criminal Code

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Provides a systematic and detailed review of the Criminal Code. It focuses on implications of the Criminal Code for forensic science, current issues in its interpretation by the courts, and its implementation by law enforcement agencies. Prerequisite: 60% or higher in FRSC 1100H.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC2110H - Police Powers

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Focuses on the legislation governing criminal investigations, including the Constitution Act and Charter of Rights and Freedoms, the practical application of those laws, and their judicial interpretation in the day-to-day activities of police officers and other law enforcement personnel. Prerequisite: FRSC 2100H.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC2750H - Computer Crime and Forensics

Overview

Department(s)
Computer Science, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Forensic Science - Not Set

Cross-Lists
COIS-2750H

Course Description
Computer crime is the fastest-growing area of illegal activity in the world. Users beware! After some background information (how computers work, number systems, information-hiding algorithms), we examine the schemes and techniques used by computer criminals, the forensic techniques used to catch the criminals, and ways to prevent victimization. Recommended prerequisite: COIS 1010H.

FRSC3000H - Laboratory DNA Forensics

Overview

Department(s)
Forensic Science, Biology

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%,
Biology - Not Set

Cross-Lists
BIOL-3000H

Course Description
Examines the theoretical foundations and techniques of DNA analysis with leading-edge technology in light of forensic cases. Students learn the theory and practice of generating forensic DNA evidence. Prerequisite: FRSC-BIOL 2050H, FRSC 3700H, and BIOL 3080H.

FRSC3001H - Applied and Environmental Geophysics

Overview

Department(s)
Environment, Anthropology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%,
Anthropology - Not Set,
Forensic Science - Not Set

Cross-Lists
ANTH-3001H, EGEO-3001H, GEOG-3001H

Course Description
Geophysics is the study of geologic properties, processes and phenomena using non-destructive physical and mathematical methods, including reflection and refraction seismology, gravity and magnetics, and electrical and electromagnetic methods. This course emphasizes how geophysical techniques can be used for resource and archeological exploration, climate change detection, and environmental investigations. Prerequisite: PHYS 1000H or PHYS 1001H or 1.0 MATH credit. Typically offered every other year.

Academic Level
Undergraduate

Course Designation

Credit Value

:
0.5

FRSC3010H - Crime Scene Investigation

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Explores forensic investigation techniques--observation, analysis, evidence identification, collection and preservation, and interviewing. Emphasizes gathering experts' scientific evidence and assessing it. Students explore use of evidence in Canadian court cases, the decision-making processes in court, and the roles of investigators, advocates, judges, and juries. Prerequisite: 60% or higher in each of FRSC 2020H and 2011H (or 1011H or 2030H). Recommended: PHYS 1001H or PHYS 1000H or PHYS-BIOL 1060H. Open only to students in Forensic Science (single- or joint-major), Forensic Biology, or Forensic Chemistry.

Academic Level
Undergraduate

Course Designation
Science

0.5

FRSC3020H - Workplace Readiness and Professional Ethics

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Students gain valuable skills necessary to be accepted into and excel in a professional environment. Emphasis is placed on effective communication and the professional ethics required to work in the high stakes field of forensic science. Prerequisite: 9.0 university credits including FRSC 2020H, 2011H (or 1011H or 2030H), and 2100H. Open only to students in Forensic Science (single-major), Forensic Biology, Forensic Chemistry, or Forensic Anthropology. Not open to students with credit for FRSC 4000H.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC3100H - Trends in Forensic Science

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Covers recent developments in forensic science and reflects the recommendations of practitioners. Typically includes updates in the theory and practices related to DNA analysis, blood-spatter analysis, tire-track and footwear impressions, ballistics, and so forth. Prerequisite: 60% or higher in each of FRSC 2020H and 2011H (or 1011H or 2030H). Open only to students in Forensic Science (single- or joint-major), Forensic Biology, Forensic Chemistry, or Forensic Anthropology.

Academic Level
Undergraduate

Science

Credit Value

:
0.5

FRSC3110H - Criminology in Forensics

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Provides students with a comprehensive view and appreciation of criminology, including the scientific study of criminal behaviour, its forms, causes, legal implications, and controls. Provides a forum for discussion and debate and enhances students' knowledge of crime, criminal justice, and society in a forensic context. Prerequisite: 9.0 university credits including FRSC 2100H. OOpen only to students in Forensic Science (single- or joint-major), Forensic Biology, Forensic Chemistry, or Forensic Anthropology.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC3111H - Wildlife DNA Forensics

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
DNA has revolutionized how forensic investigations take place through the identification of trace biological evidence. This course focusses on theoretical foundations and techniques of DNA analysis in context of enforcing wildlife protection statutes (poaching, trade in endangered species) and the use of non-human DNA in human cases (pet hair associations). Prerequisite: BIOL-FRSC-BIOL 2050H, FRSC 3700H, and BIOL 3080H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

FRSC3120H - Canadian Environmental Policy

Overview

Department(s)
Environment, Canadian Studies, Political Studies, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set, Political Studies - Not Set, Forensic Science - Not Set

Cross-Lists
CAST-3120H, ERST-3120H, POST-3120H

Course Description
An interdisciplinary inquiry into how environmental policies in Canada are developed, implemented, and improved, applying political, economic, legal, scientific, Indigenous, and moral perspectives. Focus is on federal, provincial, and municipal contexts, recognizing that the environment does not respect jurisdictions. Topics include energy and materials use, biodiversity, toxic substances, waste management, and land use. Prerequisite: 1.0 ERST, CAST, POST, and/or ADMN credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC3153H - Archaeological Science 2: Ancient Biomolecules

Overview

Department(s)
Anthropology, Biology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Biology - Not Set, Forensic Science - Not Set

Cross-Lists
ANTH-3153H, BIOL-3153H

Course Description
Ancient biomolecules (proteins, lipids, DNA), the conditions under which they preserve, how they are isolated and analyzed. Topics include stable isotopes, ancient DNA, proteomics, and organic residue analysis. Labs provide students with hands-on experience with techniques commonly used in archaeological science (emphasis on bone chemistry). Prerequisite: ANTH 2150H or three of BIOL 1020H, BIOL 1030H, CHEM 1000H, CHEM 1010H, GEOG-EGEO 1040H, or PHYS 1001H.

FRSC3250H - Introduction to Environmental Law

Overview

Department(s)
Environment, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Forensic Science - Not Set

Cross-Lists
ERST-3250H

Course Description
AA comprehensive overview of environmental law in Canada, examining the key environmental laws and policies at the provincial, federal, and international levels. Prerequisite: 9.0 university credits including GEOG-CLIM-ERSC 1060H (CLIM-ERSC 1050H) or both ERSC 1010H and 1020H.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC3320H - Forensic Psychology

Overview

Department(s)
Forensic Science, Psychology

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%, Psychology - Not Set

Cross-Lists
PSYC-3320H

Course Description
An introduction to how psychological theories and empirical research inform policing, the courts, and offender management and rehabilitation. Topics include suspect interrogation and lineups, deception detection, eyewitness memory and testimony, jury biases and jury selection, mental illness and specialized courts, risk assessment tools and methods, psychopathy, sexual, intimate partner, and homicidal violence. Prerequisite: FRSC 2100H and PSYC 2700H. Open only to students in Forensic Science (single major), Forensic Anthropology, Forensic Biology, Forensic Chemistry, or the joint-major program in Forensic Science and Psychology. Not open to students with credit for FRSC-PSYC 4320H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

FRSC3330H - Forensic Entomology

Overview

Department(s)
Biology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Forensic Science - Not Set

Cross-Lists
BIOL-3330H

Course Description
Many insect species associated with the process of decay of corpses and their maggots have been used as an important tool for identifying both the timing and location of death. This course explores the relationship between insects and the decay of corpses. Prerequisite: 8.0 university credits including 60% or higher in 1.0 BIOL and/or BIOC credit at the 2000 level.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

0.5

FRSC3400H - Chromatography

Overview

Department(s)
Chemistry, Environment, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Environment - Not Set, Forensic Science - Not Set

Cross-Lists
CHEM-3400H, ERSC-3400H

Course Description
Theory and practice of chromatography, sampling, and quality control. Particular emphasis is placed on applications in environmental analysis. Prerequisite: CHEM 2400H or 2420H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

FRSC3401H - Law and Indigenous Peoples: Foundations

Overview

Department(s)
Indigenous Studies, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Forensic Science - Not Set

Cross-Lists
INDG-3401H

Course Description
An introduction to the fundamental precepts, from both a philosophical and practical perspective, that form the foundation of Aboriginal law in Canada. The course content is taught with a balance of experiential learning exercises. Prerequisite: INDG 1001H or permission of instructor.

Academic Level
Undergraduate

Course Designation
Indigenous Course Requirement

Credit Value

:
0.5

FRSC3402H - Law and Indigenous Peoples: Litigating Aboriginal Rights

Overview

Department(s)
Indigenous Studies, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Forensic Science - Not Set

Cross-Lists
INDG-3402H

Course Description
Examines and provides experience in the challenges of litigating Aboriginal rights in Canada. In addition to an examination of the significant court cases that now define the nature and extent of Aboriginal rights, students conduct a group exercise to simulate a negotiations scenario relating to the process of defining Aboriginal rights. Prerequisite: INDG 1001H.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC3404H - Human Osteology 1

Overview

Department(s)
Anthropology, Biology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Biology - Not Set, Forensic Science - Not Set

Cross-Lists
ANTH-3404H, BIOL-3404H

Course Description
A lab-based introduction to human osteology. Students learn basic skeletal and dental anatomy in order to identify bone and tooth and side the bones of the skeleton. Students learn bone biology and development, and the functional morphology of bones. Prerequisite: 3.0 science credits.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

FRSC3405H - Forensic Anthropology

Overview

Department(s)
Anthropology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Forensic Science - Not Set

Cross-Lists
ANTH-3405H

Course Description
An introduction to forensic anthropology. Focuses on the methods used by forensic anthropologists to analyze unidentified skeletal remains, including sex determination, age estimation, stature estimation, assessment of ancestry, and identification of trauma and pathology. Prerequisite: ANTH-BIOL-FRSC 3404H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

FRSC3410H - Methods of Spectral Analysis

Overview

Department(s)
Chemistry, Environment, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%, Environment - Not Set, Forensic Science - Not Set

Cross-Lists
CHEM-3410H, ERSC-3410H

Course Description
Modern analytical spectroscopic instrumentation, techniques, and application to the analysis of organic, inorganic, and biochemical contaminants with a particular focus on the forensic and environmental fields. Prerequisite: CHEM 2400H or 2420H. Strongly recommended: CHEM 2100H and 2110H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

FRSC3680H - A Brief History of Forensics

Overview

Department(s)
History, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Forensic Science - Not Set

Cross-Lists
HIST-3680H

Course Description
Explores the history of forensic science as it intersects with the interests of law and trials, especially through the evidence of expert witnesses, new scientific tests, and developing forensic approaches to crime scenes. Allows students to explore the influences of modern consumerism and racial and imperial interests. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for FRSC 4312H. Not open to students in the single-major Forensic Science program.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC3700H - Applied Population Genetics

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Introduces students to the application of genetics to the study of taxonomy, structure of natural populations, mating systems, and forensics. Topics include the molecular tools that quantify genetic variation, mathematical models of population structure, paternity analysis, and DNA fingerprinting. Prerequisite: 7.5 university credits including FRSC-BIOL 2050H, or permission of instructor. Not open to students with credit for BIOL 3600H or FRSC-BIOL 3620H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

FRSC3711H - The History of Incarceration

Overview

Department(s)
History, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Forensic Science - Not Set

Cross-Lists
HIST-3711H

Course Description
Explores the history of incarceration from the 1700s to the early 2000s, focusing on institutions designed to segregate those labelled sick, deviant, or in need of reform, particularly in Canada. Through secondary and primary sources, the history of incarceration is studied from the perspective of authorities, the public, and inmates. Prerequisite: 4.0 university credits including 0.5 HIST credit or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC3730H - Forensic Chemistry

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Introduces students to the widespread use of analytical chemistry within the analysis of forensically relevant samples. Students first explore preliminary chemical tests as applied to drugs, explosives, gunshot residues, and fingermarks. Students then develop knowledge of instrumental and materials analysis methods via the detailed examination of gunshot residues and explosives. Prerequisite: FRSC 2011H (or 1011H or 2030H) and CHEM 2420H (or 2400H). Not open to students with credit for FRSC 2220H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

0.5

FRSC3751Y - The History of Crime in England

Overview

Department(s)
History, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Forensic Science - Not Set

Cross-Lists
HIST-3751Y

Course Description
A social history of crime between 1500 and 1900, from the perspective of the prosecutors and the courts as well as that of the criminals. Topics include witchcraft, sodomy, murder, theft, rape, and prostitution. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST-FRSC 4751Y. Offered only at Trent University Durham GTA.

FRSC3800H - Forensic Toxicology

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Analyses to test for the presence of alcohol, drugs, and poisons are frequently utilized in death and criminal cases to provide important information pertaining to forensic investigations. This course explores the pharmacology and interpretation of drugs and drug classes in the context of forensic science. Prerequisite: FRSC 2011H (or 1011H or 2030H), CHEM 2300H, and CHEM 2420H (or 2400H). Open only to students in Forensic Science (single- or joint-major), Forensic Biology, Forensic Chemistry, or Forensic Anthropology.

FRSC3852Y - Trent Bioarchaeology Field School - Fortress of Louisbourg

Overview

Department(s)
Anthropology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Forensic Science - Not Set

Cross-Lists
ANTH-3852Y

Course Description
This course provides an introduction to bioarchaeological and forensic anthropology field methods at the Fortress of Louisbourg National Historic Site of Canada. The emphasis of the course is on the ethical handling of human skeletal remains, skeletal excavation methods/techniques for individual, comingled, and disturbed burials, and field data recording. Prerequisite: Permission of instructor.

FRSC3900H - Reading Course

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Provides an opportunity for more intensive or broader study of a selected topic in forensic science under the guidance of a faculty member. Students may take only one reading course. May be taken as a science credit with permission of the department chair. Prerequisite: 10.0 university credits and permission of course supervisor. Open only to students in Forensic Science (single- or joint-major), Forensic Biology, Forensic Chemistry, or Forensic Anthropology.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC4010Y - Independent Project

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
This self-directed research course requires students to investigate research topics relating to forensic science and to prepare a thorough, detailed research proposal in an area of research pertinent to forensic science. Students defend their research questions and their proposed methodology in a class discussion. Research is carried out individually or working in small groups. Open only to students in Forensic Science (single-major), Forensic Anthropology, Forensic Biology, or Forensic Chemistry.

FRSC4020D - Research Thesis

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Students design and carry out research under the supervision of a faculty member, and attend fourth-year Forensic Science seminars on research-related issues. FRSC 4020D is a double credit. FRSC 4021Y is a single credit thesis course to be taken in combination with another single credit thesis course from another science department. Permission of the program and the availability of a thesis supervisor are required. Students are contacted by the course coordinator regarding the application process before the end of the Fall term of third year. Prerequisite: A minimum 80% cumulative average. Students with a cumulative average lower than 80% will be considered provided they include a written letter of support from a prospective supervisor with their application. Open only to students in Forensic Science (single- or joint-major), Forensic Biology, Forensic Chemistry, or Forensic Anthropology.

FRSC4089H - Firearms Intelligence and Society

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Focusses on firearms intelligence investigations and their place in society. Students learn about exploitation investigations and explore firearms through forensic review, trafficking, joint investigations, media impact, policy, and technology. Students develop analytical frameworks to evaluate firearms as symbols, tools of conflict, and vectors of crime within global security and justice systems. Prerequisite: 60% or higher in FRSC 3010H and FRSC 3100H.

FRSC4100H - Science and (In)justice

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
This course explores the dual nature of big data and technology, delving into their intended uses and historical misuses as students explore major developments in data analysis and technology. Focused on big data, DNA technology, and environmental monitoring, this course highlights the social and environmental justice consequences and considerations. Prerequisite: FRSC 2020H and 2100H.

FRSC4110H - Firearms and Ballistics

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
An introduction to firearm examination and ballistics. Students learn the science behind firearm examinations, including gunshot residue analyses, erased number restoration, and classification of firearms-related deaths. Students complete an independent case-based project and present firearms-related evidence to their peers. Prerequisite: 60% or higher in FRSC 3100H and in one of PHYS 1000H, PHYS 1001H, PHYS-FRSC 1020H, or PHYS-BIOL 1060H. Open only to students in Forensic Science (single- or joint-major), Forensic Biology, Forensic Chemistry, or Forensic Anthropology.

FRSC4111H - Basic Bloodstain Pattern Analysis

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Develops a fundamental knowledge of the discipline of bloodstain pattern analysis. Students learn the basic theoretical and practical aspects that are associated with the discipline. Scientific evidence-based analysis and conclusions are emphasized. Techniques are discussed in lectures; practical aspects are learned through participation in laboratory experimentation. Prerequisite: FRSC 2011H (or 1011H and 2030H), 3010H, and one of PHYS 1000H, PHYS 1001H, PHYS-FRSC 1020H, or PHYS-BIOL 1060H. Open only to students in Forensic Science (single- or joint-major), Forensic Biology, Forensic Chemistry, or Forensic Anthropology.

FRSC4200H - Death Scene Investigation

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
This course introduces students to the various death scenes that forensic personnel encounter. Students further develop their documentation, scene search, and evidence recovery skills through a combination of hands-on lab activities and an intensive mock remains recovery scenario. Prerequisite: A minimum 65% cumulative average and FRSC 3020H. Open only to students in Forensic Science (single-major) or Forensic Anthropology.

FRSC4210H - Fingerprint Analysis and Documentation

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
The focus of this course is on developing a fundamental knowledge of fingerprint analysis, including its history, development techniques, documentation, the comparison process, and report writing. Lectures provide an overview of the material while labs allow students to apply the techniques that they have learned. Prerequisite: 60% or higher in FRSC 3010H. Only open to students in Forensic Science (single or joint major), Forensic Biology or Forensic Chemistry.

FRSC4220H - Deconstructing the "Ideal Victim"

Overview

Department(s)
Criminology, Policing & Community Wellbeing, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%, Policing & Community Wellbeing - Not Set, Forensic Science - Not Set

Cross-Lists
CRIM-4220H, PLCW-4220H

Course Description
Using a critical victimological approach, this course explores criminological and legal conceptions of victimization and victimhood alongside socio-political meanings of the victims' rights movement. Topics include media representations of victimization, harm reduction discourses, gender-based violence, environmental crime, and cybercrime in contemporary intersectional and carceral contexts. Prerequisite: 10.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC4250H - Environmental Law and Regulation

Overview

Department(s)
Environment, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Forensic Science - Not Set

Cross-Lists
ERST-4250H

Course Description
Provides students with a practical and detailed examination of the enactment, enforcement, and limitations of environmental law and policy. The course emphasizes Ontario's environmental regime and focuses on a recent case study. Prerequisite: 9.0 university credits including ERST 3250H.

Academic Level
Undergraduate

Credit Value

:
0.5

FRSC4310H - Advanced Forensic Documentation

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
This course examines the operations, limitations, and applications of various advanced technologies for forensic and crime scene documentation, including laser scanning, image-based modelling, UAVs, and VR. Blending theory with hands-on labs simulating real scenarios will equip students with the necessary knowledge and practical skills for deploying these technologies effectively. Prerequisite: 14.0 university credits including 70% or higher in FRSC 3010H.

Undergraduate

Course Designation
Science

Credit Value

:
0.5

FRSC4312H - Presentation of Forensic Evidence

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Explores the legal functions and processes of courts and tribunals and the laws governing evidence and testimony by witnesses. Communication theory and techniques are applied to the experience of testifying in a courtroom setting and to understanding the impact of ethical and effective testimony. Prerequisite: 14.0 university credits including FRSC 2100H. Open only to students in Forensic Science (single-major), Forensic Anthropology, Forensic Biology, or Forensic Chemistry.

Academic Level
Undergraduate

Credit Value
:
0.5

FRSC4340H - Forensic Correctional Practices

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
This course allows students to gain understanding of the correctional system in Canada and globally, offering a comprehensive and up-to-date overview of current topics concerning institutional and community correctional systems. Theoretical and practical issues related to correctional psychology will be explored, including history of corrections and examination of intervention programs. Prerequisite: FRSC 3110H and 3320H.

Academic Level

:
0.5

FRSC4380H - Advanced Topics in Law and Policing

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Allows fourth-year students specializing in law and policing the opportunity to delve into a topic area within that study in more detail. Students pick a focus area, research relevant case law and literature, and conduct independent investigation into the specialized area. Prerequisite: 60% or higher in each of FRSC 2110H, 3010H, 3100H, and 3110H.

Academic Level
Undergraduate

Credit Value
:
0.5

FRSC4410H - Mathematical Tools for Criminal Investigation

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
This course surveys a variety of mathematical and computational tools that are used in criminal and forensic investigations, including but not limited to detecting potential fraudulent behavior, estimating time since death, and locating a suspected criminal offender. Prerequisite: FRSC 2020H and 1.0 MATH credit.

Academic Level

FRSC4610H - Environmental Forensic Toxicology

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
A foundation in the analyses and techniques used to test for the presence of contaminants utilized in environmental monitoring, criminal, and civil cases. Explores techniques used in the identification, quantification, and assessment of toxicological impacts of environmental damage or pollution, as well as environmental toxicology and the interpretation of contaminants. Prerequisite: FRSC 2011H (or 1011H or 2030H) and CHEM 2420H (or 2400H). Open only to students in Forensic Science (single- or joint-major), Forensic Biology, Forensic Chemistry, or Forensic Anthropology.

FRSC4710H - Molecules of Murder

Overview

Department(s)
Forensic Science, Chemistry

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%, Chemistry - Not Set

Cross-Lists
CHEM-4710H

Course Description
Provides a chemical perspective of molecules related to death and poisoning. A wide range of both natural and synthetic classes are explored with respect to their synthesis/extraction, toxicology, use within chemical poisonings and chemical warfare, and their analytical detection and quantification. Prerequisite: CHEM 2300H and one of CHEM 3400H or 3410H. Recommended: FRSC 3800H.

Academic Level
Undergraduate

Course Designation
Science

:
0.5

FRSC4730H - Advanced Topics in Forensic Chemistry

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Chemical signatures have long played a significant role as evidence in criminal investigations. This course explores recent research in analytical techniques for detecting chemical signatures -- across a variety of application areas -- and introduces computational techniques and software tools for working with these high-dimensional data structures. Prerequisite: CHEM 3400H and 3410H. Not open to students with credit for FRSC-CHEM 3720H.

FRSC4800H - Bioinformatics

Overview

Department(s)
Forensic Science, Biology

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%, Biology - Not Set

Cross-Lists
BIOL-4800H

Course Description
Biological data has grown in size and complexity. Bioinformatics--the application of computer programming to the management and analysis of biological information--is necessary for storing, manipulating, and analyzing large datasets. A tutorial-based computer lab focusing on genome sequence data allows students to learn the basics of computer programming and bioinformatics. Prerequisite: FRSC-BIOL 2050H and one of FRSC-BIOL 3700H or BIOL 3600H.

Academic Level
Undergraduate

Course Designation
Science

FRSC5000Q - Fundamentals in Forensic Science

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
This course is designed to instruct candidates with conditional entry into graduate studies in forensic science. Across three modules, students will learn key concepts in forensic science and law, biology and genetics, and chemistry and physics. Students will be assessed per module and via a final exam. The results of these assessments will be used to determine their acceptance into the graduate program (MScFS).

Academic Level
Graduate

0.25

FRSC5001H - Leadership and Communication in FRSC

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Leadership and clear communication are required in all levels of forensic science. This course will introduce students to a broad spectrum of issues in forensic science leadership with a focus on clear communication. Students will have the opportunity to practice presenting technical scientific information to both scientific and non-scientific audiences.

Academic Level
Graduate

:
0.5

FRSC5003H - Research Design & Stats in FRSC

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
The course addresses a range of fundamental research skills, including: practicing ethical and safe research; research proposal and journal article writing; data handling and statistical analysis; critical evaluation of research; and formal research presentations. Through oral presentations and discussions students will develop effective communication techniques in order to present scientific information to a variety of audiences. Ultimately, this course provides foundational skills to prepare the next generation of forensic scientists for the professional and research responsibilities required in the rapidly developing forensic field.

FRSC5009H - Forensic Placement

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
This course provides field-based learning experience in a professional setting. It emphasizes both professional practice and research skills, allowing students to gain valuable work experience in a forensic field of their choice, explore forensically relevant research questions, and develop a professional network.

Academic Level
Graduate

Credit Value

:
0.5

FRSC5010H - Advanced DNA Typing

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
This course will provide knowledge of theoretical and practical DNA analytical techniques essential for every fo-rensic scientist to understand. This course will provide students with a study in advanced molecular genetic tech-niques, DNA profiling, and emerging technologies as they relate to forensic science.

Academic Level
Graduate

Credit Value

:
0.5

FRSC5030H - Expert Evidence & the Courts

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Forensic scientists must be aware of their roles and responsibilities within Canadian (and international) judicial system. This course will explore the interplay between science and law. Expert witness testimony and the presen-tation of evidence will be a major and practical component of this course. Students will study criminal and civil procedures and rules of evidence specific to the role of forensic experts in providing testimony in court and tri-bunal settings. This course will prepare students for their future as expert witnesses. Oral and written communica-tion skills will be employed throughout the course. This course is not open to students with credit in FRSC-4312H.

:
0.5

FRSC5040H - Complex Crime Scene Analyses

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
Crime scene investigation commences the moment the chain of evidence is established. It involves the meticu-lous and rigorous application of the scientific method in order to achieve successful documentation, collection and processing of biological and physical evidence. This course will untangle the complexities of analyzing crime scenes in an array of situations and the application of advanced forensic investigation techniques. It will discuss new and emerging technologies available to crime scene investigators and cover an array of possible scenarios that may be encountered.

Overview

Department(s)
Forensic Science,
Environmental & Life Sciences

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%,
Environmental & Life Sciences - Not Set

Cross-Lists
ENLS-5800H

Course Description
Bioinformatics-the application of computer programming to the management and analysis of biological information-is necessary for storing, manipulating, and analyzing large datasets. This course will consist of a mix of active lesctures (i.e. coding during lecture) and computer-based labs and independent reserach. Students will work independently under guidance from the instructor, on a bioinformatics project of their choosing that falls within the concepts covered, and skills developed during lecture and lab. Students will work collectively on writing a primer focused topic provided by the instructor.

FRSC5950D - Major Research Paper 1

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
The MRP is set up as an extended interaction with an external organization. It has been designed to meet the needs of the forensic Science industry. The MRP provides for a larger scope project than that of a placement but not the scope of an MSc thesis. The MRP begins in September and ends at the end of August after the students present their work. The goal of this MRP is to allow students more time to interact with the placement organization, to learn from them, and contribute back to the organization through their investigations.

FRSC5990H - Special Topics

Overview

Department(s)
Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%

Course Description
The special topics course will cover an area of study relevant to the Master of Science Forensic Science Program that the instructor has specific expertise in. The goal of these courses is to provide an opportunity for students to learn from a diverse group of individuals in areas or at a depth beyond those covered in the other existing courses. The course may cover new subject matter, research techniques or methodologies. After one year, these courses will be reviewed for inclusion in the regular program curriculum.

FRSL1020H - Beginner French 1 / Français débutant 1

Overview

Department(s)
French & Francophone Studies

Contact Department ('not set' refers to cross-listed depts)
French & Francophone Studies - 100%

Course Description
A course in oral and written French for students with no or very limited knowledge of French (who do not have 3U/M or 4U/M French or its equivalent). Relies on textual as well as audio-visual and electronic support material. For students taking their first FRSL course at Trent, admission to this course is based on the results of the French placement test. Students whose level of French is judged by the instructor to be too advanced may not receive credit for this course. Not open to students with credit for FREN 1000Y, 1001H, 1010H, or 1020H.

2

GDST3830H - Field Course in Andean Community Development

Overview

Department(s)
Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%

Course Description
Combines theoretical, methodological, and practical reflections on development processes and a hands-on community development experience. Only offered in Bolivia. Equivalent to IDST 3830H.

Academic Level
Undergraduate

Credit Value

:
0.5

GDST3850H - Field Course

Overview

Department(s)
Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%

Course Description
Combines in-class instruction on migration issues in a selected country and a field trip to the country location to study migrant housing, employment, integration, and settlement. Placements in organizations working with migrants in the selected region are also offered to students. Students pay a field trip fee and cover their other costs. Prerequisite: 10.0 university credits with a cumulative average of 75%. Equivalent to IDST 3850H.

Academic Level
Undergraduate

Credit Value

:
0.5

GDST3881H - Gender, Globalization, and Resistance

Overview

Department(s)
Global Justice & Development, Political Studies, Gender & Social Justice, Sociology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Political Studies - Not Set, Gender & Social Justice - Not Set, Sociology - Not Set

Cross-Lists
GESO-3881H, HURI-3881H, POST-3881H, SOCI-3881H

Course Description
Focuses on how globalization is transforming intersectional gender dynamics that underpin relationships between and within states, markets, civil society, and households. Introduces students to feminist perspectives on the global political economy, focusing on specific issues such as international trade agreements, labour, security, migration, health, environment, and human rights. Prerequisite: 1.0 HURI, GDST, IDST, GESO, WMST, POST, and/or SOCI credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO-POST 4881H or WMST-POST 3880Y. Equivalent to IDST 3881H.

GDST4130H - Global Cities and Social Justice

Overview

Department(s)
Global Justice & Development, Geography

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Geography - Not Set

Cross-Lists
GEOG-4130H, HURI-4130H

Course Description
An examination of cities and urbanization in a global context. Explores global cities and the global economy, urban inequalities, poverty, work, violence, marginalization, housing, the environment, and urban struggles. Comparative case studies are used. Prerequisite: 14.0 university credits including 1.0 GDST, HURI, and/or GEOG credit at the 2000 level. Equivalent to IDST 4130H.

Academic Level
Undergraduate

Credit Value

:
0.5

GDST4150Y - Climate Crisis and Radical Hope

Overview

Department(s)
Global Justice & Development, Environment

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Environment - Not Set

Cross-Lists
ERST-4150Y

Course Description
This course analyzes the relationship between fossil capitalism and development in Canada and abroad, including the ongoing violation of human, Indigenous and environmental rights. During the second term we explore radical visions from scholars and activists to build post-carbon futures. Students work cooperatively in groups to build climate activism locally. Prerequisite: 14.0 university credits including 2.0 GDST/IDST credits or permission of the instructor. Equivalent to IDST 4150Y.

Academic Level
Undergraduate

Credit Value

:
1

GDST4220Y - Community-Based Research Project: Rights-Based Approach

Overview

Department(s)
Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%

Cross-Lists
HURI-4220Y

Course Description
An examination of research traditions, methodologies, and methods with application to rights-based empirical inquiry and completion of a community-based research project. Prerequisite: 14.0 university credits including GDST-HURI 2010H (GDST 2001H) or HURI 2005H or HURI 3121H or permission of instructor or department chair. Not open to students with credit for GDST 4221Y or IDST 4221Y. Equivalent to IDST 4220Y.

GDST4241H - Desiring Development: Psychoanalysis, Capitalism, and Global Futures

Overview

Department(s)
Global Justice & Development, Culture, Arts, and Media, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Culture, Arts, and Media - Not Set, Political Studies - Not Set

Cross-Lists
CUST-4241H, POST-4241H

Course Description
Introduces psychoanalysis as a critical lens for understanding global development. Explores how unconscious forces such as desire, fantasy, and enjoyment shape ideas of progress, inequality, race, and globalization. Considers how media and ideology sustain these visions and examines possibilities for alternatives and transformation in contemporary global contexts. Prerequisite: 10.0 university credits including 1.0 GDST, CUST, or POST credit.

Academic Level
Undergraduate

Credit Value

:
0.5

GDST4252H - Refugees, Forced Migration, and Experience in the Canadian Context

Overview

Department(s)
Political Studies, Canadian Studies, Global Justice & Development, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Global Justice & Development - Not Set, Sociology - Not Set

Cross-Lists
CAST-4252H, POST-4252H, SOCI-4252H

Course Description
This course focuses on the ethical and moral complexities raised by displacement and forced migration. Students examine the social, economic, and political factors associated with Canada's refugee sponsorship programs. Attention is given to media representations of refugees. Topics include resilience, parenting in a war context, and refugee education. Prerequisite: 10.0 university credits including 1.0 POST, CAST, GDST-IDST, and/or SOCI credit at the 2000 level, and an additional 2.0 credits at the 3000 level of which at least 1.0 must be from POST, GDST-IDST, CAST, or SOCI, or permission of instructor. Recommended: POST 2011H, 2012H, CAST 2245H, IDST 3150H, SOCI 3661H.

Academic Level
Undergraduate

Credit Value

0.5

GDST4255H - Politics of Work: AI, Automation, and Global Capitalism

Overview

Department(s)
Political Studies, Business, Global Justice & Development, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Business - Not Set, Global Justice & Development - Not Set, Sociology - Not Set

Cross-Lists
ADMN-4255H, POST-4255H, SOCI-4255H

Course Description
Examines how AI, robotics, and digital platforms intersect with global capitalism and geopolitics to reshape work's organization and politics. Students engage with theories of work generation to analyze automation, platform economies, and social reproduction, debating regulation, resistance, and competing visions for the future of work beyond algorithmic control. Prerequisite: 12.0 university credits including 1.0 POST, ADMN, GDST (IDST), and/or SOCI credit at the 2000 level; or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

GDST4260H - Global Governance, Human Rights, and Social Justice

Overview

Department(s)
Global Justice & Development, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Political Studies - Not Set

Cross-Lists
HURI-4260H, POST-4260H

Course Description
Explores the relationship between global governance, human rights, and social justice in an interdependent world. Examines how major global institutions shape distributive outcomes and affect the protection or violation of rights. Using interdisciplinary scholarship, students analyze how governance structures reproduce inequalities and human rights frameworks are mobilized to contest them. Prerequisite: 14.0 university credits including 1.0 HURI, GDST, and/or POST credit at the 2000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

GDST4272H - Liberal Democracy at the Crossroads: Imagining Alternatives

Overview

Department(s)
Political Studies, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Global Justice & Development - Not Set

Cross-Lists
POST-4272H

Course Description
Examines the question of whether the international order can be democratized and be accountable to the people impacted by them. It begins with an analysis of how inter-state hierarchies operate. Global governance institutions are examined focusing on whether they exacerbate or attenuate domination and submission. Prerequisite: 12.0 university credits including 1.0 POST credit, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

GDST4512H - Global Health and Human Rights

Overview

Department(s)
Global Justice & Development, Anthropology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Anthropology - Not Set, Sociology - Not Set

Cross-Lists
ANTH-4512H, HURI-4512H, SOCI-4512H

Course Description
This course examines key global health challenges of the twenty-first century and how global institutions respond to them. Drawing on public health, political economy, biopolitics, and human rights, it explores how health is shaped by structural inequalities, governance regimes, and rights frameworks that define access to care, state obligations, and accountability. Prerequisite: 14.0 university credits including 1.0 HURI, GDST (IDST), ANTH, and/or SOCI credit at the 2000 level or permission of instructor. Equivalent to IDST 4512H.

Academic Level
Undergraduate

Credit Value

:
0.5

GDST4610H - Global Environmental Policy

Overview

Department(s)
Environment, Political Studies, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Political Studies - Not Set, Global Justice & Development - Not Set

Cross-Lists
ERST-4610H, POST-4610H, SAFS-4610H

Course Description
Focuses on perspectives, actors, institutions, and economic relationships as they relate to global environmental policy and instruments. The aim is to provide students with a solid understanding of linkages between the global political system and the natural environment. Prerequisite: 9.0 university credits. Recommended: One of ERST-GDST-POST 3602H or POST 2200Y.

Academic Level
Undergraduate

Credit Value

:
0.5

GDST4630H - Advanced Seminar in the Sociology of Gender

Overview

Department(s)
Sociology, Gender & Social Justice, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Gender & Social Justice - Not Set, Global Justice & Development - Not Set

Cross-Lists
GESO-4630H, SOCI-4630H

Course Description
Examines intersections of gender with "race," ethnicity, sexuality, and class. The implications of intersectional perspectives for how we understand gender equality strategies and outcomes are considered. Specific topics will be determined yearly and may be different in Peterborough and Durham. Prerequisite: 10.0 university credits, including one of SOCI-GESO 2430H or 3440H, and 2.0 credits at the 3000 level; or permission of instructor. Equivalent to SOCI-WMST 4610H.

Academic Level
Undergraduate

Credit Value

:
0.5

GDST4750H - Ethnicity, Political Conflict, and Genocide

Overview

Department(s)
Global Justice & Development, Anthropology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Anthropology - Not Set, Sociology - Not Set

Cross-Lists
ANTH-4750H, HURI-4750H, SOCI-4750H

Course Description
An examination of ethnic consciousness and identity formation through theoretical and ethnographic case studies in a variety of settings. Themes include politicization of ethnicity in situations of conflict or political transition, genocide, and the articulation of ethnicity with gender, class, kinship, nationalism, and other markers of social and cultural difference. Prerequisite: 14.0 university credits including one of HURI 2005H, ANTH 2001H, ANTH 2002H, GDST-HURI 2010H (GDST 2001H), or SOCI 3661H, or permission of instructor. Equivalent to IDST 4750H.

GDST4801H - Research Practicum

Overview

Department(s)
Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%

Cross-Lists
HURI-4801H

Course Description
Under the direct supervision of a departmental faculty member, research activities are undertaken within the faculty member's ongoing research program. Open to Honours students in Global Development Studies or Human Rights & Global Justice with 14.0 university credits, a minimum 80% cumulative average in all GDST/IDST courses completed, permission of instructor, and permission of department chair. Equivalent to IDST 4800Y, 4801H, 4802H.

Academic Level
Undergraduate

Credit Value

GDST4873H - Community-Based Research With Immigrants

Overview

Department(s)
Political Studies, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Global Justice & Development - Not Set

Cross-Lists
POST-4873H

Course Description
Students engage in community-based research with a local immigrant focused agency to research, create, recommendation policies and ultimately solutions to challenges faced by immigrants in the community. Students learn the basics of conducting action-oriented research that advances social justice and creates social change. Prerequisite: 10.0 university credits including 1.0 POST and/or GDST/IDST credit at the 2000 level, and 2.0 credits at the 3000 level of which at least 1.0 must be from POST and/or GDST/IDST. Not open to students with credit for POST 4872H (2023-2024).

Academic Level
Undergraduate

Credit Value

:
0.5

GDST4900Y - Reading Course

Overview

Department(s)
Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%

Course Description
Prerequisite: 14.0 university credits and permission of department chair and instructor. Equivalent to IDST 4900Y, 4901H, 4902H.

Academic Level
Undergraduate

Credit Value

:
1

GDST4902H - Reading Course

Overview

Department(s)
Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%

Course Description
Prerequisite: 14.0 university credits and permission of department chair and instructor. Equivalent to IDST 4900Y, 4901H, 4902H.

Academic Level
Undergraduate

Credit Value

:
0.5

GDST4901H - Reading Course

Overview

Department(s)
Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%

Course Description
Prerequisite: 14.0 university credits and permission of department chair and instructor. Equivalent to IDST 4900Y, 4901H, 4902H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG1030H - Society, Environment, and Place

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
ERST-1030H, SAFS-1030H

Course Description
Examines the spatial organization of human activity, the significance of places in human life, and people's relationships with their environments. It includes study of people, their origins, culture, technology, economy, and impact on the environment. Field work.

Academic Level
Undergraduate

Credit Value
:
0.5

GEOG1040H - Earth's Physical Processes and Environments

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
EGEO-1040H, ERSC-1040H

Course Description
An examination of the atmospheric, tectonic, and geomorphic forces that shape Earth's physical environments. Issues addressed include soil conservation, groundwater resources, and climate change. Field work. Prerequisite for science courses in Geography.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

GEOG1045H - Introduction to the Circumpolar World

Overview

Department(s)
Geography, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-1045H

Course Description
Introduces students to the landscape, peoples, and issues of the circumpolar region. Beginning with an examination of the geography, biological, and physical systems of the Subarctic and Arctic, the course then turns to the Indigenous and contemporary peoples of the region.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG1060H - Introduction to Climate Change

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
CLIM-1060H, ERSC-1060H

Course Description
Examines the scientific foundation of climate change, including the evidence for past and future changes to the climate and the biophysical and social impacts from climate change. Climate solutions and advocacy are explored. By bringing together science, impacts, technologies, and politics, the complexity of climate change is introduced. Equivalent to CLIM-ERSC 1050H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG2001H - Earth Materials

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
EGEO-2001H

Course Description
This introductory mineralogy and petrology course teaches students about the origin, properties, and classification of minerals and rocks with environmental (e.g., human health) and economic importance. Practical laboratory exercises enable students to become proficient at identifying specimens using physical and optical properties. Prerequisite: EGEO-GEOG 1040H. Not open to students with credit for EGEO-GEOG 3000H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

0.5

GEOG2043H - Canada the Land Before 1885

Overview

Department(s)
Canadian Studies, Environment, Geography, Education, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Environment - Not Set, Geography - Not Set, Education - Not Set, Political Studies - Not Set

Cross-Lists
CAST-2043H, EDUC-2043H, ERST-2043H

Course Description
An inquiry into the emergence of the Canadian nation-state in the context of Indigenous North America. An exploration of how different peoples have tried and sometimes failed to live together. A story whose outcome depends on our capacity to build meaningful relationships with one another and with the land itself. Prerequisite: 3.0 university credits. Not open to students with credit for CAST-ERST-GEOG-INDG 2040Y or 2041H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG2044H - Canada the Land After 1885

Overview

Department(s)
Canadian Studies, Environment, Geography, Education, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Environment - Not Set, Geography - Not Set, Education - Not Set, Political Studies - Not Set

Cross-Lists
CAST-2044H, EDUC-2044H, ERST-2044H

Course Description
An inquiry into the emergence of the Canadian nation-state in the context of Indigenous North America. An exploration of how different peoples have tried and sometimes failed to live together. A story whose outcome depends on our capacity to build meaningful relationships with one another and with the land itself. Prerequisite: 3.0 university credits. Not open to students with credit for CAST-ERST-GEOG-INDG 2040Y or 2042H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG2050H - Climate Data and Analytics

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Cross-Lists
CLIM-2050H

Course Description
An introduction to the practices and concepts of data analytics applied to climate science and policy. Students learn about different types of climate data, approaches for gathering and organizing data, and tools for data analysis. Approaches for effectively presenting and communicating data are covered. Prerequisite: 4.0 university credits including CLIM-ERSC-GEOG 1060H (CLIM-ERSC 1050H), GEOG 1040H, MATH 1005H, and MATH 1051H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG2080H - Natural Science Statistics

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
ERSC-2080H

Course Description
Covers commonly-used statistical tools in Geography and Environmental & Resource Science. Lectures address basic statistical methods and background theory. Workshops involve computer-based assignments providing practical experience in statistical application. Prerequisite: MATH 1051H or 1110H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG2090H - Introduction to Geographical Information Systems

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
EGEO-2090H, ERSC-2090H

Course Description
Introduces the fundamentals of GIS technology and applications. The essentials of GIS structural components, spatial data models, and the analytical GIS operations on such data models are examined in detail. Experience with GIS analysis is gained through laboratory exercises. Prerequisite: 4.0 university credits including 1.0 ERSC/T and/or GEOG credit at the 1000 level. Elementary or intermediate-level experience with microcomputers and their operating systems is desirable.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG2120H - Water Policy

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
ERSC-2120H, WASC-2120H

Course Description
An introductory overview of water issues and related policies in Canada and internationally. Surveys the key interest groups and factors that shape conflicts over water protection and allocation, as well as policy responses, including infrastructure, regulatory, and economic tools that are employed by national, provincial, and local agencies. Prerequisite: ERSC 1010H and 1020H. Equivalent to WASC 2000H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG2180H - Natural Hazards

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
EGEO-2180H, ERSC-2180H

Course Description
An examination of the physical causes of a variety of extreme geophysical events, risk estimation and perception, and the societal approaches adopted to adjust to natural hazards. The course concentrates on climate-related natural hazards (e.g., hurricanes, droughts, floods), but also examines other geophysical events such as earthquakes. Prerequisite: 4.0 university credits including GEOG-EGEO-ERSC 1040H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG2310H - Geography of Recreation

Overview

Department(s)
Geography

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%

Course Description
Examines the concepts, contexts, and methods for studying recreation geography, including historical and theoretical perspectives on recreation; the demand for recreation; the supply of land, facilities, and services for recreation; and the economic, environmental, and social impacts of recreation and tourism. Prerequisite: GEOG 1030H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG2320H - Lands and Environments of the Circumpolar North

Overview

Department(s)
Geography, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
CAST-2320H, ERST-2320H

Course Description
Explores the lands and environments that define the Circumpolar region and identifies the key issues involving interaction between humans and their environments, examining climate change and its impacts on landscapes, biodiversity, and ecological systems. Provides a broad foundation for the study of circumpolar peoples, economies, landscapes, communities, and adaptation to climate change.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG2330H - Changing Resources of the Circumpolar North

Overview

Department(s)
Geography, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
CAST-2330H, ERST-2330H

Course Description
Provides students with an in-depth understanding of the key issues which define the future of resources and resource use in the Circumpolar North. Focuses upon the challenges of resource management for governments and communities, and assesses the potential conflicts derived from resource use. Prerequisite: GEOG 1045H and GEOG-ERST 2320H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG2401H - Environmental Geology

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
EGEO-2401H, ERSC-2401H

Course Description
Environmental geology examines the interactions between society and the geologic environment. This course begins with an introduction to the fundamental geologic processes and Earth materials, and then focuses on the most pressing geological issues of today, including fossil fuel and mineral extraction, natural hazards, climate change, water resources, and waste disposal. Prerequisite: 4.0 university credits including EGEO-ERSC-GEOG 1040H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG2460H - The Global Climate System

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
ERSC-2460H

Course Description
A study of the physical elements of the global climate system. Deals with global and synoptic climatic processes including the structure of the atmosphere, radiation, atmospheric dynamics, general circulation, and the oceans. These concepts are applied to an introduction to the problem of climatic change and its prediction. Prerequisite: GEOG-EGEO-ERSC 1040H or GEOG-CLIM-ERSC 1060H (CLIM-ERSC 1050H).

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG2500H - The World Food System

Overview

Department(s)
Geography, Anthropology, Environment, Sociology, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Anthropology - Not Set, Environment - Not Set, Sociology - Not Set, Global Justice & Development - Not Set

Cross-Lists
ANTH-2500H, GDST-2500H, SAFS-2500H, SOCI-2500H

Course Description
An interdisciplinary and comparative analysis of the impact of transformations in the world food system on contemporary agrarian societies. Prerequisite: 4.0 university credits. Equivalent to IDST 2500H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG2510H - Qualitative Methods in Geography and Environmental Studies

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
ERST-2510H

Course Description
Focuses on social science methods used in geographical and environmental research contexts. Methods examined include surveys, content analysis, interviews, focus groups, participatory action research, and community-based research. Prerequisite: 4.0 university credits including GEOG-ERST-SAFS 1030H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG2530H - Water Resources

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
ERSC-2530H, WASC-2530H

Course Description
Uses case studies to examine the principles and processes that control the distribution and uses of water at global, continental, and watershed scales. Prerequisite: 4.0 university credits including GEOG-EGEO-ERSC 1040H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG2540H - Earth's Dynamic Landforms

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
EGEO-2540H

Course Description
Addresses a selection of sedimentary processes that create a variety of features observed at the surface of the earth. Emphasis is placed upon understanding and quantifying sediment production and transport. This knowledge is then extended to the interpretation of arid, coastal, and fluvial landforms. Prerequisite: 4.0 university credits including GEOG-EGEO-ERSC 1040H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG2710H - Cities: An Introduction to Urban Geography

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
CAST-2710H, ERST-2710H

Course Description
Cities are dynamic and contradictory spaces. Focusing on the lived spaces of the city, the course explores the ideologies, practices, and geographical processes shaping the transformation of cities. Special attention is made to integrate urban theory with the everyday uses of urban space. Prerequisite: 4.0 university credits including GEOG-ERST-SAFS 1030H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG2810H - Canada's People and Places

Overview

Department(s)
Geography, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-2810H

Course Description
Explores the geography of Canada and its peoples and places. Examines the development of Canada's cultural landscapes and regions, and the social, economic, and political development of the Canadian nation-state. Canada's geography is explored as an east-west nation under increasing pressure from globalization and new national agendas. Prerequisite: GEOG 1030H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG2811H - The International Arctic: Environment, Diplomacy, and Geopolitics

Overview

Department(s)
Geography, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-2811H

Course Description
Introduces students to the international politics of the circumpolar region and concludes with a unique simulation of the Arctic Council at which students are challenged to develop real-life scenarios and to play the role of diplomatic and reach consensus on difficult areas of Arctic public policy. Prerequisite: GEOG 1045H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3001H - Applied and Environmental Geophysics

Overview

Department(s)
Environment, Anthropology, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Anthropology - Not Set, Forensic Science - Not Set

Cross-Lists
ANTH-3001H, EGEO-3001H, FRSC-3001H

Course Description
Geophysics is the study of geologic properties, processes and phenomena using non-destructive physical and mathematical methods, including reflection and refraction seismology, gravity and magnetics, and electrical and electromagnetic methods. This course emphasizes how geophysical techniques can be used for resource and archeological exploration, climate change detection, and environmental investigations. Prerequisite: PHYS 1000H or PHYS 1001H or 1.0 MATH credit. Typically offered every other year.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

GEOG3002H - Structural Geology

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
EGEO-3002H

Course Description
Examines the genesis of rock units and the causes and outcomes of subsequent deformation. Students are introduced to the different geologic structures and methods to describe them. Emphasis is the structural relevance to hydrogeology, mineralogy, and natural resources, as well as subsurface contamination migration. Required field trips. Prerequisite: EGEO-GEOG 2001H. Typically offered every other year.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

GEOG3003H - Field Methods in Environmental Geoscience

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
EGEO-3003H, ERSC-3003H

Course Description
Students learn essential field skills, including designing a field study, mapping, and measurement techniques. The geology of Central Ontario and its mining industry are examined along with the potential for environmental impacts. Most instruction takes place during required field trips with students documenting their work in technical reports. Prerequisite: EGEO-GEOG 2001H or EGEO-GEOG-ERSC 2401H. Not open to students with credit for EGEO-ERSC-GEOG 2000H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG3010H - Fundamentals of Geographical Information Systems Analysis

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
ERSC-3010H

Course Description
Focuses on Geographical Information Systems and analysis in the vector data domain (discrete object representation). It examines the fundamentals of spatial database development and the main analytical operations in vector. Practical application through laboratory exercises with examples from the urban and rural environment is a major component. Prerequisite: ERSC-GEOG-BIOL 2080H and ERSC-GEOG 2090H. Not open to students in the GIS Application Specialist Joint Program with Fleming College. Typically offered every other year.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG3020H - Remote Sensing of the Environment

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
ERSC-3020H

Course Description
Introduces the science, technology, and environmental applications of Remote Sensing of a host of environmental variables whether locally, regionally, continentally, or globally. Knowledge about the manner, process, and timing of data capture, processing, and their interpretation for specific purposes are imperatives in modern environmental assessment and monitoring. Prerequisite: GEOG-ERSC-EGEO 2090H. Typically offered every other year.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG3041H - The Changing Land

Overview

Department(s)
Canadian Studies,
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%,
Environment - Not Set,
Geography - Not Set

Cross-Lists
CAST-3041H, EDUC-3041H, ERST-3041H

Course Description
This course invites students to think of climate change as a communication event between human beings and the earth. It tasks them with re-establishing a reciprocal relationship with a specific place. There is an outdoor component to this course. Prerequisite: One of CAST-ERST-GEOG-INDG 2041H, CAST-ERST-GEOG-INDG 2042H, CAST-EDUC-ERST-GEOG 2043H, or CAST-EDUC-ERST-GEOG 2044H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3042H - Reading the Wilderness in Canada

Overview

Department(s)
Canadian Studies, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Environment - Not Set, Geography - Not Set

Cross-Lists
CAST-3042H, ERST-3042H

Course Description
An examination of shifting ideas of nature and wilderness in the work of a number of contemporary Canadian artist-thinkers. Special emphasis is placed on ecological literacy, or in learning to read the land as an "ultra-primary" text. Prerequisite: 9.0 university credits including one of CAST-ERST-GEOG-INDG 2041H, CAST-ERST-GEOG-INDG 2042H, CAST-EDUC-ERST-GEOG 2043H, or CAST-EDUC-ERST-GEOG 2044H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3100H - The Practice and Profession of Geography

Overview

Department(s)
Geography

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%

Course Description
Provides an applied understanding of the practice of Geography with an emphasis on the development of local geographical knowledge in Peterborough and the Kawarthas. Prerequisite: 9.0 university credits including GEOG 1030H; one of GEOG 1040H or 1060H; and two of GEOG 2080H, 2090H, or 2510H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG3175H - The Archaeology of Natural Disasters

Overview

Department(s)
Anthropology, Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Geography - Not Set, Environment - Not Set

Cross-Lists
ANTH-3175H, ERSC-3175H

Course Description
Lectures explore the science of natural disasters, and issues relating to resilience and risk management in the contemporary world. Seminars focus on the archaeology of natural disasters, with particular emphasis on how human conceptions of the environment condition people's perceived vulnerability, and eventually their responses, to sudden environmental changes. Prerequisite: 10.0 university credits or permission of instructor. Students majoring in Environmental & Resource Studies/ Science may only take one of ERSC-ANTH-GEOG 3175H or 3185H as an ERSC credit.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG3185H - The Archaeology of Climate Change

Overview

Department(s)
Anthropology, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set, Geography - Not Set

Cross-Lists
ANTH-3185H, ERSC-3185H

Course Description
Lectures and readings examine the science of climate change, outline how climate change influenced cultural development in the past, and assess how human perceptions of the environment conditioned the varying responses to climate change. Seminars focus on key methodological and/or theoretical issues, and specific case studies from the archaeological record. Prerequisite: 10.0 university credits or permission of instructor. Students majoring in Environmental & Resource Studies/ Science may only take one of ERSC-ANTH-GEOG 3175H or 3185H as an ERSC credit.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

GEOG3201H - Indigenous Peoples in Urban Centres - City as Home

Overview

Department(s)
Geography, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Indigenous Studies - Not Set

Cross-Lists
INDG-3201H

Course Description
Explores Indigenous peoples and the contemporary urban environment using a four directions analytic framework and the metaphor of city as home.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3202H - Indigenous Peoples in Urban Centres - Selected Issues and Cities

Overview

Department(s)
Geography, Canadian Studies, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Gender & Social Justice - Not Set

Cross-Lists
INDG-3202H

Course Description
Explores Indigenous peoples' issues and experiences in selected urban environments in Canada and the world.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3220H - Gender, Society, and Space

Overview

Department(s)
Geography, Canadian Studies, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Gender & Social Justice - Not Set

Cross-Lists
CAST-3220H, GESO-3220H

Course Description
Selected themes and topics examining the relationship between gender and spatial organization. Themes include the nature of domestic space; gendered use of public, private, and urban space; and the intersections between gender, sexuality, racism, and cultural difference. Prerequisite: 1.0 GEOG and/or GESO credit at the 2000 level or beyond.

Academic Level

GEOG3330H - Protected and Conserved Areas Management

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
CAST-3330H, ERST-3330H

Course Description
An overview of the fundamental theoretical and applied components of protected area management, including the history, planning, and management of parks and protected areas with a focus on Canadian federal, provincial, territorial, and Indigenous contexts. Lectures, case studies, seminars, and assignments engage students in the exploration of current protected area topics and issues. Prerequisite: GEOG 2310H; or one of GEOG-CAST-ERST-EDUC 2043H, 2044H, GEOG-CAST-ERST-INDG 2041H, 2042H, or 2040Y; or both ERST-CAST 2520H and 2525H.

0.5

GEOG3370H - Geography of Tourism

Overview

Department(s)
Geography, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-3370H

Course Description
A critical perspective is used to explore the geographies of tourism-related industries and workplaces and the social and environmental impacts of tourism in urban and rural settings. Special attention is given to the Canadian experience. Prerequisite: GEOG 2310H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3420H - Snow and Ice

Overview

Department(s)
Geography

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%

Cross-Lists
WASC-3420H

Course Description
Emphasizes physical and geographical aspects of different ice forms and their implications for human and biological activity. Measurement of snow and ice are studied in practical laboratories. Some field work during the Reading Week is expected. Prerequisite: 9.0 university credits including GEOG-ERSC 2080H and 2460H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG3440H - Microclimatology

Overview

Department(s)
Geography

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%

Course Description
Focuses on the physical mechanisms of flows of energy and mass between the earth surface and the atmosphere. A discussion of the principles of energy exchange is followed by their application to near surface environments. Prerequisite: One of GEOG-BIOL-ERSC 2080H or CLIM-GEOG 2050H, and one of GEOG 2460H or GEOG-EGEO 2540H.

Academic Level
Undergraduate

Course Designation
Science

GEOG3470H - Climate Change and Its Impacts

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
CLIM-3470H, ERSC-3470H

Course Description
This course examines human influence on the climate system and future changes to the climate system, and assesses the impacts of climate change on our physical and biological world. Prerequisite: 9.0 university credits including GEOG-ERSC 2080H and 2460H. Equivalent to GEOG 3410H.

Academic Level
Undergraduate

Course Designation
Science

0.5

GEOG3490H - Contemporary Issues of the Circumpolar World

Overview

Department(s)
Geography, Environment, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set, Canadian Studies - Not Set

Cross-Lists
CAST-3490H, ERST-3490H

Course Description
Develops a basic appreciation of the most important contemporary challenges surrounding governance and politics, social issues, education and knowledge systems, and global issues in the circumpolar regions of the North. It explores the complexity and inter-relatedness of governance, social policy, gender, indigeneity, and law. Prerequisite: Permission of instructor. Equivalent to GEOG 3390H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3530H - Hydrology

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
EGEO-3530H, ERSC-3530H, WASC-3530H

Course Description
Study of the movement of water through the environment with emphasis on terrestrial aspects including interception, infiltration, soil moisture, groundwater, surface runoff, and stream-flow, also covering human impact on hydrological processes. Prerequisite: 9.0 university credits including GEOG-BIOL-ERSC 2080H and one of GEOG 2460H, GEOG-EGEO 2540H, or GEOG 3440H.

Academic Level
Undergraduate

GEOG3540H - River Environments and Processes

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
WASC-3540H

Course Description
Examines the morphology of rivers and river systems and relationships between process and form. Topics to be covered include erosion, transportation, and deposition of sediments; channel morphology, the drainage basin as a geomorphic unit; and human impact on river morphology. Field work. Prerequisite: GEOG-BIOL-ERSC 2080H and one of GEOG-EGEO-ERSC 2401H, GEOG-EGEO 2540H, or GEOG 3520H.

GEOG3560H - Soil Science

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
EGEO-3560H, ERSC-3560H, SAFS-3560H

Course Description
Soil is at the heart of terrestrial ecosystems. A sound understanding of soil science is necessary for physical geography, environmental science, engineering, and agriculture. This course describes the mechanisms of soil formation and the physical, chemical, and biological properties of soils, as well as current issues in soil science. Prerequisite: GEOG-ERSC 2080H and one of ERSC 2240H or GEOG 2540H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

GEOG3590H - Sedimentary Processes

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
EGEO-3590H

Course Description
An advanced treatment of sedimentary processes and related stratigraphic features that occur in a wide range of environmental contexts inclusive of benthic, coastal, and dryland systems. An emphasis is placed upon field and laboratory techniques for measurement, and on case studies. Prerequisite: One of GEOG-EGEO-ERSC 2401H, GEOG-EGEO 2540H, or GEOG 3520H.

GEOG3621H - The Critical Place of Law in Canadian Society

Overview

Department(s)
Canadian Studies, Political Studies, Geography

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Political Studies - Not Set, Geography - Not Set

Cross-Lists
CAST-3621H, POST-3621H

Course Description
An exploration of the critical places and spaces of law in the making of Canadian identity. Discusses issues such as treaties and rights under the law and within Canadian society. Prerequisite 6.0 university credits. Not open to students with credit for CAST-INDG-WMST 3480Y or CAST-GEOG-POST 4621H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3640H - Geography of the Polar Regions

Overview

Department(s)
Geography, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-3640H

Course Description
Study of selected aspects of the Polar regions with considerable reference to northern Canada but with the deliberate intention of developing comparisons between it and other parts of the Polar regions. Prerequisite: GEOG 1045H; or GEOG 1030H and one of GEOG 1040H or 1060H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:

GEOG3650H - Soil Management and Conservation

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
ERSC-3650H, SAFS-3650H

Course Description
Soils represent one of the most important natural resources from the point of view of sustainable agriculture and forestry, and protection of habitat. This course explores the scientific basis and management options for conservation of soil resources. Prerequisite: ERSC 2240H or ERSC-EGEO-GEOG 2401H or GEOG 3520H or both GEOG 2540H and 2560H. Recommended: ERSC-GEOG-SAFS 3560H.

GEOG3711H - Urban and Regional Planning

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
CAST-3711H, ERST-3711H

Course Description
Examines the main planning principles which govern the economic, social, and physical development of cities and regions. Topics to be covered include national, provincial, regional, and municipal policies and their impact on urban and rural systems; historical development of planning in North America; and planning as a profession. Prerequisite: GEOG-CAST-ERST 2710H. Equivalent to GEOG-CAST 3710H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3720H - Urban Environments

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
CAST-3720H, ERST-3720H

Course Description
This interdisciplinary course is designed to explore critical and practical perspectives on urban environments. The theme of water and infrastructure networks (i.e., canals, rivers, waterfronts) guides a critical exploration of the historical and symbolic dimensions of our built environment and the eco-future of our urban spaces. Prerequisite: One of GEOG-CAST 2710H, GEOG-CAST-ERST-INDG 2040Y, 2041H, or 2042H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3730H - Social Geography

Overview

Department(s)
Geography, Canadian Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Environment - Not Set

Cross-Lists
CAST-3730H, ERST-3730H

Course Description
Explores the social structures of contemporary Western cities and communities by examining how social relations, social identities, and social inequalities are produced, and the role of space in constructing them. Geographical perspectives on gender, occupation, ethnicity, age, disability, poverty, health, and sexuality are emphasized. Prerequisite: 9.0 university credits including 1.0 GEOG and/or ERST credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3760H - The Geography of Beer

Overview

Department(s)
Geography, Canadian Studies, Business, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Business - Not Set, Environment - Not Set

Cross-Lists
ADMN-3760H, CAST-3760H, ERST-3760H, SAFS-3760H

Course Description
Designed around a term-long research project, this course explores themes such as tourism, built heritage, and post-industrial design associated with the production of craft beer. Students learn how to examine land-use patterns, built form, and branding techniques in one locale. Emphasis is placed on in-class participation and experiential learning. Prerequisite: GEOG-ERST 2510H, GEOG-CAST 2710H, ADMN 2080H, or SAFS 1001H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3790H - Exploring the City

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
ERST-3790H

Course Description
This course explores the practice of sustainable urban planning though experiential learning. During the field work component, students meet urban planning professionals, research site-specific planning projects, and apply the tools and methods of urban planning to a project-based final research report. Prerequisite: 9.0 university credits including 1.0 GEOG and/or ERST credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3820H - Health Geography

Overview

Department(s)
Geography, Nursing

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Nursing - Not Set

Cross-Lists
NURS-3820H

Course Description
Studies the relationships between health, place, and space. Traditional perspectives on the spatial dimensions of diseases, health inequalities, and health care services ("medical geography") and contemporary place-based perspectives on health, care, and well-being ("health geography") are examined with specific reference to global trends, vulnerable populations, and (un)healthy environments. Prerequisite: One of GEOG-CAST 2710H or 2810H; or a minimum 60% in all required 1000- and 2000-level NURS courses; or BIOM 1000H and PHIL 2390H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3860H - Field Research in Geography

Overview

Department(s)
Geography

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%

Course Description
Recommended for all Geography majors. Students learn the skills for writing research proposals and project design, and design and carry out research projects in various geographical specializations. Centres on a mandatory field trip during the Reading Week--a minimum of six days in the field at cost to the student. Prerequisite: 9.0 university credits including GEOG 1030H; one of GEOG 1040H or 1060H; and two of GEOG 2080H, 2090H, or 2510H.

0.5

GEOG3890H - Placement Course

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%,
Geography - Not Set

Course Description
A placement experience with a government agency, industry, or non-governmental agency, or related laboratory or work unit, on themes and principles learned during coursework associated with the Environmental & Resource Science/Studies, Geography, or Sustainable Agriculture & Food Systems programs in the School of the Environment. Students work closely with the instructor and placement host to determine deliverables that will be presented to various stakeholders as technical report(s) and/or presentation(s). Course is graded on a pass/fail basis. Prerequisite: A minimum cumulative average of 75% and 9.0 university credits including 4.0 GEOG credits.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG3900Y - Reading Course

Overview

Department(s)
Geography

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%

Course Description
A research course on a specific topic. Open only to Geography majors or joint-majors. Prerequisite: 9.0 university credits and a minimum average of 75% in GEOG courses. Written permission must be obtained from supervising instructor and the TSE director before registration.

Academic Level
Undergraduate

Credit Value

GEOG4010Y - Honours Thesis

Overview

Department(s)
Geography

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%

Course Description
Design, implementation, and dissemination of a major research project in human or physical geography featuring independent work under the supervision of a faculty supervisor. GEOG 4020D is a double credit in Geography. GEOG 4010Y is a single credit because the same thesis is submitted to the other program in a joint-major. Prerequisite: 14.0 university credits and a minimum average of 75%. Students must find a faculty member who is agreeable to supervise their project. Applications are available from the TSE office, and should be submitted in the academic year before enrolment in the course. Not open to students with credit for GEOG 4030Y or 4830Y.

GEOG4043H - Windy Pine Summer Institute

Overview

Department(s)
Canadian Studies, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Environment - Not Set, Geography - Not Set

Cross-Lists
CAST-4043H, ERST-4043H

Course Description
This residential field course, based out of the Windy Pine Conference Centre, is a multi-faceted exploration of the Haliburton Highlands bioregion. Insights will be drawn from anthropology, documentary film, ecology, geography, geomorphology, history, Indigenous studies, literature, ornithology, and visual art. Prerequisite: One of CAST-ERST-GEOG-INDG 2041H, CAST-ERST-GEOG-INDG 2042H, CAST-EDUC-ERST-GEOG 2043H, or CAST-EDUC-ERST-GEOG 2044H, and permission of the instructor.

GEOG4060H - The Geochemistry of Natural Waters

Overview

Department(s)
Geography, Biology, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Biology - Not Set, Environment - Not Set

Cross-Lists
BIOL-4060H, EGEO-4060H, ERSC-4060H, WASC-4060H

Course Description
Examines the chemistry of freshwater systems. Chemical and physical processes that lead to changes in water quality are discussed. The emphasis is on the concentrations and distributions of contaminants. Topics include watershed contributions of chemicals, acidification and the carbonate system, weathering, redox chemistry, trace metals, and synthetic organic contaminants. Prerequisite: ERSC 2230H or ERSC-CHEM 2620H.

GEOG4070H - The Fate of Contaminants in the Aquatic Environment

Overview

Department(s)
Environment, Geography, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set, Biology - Not Set

Cross-Lists
BIOL-4070H, EGEO-4070H, ERSC-4070H, WASC-4070H

Course Description
Discusses approaches to predicting the fate of contaminants in aquatic systems. Basic assumptions and algorithms of fate models for toxic metals and organic xenobiotics are examined and students get hands-on experience in applying recent models to case studies. Prerequisite: ERSC-GEOG-BIOL 4060H.

Academic Level
Undergraduate

GEOG4080H - Hydrogeology

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
EGEO-4080H, WASC-4080H

Course Description
Examines the nature, occurrence, and movement of water in soil and groundwater systems. Physical and chemical aspects of groundwater are addressed, and the use of field techniques and mathematical models in the study of groundwater movement and contamination are emphasized. Prerequisite: 9.0 university credits including GEOG-EGEO-ERSC 3530H. Strongly recommended: Grade 12U Calculus and Vectors.

GEOG4090H - Geosystems

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Course Description
A capstone course for students interested in the environmental earth sciences. Introduces systems analysis, model parameterization, calibration and sensitivity. The wind tunnel is profiled as a hardware model. Students experiment with various forms of models in exploring the effects of disturbance and readjustment within selected geosystems. Prerequisite: GEOG-BIOL-ERSC 2080H and 2.0 GEOG Category B credits.

GEOG4130H - Global Cities and Social Justice

Overview

Department(s)
Global Justice & Development, Geography

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Geography - Not Set

Cross-Lists
GDST-4130H, HURI-4130H

Course Description
An examination of cities and urbanization in a global context. Explores the metropolis and the global economy, urban inequalities, poverty, work, violence, marginalization, housing, the environment, and urban struggles. Comparative case studies are used. Prerequisite: 14.0 university credits including 1.0 GDST, HURI, and/or GEOG credit at the 2000 level. Equivalent to IDST 4130H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG4140H - Climate and Energy Policy

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
ERST-4140H

Course Description
An interdisciplinary inquiry into social, political, institutional, and technical change as it relates to climate and energy policy. Themes for inquiry include policy and technology innovation and low-carbon energy transitions. Efforts are made to translate theory into practical action and intervention through community-based study. Prerequisite: One of GEOG 2460H, ERSC 2300H, ERST 2100H, 3120H, or 3250H. Equivalent to ERST 4130H.

Academic Level
Undergraduate

Credit Value

GEOG4270H - Nutrient Cycling in Ecosystems For Sustainable Agriculture

Overview

Department(s)
Environment, Biology, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Geography - Not Set

Cross-Lists
BIOL-4270H, ERSC-4270H, SAFS-4270H

Course Description
Examines plant nutrition, soil fertility, and fertilizer management, with a focus on essential macronutrients. Topics include biogeochemical cycling of nitrogen, phosphorus, potassium, calcium, magnesium, and sulphur in crop production. Sustainable management of nutrients for optimum productivity and minimum impact on the environment will be discussed. Prerequisite: SAFS-ERSC-GEOG 3560H.

Academic Level
Undergraduate

GEOG4555H - City, Economy, and Society

Overview

Department(s)
Political Studies, Canadian Studies, Geography

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Geography - Not Set

Cross-Lists
CAST-4555H, POST-4555H

Course Description
Focuses on contemporary issues facing Canadian cities in comparative perspective. It locates cities within the global circuit of capital, examines the ways in which cities are being reordered to enhance their global competitiveness and standing, and analyzes the effects of restructuring on communities and the struggles for social justice. Prerequisite: 14.0 university credits.

Academic Level
Undergraduate

Credit Value
:
0.5

GEOG4621H - The Critical Place of Law in Canadian Society

Overview

Department(s)
Canadian Studies, Political Studies, Geography

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Political Studies - Not Set, Geography - Not Set

Cross-Lists
CAST-4621H, POST-4621H

Course Description
An exploration of the critical places and spaces of law in the making of Canadian identity. Discusses issues such as treaties and rights under the law and within Canadian society. Prerequisite: 14.0 university credits. Not open to students with credit for CAST-GEOG-POST 3621H.

Academic Level
Undergraduate

Credit Value

:
0.5

GEOG4640H - Integrated Watershed Management: Approaches and Methods

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
ERSC-4640H

Course Description
Integrated ecosystems management is the focus of this course. It deals, first, with the methodological and practical aspects of watershed assessment, planning, decision-making, and management. Then, it examines comparatively the management of watersheds in the developing world, introducing students to strategies for planning and managing watersheds through case studies. Prerequisite: 9.0 university credits including GEOG-EGEO-ERSC 2090H.

GEOG4703H - Senior Seminar in Earth and Environmental Science

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
ERSC-4703H, SAFS-4703H, WASC-4703H

Course Description
Students examine the fundamental concepts of scientific research, including the role of research in managing environmental issues. A range of topics will be covered through guest seminars, group discussions, and an individual research project. In the project, students evaluate the scientific literature on an emerging environmental issue of their choosing. Prerequisite: 14.0 university credits including 4.0 ERSC, ERST, GEOG, SAFS, and/or WASC credits.

GEOG4830Y - Community-Based Research in Geography

Overview

Department(s)
Geography

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%

Course Description
Design, implementation, and dissemination of a major research project in applied human or physical geography with an emphasis on community-based research. Requires independent or team-based research, either through a placement arranged by the Trent Community Research Centre at the request of a community group, government agency or business, or under the auspices of the Geography Program. Prerequisite: 14.0 university credits including 2.0 GEOG credits from Category A and/or B and a minimum cumulative average of 75%. Open only to students pursuing a single- or joint-major Honours degree in Geography. Not open to students with credit for GEOG 4010Y, 4020D, or 4030Y.

GESO1001H - Thinking About Gender & Social Justice

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
Exploring social media, art, law, literature, and protest, this course draws connections between histories and the contemporary moment through the lens of gender and social justice. Examines the social construction of sex and gender in relation to race, class, disability, and sexuality, and challenge assumptions about feminism and human inequality. Equivalent to WMST 1001H.

Academic Level
Undergraduate

0.5

GESO1002H - Gender and Social Justice Matters

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
Considers gender, sex, and bodies in relation to contemporary challenges facing our world, both in North America and abroad. Through issues including media, popular culture, violence, sexuality, health, poverty, and globalization, we explore diverse women's experiences and gender relations, and evaluate multiple pathways toward gender and economic justice for everyone. Equivalent to WMST 1002H.

0.5

GESO2002H - Health Humanities

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
Health humanities explores how the arts and media illuminate aesthetic, ethical, political, and contextual elements of health in everyday life, including but going beyond clinical encounters. With context in mind, students learn how humanities epistemologies enrich understandings of concepts central to health, such as diagnosis, disease, discrimination, and disability. Prerequisite: 3.0 university credits. Equivalent to UNIV 2002H.

GESO2141H - Discovering Feminist Thought

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
How have feminists conceptualized social justice, especially as connected to struggles for social change? This course explores some of the key historical and contemporary feminist theories, inviting debate about the many different ways that feminists have explained and analyzed social inequalities, imagined alternatives, and strategized for social gender justice. Prerequisite: 4.0 university credits including 0.5 GESO or WMST credit at the 1000 level, or permission of instructor. Equivalent to PHIL 2141H, WMST 2141H.

Academic Level
Undergraduate

GESO2171H - Making for Justice: Creative Workshop

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
A project/practice-based class engaging with artists who play outside the canon and creative makers who challenge systemic injustices. Students create work exploring how to use creative practice to engage and reimagine justice-seeking research questions, collective histories, and possible futures. This course revels in the rough draft, experimentation, dissent, and celebration. Prerequisite: GESO 1001H (or WMST 1001H).

GESO2183H - (Un)making Men: Intro to Masculinity

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
What makes a man? Does masculinity have an inherent, fixed quality or does it change over time? This course examines the social construction of masculinity and traces how masculine identities, actions, and experiences circulate in, and are structured by, diverse economic and political contexts, social conventions, and cultural spaces. Prerequisite: GESO 1001H and 1002H.

0.5

GESO2251H - Gender, Human Rights, and Development

Overview

Department(s)
Global Justice & Development, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Gender & Social Justice - Not Set

Cross-Lists
GDST-2251H, HURI-2251H

Course Description
An analysis of the intersectional gender relations that shape political, socio-economic, and cultural issues and struggles for sustainable development across the globe. Introduces students to feminist political economy and ecology frameworks and pathways to gender justice and human rights. Prerequisite: 0.5 HURI, GDST, IDST, GESO, WMST, or POST credit at the 1000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO2410H - The Revolution Will Be Recorded: Popular Culture, Gender, and Social Movements

Overview

Department(s)
Gender & Social Justice, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Media Studies - Not Set

Cross-Lists
MDST-2410H

Course Description
Examines the role of popular culture in various forms--including live theatre, music, fashion, film, and television--within Canadian and American social movements of the twentieth century that sought to reimagine gender. Emphasizes the role of race, class, sexuality, ability, and medium in the production and consumption of protest cultures. Equivalent to WMST 2410H.

Undergraduate

Credit Value

:
0.5

GESO2430H - Sociology of Gender

Overview

Department(s)
Sociology, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Gender & Social Justice - Not Set

Cross-Lists
SOCI-2430H

Course Description
Focuses on gender as a core aspect of social organization and inequality. Key concepts are gender, femininity, masculinity, sexuality, homosexuality, heterosexuality, and queer. Naturalist ideas and sociological analyses developed within feminism and lesbian and gay theories are studied. Prerequisite: 60% or higher in SOCI 1002H or 0.5 GESO credit. Not open to students with credit for SOCI-WMST 3430H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO2465H - Introduction to Sexuality Studies

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
This course explores intimate aspects of life--bodies, genders, desires, identities--through a social justice lens. Students examine how sexual identities form, the fluidity of sexuality, and contested representations of sex, connecting them to issues of race, class, indigeneity, media, politics, and social power. Prerequisite: 4.0 university credits including 0.5 GESO credit at the 1000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value

GESO2487H - Decolonizing Feminisms

Overview

Department(s)
Gender & Social Justice, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Indigenous Studies - Not Set

Cross-Lists
INDG-2487H

Course Description
Looks at how contemporary feminisms can urgently turn to recognition and foregrounding of Indigenous Peoples and their voices across territories. With emphasis on Indigenous women and 2SQ people as creative makers, vibrant thinkers, and vital members of our communities, we examine Indigenous/feminist acts of resistance, resilience and resurgence. Prerequisite: GESO 1001H (or WMST 1001H). Equivalent to WMST 2487H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO2520H - Women in the Ancient World, 700 BCE-600 CE

Overview

Department(s)
Ancient Greek & Roman Studies, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, Gender & Social Justice - Not Set

Cross-Lists
AGRS-2520H

Course Description
Introduces students to the social and cultural presence, significance, and role of women in ancient Greece and Rome. Particular attention will be given to those few sources and evidence that offer a female perspective from these patriarchal societies, including literature, philosophical and medical treatises, law codes, and the visual arts. Prerequisite: 4.0 university credits. Not open to students with credit for AHCL-WMST 2310H or 2320H. Equivalent to AHCL 2520H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO2600Y - Documenting Canada

Overview

Department(s)
Canadian Studies, Gender & Social Justice, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Gender & Social Justice - Not Set, Media Studies - Not Set

Cross-Lists
CAST-2600Y, MDST-2600Y

Course Description
Documentary film, music, and poetry as modes of inquiry into contemporary Canadian life. Topics may include gender and the arts; community and memory; climate change and the "Anthropocene"; ecological ethics; the politics of indigeneity; cultural approaches to addiction and education; grief and emotional renewal. Prerequisite: 3.0 university credits. Students may take only one of CAST-GESO-MDST 2600Y or 2601H for credit.

0.5

GESO2711H - Acting Up! Feminism and History in Canada

Overview

Department(s)
Gender & Social Justice, Canadian Studies, History

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, History - Not Set

Cross-Lists
CAST-2711H, HIST-2711H

Course Description
An overview of the history of feminist ideas, strategies, and actions in Canada. We explore the diversity and distinctiveness of Canadian feminism at different historical moments, celebrating the strength and creativity of organized and individual forms of resistance, while also probing the complicated, difficult, and sometimes "messy" workings of feminism. Prerequisite: 4.0 university credits including 0.5 GESO, WMST, CAST, or HIST credit at the 1000 level, or permission of instructor. Equivalent to WMST 2711H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO2755H - Women in Canada: Women and the Arts

Overview

Department(s)
Canadian Studies, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Gender & Social Justice - Not Set

Course Description
Selected studies in Canadian women's artistic expression, exploring a variety of art forms and genres. Includes fiction about gender and the arts in Canada. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3021H - Discovering Social Justice Research

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
How can research be used as a tool for social change? This course teaches students how to design anti-oppressive, decolonial, and feminist research in collaboration with community organizations. With attention to a range of current social issues, students learn about the theory, ethics, and design of engaged research. Prerequisite: 7.0 university credits including GESO 2141H and 0.5 additional GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Equivalent to WMST 3021H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3022H - Researching Women's Lives

Overview

Department(s)
Gender & Social Justice, Nursing

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Nursing - Not Set

Course Description
Focuses on Institutional Ethnography (IE) as a feminist methodological practice that begins from women's standpoint--women's lives as they are actually experienced at the intersections of class and identity. Prerequisite: 1.0 GESO, WMST, and/or NURS credit at the 2000 level or beyond, or permission of the instructor. Equivalent to WMST 3022H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3031H - Doing Social Justice Research Making Social Change

Overview

Department(s)
Gender & Social Justice, Nursing

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Nursing - Not Set

Course Description
Builds on the theories and approaches learned in GESO 3021H. Students have opportunities to gain practical research experience and continue to explore the relationship between research and social justice. Prerequisite: GESO 3021H (or WMST 3021H). Equivalent to WMST 3031H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3050H - Philosophy, Gender, and Feminism

Overview

Department(s)
Philosophy, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Gender & Social Justice - Not Set

Cross-Lists
PHIL-3050H

Course Description
A study of philosophical concepts of gender, sex and sexuality, feminist critique, and developments in feminist philosophies. Prerequisite 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3052H - Race and Racialization

Overview

Department(s)
Gender & Social Justice, Sociology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Sociology - Not Set

Cross-Lists
SOCI-3052H

Course Description
Highlighting work by racialized and Indigenous women, this course explores contemporary themes within feminism about critical race theory, white supremacy, and anti-racist practice. Topics include intersections of racism with other systems of inequality, everyday and systemic racism, racial violence, whiteness and privilege, and feminist anti-racism responses. Prerequisite: 6.0 university credits including 1.0 GESO, SOCI, or WMST credit at the 2000 level, or permission of instructor. Not open to students with credit for GESO-SOCI 4052H.

Academic Level
Undergraduate

Credit Value

0.5

GESO3122H - Activists and Activisms: Social Justice and Decolonial Perspectives

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
A critical analysis of contemporary activisms, drawing upon diverse racial justice, climate justice, Indigenous sovereignty, border justice, feminist, and/or queer/trans justice scholars and activists. With attention to critical race, decolonial, and feminist scholarship, students learn alongside local change-makers and may participate directly in diverse activisms and ways of organizing. Prerequisite: 6.0 university credits including 1.0 GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO 4122H. Equivalent to WMST 3122H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3134H - Gender, Sports, and Social Justice

Overview

Department(s)
Gender & Social Justice, Kinesiology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Kinesiology - Not Set

Cross-Lists
KINE-3134H

Course Description
Undertakes a socio-cultural analysis of how gender, race, and sexuality shape the construction, configuration, and meanings of sports and athleticism. Examines professional and amateur sports and athletics as they are played and represented within the gender binary and beyond, engaging with pertinent questions related to trans bodies, disability, aging, settler colonialism, etc. Prerequisite: 8.0 university credits.

Academic Level
Undergraduate

Credit Value

:

0.5

GESO3150H - Troubling Trans: Trans Cultures, Theories, and Resistance

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
Explores the ways trans and gender diverse bodies intersect with questions of queerness, feminism, nationalism, colonialism, citizenship, criminalization, race, and capital. What strategies of representation and resistance do trans communities engage in as part of their work of imagining and enacting freedom? Prerequisite: 1.0 GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO 4150H. Equivalent to WMST 3150H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3151H - Transnational Sexualities

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
How does sexual and gendered difference map on to cultural, racial, and national difference? This course considers how marginalized, transnational, and diverse forms of sexuality and/or gender expression shape, and are shaped by, discourses of (homo)nationalism and sexual citizenship, histories of race and racialization, indigenous contexts, neoliberalism, (im)migration and labour, sex work, and human rights. Prerequisite: 3.0 university credits including 0.5 GESO or WMST credit, or permission of instructor. Not open to students with credit for WMST 2161H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3161H - Gender and Colonialism

Overview

Department(s)
Gender & Social Justice, History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, History - Not Set, Canadian Studies - Not Set

Course Description
Examines gender disruptions and relations in the early colonial period of Canada's history. Students analyze how gender, together with class, race, and language, informed early relationships between Turtle Island's First Peoples, newcomers to this land, and the settler colonial state. Topics may include slavery, treaties, white settler societies, law, labour, education, and political and social organizing. Prerequisite: 1.0 GESO, WMST, and/or HIST credit with a minimum 60% grade, or permission of instructor. Not open to students with credit for GESO-HIST-CAST 3160Y or 4160Y. Equivalent to WMST 3161H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3162H - Modernizing Women: Twentieth-Century Canada

Overview

Department(s)
Gender & Social Justice, History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, History - Not Set, Canadian Studies - Not Set

Cross-Lists
CAST-3162H, HIST-3162H

Course Description
Focusing on Canadian women in the twentieth century, this course studies women's political organizing; feminism; women's experience of war; paid and unpaid work; immigrant experiences; sexuality; and modern colonialism. Emphasizes how class, race, language and culture create a diversity of women's histories that were both distinct, but always closely interrelated. Prerequisite: 1.0 GESO, WMST, and/or HIST credit with a minimum 60% grade, or permission of instructor. Not open to students with credit for GESO-HIST-CAST 3160Y or 4160Y. Equivalent to WMST 3162H.

GESO3220H - Gender, Society, and Space

Overview

Department(s)
Geography, Canadian Studies, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Gender & Social Justice - Not Set

Cross-Lists
CAST-3220H, GEOG-3220H

Course Description
Selected themes and topics examining the relationship between gender and spatial organization. Themes include the nature of domestic space; gendered use of public, private, and urban space; and the intersections between gender, sexuality, racism, and cultural difference. Prerequisite: 1.0 GEOG and/or GESO credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3250H - Queer Feminisms

Overview

Department(s)
Gender & Social Justice, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Culture, Arts, and Media - Not Set

Cross-Lists
CUST-3250H

Course Description
Students explore bodies, desires, relations, and culture through queer and feminist theories. We consider connections among queer feminist scholarship, personal experience, political struggle, and artistic expression. Gender, sexuality, transgression, and intersectionality are central to the inquiry and conversation. Prerequisite: 7.0 university credits including 0.5 GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO-CUST 4250H. Equivalent to WMST 3250H.

Overview

Department(s)
History, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Gender & Social Justice - Not Set

Cross-Lists
HIST-3333H

Course Description
Examines women's wartime and postwar lives in China, Korea, Japan, and Vietnam. While concerned with wars' brutal impacts, it also considers women's agency. The course explores how the intersections of gender, sexuality, race, and class shaped women's wartime experiences and interrogates how assumptions of gender shaped war and vice versa. Prerequisite: 4.0 university credits or permission of the chair.

GESO3400H - Feminism and Disability

Overview

Department(s)
Gender & Social Justice, Philosophy, Sociology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Philosophy - Not Set, Sociology - Not Set

Cross-Lists
PHIL-3400H, SOCI-3400H

Course Description
Introduces students to critical perspectives that push thinking about disability beyond medical and social models. Focuses on connections between gender and disability. Explores feminist challenges to ableism. Other topics include bodies, race, sexuality, education, creativity, access, eugenics, intersections, and austerity. Prerequisite: 6.0 university credits. Equivalent to WMST 3300H, 3400H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3431H - Growing Gap: Gender (In)Justice in Canada

Overview

Department(s)
Gender & Social Justice, Canadian Studies, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, Political Studies - Not Set

Cross-Lists
CAST-3431H, POST-3431H

Course Description
An intersectional feminist analysis of social welfare issues and policies in Canada. Focusing on topics including poverty, homelessness, childcare, and employment, we examine historical roots and contemporary contexts shaping the lives of women and marginalized groups bearing the brunt of the growing income gap and neoliberal threats to equality. Prerequisite: 6.0 university credits including 1.0 GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO-CAST-POST 4431H or 4430Y. Equivalent to WMST 3431H.

GESO3440H - Sexuality and the Social

Overview

Department(s)
Sociology, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Gender & Social Justice - Not Set

Cross-Lists
SOCI-3440H

Course Description
Explores sexuality as a complex issue in sociological analysis. Examines theoretical approaches to the body, gender, and sexuality, the construction of "normal" and "deviant" sexualities, and various forms of sexual regulation and resistance. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI and/or GESO at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3485H - Indigenous Women's Writing in Canada

Overview

Department(s)
Canadian Studies, Indigenous Studies, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Indigenous Studies - Not Set, Gender & Social Justice - Not Set

Course Description
An overview of fiction, poetry, and drama by Indigenous women writers publishing in Canada, with emphasis on the modern and contemporary period. Interpretive frameworks influenced by Western (Euro-Canadian) and Indigenous traditions, and used in this course, include but are not limited to feminist, literary, and anti-colonialist approaches. Prerequisite: 5.0 university credits. Not open to students with credit for CAST-INDG 3480Y.

GESO3609H - SickLit

Overview

Department(s)
Gender & Social Justice, English Literature

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, English Literature - Not Set

Cross-Lists
ENGL-3609H

Course Description
We read works that imagine disease, cure, and convalescence as gendered modes, asking how literature exposes pathologization and how authors rewrite illness beyond pathology. We focus on the regulation imposed by cultural and social understandings of "sickness" and the resistance posed by authors to medicalization. Prerequisite: 4.0 university credits.

0.5

GESO3625H - Gender-Based Violence: Reactions, Responses, and Responsibilities

Overview

Department(s)
Criminology, Gender & Social Justice, Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%, Gender & Social Justice - Not Set, Policing & Community Wellbeing - Not Set

Cross-Lists
CRIM-3625H, PLCW-3625H

Course Description
A critical look at gender-based violence as a political and legal construct. Topics may include missing and murdered Indigenous women, legalization debates regarding sexed work, hegemonic masculinities and violence. Prerequisite: 7.0 university credits including 60% or higher in CRIM 2616H or GESO 2141H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3651H - Crip Theory

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
Literary scholars and disability activists reclaimed the term "crip" to explore overlaps between queer and disability cultures in neoliberal contexts. The course considers the emergence and continued relevance of crip theories, including crip authorship, disability justice, critical accessibility, and crip making. Prerequisite: 8.0 university credits. Not open to students with credit for GESO 3651H.

Academic Level
Undergraduate

Credit Value

0.5

GESO3653H - (Mis)adventures in AI: Decolonial Dreaming

Overview

Department(s)
Gender & Social Justice, Artificial Intelligence, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Artificial Intelligence - Not Set, Media Studies - Not Set

Cross-Lists
AIST-3653H, MDST-3653H

Course Description
Drawing on developments in the field of AI, as well as representations in popular culture, students learn to both recognize discrimination, and understand how AI can be used as a tool for social and environmental justice. Critical approaches to artificial intelligence, including critical race, critical (dis)ability, feminist, queer, decolonizing, and ecological theories. Prerequisite: 1.0 GESO credit or AIST 1000H or 1.0 MDST credit, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3672H - Gender, Diversity, and Intersectionalities

Overview

Department(s)
Political Studies, Canadian Studies, Gender & Social Justice, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Gender & Social Justice - Not Set, Sociology - Not Set

Cross-Lists
CAST-3672H, POST-3672H, SOCI-3672H

Course Description
Examines issues of diverse intersectional gender identities and gender experiences, including Indigeneity, (dis)ability, race, class, LBTQ, and fat, and provides socio-political perspectives to understand activism, community building, and possibilities for socio-political and policy change. Prerequisite: 7.0 university credits including 1.0 POST, CAST, GESO, and/or SOCI credit at the 2000 level, or permission of instructor. Recommended: POST-CAST 2011H and/or 2012H. Not open to students with credit for POST-CAST-WMST 3670Y.

0.5

GESO3700Y - Writing the Body

Overview

Department(s)
English Literature, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%, Gender & Social Justice - Not Set

Cross-Lists
ENGL-3700Y

Course Description
Studies how literary production is influenced by gender and sexuality, with selected works from different genres and literary periods in English. Areas of study may include the female literary tradition, discourses in masculinities, and queer and trans-gendered narratives, among others. Prerequisite: 4.0 university credits. Students may take only one of ENGL-GESO 3700Y or 3701H for credit.

Academic Level
Undergraduate

Credit Value

:
1

GESO3701H - Writing the Body

Overview

Department(s)
English Literature, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%, Gender & Social Justice - Not Set

Cross-Lists
ENGL-3701H

Course Description
Studies how literary production is influenced by gender and sexuality, with selected works from different genres and literary periods in English. Areas of study may include the female literary tradition, discourses in masculinities, and queer and trans-gendered narratives, among others. Prerequisite: 4.0 university credits. Students may take only one of ENGL-GESO 3700Y or 3701H for credit.

GESO3704H - Queer Lit

Overview

Department(s)
English Literature, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%, Gender & Social Justice - Not Set

Cross-Lists
ENGL-3704H

Course Description
Examines literary and cultural representations of queerness through historical, theoretical, and aesthetic approaches. What does it mean for a text to be "queer"? How do sexual identities intersect with racial, ethnic, and religious ones? What can explorations of queerness as an identity category tell us about identity itself? Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

0.5

GESO3797H - Feminist Psychologies

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
Explores principles and practices of feminist psychology, theories of gender and sexual development, and the psychology of women. Focus is on feminist critiques of psychology and feminist contributions to psychology. Feminist relational, community, anti-colonial, and narrative approaches are emphasized. Prerequisite: 6.0 university credits including 1.0 GESO credit at 2000 level or beyond. Not open to students with credit for GESO-PSYC 3796H or GESO-PSYC 4796H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3820Y - Making Social Change

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
The Trent Community Research Centre makes available to students research placements with community organizations. Students gain practical research experience, supported by monthly group meetings with the course instructor, consultation with the TCRC and a representative of a community organization. For details, see Community-Based Research Program. Prerequisite: 10.0 university credits including GESO 3021H and a minimum 75% cumulative average. Equivalent to WMST 3820Y/3821H.

0.5

GESO3965H - Gender-Based Violence: Issues, Impacts, and Resistance

Overview

Department(s)
Gender & Social Justice, Criminology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Criminology - Not Set

Cross-Lists
CRIM-3965H

Course Description
Examines how gender-based violence impacts individuals, communities, and societies, and applies an intersectional lens to consider differences in experiences, interventions, and acts of resistance. This course assesses responses to gender-based violence at the community, institutional, and policy levels, and critically reflects on strategies required to make change. Prerequisite: 6.0 university credits including GESO 1001H.

Academic Level
Undergraduate

Credit Value

:
0.5

GESO3966H - Criminalizing Women

Overview

Department(s)
Gender & Social Justice, Canadian Studies, Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, Sociology - Not Set, Criminology - Not Set

Cross-Lists
CAST-3966H, CRIM-3966H, SOCI-3966H

Course Description
A criminological analysis of women in trouble from early to late modernity to the present moment, with specific analysis of the disciplining and incarceration of cisgender women and trans women. Focuses on the Canadian criminal justice system, with analysis of its racist, colonial, patriarchal, homophobic, ableist legacies. Prerequisite: 1.0 GESO, WMST, CAST, CRIM, and/or SOCI credit, or permission of instructor. Equivalent to WMST 3966H.

CUST-4250H

Course Description
Students explore bodies, desires, relations, and culture through queer and feminist theories. We consider connections among queer feminist scholarship, personal experience, political struggle, and artistic expression. Gender, sexuality, transgression, and intersectionality are central to the inquiry and conversation. Prerequisite: 1.0 GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO-CUST 3250H. Equivalent to WMST 4250H.

GESO4351H - Black Lives Matter

Overview

Department(s)
English Literature, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%, Gender & Social Justice - Not Set

Cross-Lists
ENGL-4351H

Course Description
This course examines the Black Lives Matter movement within a history of social protest against state-sanctioned racial violence in the US. The course situates BLM within earlier civil rights movements and the "racial formations" (the prison industrial complex, racial justice activism, the Obama presidency) from which the movement emerged. Prerequisite: 4.0 ENGL credits (or permission of the department) or 1.0 GESO credit at the 2000 level or beyond. Not open to students with credit for ENGL 4301H in 2018-2019 or 2021-2022.

GESO4431H - Growing Gap: Gender (In)Justice in Canada

Overview

Department(s)
Gender & Social Justice, Canadian Studies, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, Political Studies - Not Set

Cross-Lists
CAST-4431H, POST-4431H

Course Description
An intersectional feminist analysis of social welfare issues and policies in Canada. Focusing on topics including poverty, homelessness, childcare, and employment, we examine historical roots and contemporary contexts shaping the lives of women and marginalized groups bearing the brunt of the growing income gap and neoliberal threats to equality. Prerequisite: 6.0 university credits including 1.0 GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO-CAST-POST 3431H or WMST-CAST-POST 4430Y. Equivalent to WMST 4431H.

GESO4551H - Gender and Disability in Canada

Overview

Department(s)
Canadian Studies, Sociology, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Sociology - Not Set, Gender & Social Justice - Not Set

Cross-Lists
CAST-4551H, SOCI-4551H

Course Description
Explores how difference--especially who is labelled "different"--changes according to social, political, and cultural factors and interests. Students focus on disability and its intersection with other identity-based categories, including gender, race, and sexuality. Readings come from Canadian literature and film, critical theory, social policy, and the mass media. Prerequisite: 14.0 university credits. Not open to students with credit for CAST-SOCI-WMST 4550Y.

Academic Level
Undergraduate

GESO4630H - Advanced Seminar in the Sociology of Gender

Overview

Department(s)
Sociology, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Gender & Social Justice - Not Set

Cross-Lists
GDST-4630H, SOCI-4630H

Course Description
Examines intersections of gender with "race," ethnicity, sexuality, and class. The implications of intersectional perspectives for how we understand gender equality strategies and outcomes are considered. Specific topics will be determined yearly and may be different in Peterborough and Durham. Prerequisite: 10.0 university credits, including one of SOCI-GESO 2430H or 3440H, and 2.0 credits at the 3000 level; or permission of instructor. Equivalent to SOCI-WMST 4610H.

GESO5000H - Social Justice Research Practice: Feminist, Decolonial, Queer, Crip, and Critical Race Methodologies

Overview

Department(s)
Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%

Course Description
This course explores anti-oppressive approaches to knowledge production and analysis. The course is designed to support students to develop their own primary or secondary research (thesis, MRP or otherwise) through a lens of feminist, decolonial, queer, crip, and/or critical race epistemologies and methodologies. Core questions include: How has research been used as a tool for social change? How can research be designed to reveal or obscure systems of power and inequality? How can research resist the erasure of some knowledges within academia, and why is it important to raise critical questions about what knowledges are deemed credible? How do we work toward accountability and remain critical of existing relations of power as anti-oppressive researchers in uncertain times? This course can be taken as an elective or as the foundation for Trent's Collaborative Graduate Specialization in Gender and Social Justice (previously Feminist and Gender Studies).

Credit Value

:
0.5

HIST2080Y - Ordinary People in a Changing World

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
A look at how low-ranking Europeans experienced the dramatic transformation wrought by everything from the Protestant Reformation to the French Revolution. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
1

HIST2091H - The History of Childhood

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Investigates shifting concepts and experiences of childhood in Europe and North America from the Middle Ages to the Cold War. This course helps students to question some modern-day assumptions of the inherent 'nature' of childhood that guide parents, educators, and policymakers. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST2101H - War and Society Before 1800

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Explores how war has shaped and been shaped by society in the period before 1800. Specific case studies are chosen by the instructor. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST2102H - War and Society After 1800

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Explores how war has shaped and been shaped by society in the period after 1800. Specific case studies are chosen by the instructor. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST2103H - Approaches to Ancient Historians

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
AGRS-2103H

Course Description
An introduction to historiography between Archaic Greece and the late Roman Empire, examining both the history of this period and its construction by ancient writers. Prerequisite: 4.0 university credits. Not open to students with credit for AHCL 2102H or 2105H.Equivalent to AHCL 2103H.

HIST2471H - Introduction to Latin America

Overview

Department(s)
History, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Global Justice & Development - Not Set

Cross-Lists
GDST-2471H

Course Description
Topics include Indigenous resistance, colonial domination, slavery, independence, neo-colonialism, nation building, dictatorship, and revolutionary change. Prerequisite: 3.0 university credits or permission of the chair. Equivalent to IDST 2471H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST2520H - A History of Happiness

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Did medieval peasants, fifth-century Buddhists, and nineteenth-century coal barons have a definition of happiness? This course surveys how humans have defined and pursued happiness from ancient Greece to the present day, and considers how relative wealth, race, and inequality affect humans' pursuit of the good life. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST2601H - Public Health and Medicine: Doctors, Nurses, and Patients in History

Overview

Department(s)
History, Sociology

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Sociology - Not Set

Cross-Lists
SOCI-2601H

Course Description
Medicine is simultaneously scientific and social. What gets defined as a disease? Who heals? Who can access health care? Such questions reveal how political, cultural, and economic forces have shaped medicine throughout history. We explore topics highlighting this interaction between the scientific and the social in a variety of historical contexts. Prerequisite: 2.5 university credits or permission of the chair.

0.5

HIST2711H - Acting Up! Feminism and History in Canada

Overview

Department(s)
Gender & Social Justice, Canadian Studies, History

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, History - Not Set

Cross-Lists
CAST-2711H, GESO-2711H

Course Description
An overview of the history of feminist ideas, strategies, and actions in Canada. We explore the diversity and distinctiveness of Canadian feminism at different historical moments, celebrating the strength and creativity of organized and individual forms of resistance, while also probing the complicated, difficult, and sometimes "messy" workings of feminism. Prerequisite: 4.0 university credits including 0.5 GESO, WMST, CAST, or HIST credit at the 1000 level, or permission of instructor. Equivalent to WMST 2711H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST2751H - The Rise and Fall of Ancient and Imperial East Asia

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
This course provides an overview of Chinese, Korean, and Japanese societies until the late nineteenth century. Emphasizing regional dynamism, innovations, and development, this course counters the Orientalist notion of a static, 'traditional' Asia. Students will critically analyze, research, and write about the socio-political and military interactions that shaped East Asia and the West. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST2752H - East Asia in War and Revolution - Nineteenth to Twentieth Centuries

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Examines the political and social developments of China, Japan, and Korea from the late nineteenth century onward. While the course explores how East Asians responded to the challenge of the rising West, it also focuses on the internal dynamics of these societies which resulted in wars and revolutions. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST2801H - Film and History

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Explores the intersections between film and history.
Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST2805H - Green Screen: Film and Environmental History

Overview

Department(s)
History, Environment, Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Environment - Not Set, Culture, Arts, and Media - Not Set, Media Studies - Not Set

Cross-Lists
CUST-2805H, ERST-2805H, MDST-2805H

Course Description
Considers feature, documentary, animated, and activist films that engage with critical environmental issues. Topics include popular portrayals of animals and endangered species; histories of environmental injustice; the development of environmentalism; the role of storytelling in history, science, and culture; and the challenges of depicting climate change and the Anthropocene. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

Overview

Department(s)
History, Environment

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Environment - Not Set

Cross-Lists
SAFS-2821H

Course Description
Explores how and why foodways have changed in North America and Europe between 1800 and the present. It allows students to draw links between global questions and everyday life, gender and politics, and social class and health, while introducing various methods of historical inquiry. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST2831H - The Politics of Sport in the Modern World

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Explores the intersections of sport and politics across different regions and time-periods. Draws on historical and other sources to consider how sports have been used to advance political projects and agendas. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST2832H - Sports Cultures in the Modern World

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Uses sport as a prism through which to approach a range of cultural problems over the past century in societies around the world. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3010Y - Everyday History

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-3010Y

Course Description
A behind-the-scenes history of everyday life in Canada, exposing the complex histories of such common activities as drinking, barbecuing, gambling, and sex. The course emphasizes the "otherness" of previous moments in time as a way to foster an awareness of the contingency of our current historical moment. Prerequisite: 6.0 university credits. Students may take only one of HIST-CAST 3010Y or 3011H for credit.

Academic Level
Undergraduate

Credit Value

HIST3022H - French Canada and Quebec Since 1890

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-3022H

Course Description
Provides a detailed investigation of the history of French Canada and Quebec since 1890. It covers numerous political transformations as well as economic, social, and cultural developments that transformed, modernized, and liberalized French-Canadian nationalism, collective identity, and attitudes. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3030Y - History of Night

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
An introduction to contemporary approaches to cultural history through an investigation of witchcraft, crime, sexuality, entertainment, and other themes related to the dark side of human experiences. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
1

HIST3061H - Trudeau's Canada

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-3061H

Course Description
Examines the first Trudeau era and its enduring legacy vis-à-vis Canadian politics, culture, and society. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST-CAST 4061H. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3071H - Public History

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-3071H

Course Description
The art of bringing history to a wider public. This course explores issues of memory, commemoration, heritage preservation and interpretation that face historic sites, museums, heritage societies, and archives in Canada and throughout the world. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST-CAST 4071H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3073H - Public History in a Digital World

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
An exploration into our digital world and how we use it to understand the past. From the examination of digitized and born-digital records to the analysis of websites and e-publications, students will become familiar with the various aspects of historical research, creation, and public diffusion in an electronic environment. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3103H - Ancient Warfare

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
AGRS-3103H

Course Description
An in-depth study of the practice of ancient warfare from the Bronze Age to the Arab Invasions. Themes examined for each era include logistics, recruiting, intelligence, strategy, and naval warfare. Prerequisite: 8.0 university credits. Equivalent to AHCL 3101H, 3103H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3104H - The Environment in Ancient History

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
AGRS-3104H

Course Description
Focuses on the concepts and methods used by ancient historians to investigate human interactions with the ancient Mediterranean environment. Demography, food supply, agriculture, disaster, disease, and climate are examined not only as described by ancient writers, but also as analyzed by modern historians of the ancient Mediterranean. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3121H - The United States Since 1945

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Explores the cultural, political, and social history of the United States from 1945 to the present. Topics include Cold War culture and the Vietnam War; civil rights, antiwar, and feminist movements; popular culture; and the history of political ideas, from liberalism and radicalism to conservatism and neoliberalism. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3130H - The Augustan Principate and Its Origins, 44 BCE-14 CE

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
AGRS-3130H

Course Description
A study of the political, administrative, social, and cultural history from the assassination of Julius Caesar to the death of Augustus, with special attention paid to the ancient sources. Prerequisite: 4.0 university credits. Equivalent to AHCL 3130H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3150Y - Culture and Politics in the International History of the United States, 1900-1989

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
During the twentieth century, the United States emerged as a predominant world power. Course themes include the empire and expansionism; revolutionary struggle in Latin America, Asia, and Africa; ideological confrontation with the Soviet Union and China; and the impact of rapid cultural and social change in the United States on its international positions. Prerequisite: 4.0 university credits or permission of the chair. Students may take only one of HIST 3150Y, 3151H, 4150Y, or 4151H for credit.

Academic Level
Undergraduate

Credit Value

:

HIST3161H - Gender and Colonialism: Canada Before the Twentieth Century

Overview

Department(s)
Gender & Social Justice, Canadian Studies, History

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, History - Not Set

Cross-Lists
CAST-3161H, GESO-3161H

Course Description
Examines gender disruptions and relations in the early colonial period of Canada's history. Students analyze how gender, together with class, race, and language, informed early relationships between Turtle Island's First Peoples, newcomers to this land, and the settler colonial state. Topics may include slavery, treaties, white settler societies, law, labour, education, and political and social organizing. Prerequisite: 1.0 GESO, WMST, and/or HIST credit with a minimum 60% grade, or permission of instructor. Not open to students with credit for GESO-HIST-CAST 3160Y or 4160Y. Equivalent to WMST 3161H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3162H - Modernizing Women: Twentieth-Century Canada

Overview

Department(s)
Gender & Social Justice, History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, History - Not Set, Canadian Studies - Not Set

Cross-Lists
CAST-3162H, GESO-3162H

Course Description
Focusing on Canadian women in the twentieth century, this course studies women's political organizing; feminism; women's experience of war; paid and unpaid work; immigrant experiences; sexuality; and modern colonialism. Emphasizes how class, race, language and culture create a diversity of women's histories that were both distinct, but always closely interrelated. Prerequisite: 1.0 GESO, WMST, and/or HIST credit with a minimum 60% grade, or permission of instructor. Not open to students with credit for GESO-HIST-CAST 3160Y or 4160Y. Equivalent to WMST 3162H.

HIST3170H - Trump, Trudeau, Trees, Trade and Other Stuff: Contemporary Canada and the United States

Overview

Department(s)
History, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-3170H

Course Description
How do we understand our complex and quickly changing twenty-first century world? This course examines contemporary issues in Canada and the United States in historical perspective by utilizing flashpoint issues, individuals, and events to explain longer trends and developments within a continental, cross-border analytical framework. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3171H - Alexander the Great and His Age

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
AGRS-3171H

Course Description
Offers both a survey of the life and deeds of Alexander and an examination of the background, the ancient sources (studied in English), and modern assessments. Prerequisite: 4.0 university credits. Equivalent to AHCL 3170H, 3171H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3181H - The Age of Constantine

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
AGRS-3181H

Course Description
The "New Roman Empire" of Diocletian and Constantine, the emergence of Christianity as the state religion under Constantine, the foundation of Constantinople, and the Gothic Wars of Theodosius I. Prerequisite: 4.0 university credits. Not open to students with credit for AHCL 3120H or AHCL-HIST 3180H. Equivalent to AHCL 3181H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3182H - The Age of Attila

Overview

Department(s)
Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, History - Not Set

Cross-Lists
AGRS-3182H

Course Description
The collapse of the Roman Empire in the West and its replacement by Germanic kingdoms; the survival of the Roman Empire in the East and the birth of Byzantine civilization. Prerequisite: 4.0 university credits. Not open to students with credit for AHCL 3120H or AHCL-HIST 3180H. Equivalent to AHCL 3182H.

Undergraduate

Credit Value

:
0.5

HIST3190H - Ancient Anatolia

Overview

Department(s)
Ancient Greek & Roman Studies, Anthropology, History

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, Anthropology - Not Set, History - Not Set

Cross-Lists
AGRS-3190H, ANTH-3190H

Course Description
A study of Anatolia in Antiquity. Topics include Lydian, Achaemenid, Seleucid, and Roman Empires, urbanism, roads, local languages and cultures, including Lycia, Isauria, and Pontus, as well as village life and cities such as Sagalassus, Ephesus, Sinop, and Euchaita. Prerequisite: 4.0 university credits. Equivalent to AHCL 3190H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3221H - State Religion in Ancient Greece and Rome

Overview

Department(s)
Anthropology, History, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, History - Not Set, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-3221H, ANTH-3221H

Course Description
Offers critical examination of the structure, function, and practices of official religion between the late Iron Age and the rise of monotheism in the late antique Mediterranean. Archaeological remains and ancient texts demonstrate how state-sponsored cults served to bind the populace and codify social and political behaviour. Prerequisite: 8.0 university credits including one of AGRS-HIST 2103H (or AHCL 2103H), ANTH-AGRS 2205H or 2206H. Equivalent to AHCL 3221H.

Academic Level
Undergraduate

Credit Value

0.5

HIST3222H - Mystery Cults and Restricted Rituals in the Ancient Mediterranean

Overview

Department(s)
Anthropology, Ancient Greek & Roman Studies, History

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Ancient Greek & Roman Studies - Not Set, History - Not Set

Cross-Lists
AGRS-3222H, ANTH-3222H

Course Description
In ancient Greece and Rome, exclusionary rituals and secretive initiation cults like those of Dionysos, Mithras, Isis, and Christianity overturned entrenched social norms and threatened the cohesion of the state. Archaeological and written evidence provide evidence for the origins, impact, and legacy of such practices in the ancient Mediterranean. Prerequisite: 8.0 university credits including one of AGRS-HIST 2103H (or AHCL 2103H), ANTH-AGRS 2205H or 2206H. Equivalent to AHCL 3222H.

Academic Level
Undergraduate

Credit Value

0.5

HIST3251H - The Soviet Experiment 1917-1939

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
This course examines the Soviet Union from 1917 to 1939 as a series of social, political, economic, and cultural experiments with a focus on the complexities and contradictions of these transformations. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST 3250Y.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3275H - Cultural Identity and Ancient North Africa

Overview

Department(s)
Anthropology, History, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, History - Not Set, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-3275H, ANTH-3275H

Course Description
By critically comparing archaeological and textual evidence with scholarly publications, we examine attitudes toward culture and self-identification in ancient North Africa (ca. 700 BCE-450 CE), as expressed by both ancient peoples and scholars of the past circa 150 years, a period of tremendous change in political and academic thought. Prerequisite: 6.0 university credits. Equivalent to AHCL 3275H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3301H - Twentieth-Century Germany

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
The political, social, economic, and cultural history of the modern German nation, with special emphasis on the eras of Wilhelmine Germany, the Weimar Republic, and the Third Reich. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST 3300Y.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3310Y - The Nazi Holocaust and Modern Culture

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Examines the Nazi program of mass-murder in the context of earlier and later genocides, with particular emphasis on questions of agency and complicity. Topics include Nazi eugenics and race policy, the culture of the concentration camps, the role of ordinary Germans, resistance, and the Holocaust in popular culture. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST 4310Y. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
1

HIST3320H - A History of Comparative Genocide

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
A history of comparative genocide that addresses the U.N. definition of genocide. The case studies include the examples of the Holocaust and the Cambodian, Rwandan, Armenian, Bosnian, and Ukrainian genocides; we study the historical conditions that led to genocide in each case, the actions of the perpetrators, and the suffering of ordinary peoples. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3330H - Japan, Pearl Harbor, and the Asia-Pacific War

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Why did Japan attack Pearl Harbor and provoke the Pacific War? This course locates causal factors in the history of Japan's imperialism and militarization and contextualizes these developments in larger global trends. Students will examine the wars impacts and legacies, engage critically with historical interpretations, and conduct analytical research. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3333H - Women Warriors and Heroic Mothers: Women and War in East Asia

Overview

Department(s)
History, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Gender & Social Justice - Not Set

Cross-Lists
GESO-3333H

Course Description
Examines women's wartime and postwar lives in China, Korea, Japan, and Vietnam. While concerned with wars' brutal impacts, it also considers women's agency. The course explores how the intersections of gender, sexuality, race, and class shaped women's wartime experiences and interrogates how assumptions of gender shaped war and vice versa. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3335H - First Nations and the Canadian State in the Twentieth Century

Overview

Department(s)
Canadian Studies, History, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set, Indigenous Studies - Not Set

Cross-Lists
CAST-3335H, INDG-3335H

Course Description
The relationship between First Nations and the Canadian state in the twentieth century. Topics include health, social welfare interventions, unemployment, population growth, community development, and education. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3351H - World War I

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Examines the First World War from a global perspective. Through assigned readings, written assignments, and online discussions, students examine topics ranging from military operations in all the major theatres to studies of the war's impact on the European and North American home fronts. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3355H - The Spanish Civil War

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
The Spanish Civil War (1936-1939) remains one of the most controversial and disputed conflicts in history. Was the Spanish Republic fighting for democracy against a tide of fascism that would soon swamp Europe? Did Franco save Spain from Stalinist communism? This class tackles these and other questions. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3361H - World War II

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
During the Second World War there were significant developments in military tactics and technology, but also in societal norms, ideology, and morality. This intensive course provides a detailed chronological-thematic overview of some of this conflict's most important themes, controversies, and historical debates. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST 3360Y or 4360Y.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3381H - Espionage and National Security in North America

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Examines the North American national-security state from the Cold War to the present, including domestic and foreign intelligence-gathering, state-sponsored espionage, surveillance, covert action and torture, propaganda, education, academic and medical research, dissidence and other subversive practices, and human rights. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST 4381H. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

0.5

HIST3390H - Creating Modern Capitalism: Cases in Global and Canadian Perspective

Overview

Department(s)
History, Business, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Business - Not Set, Canadian Studies - Not Set

Cross-Lists
ADMN-3390H, CAST-3390H

Course Description
Capitalism and globalization shape our world in profound ways. Utilizing a "glocal" approach that combines global and Canadian cases within a transnational context, this course seeks to interrogate and understand the evolution and development of modern capitalism and globalization from the late nineteenth century into the early twenty-first. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3401H - Southern Africa in the Nineteenth Century

Overview

Department(s)
History, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Global Justice & Development - Not Set

Cross-Lists
GDST-3401H

Course Description
An examination of major issues, including the gradual British colonial conquest of the Xhosa people in the Cape, the Boer trek into the interior, African military resistance to colonial expansion, and the impact of mineral discoveries. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3402H - Southern Africa in the Twentieth Century

Overview

Department(s)
History, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Global Justice & Development - Not Set

Cross-Lists
GDST-3402H

Course Description
Themes include the Union of South Africa in 1910, the development of African nationalism and trade unions, the rise of the Apartheid state from 1948, wars of liberation in Angola and Mozambique, the Rhodesian crisis, South Africa's campaign to destabilize the Frontline States in the 1980s, and post-Apartheid issues. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3430H - The History of Tyranny

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Explores the history of Western tyranny and democracy, from the Caesars of Ancient Rome, through Communism, Fascism and Nazism in the twentieth century, to the "spin dictatorships" of the twenty-first. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST 4430H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3480Y - Cuban-Canadian-US Relations

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Explores Canadian and American relations with the Republic of Cuba from the era of the Spanish-American war to the present. Special emphasis is given to the Castro era, and to the divergent North American attitudes and policies toward the Cuban revolution. Prerequisite: 4.0 university credits or permission of the chair. Students may take only one of HIST 3480Y, 3481H, 4480Y, or 4481H for credit. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
1

HIST3481H - Cuban-Canadian-US Relations

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Explores Canadian and American relations with the Republic of Cuba from the era of the Spanish-American war to the present. Special emphasis is given to the Castro era, and to the divergent North American attitudes and policies toward the Cuban revolution. Prerequisite: 4.0 university credits or permission of the chair. Students may take only one of HIST 3480Y, 3481H, 4480Y, or 4481H for credit. Offered only at Trent University Durham GTA.

Undergraduate

Credit Value

:
0.5

HIST3560Y - The Family in England, 1500-1900

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
A social history of the changes in family life in England wrought by the Reformation, the Renaissance, civil war, the Enlightenment, and industrialization. While focusing upon plebeian families, it considers broad legal and social trends that affected all families and all members of the English household, including extended family, servants, and apprentices. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST 4560Y. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
1

HIST3565H - Everyday Life of Common Soldiers in the Napoleonic Wars

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
A look at the recruitment, camp, and battlefield adventures of men in the ranks of the British Army from 1803 to 1815. The course encourages students to think about creative ways to understand the daily lives of soldiers through simulated experiential learning. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST 4565H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3570H - Great Canadian Debates

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Explores the history of post-World War II Canada, with special emphasis on popular debates that had enduring consequences for national unity, security, and prosperity. Prerequisite: 4.0 university credits. Not open to students with credit for HIST 4570H.

Academic Level
Undergraduate

Credit Value

HIST3620H - Freedom and Un-Freedom in Pre-Modern Europe

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Explores freedom and un-freedom in the pre-modern period: the changing concepts of absolute and partial freedom; religious, civic, and personal freedoms/liberties; tolerance freedom of conscience; restrictions based on age and gender, and on social and physical mobility; and the distinctions between the status of "free" and "unfree" persons. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3625H - Famine in Modern History

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Are famines inevitable? To what extent have modern famines been caused by social, political, and economic policies rather than food shortages? This course examines several case studies of famine in the nineteenth and twentieth centuries and the controversies surrounding them, from the Irish potato famine of the 1840s to Ethiopia in the 1970s. Prerequisite: 4.0 university credits or permission of the chair.

HIST3661H - The Roma People: From India to Canada, Fifteenth Century to Present

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
The course focuses on the cultural construction of the Roma that have contributed to the formation of group identity. Roma first appeared in Western Europe in the fifteenth century. They were known under many other appellations including English Romanichals, Spanish Cale, Welsh Kale, German Sinti, Bosnian Ludar, and Russian Kalderasha. Prerequisite: 4.0 university credits or permission of the Chair. Not open to students with credit for HIST 4661H.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3680H - A Brief History of Forensics

Overview

Department(s)
History, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Forensic Science - Not Set

Cross-Lists
FRSC-3680H

Course Description
Explores the history of forensic science as it intersects with the interests of law and trials, especially through the evidence of expert witnesses, new scientific tests, and developing forensic approaches to crime scenes. Allows students to explore the influences of modern consumerism and racial and imperial interests. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for FRSC 4312H. Not open to students in the single-major Forensic Science program.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3711H - The History of Incarceration

Overview

Department(s)
History, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Forensic Science - Not Set

Cross-Lists
FRSC-3711H

Course Description
Explores the history of incarceration from the 1700s to the early 2000s, focusing on institutions designed to segregate those labelled sick, deviant, or in need of reform, particularly in Canada. Through secondary and primary sources, the history of incarceration is studied from the perspective of authorities, the public, and inmates. Prerequisite: 4.0 university credits including 0.5 HIST credit or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3721H - Italy, Portugal, and Spain Since 1800

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Offers a trans-national vision of the past that explores the common social, economic, and political developments that took place in the nineteenth and twentieth centuries in Italy, Portugal, and Spain. It analyzes the often-overlooked yet very close similarities of those three countries' history. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3730H - The History of the Future

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Explores the centuries-old obsession among Western elites with the political, technological, and social future of humankind. Special emphasis on anti-capitalist and eco-doom dystopians including Thomas Malthus, Karl Marx, and Paul Ehrlich. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST 4730H. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3741H - Comics in History

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Examines the history of the comics medium, but also the representation of history, society, and culture in comics and graphic novels. Students critically read American and European comics and their secondary sources to analyze and evaluate comics' place and role in modern culture. Prerequisite: 4.0 university credits or permission of the chair.

Undergraduate

Credit Value

:
0.5

HIST3751Y - The History of Crime in England

Overview

Department(s)
History, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Forensic Science - Not Set

Cross-Lists
FRSC-3751Y

Course Description
A social history of crime between 1500 and 1900, from the perspective of the prosecutors and the courts as well as that of the criminals. Topics include witchcraft, sodomy, murder, theft, rape, and prostitution. Prerequisite: 4.0 university credits or permission of the chair. Not open to students with credit for HIST-FRSC 4751Y. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
1

HIST3752H - Caribbean Encounters

Overview

Department(s)
History

Contact Department ('not set' refers to cross-listed depts)
History - 100%

Course Description
Examines social and cultural conflicts that marked the history of the Caribbean during the colonial period. Topics include native societies, colonization, wars and conflicts, and plantation slavery during the early modern period. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

HIST3756H - The Environmental Crisis: From the Atomic Bomb to Global Warming

Overview

Department(s)
History, Environment

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Environment - Not Set

Cross-Lists
ERST-3756H

Course Description
A historical perspective on contemporary environmental problems, both within North America and around the globe. Topics include the impact of environmental thought; toxic threats to human health; landscape photography and media depictions of the environment; the rise of international environmentalism; and the current politics of global warming. Prerequisite: 4.0 university credits or permission of the chair.

Global Justice & Development - 100%, Sociology - Not Set, Criminology - Not Set, Political Studies - Not Set

Cross-Lists
CRIM-3115H, GDST-3115H, POST-3115H, SOCI-3115H

Course Description
An analysis of the concept of citizenship and rights and their role in social and political transformation. Includes social justice and citizenship struggles; critical perspectives on power and various citizenship regimes; and their implementation on national and global levels. Prerequisite: 7.0 university credits including 1.0 GDST/IDST, POST, and/or SOCI credit at the 1000 level and 1.0 GDST/IDST, POST, and/or SOCI credit at the 2000 level, or permission of instructor. Equivalent to IDST-CRIM-SOCI 3120H.

HURI3121H - Human Rights: Law and Institutions

Overview

Department(s)
Sociology, Criminology, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Criminology - Not Set, Global Justice & Development - Not Set

Cross-Lists
CRIM-3121H, GDST-3121H, SOCI-3121H

Course Description
This course examines the legal and institutional frameworks for protecting and promoting human rights at national and international levels. Students explore the main treaties, and the role of courts, tribunals, and other mechanisms in enforcing human rights standards. Prerequisite: HURI 2005H, HURI-GDST 2010H (GDST 2001H), GESO 2151H, POST 2232H, or SOCI 2110H, or permission of instructor.

HURI3150H - Global Migration

Overview

Department(s)
Global Justice & Development, Sociology, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Sociology - Not Set, Political Studies - Not Set

Cross-Lists
GDST-3150H, POST-3150H, SOCI-3150H

Course Description
An examination of the theoretical and conceptual debates that centre on the causes and consequences of international migration. Transnationalism, gender, citizenship, identity, social and spatial inequalities, labour markets, migrant livelihoods, politics, and social exclusion are all explored. Prerequisite: 7.0 university credits including 1.0 GDST/IDST, POST, and/or SOCI credit at the 1000 level and 1.0 GDST/IDST, POST and/or SOCI credit at the 2000 level or permission of instructor. Not open to students with credit for IDST 4120H. Equivalent to IDST 3150H.

HURI3200D - Community Field Placement Course - Trent in Bolivia

Overview

Department(s)
Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%

Cross-Lists
GDST-3200D

Course Description
The theory and practice of community-based development or rights advocacy with an extensive field placement. Only offered in Bolivia or Peru for students in the Trent in Bolivia Study Abroad Program.

Academic Level
Undergraduate

Credit Value

:
2

HURI3740H - The Politics of Legal Rights, Criminal Law, and the Canadian Judicial Process

Overview

Department(s)
Political Studies, Canadian Studies, Criminology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Criminology - Not Set, Sociology - Not Set

Cross-Lists
CAST-3740H, CRIM-3740H, POST-3740H, SOCI-3740H

Course Description
An exploration of the politics of the Canadian criminal process. Examines legal rights under the Charter of Rights and Freedoms and critiques of the inequities of the Canadian criminal justice system. Also looks at key political issues in the making of criminal law, its enforcement, and the criminal trial process. Prerequisite: 7.0 university credits.

HURI3881H - Gender, Globalization, and Resistance

Overview

Department(s)
Global Justice & Development, Political Studies, Gender & Social Justice, Sociology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Political Studies - Not Set, Gender & Social Justice - Not Set, Sociology - Not Set

Cross-Lists
GDST-3881H, GESO-3881H, POST-3881H, SOCI-3881H

Course Description
Focuses on how globalization is transforming intersectional gender dynamics that underpin relationships between and within states, markets, civil society, and households. Introduces students to feminist perspectives on the global political economy, focusing on specific issues such as international trade agreements, labour, security, migration, health, environment, and human rights. Prerequisite: 1.0 HURI, GDST (IDST), POST, GESO/WMST, or SOCI credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO-POST 4881H or WMST-POST 3880Y. Equivalent to IDST 3881H.

HURI4001H - Human Rights Honours Seminar

Overview

Department(s)
Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%

Course Description
This seminar brings students interested in human rights together to do advanced group and independent work. The seminar focuses on assessments, contestations, critiques, as well articulating alternative frameworks, and strategies for human rights. This seminar provides a cooperative setting for researching, writing, and presenting on student-driven group projects. Prerequisite: 14.0 university credits including POST 3605H or both HURI 2005H and 3121H, or permission of instructor.

Academic Level
Undergraduate

Credit Value

HURI4260H - Global Governance, Human Rights, and Social Justice

Overview

Department(s)
Global Justice & Development, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Political Studies - Not Set

Cross-Lists
GDST-4260H, POST-4260H

Course Description
Explores the relationship between global governance, human rights, and social justice in an interdependent world. Examines how major global institutions shape distributive outcomes and affect the protection or violation of rights. Using interdisciplinary scholarship, students analyze how governance structures reproduce inequalities and human rights frameworks are mobilized to contest them. Prerequisite: 14.0 university credits including 1.0 HURI, GDST, and/or POST credit at the 2000 level, or permission of instructor.

0.5

HURI4512H - Global Health and Human Rights

Overview

Department(s)
Global Justice & Development, Anthropology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Anthropology - Not Set, Sociology - Not Set

Cross-Lists
ANTH-4512H, GDST-4512H, SOCI-4512H

Course Description
This course examines key global health challenges of the twenty-first century and how global institutions respond to them. Drawing on public health, political economy, biopolitics, and human rights, it explores how health is shaped by structural inequalities, governance regimes, and rights frameworks that define access to care, state obligations, and accountability. Prerequisite: 14.0 university credits including 1.0 HURI, GDST, ANTH, and/or SOCI credit at the 2000 level or permission of instructor. Equivalent to IDST 4512H.

Academic Level
Undergraduate

Credit Value

ICAN5001H - Principles of Mass Spectrometry

Overview

Department(s)
Instrumental Chemical Analysis, Environmental & Life Sciences

Contact Department ('not set' refers to cross-listed depts)
Instrumental Chemical Analysis - 100%, Environmental & Life Sciences - Not Set

Cross-Lists
ENLS-5088H

Course Description
In this course, students will be taught the theory and operating principles of the mass spectrometers used in Trent University's Water Quality Centre and explore current applications in both organic and inorganic mass spectrometry. Special emphasis will be given to the practical application of mass spectrometry theory to enable students to effectively use the Water Quality Centre mass spectrometers in their graduate research.

ICAN5002H - Advanced Analytical Seperation Technique

Overview

Department(s)
Chemistry

Contact Department ('not set' refers to cross-listed depts)
Chemistry - 100%

Course Description
This course will consist of three blocks of material. In the first, students will learn about modern separation techniques that are not taught in the undergraduate Chromatography course (CHEM 3400) at Trent. In the second, students will become familiar with common problems encountered in routine chromatographic applications, and how to solve them. In the third block, students will be trained in the development and modification of routine chromatographic techniques.

ICAN5003H - Accreditation and Quality Mgmt Systems

Overview

Department(s)
Instrumental Chemical Analysis

Contact Department ('not set' refers to cross-listed depts)
Instrumental Chemical Analysis - 100%

Course Description
This course focuses on a broad understanding of quality management systems (QMS) in chemical laboratory operations to ensure quality control (QC) in laboratory practices. Accreditation, certification, analytical method validation, and implementation to ensure quality are covered. This course will equip students with competence and tools expected to be applied by quality officers and laboratory professionals working in laboratories or testing centres.

ICAN5004H - Statistical Analysis & Data Processing

Overview

Department(s)
Instrumental Chemical Analysis

Contact Department ('not set' refers to cross-listed depts)
Instrumental Chemical Analysis - 100%

Course Description
This course provides students with the knowledge required for the use of statistical methods of data analysis to address matters related to data processing and informed decision making. The importance of experimental design is also covered as an efficient approach to analytical method validation.

Academic Level
Graduate

Credit Value

:
0.5

ICAN5005H - Instrument Maintenance & Repair

Overview

Department(s)
Instrumental Chemical Analysis

Contact Department ('not set' refers to cross-listed depts)
Instrumental Chemical Analysis - 100%

Course Description
In this course, students will be taught the basic aspects of routine instrument maintenance and learn simple types of common repairs required for chromatographic and mass spectrometric instrumentation. Students will be familiarized with the fundamentals of several main relevant areas, including vacuum technology, ion optics, gas and liquid handling, instrumental electronics, and computer control of instrumentation. They will also learn how to assess the operational state of different parts of analytical instrumentation, and how to perform routine measures that maintain or restore this operational state. By the end of this course, successful students will be competent at performing routine maintenance tasks for chromatographic and mass spectrometric instrumentation, and will be able to attempt simple common repairs under the supervision of more experienced personnel (e.g. service technicians).

ICAN5110H - Troubleshooting Analytical Meth. & Inst.

Overview

Department(s)
Instrumental Chemical Analysis

Contact Department ('not set' refers to cross-listed depts)
Instrumental Chemical Analysis - 100%

Course Description
In this course, students learn strategies and approaches for troubleshooting analytical problems with a focus on high-tech instruments and instrumental methods. The course emphasizes systematic problem-solving, including problem investigation, isolation, confirmation, solution plan, and execution. Students gain experience in key analytical techniques such as spectroscopy, chromatography, mass spectrometry, texture analysis, and diffraction. They also learn how to collect, analyze, and interpret data from case studies for effective troubleshooting. By the end of the course, students will confidently identify instrumental and methodological issues and resolve them efficiently using a structured approach.

ICAN5121H - ICP-MS and LC-MS-MS

Overview

Department(s)
Instrumental Chemical Analysis

Contact Department ('not set' refers to cross-listed depts)
Instrumental Chemical Analysis - 100%

Course Description
In this course, students will be taught the theory and practical application of Inductively Coupled Plasma-Mass Spectrometry (ICP-MS) and Liquid Chromatography-Tandem Mass Spectrometry (LC-MS/MS). Students will cover several key areas of each technique. For LC-MS/MS, this will include electrospray ionization, optimization of ionization and chromatography parameters, fragmentation, quantitation techniques and quality assurance. For ICP-MS, this will include plasma generation, choice of sampler and skimmer cones, liquid sample introduction, calibration strategies and collision/ reaction cells. By the end of this course, successful students will be competent in the operation of a commercial ICP-MS and LC-MS/MS instrument and have experience of analytical method development for real-world samples.

ICAN5122H - Other Analytical Methods Overview

Overview

Department(s)
Instrumental Chemical Analysis

Contact Department ('not set' refers to cross-listed depts)
Instrumental Chemical Analysis - 100%

Course Description
This advanced course has been designed to study modern techniques commonly applied in qualitative analysis and chemical structure characterization of organic and inorganic substances. Several techniques will be discussed, namely IR spectroscopy, Raman spectroscopy, NMR spectroscopy, X-Ray spectroscopy, thermal analytics, and surface analysis. Mass spectrometry is a unique technique which has two dedicated courses in the MICA program (ICAN 5001 and ICAN 5121H), and therefore it is not discussed in this course. This course will provide students with an overview of the theory, instrumentation, and operating practice of each technique. Special emphasis will be given to the practical applications, and hands-on experience in operating each technique. Upon completion of the course, successful students will be familiar with the discussed techniques, and be able to apply their knowledge and skills to organic and inorganic qualitative analysis and chemical structure elucidation.

Interdisciplinary Social Rsrch, Arts Management

Contact Department ('not set' refers to cross-listed depts)
Interdisciplinary Social Rsrch - Not Set, Arts Management - 100%

Cross-Lists
ARTM 5000H

Course Description
The idea of the museum is inherently modern and brings with it many of the trappings of Western modern thought. This course explores the contemporary issues in curation and the possible ways to de-colonize galleries, museums, aesthetics and other Western systems of art (both physical and ideological). With curation as the focus, the course considers the discursive relationship between artists, theorists and curators, and the politics of contemporary curatorial spaces in a global, digital age.

IDSR6050H - Independent Reading & Research Course

Overview

Department(s)
Interdisciplinary Social Rsrch

Contact Department ('not set' refers to cross-listed depts)
Interdisciplinary Social Rsrch - 100%

Course Description
This course enables students to pursue topics of particular interests which are not presented in existing courses. It allows concentrated and integrated study on a topic or inquiry that is specifically relevant to a student's approved program. It also enables the student and instructor the opportunity to explore shared interests. The format of the course is designed by the student in consultation with the supervisor or supervisory committee. Written justification for the course must be made to the Program Director and must be arranged before registration for the course. The reading course is normally in the form of a literature review or a small research project.

IESS3731H - Understanding Indigenous Peoples' Health and the Environment

Overview

Department(s)
Environment, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Indigenous Studies - Not Set

Cross-Lists
ERST-3731H, INDG-3731H

Course Description
An introduction to the multidisciplinary field of environmental health and its application to understanding health among Indigenous peoples. Students gain an understanding of the concepts, theories, and methods used in environmental health. This course may be taken as a science credit by successfully undertaking an appropriate technical assignment. Prerequisite: One of ERSC 2240H, ERST-INDG 2601Y, or ERSC-INDG 2150H; or NURS 1000H, 1002H, and 1010H; or BIOM 1000H, PHIL 2390H, and 0.5 INDG credit. Not open to students with credit for ERSC/ERST-IESS-INDG 3730Y.

INDG6625H - Land Based Cultural Immersion Course

Overview

Department(s)
Indigenous Studies, Education

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Education - Not Set

Course Description
This graduate topics course is designed to facilitate engagement with an Indigenous language through a week long camp. Located in a culturally significant site, the course operates from the position that language provides a foundational framework for understanding the world. Students are not expected to be fluent in an Indigenous language but should have enough familiarity to work in a culturally immersive environment.Students will explore the connections between language and identity, worldview, orality, as well as recovery and revitalization. The week long camp will provide an immersive experience from which to think about the interplay between culture and language and how language can help us to understand the world better in a contemporary sense. Topics covered in the course include discussion of oral and writing systems, narrative and stories, performance, songs, chants, dances, conveyed through action (physical activities, movement, dancing, practices) that facilitate the development of positive relationships with the natural World(i.e. land, waters, trees, plants, animals, spiritual beings, ancestors etc.) This course is offered periodically.

Course Description
This graduate topics course is designed to facilitate engagement with an Indigenous language through weekend intensive cultural immersion. Located in culturally significant sites within the Kawarthas, the course will focus on language and culture as it relates to the fall cycle within the Natural World. Students will explore the connections between language and identity, worldview, orality, as well as recovery and revitalization. The intensive weekends will provide an immersive experience from which to think about the interplay between culture and language and how language can help us to understand the world better in a contemporary sense. This course is offered periodically.

INDG6630H - Special Topics Reading Course

Overview

Department(s)
Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%

Course Description
This is a reading course for students who have come from the Frost Centre Masters program and who took INDG 6603H at the MA level. Students are required to maintain the same course load as other students in the PhD cohort. This course will allow them to maintain the same course load with the option of taking a reading course that serves their particular need in the program.

INDG6700Y - Practicum Field Placement

Overview

Department(s)
Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%

Course Description
Students work with an Indigenous community or organization, with a focus on community or organizational needs. The practicum should be approximately 200 hours, either full-time (5 weeks) or part-time, 2 days per week and is normally carried out in the second year of study. Practicums should be completed by the end of the third year. Required of all students.

INDG6715H - Bimaadiziwin/ Atonhetseri:io

Overview

Department(s)
Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%

Course Description
This course is required for all students and builds on what was covered in INDG 6600Y. It provides students with an exceptional opportunity to apprentice with an Elder or Knowledge Holder over an intense period of time arranged between the student and the Elder or Knowledge Holder. Upon completion of the apprenticeship, students make a formal presentation to the Traditional Advisory Council. This course should be completed by the end of the first term of the second year.

INDG6825Y - Project-Based Dissertation

Overview

Department(s)
Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%

Course Description
Students are required to conduct original research and complete a project-based dissertation consisting of a creative project component and a written component (20,000-30,000 words). The dissertation must make an original contribution to the field of Indigenous Studies and be consistent with program guidelines for the project-based option. A PhD student must successfully complete both components of the project-based option and defend those components before a Dissertation Examining Committee. The maximum time for completion of the Project-Based dissertation and other required academic requirements is five years.

KINE2001H - Kinesiology 1: Anatomy of Human Movement Movement

Overview

Department(s)
Kinesiology

Contact Department ('not set' refers to cross-listed depts)
Kinesiology - 100%

Course Description
Through didactic classroom lecturing, hands-on laboratories, use of models, and computer-based software examples, students take a regional approach to examine the anatomy and neural control of the musculoskeletal system. Special emphasis is on learning how the various regional structures contribute (both individually and synergistically) toward producing movement patterns. Prerequisite: 60% or higher in KINE 1001H and 60% or higher in BIOL 1050H or in each of BIOL 1500H and 1501H. Open only to students in the Kinesiology program. Equivalent to NURS-BIOL 2250H.

KINE2003H - Movement and Well-Being in Indigenous Health

Overview

Department(s)
Kinesiology

Contact Department ('not set' refers to cross-listed depts)
Kinesiology - 100%

Course Description
This course explores Indigenous perspectives on movement and wellness, emphasizing the interconnectedness of mind, body, emotions, and spirit. Students examine traditional subsistence practices, healing approaches, and athletic competition, their role in well-being, and the impacts of colonialism. The course highlights the importance of land, culture, and community in Indigenous health. Open only to students in the Kinesiology program.

KINE3002H - Introduction to Injury Management

Overview

Department(s)
Kinesiology

Contact Department ('not set' refers to cross-listed depts)
Kinesiology - 100%

Course Description
Covers the fundamentals of sports injury management with emphasis on musculoskeletal injuries of the extremities. Emergency assessment, care, and treatment of the limbs, including basic taping and support techniques, will be covered. Review of functional anatomy provides the foundation for understanding the mechanisms of injury and possible injury prevention. Prerequisite: 60% or higher in KINE 2001H and 60% or higher in BIOL 1050H or in each of BIOL 1500H and 1501H. Open only to students in the Kinesiology program. Equivalent to NURS 2345H.

LAWS4050H - Dispute Res and Restorative Justice

Overview

Department(s)
Swansea Law

Contact Department ('not set' refers to cross-listed depts)
Swansea Law - 100%

Course Description
An experiential study of the non-litigious resolution of disputes in professional/institutional contexts, including the nature, scope and underlying causes of conflict, and the methods of resolving conflict through negotiation, mediation, and restorative practices. Students study theory, develop skills, and apply their learning to specific fact situations with emphasis on legal, medical, and university settings. Prerequisite: 12.0 university credits with a minimum 75% cumulative average and permission of the instructor unless in year six of the Trent/ Swansea Dual Degree Program or year four of the Medical Professional Stream.

Academic Level
Undergraduate

Credit Value

:
0.5

LAWS4850H - Law Field Placement

Overview

Department(s)
Swansea Law

Contact Department ('not set' refers to cross-listed depts)
Swansea Law - 100%

Course Description
An opportunity to apply legal knowledge and skills in a practical setting. Students work part-time for a law firm, or for a business, non-profit organization or government office with a legal department. They will also complete written assignments relevant to their placement. Enrolment is limited by the number of available work placements. Prerequisite: 15.0 university credits and an internationally obtained LLB.

0.5

LING1000Y - Introduction to Linguistics

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An overview of the many approaches to the study of human languages. Topics covered include the descriptive study of words, sentences, and sounds; the role of language in society; how languages change over time; the development of writing systems; language learning; the brain and language. Offered only in the summer.

Undergraduate

Credit Value

:
1

LING1001H - Sounds, Words, and Sentences: Concepts in Linguistics

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An introduction to modern approaches to the descriptive analysis of sounds, words, and sentences, including extensive practice in the application of linguistic techniques. Not open to students with credit for LING 1000Y.

Academic Level
Undergraduate

Credit Value

:
0.5

LING1002H - Linguistics in Action: How Languages Are Used

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
Approaches to the study of human language: how languages change over time, the role of language in society, the development of writing systems, language learning, the brain and language. Not open to students with credit for LING 1000Y.

Academic Level
Undergraduate

Credit Value

:
0.5

LING2003H - Morphology

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Cross-Lists
ANTH-2003H

Course Description
An intermediate course, designed to broaden students' knowledge of morphology and morphological analysis in English and other languages. Topics include methods of morphological analysis, morphophonology, derivation and inflection, the role of the lexicon, and morphosyntax. Prerequisite: LING 1000Y or 1001H. Not open to students with credit for LING 2001H.

Academic Level
Undergraduate

Credit Value

:
0.5

LING2004H - Phonology

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Cross-Lists
ANTH-2004H

Course Description
An intermediate course, designed to broaden students' knowledge of phonology and phonological analysis in English and other languages. Topics include phonemic analysis, syllables, morphophonemics, rules and rule ordering, opacity, and tone. Prerequisite: LING 1000Y or 1001H. Not open to students with credit for LING 2001H.

Academic Level
Undergraduate

Credit Value

:
0.5

LING2010H - Phonetics

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Cross-Lists
ANTH-2010H

Course Description
An overview of articulatory and instrumental phonetics, including the mechanics of speech production, the accurate transcription of speech in any language, and the use of instruments to study the physical nature of speech sounds. Students learn all characters and values of the International Phonetic Alphabet, an indispensable tool for linguistic study and research. Prerequisite: LING 1000Y or 1001H.

Academic Level
Undergraduate

Credit Value

:
0.5

LING2020H - Historical Linguistics: How Language Changes

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Cross-Lists
ANTH-2020H

Course Description
An overview of the field of historical linguistics. Students are exposed to the principles and methods of historical research on languages, including topics related to language change and the reconstruction of extinct languages from their known daughter languages. Prerequisite: LING 1000Y or 1002H.

Academic Level
Undergraduate

Credit Value

:
0.5

LING2050H - Languages of the World

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An overview of linguistic diversity and universal features of language through a survey of the languages and language families of several world regions. The course also focuses on endangered languages and language revitalization initiatives, with emphasis on indigenous languages in North America and across the world. Recommended prerequisite: LING 1001H and/or 1002H.

Academic Level
Undergraduate

Credit Value

:
0.5

LING2311H - Linguistic Anthropology

Overview

Department(s)
Anthropology, Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Languages & Linguistics - Not Set

Cross-Lists
ANTH-2311H

Course Description
The course examines human expression--verbal and nonverbal--as communicative practices that connect persons together to form a common culture. Discussions may include case studies of communicative practices and the cultures that emerge in the modern world. Topics covered may include the precursors, forms, common characteristics, dynamics, diversity of languages. Prerequisite: 3.0 university credits. Recommended: ANTH 1001H. Equivalent to ANTH 2002H.

Academic Level
Undergraduate

Credit Value

:
0.5

LING3003H - Syntax and Semantics

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Cross-Lists
ANTH-3003H

Course Description
An intermediate/advanced course, designed to broaden students' knowledge of syntax, syntactic analysis, and semantics, primarily in English but with reference to other languages. Topics include phrase structure and tree drawing, structural relations, X-bar theory, raising, movement, binding, and minimalism, as well as related topics in lexical and formal semantics. Prerequisite: LING 1000Y or 1001H.

Academic Level
Undergraduate

Credit Value

:
0.5

LING3010H - The Story of English: the First Thousand Years

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An exploration of the history of the English language from its origins to the Middle English period. Linguistic features (phonetics, morphology, syntax, and semantics) of both Old and Middle English are examined alongside social forces and other factors causing language change. Recommended prerequisite: LING 1001H. Not open to students with credit for ENGL 3100Y.

Academic Level
Undergraduate

Credit Value

:
0.5

LING3050H - Language and Style: Analyzing How Literary and Non-Literary Texts Make Meaning

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An introduction to the methods of stylistics, including linguistic approaches to literary analysis, foregrounding and deviation, applications of stylistics to non-literary texts (journalism, speeches, advertising, etc.), and computer-based methods (corpus stylistics). Students develop practical skills in applying linguistic tools to a wide range of texts. Prerequisite: 4.0 university credits or permission of instructor. Recommended: 1.0 ENGL or LING credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

LING3060H - Second Language Acquisition: Theory, Methods, and Practice

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An overview of the field of second language acquisition and learning, with an emphasis on linguistic applications to the field, individual differences (affective and cognitive), learning and teaching styles, bilingualism, patterns of interlanguage development, fossilization, competence/performance, cultural factors, and the role of the first language. Prerequisite: 4.0 university credits or permission of instructor. Recommended: LING 1000Y or 1002H.

Academic Level
Undergraduate

Credit Value

:
0.5

LING3070H - Sociolinguistics: Language in Society

Overview

Department(s)
Languages & Linguistics, Anthropology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set, Sociology - Not Set

Cross-Lists
ANTH-3070H, SOCI-3070H

Course Description
An introduction to the study of language in use in society. Topics include varieties of language; pragmatics; ethnographic approaches; discourse analysis; multilingualism; pidgins and creoles; sexist language; language in education; and language policy and planning. Students investigate how language is shaped by factors such as region, sex/gender, age, and identity. Prerequisite: 4.0 university credits or permission of instructor. Recommended: LING 1000Y or 1002H.

Academic Level
Undergraduate

Credit Value

:
0.5

LING3311H - Anthropology of Language

Overview

Department(s)
Anthropology, Media Studies, Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Media Studies - Not Set, Languages & Linguistics - Not Set

Cross-Lists
ANTH-3311H, MDST-3311H

Course Description
Covers the basic issues involved in situating diverse languages within diverse cultures and societies, placing the study of genres or ways of speaking in socio-cultural contexts of use, attending to the way people's ideas about what language is and what it is for shape the ways they speak. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

LING3500H - Current Issues in Speech-Language Pathology

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
This course explores foundational concepts in speech-language pathology. Topics will include language development, language disorders, and professional and ethical issues. Students will learn to critically examine research, policy, and technological innovations from a practitioner's perspective. Prerequisite: 5.0 university credits including LING 1001H, PSYC 1020H, and PSYC 1030H.

Academic Level
Undergraduate

Credit Value

:
0.5

LING3860H - Field Methods in Linguistics

Overview

Department(s)
Languages & Linguistics, Anthropology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set

Cross-Lists
ANTH-3860H

Course Description
An introduction to linguistic fieldwork. Students work either individually or in groups with a native language informant in the local community or, by special arrangement, in a remote location. Students develop a research question and complete a final report that focuses on phonetics/phonology, morphology, and/or syntax. Prerequisite: LING 1000Y or 1001H. Highly recommended: LING 2002H, 2003H, or 2010H.

Academic Level
Undergraduate

Credit Value

:
0.5

LING4010Y - Thesis

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
Prerequisite: 10.0 university credits including LING 1001H, LING 1002H, and 1.5 additional LING credits; and permission of instructor.

Academic Level
Undergraduate

Credit Value

:
1

LING4747H - Writing Systems

Overview

Department(s)
Anthropology, Media Studies, Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Media Studies - Not Set, Languages & Linguistics - Not Set

Cross-Lists
ANTH-4747H, MDST-4747H

Course Description
Explores primarily non-alphabetic writing systems from linguistic and anthropological perspectives, including ancient writing systems (Sumerian, Egyptian, Anatolian, Mycenean, Mayan, Olmec) and contemporary ones, the transition from writing lists to linguistic texts, and the different social roles of writing from clay accounting tablets of early state bureaucracies to bamboo love letters. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

LING4901H - Reading Course

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
Independent study in an advanced topic in linguistics, with readings and assignments to be agreed upon in consultation with the instructor. Prerequisite: LING 1001H and at least 1.5 additional LING courses.

Academic Level
Undergraduate

Credit Value

:
0.5

LING4902H - Reading Course

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
Independent study in an advanced topic in linguistics, with readings and assignments to be agreed upon in consultation with the instructor. Prerequisite: LING 1001H and at least 1.5 additional LING courses.

Academic Level
Undergraduate

Credit Value

:
0.5

LSCM1001H - Operations Management for Supply Chain

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
Production and operations management are activities that relate to the creation of goods and services through the transformation of inputs into outputs. This course provides students with a broad understanding and knowledge of several operations management concepts to manage flow of information and products effectively along the supply chain. Not open to students enrolled in or with credit for ADMN 3550H.

Academic Level
Undergraduate

Credit Value

:
0.5

LSCM2002H - Supply Chain Management

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
A managerial perspective of the core functions and challenges required to effectively manage supply chains. The format of this course is a case approach with emphasis on assessing and evaluating supply chain and logistics alternatives by applying quantitative techniques to produce comprehensive and realistic solutions. Prerequisite: LSCM 1001H or ADMN 3550H.

Academic Level
Undergraduate

Credit Value

:
0.5

LSCM2003H - Transportation and Logistics Management

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
Provides a basic understanding of the concepts and applications for effective management of warehousing operations, layout, storage and handling equipment, risk and information. Focuses on management of transportation including infrastructure of transportation industry and other aspects such as distribution planning, scheduling, pricing, safety, cost, security, regulation, and documentation. Prerequisite: LSCM 2002H, ECON-ADMN 1250H, and one of LSCM 1001H or ADMN 3550H.

Academic Level
Undergraduate

Credit Value

:
0.5

LSCM2005H - Procurement Principles and Supply Chain Management

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
Principles of managing procurement processes in supply chain to ensure continuous supply of goods and services to enable world-class organizational performance. Procurement manages supply chain risks through the effective negotiation of contracts, cost and price models, quality, and other essential supply characteristics. Emphasis on ethics in purchasing. Prerequisite: LSCM 2002H.

Academic Level
Undergraduate

Credit Value

:
0.5

LSCM3000H - Supply Chain Analytics

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
Provides fundamental concepts and tools necessary for understanding the role of analytics in supply chain management, gaining hands-on experience with analytics and optimization modeling in a spreadsheet environment, and effectively using the results to enhance supply chain decision-making. MS Excel is extensively utilized for spreadsheet management and mathematical modeling. Prerequisite: COIS 1010H and ECON-ADMN 1250H.

Academic Level
Undergraduate

Credit Value

:
0.5

LSCM3100H - Forecasting in Business and Economics

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
Provides a variety of forecasting methods and applications such as time series models, Box-Jenkins (ARIMA), simple and multiple regression, and logistic regression in business and economics. Practical case studies and statistical software are provided to help students to manage forecasting processes and to analyze the results. Prerequisite: COIS 1010H and ECON-ADMN 2200H.

Academic Level
Undergraduate

Credit Value

:
0.5

LSCM3400H - Lean Six Sigma

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
A practical Lean approach with the knowledge of (DMAIC) methodology to improve the process. Students learn how to define improvement needs, measure current performance, generate and implement solutions, analyze and control business performance. Statistical tools and software are integral parts of this course. Prerequisite: COIS 1010H, LSCM 2002H, ECON-ADMN 2200H, and COIS-ADMN 3850H.

Academic Level
Undergraduate

Credit Value

:
0.5

LSCM3500H - International Logistics and Trade

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
The role and scope of logistics in the global economy. The use of international commerce terms, documents, contracts, international logistics security, customs clearance, and key strategies and techniques to obtain a competitive advantage in a global supply chain management. Prerequisite: LSCM 2003H and 2005H.

Academic Level
Undergraduate

Credit Value

:
0.5

LSCM4200H - Introduction to Enterprise Resource Planning using SAP/ERP Simulation

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
A comprehensive course with an emphasis on hands-on experience of ERP/SIM, a game-based SAP/ ERP simulation. Students learn to manage companies from end-to-end using the actual SAP/ ERP in a real-time simulated competitive environment. Hands-on cases and simulations. Required fee for ERPsim: $57 (subject to change). Prerequisite: LSCM 2002H and one of LSCM 1001H or ADMN 3550H.

Academic Level
Undergraduate

Credit Value

:
0.5

LSCM4400H - Selected Topics in Supply Chain Management

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
Develops critical thinking, the ability to formulate, analyze and solve the supply chain management decisions such as sales, operations, facilities, warehousing, transportation, pricing and globalization. Helps internalize the link between the analytic methodologies and strategic decision making. MS Excel is used for analytic methodologies. Prerequisite: LSCM 2003H and 3000H.

Academic Level
Undergraduate

Credit Value

:
0.5

LSCM4500Y - Capstone Course - Placement

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
A full year placement in one term. Students are expected to be in placement at least two days a week. The placement allows students the opportunity to gain practical experience in businesses with a focus on supply chain management. Students interview for various placements that are either identified by the Workplace Coordinator or opportunities secured by students, with appropriate program approval. During the placement, coursework lends support to the field experience. Prerequisite: LSCM 3400H, 3500H, 4200H, and COIS 3510H.

Academic Level
Undergraduate

Credit Value

:
1

LSCM4600Y - Supply Chain Research/Consulting Project

Overview

Department(s)
Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Supply Chain Management - 100%

Course Description
This course enables students to apply supply chain management principles through hands-on research or consulting projects. Guided by the instructor, students develop and implement solutions for real-world supply chain challenges, strengthening their research, analytical, and communication skills to deliver value-added recommendations to host organizations. Prerequisite: LSCM 3400H, 3500H, 4200H, and COIS 3510H.

Academic Level
Undergraduate

Credit Value

:
1

LSCM4890Y - Business Internship

Overview

Department(s)
Business, Economics, Supply Chain Management

Contact Department ('not set' refers to cross-listed depts)
Business - 100%, Economics - Not Set, Supply Chain Management - Not Set

Cross-Lists
ADMN-4890Y, ECON-4890Y

Course Description
Designed for students interested in gaining in-depth, practical industry experience, while enhancing their classroom knowledge with real-world, paid industry positions. Students spend 6, 8, 12, or 16 months working full time in industry and return to Trent for a final term. Students apply, interview, and compete for limited positions. Course is graded on a pass/fail basis. Application deadline: October 15 of third year. Business Administration prerequisite: A minimum 75% cumulative average and 14.5 university credits including ADMN and ECON credits required for a single major in years 1-3, or permission of the director. Economics prerequisite: A minimum 75% cumulative average and 14.5 university credits including ECON credits required for a single major in years 1-3 and 2.0 ADMN credits, or permission of the director. Supply Chain Management prerequisite: A minimum 75% cumulative average and 14.5 university credits including LSCM, ADMN, and ECON credits required for years 1-3, or permission of the director. Accounting & Economics prerequisite: A minimum 75% cumulative average and 14.5 university credits including ADMN and ECON credits required for years 1-3, or permission of the director. Mathematical Economics prerequisite: A minimum 75% cumulative average and 14.5 university credits including ECON and MATH credits required for years 1-3, or permission of the director. Recommended prerequisite: ADMN 2410H. Open only to students in the single-major Honours programs in Business Administration, Economics, Supply Chain Management, Accounting & Economics, or Mathematical Economics. Not for credit toward a major in Business Administration, Economics, Accounting & Economics, or Mathematical Economics. Supply Chain Management students may take LSCM 4890Y in lieu of LSCM 4500Y. Not open to co-op students or students in the General programs in Business Administration or Economics.

MATH1001H - Precalculus Mathematics

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Designed for students needing to strengthen their math background in preparation for further courses in mathematics or the sciences. Topics include rational numbers, real numbers, inequalities, algebraic expressions; trigonometry; functions, including algebraic, exponential, logarithmic, and trigonometric functions; equations; graph transformations; analytic geometry and applications. Prerequisite: Ontario Grade 11 Functions and Relations (MCR3U) or equivalent. Not open to students enrolled in or with credit for any MATH courses other than MATH 1051H, 1052H, 1350H, 2080Y, 2081H, or 2082H. Does not satisfy the Mathematics requirement for a Bachelor of Science degree. Not for credit toward a major or minor in Mathematics.

MATH1005H - Calculus for Business and Social Sciences

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
An introduction to the methods and applications of calculus for business and the social sciences. Derivatives, exponential and logarithmic functions, optimization problems, related rates, integration, partial derivatives, differential equations. Selected applications from the social sciences. Prerequisite: A Grade 12U mathematics course or its equivalent. Not open to students enrolled in or with credit for MATH 1006H, 1110H, 1111H, 1120H, 1121H, or 1122H. Not for credit toward a major or minor in Mathematics.

MATH1051H - Non-Calculus Statistics 1: Elementary Probability and Statistics

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Data summary, elementary probability, discrete and continuous distributions, the central limit theorem, estimation and hypotheses testing. This course uses high school mathematics as a foundation and involves the use of computer software. Not open to students enrolled in or with credit for MATH 2560H. Not for credit toward a major or minor in Mathematics.

MATH1080H - Math for Everyday Life

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Should you buy a ticket for 6/49 or Super 7? If you test positive for a rare disease, what is the chance that you actually have it? How are E. coli bacteria and interest rates related? These are some of the questions we investigate in this course. We also look into the use, misuse, and abuse of mathematics in the media. Prerequisite: Ontario Grade 11 Functions & Relations (MCR3U) or equivalent. Not open to students enrolled in or with credit for any other MATH courses. Does not satisfy the Mathematics requirement for a Bachelor of Science degree. Not for credit toward a major or minor in Mathematics.

0.5

MATH1121H - Calculus 2

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Techniques and applications of integration, sequences, series, and power series, with applications to other areas of mathematics and the physical and social sciences. Designed for majors in Mathematics and Physics, or other qualified students. Prerequisite: A pass in MATH 1111H or at least 80% in MATH 1110H. Not open to students enrolled in or with credit for MATH 1005H, 1006H, 1120H, or 1122H except by permission of the department.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH1122H - Calculus 2 for Chemistry

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Techniques and applications of integration and differentiation for single and multiple variable contexts, with applications to the chemical sciences. Designed for majors in Chemistry and Biochemistry & Molecular Biology, and as a terminal course. Prerequisite: MATH 1110H or 1111H. Not open to students enrolled in or with credit for MATH 1005H, 1006H, 1120H, or 1121H except by permission of the department.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH1350H - Algebra 1: Linear Algebra

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Vectors, systems of linear equations, matrices, determinants, linear transformations, eigenvalues, and eigenvectors. Prerequisite: A Grade 12U mathematics course with at least 60%. Recommended: Grade 12U Calculus and Vectors.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH1550H - Probability 1: Introduction to Probability

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Probability, random variables, probability distributions. Does not count as the Introductory Statistics course required for admission to some professional schools. Prerequisite: MATH 1005H or 1110H or 1111H or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH2081H - Mathematics for Teacher Education: Numbers and Geometry

Overview

Department(s)
Mathematics & Statistics, Education

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Education - Not Set

Cross-Lists
EDUC-2081H

Course Description
Mathematics and mathematical thinking for prospective elementary school teachers. Number systems and counting, symmetry and patterns, graphs and networks, with examples from nature and art. Not open to students with credit for any MATH course which counts toward a major or minor in Mathematics. Does not satisfy the Mathematics requirement for a Bachelor of Science degree.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH2082H - Mathematics for Teacher Education: Growth, Statistics, and Probability

Overview

Department(s)
Mathematics & Statistics, Education

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Education - Not Set

Cross-Lists
EDUC-2082H

Course Description
Mathematics and mathematical thinking for prospective elementary school teachers. Measurement and growth, probability, and statistics, with examples from nature and art. Not open to students with credit for any MATH course which counts toward a major or minor in Mathematics. Does not satisfy the Mathematics requirement for a Bachelor of Science degree.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH2110H - Calculus 3: Calculus of Several Variables

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Multivariable functions, curves, and surfaces in two and three dimensions. Partial differentiation and applications. Multiple integrals. Prerequisite: 60% or higher in MATH 1350H and in 1120H or 1121H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH2120H - Calculus 4: Vector Calculus

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Parametric curves and surfaces, vector functions and fields. Line integrals, Green's Theorem. Surface integrals, curl and divergence, Stokes' and Divergence Theorems. Introduction to Fourier methods and complex numbers. Prerequisite: MATH 2110H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH2130H - Introductory Classical Dynamics

Overview

Department(s)
Physics & Astronomy, Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Mathematics & Statistics - Not Set

Cross-Lists
PHYS-2130H

Course Description
Analytical and computational methods for obtaining the motion of simple physical systems. Includes motion in one dimension, projectile motion, realistic motion of objects with drag and spin, oscillatory motion, chaos in the nonlinear pendulum. Students use a mix of analytical calculus-based methods and scientific computing tools to solve problems. Prerequisite: 60% or higher in PHYS 1001H and MATH 1120H or 1121H. Pre- or co-requisite: MATH 2150H. Strongly recommended: COIS 1020H. Not open to students with credit for PHYS-COIS 2310H or PHYS-MATH 3130H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH2150H - Ordinary Differential Equations

Overview

Department(s)
Mathematics & Statistics, Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Physics & Astronomy - Not Set

Cross-Lists
PHYS-2150H

Course Description
First order equations; qualitative and numerical methods. Second order linear equations. Linear systems. Applications to physical and biological models. Laplace transforms. Prerequisite: 60% or higher in MATH 1120H or 1121H. Recommended: MATH 1350H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH2200H - Mathematical Reasoning

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Introduces concepts and methods that are essential for advanced courses in pure mathematics. Intended for Mathematics majors early in their program. Introduction to logic, abstraction, and proof through exploration of sets, elementary topology of Euclidean spaces, sequences and series of number and functions, integers, polynomials, and modular arithmetic. Prerequisite: MATH 1350H and either MATH 1120H or 1121H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH2260H - Euclidean Geometry

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Elements of Euclidean geometry, stressing its axiomatic development. Recommended for Education students. Prerequisite: One of MATH 1005H, 1006H, 1110H, 1111H or 1350H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH2350H - Algebra 2: Vector Spaces

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Complex numbers, vector spaces, basis and dimension, linear transformations, diagonalization, quadratic forms, least squares, inner product spaces, orthogonality. Prerequisite: MATH 1350H and either MATH 1110H or 1111H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH2560H - Statistics 1: Mathematical Statistics

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
An introduction to statistical theory and methods. Probability distributions and the central limit theorem, methods of point estimation, confidence intervals, hypothesis testing, comparative inferences, and nonparametric methods. Computer methods in statistics. Prerequisite: MATH 1550H and one of MATH 1005H, 1006H, 1110H, or 1111H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH2570H - Probability 2: Intermediate Probability

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Intermediate probability theory as a basis for further study in mathematical statistics and advanced probability, including stochastic processes. Random variables, jointly distributed random variables, transformations and generating functions, conditioning and conditional expectation. Binomial, Poisson, Exponential, Gamma, and Normal distributions. Prerequisite: MATH 1550H and one of MATH 1005H, 1006H, 1110H, or 1111H. Not open to students with credit for MATH 3570H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH2600H - Discrete 1: Structures

Overview

Department(s)
Mathematics & Statistics, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Computer Science - Not Set

Cross-Lists
COIS-2600H

Course Description
Mathematics related to computer science, including propositional logic, sets and relations, proofs, counting techniques and recursive relations, trees and networks (graphs); applications. Prerequisite: MATH 1350H and either 1120H or 1121H; or COIS 1020H, MATH 1350H, and one of MATH 1005H, 1110H or 1111H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH3130H - Classical Mechanics

Overview

Department(s)
Mathematics & Statistics, Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Physics & Astronomy - Not Set

Cross-Lists
PHYS-3130H

Course Description
Classical mechanics of particles in three dimensions. Topics include motion in non-inertial reference frames, gravity, central forces, and special relativity. Prerequisite: PHYS-MATH 2130H (or PHYS 2110H). Pre- or co-requisite: MATH 2110H and 2150H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH3150H - Partial Differential Equations

Overview

Department(s)
Mathematics & Statistics, Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Physics & Astronomy - Not Set

Cross-Lists
PHYS-3150H

Course Description
The transport equation, heat equation, wave equation, Laplace equation, Poisson equation, in one, two, and three dimensions, in Cartesian, Polar, and/or Spherical coordinates. Physical interpretations. Properties of harmonic functions. Fourier theory: uniform, pointwise, and L2 convergence. Initial/ boundary value problems: existence and uniqueness of solutions. Solutions to I/BVPs using orthogonal eigenfunction expansions. Solutions to I/BVPs using convolutional transforms. Prerequisite: MATH 2110H and 2150H. Strongly recommended: MATH 1350H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH3160H - Methods of Applied Mathematics

Overview

Department(s)
Mathematics & Statistics, Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Physics & Astronomy - Not Set

Cross-Lists
PHYS-3160H

Course Description
Differential equations in applied mathematics, including Bessel, Legendre, hypergeometric, Laguerre, Hermite, Chebyshev, etc. Series and numerical solutions. Properties of the special functions arising from these equations. Prerequisite: MATH 2110H and MATH-PHYS 2150H. Recommended: MATH 2200H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH3180H - Numerical & Computational Methods

Overview

Department(s)
Mathematics & Statistics, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Computer Science - Not Set

Cross-Lists
COIS-3180H

Course Description
Error analysis, nonlinear equations, linear systems, interpolation methods, numerical differentiation and integration and initial value problems. Prerequisite: MATH 2110H. Not open to students with credit for MATH-COIS 2180H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH3200H - Number Theory

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Divisibility (GCDs, LCMs, Euclidean algorithm, Bezout's identity). Linear Diophantine Equations. Prime numbers (Factorization; Fermat/Mersenne numbers; pseudoprimes; Carmichael numbers). Modular Arithmetic (Chinese Remainder Theorem; Fermat/ Euler theorem). Group of units mod m. Primitive roots. Quadratic Residues (Legendre symbols; Quadratic Reciprocity). Prerequisite: MATH 1350H and 2200H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3310H - Algebra 3: Abstract Algebra

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
An introduction to the fundamental algebraic structures: groups, rings, fields. Subgroups and subrings, homomorphisms and isomorphisms, quotient structures, finite fields. Selected applications. Prerequisite: MATH 2350H and 60% or higher in MATH 2200H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3350H - Linear Programming

Overview

Department(s)
Mathematics & Statistics, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Computer Science - Not Set

Cross-Lists
COIS-3350H

Course Description
An introduction to the concepts, techniques, and applications of linear programming and discrete optimization. Topics include the simplex method, duality, and integer programming. Prerequisite: MATH 1350H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3510H - Mathematical Finance

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Elements of stochastic calculus. Discrete time market models and continuous time market models. Selffinancing strategies and arbitrage. Replication of claims. Completeness of market models. Pricing of derivatives: binomial model, Black-Scholes model. Historical and implied volatility. Prerequisite: MATH 1550H and 2150H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3560H - Statistics 2: Linear Models

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Linear and generalized linear models, introduction to smoothing and simulation, additive models, and topics in distributions and dimensionality. Prerequisite: MATH 2350H and 2560H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3561H - Statistics 3: Advanced Statistics

Overview

Department(s)
Mathematics & Statistics, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-3561H

Course Description
Advanced statistical methods, especially in computational statistics: linear and generalized linear models; classification methods; variable selection; resampling; decision trees; neural networks; Markov Chain Monte Carlo methods; Bayesian estimation; multilevel and hierarchical models; and experimental design. Additional topics as time allows. Prerequisite: MATH 2560H or a minimum 75% in each of MATH 1051H and 1052H, or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3600H - Topics in Discrete Mathematics

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Basics of three increasingly popular areas of discrete mathematics (discrete/computational geometry, combinatorial designs, error-correcting codes) and some connections between them. Topics may include Art Gallery problem, triangulations/flip graphs, affine/projective geometries; construction techniques for popular combinatorial designs; basics of coding theory, linear codes, bounds on codes, and techniques for combining codes. Prerequisite: MATH-COIS 2600H, or permission of instructor.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3630H - Discrete 2: Graph Theory

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
An introduction to graph theory with emphasis on both theory and applications (algorithms). Topics may include graph terminology; trees; Eulerian and Hamiltonian properties of graphs; planarity; colourings; matchings. Prerequisite: MATH 2200H or MATH-COIS 2600H. Not open to students with credit for 4610H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3770H - Complex Analysis

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Complex numbers, limits and series. Complex functions, holomorphic functions. Complex contour integrals; Cauchy integral theorems. Taylor series. Laurent series. Calculus of residues. The Fundamental Theorem of Algebra. Frequency analysis: Fourier transforms, Laplace transforms, Fourier series, Z-transforms. Prerequisite: MATH 2120H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3790H - Analysis 1: Real Analysis

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
The real number system. Limits and continuity. Differentiability. Mean-value theorem. Convergence of sequences and series. Uniform convergence. Completeness. Prerequisite: Prerequisite: 60% or higher in MATH 2200H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3830H - A Survey of the History of Mathematics

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
A survey of the development of mathematics from pre-history to the modern era, with a focus on the development and spread of number systems and arithmetic techniques, proofs, algebra, and applications. Prerequisite: MATH 1120H, 1121H, or 1122H. Recommended: MATH 2200H or 2350H. Not open to students with credit for MATH 3810H or 3820H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3900Y - Reading Course

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Details may be obtained by consulting the department. Prerequisite: 85% minimum in any prerequisite for the course; or permission of department chair.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
1

MATH3901H - Reading Course

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Details may be obtained by consulting the department. Prerequisite: 85% minimum in any prerequisite for the course; or permission of department chair.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH3902H - Reading Course

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Details may be obtained by consulting the department. Prerequisite: 85% minimum in any prerequisite for the course; or permission of department chair.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH4120H - Mathematical Modeling 1

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Provides an introduction to the mathematical modelling process and applies this process to simple mathematical modelling problems arising from a variety of application areas in science and engineering. Mathematical modelling techniques, such as differential and partial differential equations, discrete systems, and numerical methods along with computer aids are utilized. Prerequisite: MATH-PHYS 3150H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH4140H - Advanced Classical Mechanics

Overview

Department(s)
Physics & Astronomy, Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Mathematics & Statistics - Not Set

Cross-Lists
PHYS-4140H

Course Description
Classical mechanics of particles, rigid bodies, and continuous media. Topics include Lagrangian and Hamiltonian mechanics, systems of particles, motion of rigid bodies, and oscillating systems. Prerequisite: MATH 2110H, 2150H, and PHYS-MATH 3130H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH4230H - Mathematical Biology

Overview

Department(s)
Mathematics & Statistics, Biology

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Biology - Not Set

Cross-Lists
BIOL-4230H

Course Description
Covers classic topics in mathematical biology, including population biology, epidemiology, and mathematical ecology of a single or interacting species. The course addresses modeling of life-science problems by using difference/differential equations and applications of dynamical systems theories. Prerequisite: MATH-PHYS 3150H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH4251H - Advanced Mathematical Methods for Economics

Overview

Department(s)
Mathematics & Statistics, Economics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Economics - Not Set

Cross-Lists
ECON-4251H

Course Description
Provides the fundamental mathematical methods that are required to understand advanced topics in economics and to analyze economic models. Also useful for students who intend to pursue graduate studies in in economics, business, or applied mathematics. Topics include differential equations, difference equations, optimization, optimal control theory, and calculus of variation. Prerequisite: ECON 3250H or both MATH 2110H and 2150H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH4360H - Algebra 4: Rings and Fields

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Rings, subrings, quotient rings and ring homomorphisms. Ideal theory. Polynomial rings. Integral domains and fields of quotients. Fields, finite fields. Field extensions. Isomorphism Theorems for rings. The Fundamental Theorem of Galois Theory. Prerequisite: 60% or higher in MATH 3310H or permission of instructor. Not open to students with credit for MATH 3360H or 4310H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH4510H - Mathematical Risk Management

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Basic mathematical theory and computational techniques for how financial institutions can quantify and manage risks in portfolios of assets. Topics include: mean-variance portfolio analysis, the capital asset pricing model and Value at Risk (VaR). Prerequisite: MATH 2110H and 2570H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH4560H - Statistics 4: Topics in Statistics

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
A senior topics course in statistics. Topics may include time series analysis, clustering and classification, generalized linear models, computational statistics or similar. Prerequisite: MATH 2560H and one of MATH 3560H or 3561H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

MATH4561H - Statistics 5: Sampling and Experimental Design

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Sampling schema and design of experiments. Topics in design of experiments include ANOVA, randomized block designs, factorial designs, blocking and confounding in factorial designs, and response surface methods. Topics in sampling include simple random, systematic, stratified and cluster sampling, sample size estimation, unequal probability sampling, and multistage designs. Prerequisite: MATH 3560H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH4570H - Probability 3: Stochastic Processes

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Discrete- and continuous-time Markov chains, birth and death processes, random walk problems, elementary renewal theory, Markov processes, Poisson processes, queuing theory. Prerequisite: MATH 2200H and 2570H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH4630H - Discrete 3: Combinatorics

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
An introduction to combinatorics. Topics may include advanced counting techniques; Stirling numbers, Bell numbers and Catalan numbers; generating functions; Latin squares, block designs and Hadamard matrices. Prerequisite: MATH-COIS 2600H or MATH 3630H. Not open to students with credit for MATH 4620H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH4790H - Analysis 2: Topology and Measure

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Normed and metric spaces, open sets, continuous mappings, sequence and function spaces, completeness. Lebesgue measure on the line, the Lebesgue integral, monotone and dominated convergence theorems. Prerequisite: MATH 3790H. Not open to students with credit for MATH 3700H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH4800H - Mathematics Honours Project

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Working under the guidance of an approved faculty supervisor, students independently study an area of mathematics, write a paper on the topic, and give a presentation describing the research conducted. Prerequisite: Any two of MATH 3150H, 3160H, 3200H, 3310H, 3510H, 3560H, 3600H, 3770H, or 3790H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MATH4850Y - Community-Based Research Project

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
Students are placed in research projects with community organizations in the Peterborough area. Each placement is supervised jointly by a faculty member and a representative of a community organization. For details see Community-Based Research Program. Prerequisite: One of MATH 4120H, 4230H, 4510H, 4560H, or 4561H, and a minimum cumulative average of 75%. Students may take either MATH 4850Y or two of MATH 4851H, 4852H, or 4855H for credit.

MATH4855H - Integrated Internship

Overview

Department(s)
Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%

Course Description
A real-world internship experience which enhances classroom knowledge by applying mathematical or statistical modelling skills acquired during coursework. Students spend three months working full-time while meeting deliverables developed jointly by the student, instructor, and internship host, including a final academic report and presentation. Prerequisite: A minimum cumulative average of 75% and 1.5 MATH credits at the 3000-level or above. Students may take either MATH 4850Y or two of MATH 4851H, 4852H, or 4855H for credit.

MDST1010H - The Digital World

Overview

Department(s)
Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Media Studies - Not Set

Cross-Lists
COIS-1010H

Course Description
Digital systems have redefined how we work, communicate, and play-just think about the World Wide Web, mobile camera phones, video games, and e-business. Core topics examine the underlying technologies of both computing and information systems and how they have become an integral and indispensable part of our daily lives.

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-2184H

Course Description
A workshop course in experimental animation where students can work with 16mm film, digital video and materials for the expanded image. Art materials fee: $60. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST2186H - Workshop: Photography

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-2186H

Course Description
An introductory photography course looking at analog and/or digital photography. Historical and contemporary issues are examined through practical hands-on experiences, including basic use of cameras, darkroom techniques, and basic digital post-production. Course fee: $100. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

MDST2210H - Gender, Race, and Popular Culture

Overview

Department(s)
Gender & Social Justice, Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Culture, Arts, and Media - Not Set, Media Studies - Not Set

Cross-Lists
CUST-2210H, GESO-2210H

Course Description
An introduction to historical and contemporary popular and everyday culture, arts, and entertainment as mechanisms that produce and reinforce ideologies about gender, race, class, ability, sexuality, and citizenship. Prerequisite: 4.0 university credits including 0.5 GESO, WMST, or CUST credit at the 1000 level, or permission of instructor. Equivalent to WMST 2210H.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST2236H - New Media Literacy

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-2236H

Course Description
Offers opportunities to practice new media literacies, including those related to online learning, while also providing theoretical frameworks through which to better understand these same literacies and practices. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST2312H - Anthropology of Media

Overview

Department(s)
Anthropology, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Media Studies - Not Set

Cross-Lists
ANTH-2312H

Course Description
A cross-cultural comparative anthropological exploration of how people's ideas about different media shape the ways they use these media. Prerequisite: 3.0 university credits. Not open to students with credit for ANTH-MDST 3312H.

Academic Level
Undergraduate

Credit Value

MDST2581H - Introduction to Film 1: What Is Cinema?

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-2581H

Course Description
A wide-ranging and diverse introduction to the film medium, this course focuses on the component elements of cinema: mise-en-scène, cinematography, editing, sound, narrative, genre, digitization, and "post-cinema." It examines the vocabulary of film analysis, cultivates techniques for writing engagingly about the medium, and develops viewing skills to enhance the cinematic experience. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 2081Y.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST2582H - Introduction to Film 2: Film Movements, Film History

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-2582H

Course Description
A wide-ranging and diverse introduction to the film medium, this course focuses on elements of filmmaking history, covering the origin and development of cinema technology; the medium's material contexts; and intellectual and aesthetic concerns of major film movements. It develops critical viewing and writing skills that enhance the cinematic experience. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 2081Y.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST2590H - Philosophy and Film

Overview

Department(s)
Philosophy, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Media Studies - Not Set

Cross-Lists
PHIL-2590H

Course Description
An exploration of philosophy in film and of the relationship between philosophy and film. The focus is on the ability of films not only to illustrate philosophical ideas, but also to advance our understanding of philosophical problems in ways unique to cinema. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST2600Y - Documenting Canada

Overview

Department(s)
Canadian Studies, Gender & Social Justice, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Gender & Social Justice - Not Set, Media Studies - Not Set

Cross-Lists
CAST-2600Y, GESO-2600Y

Course Description
Documentary film, music, and poetry as modes of inquiry into contemporary Canadian life. Topics may include gender and the arts; community and memory; climate change and the "Anthropocene"; ecological ethics; the politics of indigeneity; cultural approaches to addiction and education; grief and emotional renewal. Prerequisite: 3.0 university credits. Students may take only one of CAST-GESO-MDST 2600Y or 2601H for credit.

Academic Level
Undergraduate

Credit Value
:
1

MDST2601H - Documenting Canada

Overview

Department(s)
Canadian Studies, Gender & Social Justice, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Gender & Social Justice - Not Set, Media Studies - Not Set

Cross-Lists
CAST-2601H, GESO-2601H

Course Description
Documentary film, music, and poetry as modes of inquiry into contemporary Canadian life. Topics may include gender and the arts; community and memory; climate change and the "Anthropocene"; ecological ethics; the politics of indigeneity; cultural approaches to addiction and education; grief and emotional renewal. Prerequisite: 3.0 university credits. Students may take only one of CAST-GESO-MDST 2600Y or 2601H for credit.

Undergraduate

Credit Value
:
0.5

MDST2650H - Antiquity on Screen

Overview

Department(s)
Ancient Greek & Roman Studies, Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Ancient Greek & Roman Studies - 100%, Culture, Arts, and Media - Not Set, Media Studies - Not Set

Cross-Lists
AGRS-2650H, CUST-2650H

Course Description
Contemplates depictions of ancient Greece and Rome in cinema and television alongside ancient sources to better understand how mass media representations have shaped our understanding of antiquity for at least a century. Themes and films (screened in class) may vary. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST2800H - Digital Culture

Overview

Department(s)
Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Media Studies - Not Set

Cross-Lists
COIS-2800H

Course Description
Interactive digital technology and the convergence of computing, communications, public media, and entertainment have had profound cultural implications. Core topics address current concerns such as the World Wide Web, multimedia design, virtual spaces, social domains, and the blogosphere. Recommended prerequisite: COIS 1010H. This course cannot be counted as a science credit.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST2805H - Green Screen: Film and Environmental History

Overview

Department(s)
History, Environment, Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Environment - Not Set, Culture, Arts, and Media - Not Set, Media Studies - Not Set

Cross-Lists
CUST-2805H, ERST-2805H, HIST-2805H

Course Description
Considers feature, documentary, animated, and activist films that engage with critical environmental issues. Topics include popular portrayals of animals and endangered species; histories of environmental injustice; the development of environmentalism; the role of storytelling in history, science, and culture; and the challenges of depicting climate change and the Anthropocene. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST2830H - Multimedia and Design

Overview

Department(s)
Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Media Studies - Not Set

Cross-Lists
COIS-2830H

Course Description
Multimedia concepts such as photo and video editing, visual effects, 3D assets, and even writing style serve as tools to explore concepts and challenges in modern user experience design, with a focus on web pages, game design, and user interfaces. Principles of design covers core concepts such as the discoverability of features, understanding diverse human users, complexity of feedback, and how computer systems interpret and react to human actions. Recommended prerequisite: COIS 1010H.

MDST3031H - TV Guide: Television in Canada

Overview

Department(s)
Canadian Studies, Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Culture, Arts, and Media - Not Set, Media Studies - Not Set

Cross-Lists
CAST-3031H, CUST-3031H

Course Description
An introduction to television in Canada focusing on issues, content, and regulation from the 1950s until current day, including the impact of digital and Internet broadcasting. Themes include race, politics, region, and identity in the context of Canadian TV culture. Prerequisite: 4.0 university credits including 1.0 CAST and/or CUST credit at the 1000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3102Y - Images in Contemporary Media

Overview

Department(s)
Indigenous Studies, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Media Studies - Not Set

Cross-Lists
INDG-3102Y

Course Description
By examining the portrayal of First Nations peoples and their cultures in mass media, this course provides students with a better understanding of the power of television and film and the impacts of these images on the relationship, place, and space occupied by Indigenous peoples in contemporary society.

Academic Level
Undergraduate

Credit Value

:
1

MDST3129H - Workshop: Worldbuilding

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3129H

Course Description
This course examines the concept and practice of worldbuilding via group projects in the design and creation of storyworlds, metanarratives, and storyworld objects in different media, as well as participation in storyworld games. Prerequisite: 4.0 university credits or permission of instructor. Not open to students with credit for ENGL 4703H.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3133H - Workshop: Game Design

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3133H

Course Description
Drawing on readings from game studies, students engage the conceptual issues and practical details of player experience and design by analyzing and creating a wide range of games. Students leave the class with a playable prototype for an analog or digital game. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3139H - Workshop: Radio and Podcast

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3139H

Course Description
A hands-on workshop introducing the theoretical concepts and practical skills of radio storytelling, from documentary to fiction, field production to experimentation. Students use their own smartphones. Required fee for studio time (Peterborough only): $75. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3142H - Workshop: Experimental Music

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3142H

Course Description
Experimental music is composed and performed. Neither genre nor technique, experimental music is constantly pushing at boundaries. Special attention is paid to John Cage and musicians he influenced, together with post-punk and various current DIY practices. No previous experience with making music is required. Prerequisite: 4.0 university credits including 1.0 CUST credit or permission of instructor. Not open to students with credit for CUST 3146Y.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3143H - Workshop: Electronic Music Production

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3143H

Course Description
Students learn the basics of software music production, generate one or more pieces of music, and explore the media critically in discussions of both theoretical and practical texts. Music and songwriting skills are developed in conjunction with software learning. No previous training in music making is required. Prerequisite: 4.0 university credits including 1.0 CUST credit or permission of instructor. Not open to students with credit for CUST 3146Y.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3184H - Workshop: Documentary Film

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3184H

Course Description
A workshop course in 16mm filmmaking with an emphasis on experimental documentary work using lightweight film cameras. Required fee for materials: $125. Prerequisite: 4.0 university credits including 1.0 CUST credit or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3186H - Workshop: Experimental Film

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3186H

Course Description
Students carry out a series of visual exercises in Super-8 film and/or 16mm film. The emphasis for this course is on avant-garde cinema practices. Required fee for materials: $100. Prerequisite: 4.0 university credits including 1.0 CUST credit or 1.0 credit from COIS-MDST 1010H, CUST-MDST 1535H, or CUST 2535H; or permission of the instructor. Not open to students with credit for CUST 3185Y.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3203H - Theatre and Journalism During the Restoration and Eighteenth Century

Overview

Department(s)
English Literature, Media Studies

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%, Media Studies - Not Set

Cross-Lists
ENGL-3203H

Course Description
An examination of the fundamental connections between theatre and journalism from the first newspapers and magazines through contemporary examples of print and other media. Prerequisite: 4.0 university credits. Not open to students with credit for ENGL 3202Y.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3209H - The First Media Revolution

Overview

Department(s)
English Literature, Media Studies

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%, Media Studies - Not Set

Cross-Lists
ENGL-3209H

Course Description
Examines both the rapid evolution of print media from 1660 through to the later eighteenth century brought about by the two-person printing press, and the new genres made possible by this technology: newspapers and magazines, pamphlets, encyclopaedias, cookbooks, comic books, engravings and cartoons, printed music, board games, maps and, of course, novels. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3311H - Anthropology of Language

Overview

Department(s)
Anthropology, Media Studies, Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Media Studies - Not Set, Languages & Linguistics - Not Set

Cross-Lists
ANTH-3311H, LING-3311H

Course Description
Covers the basic issues involved in situating diverse languages within diverse cultures and societies, placing the study of genres or ways of speaking in socio-cultural contexts of use, attending to the way people's ideas about what language is and what it is for shape the ways they speak. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3360H - Social Media Ethics

Overview

Department(s)
Philosophy, Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set, Media Studies - Not Set

Cross-Lists
COIS-3360H, PHIL-3360H

Course Description
An examination of the moral challenges raised by social media, including echo chambers, cancel culture, hate speech, privacy, manipulation, misinformation, and digital addiction. The course explores how social media reshapes our notions of friendship, community, responsibility, and freedom. Prerequisite: 7.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3370H - Cyberethics

Overview

Department(s)
Philosophy, Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set, Media Studies - Not Set

Cross-Lists
COIS-3370H, PHIL-3370H

Course Description
Enables students to develop their own positions about the most important social and moral problems raised by computer use and technologies, including the fragmentation of society into computer "haves" and "have-nots," Internet censorship, pornography, intellectual property rights, and software piracy. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3450H - The Sociology of Communication and Media in Canada

Overview

Department(s)
Sociology, Canadian Studies, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Canadian Studies - Not Set, Media Studies - Not Set

Cross-Lists
CAST-3450H, SOCI-3450H

Course Description
Introduces the structure of the Canadian mediascape with a focus upon film, radio, television, and newer information and communication technologies. Sociological issues related to the production of these media and their reception by audiences are also addressed. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI and/or CAST at the 2000 level or CUST-MDST 2035Y or 2535H.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3465H - Realities and Futurities in Film

Overview

Department(s)
Political Studies, Culture, Arts, and Media, Media Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Culture, Arts, and Media - Not Set, Media Studies - Not Set, Sociology - Not Set

Cross-Lists
CUST-3465H, POST-3465H, SOCI-3465H

Course Description
What makes a film "political" and how can we understand the realities and futurities presented in film? We consider the various ways in which political life and action are portrayed in and through film, addressing--in relation to a variety of film genres--such topics as publics/counterpublics, visual politics, political senses. Prerequisite: 7.0 university credits including 1.0 POST, CUST, and/or SOCI credit, or permission of instructor. Recommended: POST 2351H, 2352H; CUST-MDST 2581H, 2582H, SOCI 2110H, or 2220H.

MDST3475H - The Media of Politics

Overview

Department(s)
Political Studies, Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Culture, Arts, and Media - Not Set, Media Studies - Not Set

Cross-Lists
CUST-3475H, POST-3475H

Course Description
Examines the decline of the traditional model of journalism and the explosive growth of internet and social media as citizens' main source of news. The ethical, political, and social implications of the nexus between the media and political accountability in a democratic society will be the focus of the course. Prerequisite: 7.0 university credits including 1.0 POST and/or CUST credit at the 2000 level, or permission of instructor. Recommended: POST 2351H and 2352H or CUST-MDST 2581H or 2582H.

0.5

MDST3524H - Storyworlds Across Media

Overview

Department(s)
Culture, Arts, and Media, English Literature, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, English Literature - Not Set, Media Studies - Not Set

Cross-Lists
CUST-3524H, ENGL-3524H

Course Description
This course frames media and genre as determinate factors in the creation of fictional worlds. It elaborates the political resonance such imaginary places have with the real world. Through the interpretation of comics, criticism, tabletop games, music, novels, and theory, students learn the influence of media on narrative. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 4535H.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3530H - Social Media and Power

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3530H

Course Description
Examines social media experiences with a focus on perspectives from critical theory. Covers a breadth of topics in the subject area, from doomsurfing and slacktivism to platform politics and cyberwar, and encourages students to adopt key methodologies and critical approaches, including ethnography, discursive and rhetorical analysis, semiotics, science and technology studies, and the critique of ideology. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3531H - War and Media

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3531H

Course Description
Critically examines historical, visual, and narrative approaches to war and media from around the world, with a focus on propaganda images, war reporting and photojournalism, surveillance, biopolitics, cyberwar, and platform activism. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3532H - Issues in Global Media

Overview

Department(s)
Culture, Arts, and Media, Global Justice & Development, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Global Justice & Development - Not Set, Media Studies - Not Set

Cross-Lists
CUST-3532H, GDST-3532H

Course Description
Critically examines the uses of media for development, with a focus on hyperlocal news, journalistic empires from the Global South, global audiences, media infrastructures, environmental monitoring, and the politics of e-waste. Prerequisite: 4.0 university credits. Not open to students with credit for CUST-IDST 3032Y.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3533H - Game Studies

Overview

Department(s)
Culture, Arts, and Media, Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Computer Science - Not Set, Media Studies - Not Set

Cross-Lists
COIS-3533H, CUST-3533H

Course Description
An introduction to game studies that explores the implications of games and play. What can games tell us about what we value, how we think, and who we are? Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3535H - Television Studies

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3535H

Course Description
An introduction to television studies with an emphasis on the historical transformations of TV from the 1950s to the YouTube era. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value
:
0.5

MDST3538H - Radio Studies

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3538H

Course Description
Introduction to the history and theory of radio broadcasting from the early twentieth century to the age of the Internet. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value
:
0.5

MDST3545H - Music and Media - An Archaeology

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3545H

Course Description
Explores the various functions of music in drama, film, television, and computer games, and considers how media adapt and adapt to a way of communicating that is (at least) as old as human civilization. Prerequisite: 4.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3549H - Producing Punk

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3549H

Course Description
A critical exploration of punk rock, punk culture, and punk politics, and their relationship to the various media through which they have been transmitted, including fashion, zines, radio, vinyl, cassettes, film, videos, television, newspapers, and music magazines. Prerequisite: 4.0 university credits or permission of the instructor. Not open to students with credit for ENGL-MDST 3607H.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3560H - Human-Computer Interaction

Overview

Department(s)
Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Media Studies - Not Set

Cross-Lists
COIS-3560H

Course Description
The study of human-computer interaction incorporates ideas from computer science, behavioural science, and design to improve interaction between people and computers. Core topics include multidisciplinary, intuitive design, computer-supported co-operative education/work, ubiquitous computing, prototyping, collaboration, social interaction, augmented reality, haptics, heuristics, interfaces, workstation independence. Prerequisite: 5.0 university credits.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

MDST3580H - Text and Image

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3580H

Course Description
Considers the relationship between word and image in a range of media objects, including comics, graphic novels, visual essays, graffiti, novels, paintings, and cinema. Also engages the long philosophical tradition of thinking about the relationship between seeable and sayable in such thinkers as Horace, Gotthold, Lessing, Freud, and Foucault. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 3080Y, 4080Y, or 4580H.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3581H - World Cinema 1: Experiment and Innovation

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3581H

Course Description
Explores experiments and innovations in European and American cinemas in their relation to film cultures elsewhere, focusing on the aesthetics and politics of cinematic form. How does the way a film is made influence its meaning and reception? Features films from Africa, Latin America, West Asia, and other regions. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 3081Y.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3582H - World Cinema 2: Images of Globalization

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-3582H

Course Description
Considers the problematic of world cinema in contemporary film from the perspective of the impact of globalization on film production internationally. Themes addressed include colonialism and neocolonialism, the national and the postnational, the political economy of film production, film language and cultural authenticity, and feminism and sexuality. Prerequisite: 4.0 university credits. Not open to students with credit for CUST 3081Y.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3653H - (Mis)adventures in AI: Decolonial Dreaming

Overview

Department(s)
Gender & Social Justice, Artificial Intelligence, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Artificial Intelligence - Not Set, Media Studies - Not Set

Cross-Lists
AIST-3653H, GESO-3653H

Course Description
Drawing on developments in the field of AI, as well as representations in popular culture, students learn to both recognize discrimination, and understand how AI can be used as a tool for social and environmental justice. Critical approaches to artificial intelligence, including critical race, critical (dis)ability, feminist, queer, decolonizing, and ecological theories. Prerequisite: 1.0 GESO credit or AIST 1000H or 1.0 MDST credit, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3745H - Virtual Worlds: The Anthropology of Online Communities

Overview

Department(s)
Anthropology, Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Computer Science - Not Set, Media Studies - Not Set

Cross-Lists
ANTH-3745H, COIS-3745H

Course Description
Focuses on worlds creating in playable media (games), including both massively multiple online games (MMOGs) and tabletop role-playing games. "Virtual" society is now an increasingly taken-for-granted aspect of everyday sociality. This course develops tools and theories for the study of virtual worlds, online and offline. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3748H - Anthropology of Animation

Overview

Department(s)
Anthropology, Media Studies, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Media Studies - Not Set, Culture, Arts, and Media - Not Set

Cross-Lists
ANTH-3748H, CUST-3748H

Course Description
Explores anthropologically the concept of animation--the attribution of human agency and life to nonhumans or media forms that create such an "illusion of life"--covering animated nonhumans from religious images, dolls, puppets, automatons, and robots to animated characters and brand mascots across different animated media (cel animation, rotoscopy, stop-motion, puppetry). Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST3820H - History and Impact of Computing

Overview

Department(s)
Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Media Studies - Not Set

Cross-Lists
COIS-3820H

Course Description
The history of digital computation is relatively recent, but all around us. By introducing the key people whose insight, inventiveness, and industry have defined the digital world, a framework is developed within which all students can appreciate the fundamental milestones of computing and their impact on the world. Prerequisite: 5.0 university credits.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:

MDST4041Y - Internship in Media and Cultural Studies

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-4041Y

Course Description
Designed to permit a student in Media Studies or Cultural Studies, under the direction of a faculty member and with the approval of the department, to apply their skills in media to specific practical endeavours. Students must obtain the agreement of a faculty member to supervise the course and apply for permission to enrol prior to the commencement of the session in which the course will be offered. Prerequisite: A minimum 65% cumulative average, 10.0 university credits including 3.0 CUST credits, and permission of the department. Students may take only one of CUST-MDST 4041Y or 4541H for credit.

Academic Level
Undergraduate

Credit Value

:

MDST4091H - American Visual Culture

Overview

Department(s)
History, Media Studies, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Media Studies - Not Set, Culture, Arts, and Media - Not Set

Cross-Lists
CUST-4091H, HIST-4091H

Course Description
Focuses on visual culture in relation to broad themes in modern United States history. Topics include photography and civil rights struggles, gender and visual politics, environmental images, and debates over war and memory. The course emphasizes research methods and the value of images for historical and interdisciplinary scholarship. Prerequisite: 4.0 HIST credits or permission of the chair. Not open to students with credit for HIST-CUST-MDST 4090Y.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST4136H - Workshop: Computational Arts

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-4136H

Course Description
Examines diverse spatial media experiences with a focus on documentary, narrative, and visual culture. Engaging through experimentation with mapping and GIS tools, location-based media, augmented reality, and virtual reality, students participate in a major project using the digital imaging resources at Bata Library's Moore Innovation and Research Hub. Prerequisite: 10.0 university credits including 3.0 CUST credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

MDST4523H - Shapeshifters: Narrative Adaptations Across Media

Overview

Department(s)
Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set

Cross-Lists
CUST-4523H

Course Description
Engages specific "cases" of adaptations across media, including "Snow White," Pride and Prejudice, and The Walking Dead, to explore contemporary issues in adaptation studies such as the nature of the object; the question of "fidelity"; and the formal and material conditions of narrative production related to different media. Prerequisite: 10.0 university credits including 3.0 CUST credits; or CUST-MDST 1535H, COIS-MDST 1010H, and either CUST-MDST 2035Y or 2535H; or permission of instructor.

MDST4538H - Media Ecologies

Overview

Department(s)
Culture, Arts, and Media, Media Studies, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set, Political Studies - Not Set

Cross-Lists
CUST-4538H, POST-4538H

Course Description
Examines some theories and practices for the analysis of media ecologies. "Media ecologies" refers to the worlds, sensibilities, and perceptibilities that our interactions with media enable. Detailed attention is given to media objects, the role of the culture-maker, and the critical political analysis of human/non-human entanglement(s). May include a course fee: $50. Prerequisite: 10.0 university credits including 3.0 CUST credits; or CUST-MDST 1535H, COIS-MDST 1010H, and either CUST-MDST 2035Y or 2535H; or permission of instructor.

MSMG5000Y - Workplace Integrated Learning Project

Overview

Department(s)
Management

Contact Department ('not set' refers to cross-listed depts)
Management - 100%

Course Description
This course involves a 160-hour placement with a local organization (i.e., private-sector firm, government, or not-for-profit), along with a classroom component, that together provide students with a field-based professional learning experience and an opportunity to develop their professional skills and reflective practice. The course will culminate with a reflective essay and presentation.

MSMG5030H - Marketing Management

Overview

Department(s)
Management

Contact Department ('not set' refers to cross-listed depts)
Management - 100%

Course Description
In order to grow and survive in today's changing and capture superior customer value. Marketing is critical to achieve these strategic objectives and obtain sustainable competitive advantage in the market. This course is designed to familiarize students with core marketing concepts and develop students' skills in contemporary marketing management. Please refer to course syllabus for topics to be covered in this course.

MSMG5900H - Change Management Strategies

Overview

Department(s)
Management

Contact Department ('not set' refers to cross-listed depts)
Management - 100%

Course Description
To remain relevant in a rapidly evolving business environment, organizations must continually assess the need for strategic realignment and develop effective and efficient strategies for change. The aim of this course is to give the student an overview of different approaches to organizational change. The course is designed to increase the student's effectiveness in dealing with multiple aspects of organizational change by adopting different perspectives. These diverse perspectives help students learn new and more innovative ways of approaching the change management process.

MTSC6010H - Physics and Chemistry of Materials

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
This course examines the fundamental principles and concepts used by physicists and chemists to describe materials. It covers scientific and practical interrelations between traditional disciplines emphasizing the structure, physical and chemical properties of all classes of materials. Prerequisite: Students should have completed at least one full-year of study in each of undergraduate physics, chemistry, and mathematics. Registration open to Materials Science students only.

MTSC6100H - Graduate Seminar in Science Communication II

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
This course will further the students' communication skills. Students will present a 30 minute research talk on their research to all participants in the program. Speakers will receive peer and faculty reviews of their presentations. Non-credit.

Academic Level
Graduate

Credit Value

:
0

MTSC6110H - Thermodynamics and Statistical Mechanics of Materials

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
A comprehensive investigation of thermodynamics and statistical mechanics of materials. Including phase transitions, order-disorder phenomena, point defects in crystals, and the statistical thermodynamics of interfaces.

Academic Level
Graduate

Credit Value

:
0.5

MTSC6120H - Theory of the Solid State

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
This course develops the theoretical foundations of a variety of condensed matter systems from a mathematical perspective. Prerequisite or co requisite: MTSC 6010H, 6110H.

Academic Level
Graduate

Credit Value

:
0.5

MTSC6130H - Surface Science and Catalysis

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
This course covers the fundamental science required to understand the atomic and electronic structure of surfaces and their chemical reactivity and the most common tools for surface characterization. Prerequisite: MTSC 6010H.

Academic Level
Graduate

Credit Value

:
0.5

MTSC6140H - Experimental Techniques in Materials Characterization

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
A techniques-oriented course covering high resolution experimental solid-state characterization including both theory and operational aspects of bulk, surface and molecular characterization.

Academic Level
Graduate

Credit Value

:
0.5

MTSC6240H - Biomaterials

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
An introduction to natural materials and their applications including properties of animal and plant originating materials as well as manipulation of naturally occurring materials to produce novel materials.

Academic Level
Graduate

Credit Value

:
0.5

MTSC6250H - Polymer Science & Engineering

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
The course introduces the fundamental characteristics of polymers, visco-elasticity and non-Newtonian fluid mechanics. It describes the effects of temperature, crystallinity and diffusivity on polymer processing and properties. Prerequisite: MTSC 6010H.

Academic Level
Graduate

Credit Value

:
0.5

MTSC6260H - Topics in Material Science I

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
This course will focus on topics that may vary depending on the interests of the students and the availability of faculty. Some suggested topics are Nanotechnology, Optical Applications, Electrochemistry and Mass Transport in Fuel Cells.

Academic Level
Graduate

Credit Value

:
0.5

MTSC6270H - Topics in Materials Science II

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
This course will focus on topics that may vary depending on the interests of the students and the availability of faculty. Some suggested topics are Nanotechnology, Optical Applications, Electrochemistry and Mass Transport in Fuel Cells.

Academic Level
Graduate

Credit Value

:
0.5

MTSC6330H - Electrochemical Methods

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
This course addresses the principles and theory of dynamic electrochemistry, voltammetry, stripping analysis, electrochemical sensors and detectors, including an overview of electroanalytical methods and in-depth treatment of mass transport and electron transfer kinetics. Advanced electrode materials and elctrode/cell designs will also be covered. Prerequisite: MTSC-6010H.

Academic Level
Graduate

Credit Value

:
0.5

MTSC6520H - Nanomaterials

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
This course will introduce students to the relevant concepts governing the synthesis, science and engineering of nanomaterials. The course will also examine characterization methods at the nanoscale, new properties at the nanoscale and existing and emerging applications of nanomaterials.

Academic Level
Graduate

Credit Value

:
0.5

MTSC6530H - Carbon-Based Materials

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
The course examines the present state of processing, properties and application of carbonaceous materials. Old and new forms of carbon will be introduced, with an emphasis on novel carbon forms. The physicochemical and surface chemical properties of several forms of carbon will be examined in detail. Prerequisite: MTSC 6010H.

Academic Level
Graduate

Credit Value

:
0.5

MTSC7000H - Materials Science Ph.D. Candidacy Exam

Overview

Department(s)
Materials Science

Contact Department ('not set' refers to cross-listed depts)
Materials Science - 100%

Course Description
Students are required to develop a research proposal for their thesis in conjunction with their supervisory committee. The basis of the proposal is not only major ideas of research but also a discussion of the research context for the proposed work. The proposal must be submitted between 12 and 18 months after enrolment. The candidate's proposal is examined at the candidacy exam by the members of the supervisory committee. The possible exam outcomes are pass, fail, or pass with remediation.

NURS1002H - Introduction to Foundational Practice Concepts

Overview

Department(s)
Nursing

Contact Department ('not set' refers to cross-listed depts)
Nursing - 100%

Course Description
A focus on the older individual living with support. Core concepts include adaptation, dependence/independence, aging, and end-of-life. Topics include ethics (autonomy, competence, consent, confidentiality, privacy), relational inquiry, and therapeutic relationships. Prerequisite: 60% or higher in NURS 1010H and 1100H (or 1000H and 1001H). Co-requisite: NURS 1020H.

Overview

Department(s)
Health, Nursing

Contact Department ('not set' refers to cross-listed depts)
Health - 100%, Nursing - Not Set

Cross-Lists
HEAL-1005H

Course Description
An overview of the relationship between human behaviour and patterns of health and illness. Learners develop a foundational knowledge of human behaviour as it relates to the major determinants of health in individuals, families, and communities. A bio-psychosocial perspective is used to examine a range of factors that influence health outcomes.

Academic Level

NURS1010H - Relational Inquiry

Overview

Department(s)
Nursing

Contact Department ('not set' refers to cross-listed depts)
Nursing - 100%

Course Description
This course introduces relational inquiry (RI) as a foundation for nursing, helping students navigate its complexities with a research-informed approach. It fosters intentional knowledge and practice development while emphasizing the interdependence of patient, nurse, and community well-being. Key concepts include inquiry, relational consciousness, theoretical lenses, and the 5 Cs of RI. Not open to students with credit for NURS 1000H or 1001H.

NURS2021H - Family Focused Practice

Overview

Department(s)
Nursing

Contact Department ('not set' refers to cross-listed depts)
Nursing - 100%

Course Description
Group practice in a setting focused on families dealing with health transitions. Settings may include long-term care, mental health, public health, or maternal/child. Supported by Learning Centre activities relevant to family-focused practice, including breastfeeding support, sexual health counselling, and assessment (cultural, prenatal, postnatal, neonatal). Prerequisite: Students must submit documentation satisfactory to the School of Nursing for all non-academic requirements by the deadline designated for each term; a pass in NURS 1020H; and 60% or higher in NURS 1010H, 1100H (or 1000H, 1001H), 1002H, and 1550H. NURS2022H - International Placement: Central America

Overview

Department(s)
Nursing

Contact Department ('not set' refers to cross-listed depts)
Nursing - 100%

Course Description
This course engages students in community-based nursing practice in a low to middle-income country characterized by diverse cultural, linguistic, and experiential contexts. Students will deepen their understanding of global health nursing and critical analysis through practical clinical experience and seminar discussions. This placement is typically hosted in Guatemala or Honduras. Prerequisite: Satisfactory documentation submitted to the School of Nursing for all non-academic requirements by the deadline designated for each term; a pass in NURS 1020H; 60% or higher in NURS 1010H, 1100H (or 1000H, 1001H), and 1002H; and 60% or higher in one of PSYC 1020H or 1030H. Co-requisite: NURS 2000H. Students may take only one of NURS 2022H or 2020H for credit.

NURS2031H - Quantitative Research for Health Care

Overview

Department(s)
Nursing

Contact Department ('not set' refers to cross-listed depts)
Nursing - 100%

Course Description
An introductory course in health research with an emphasis on quantitative methods. Includes an introduction to health care research and the research process, ethical and legal considerations, research designs and methods, data analysis, and critical appraisal of research findings to inform practice. NURS 2031H and 3031H fulfill the Mathematics requirement for the BScN. Prerequisite: A pass in NURS 1020H and 60% or higher in NURS 1002H, 1010H, and 1100H (or 1000H, 1001H, and 1002H). NURS2121H - Women and Health

Overview

Department(s)
Gender & Social Justice, Nursing

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Nursing - Not Set

Cross-Lists
GESO-2121H

Course Description
Addresses issues of importance to women as recipients and providers of health care and as subjects of health research. Students are introduced to various models of health and illness, and to the origins and theoretical underpinnings of the gendered dimensions of health in Canadian and global contexts. Prerequisite: 0.5 GESO or WMST credit at the 1000 level, or a minimum of 60% in all required NURS 1000-level courses, or permission of instructor. Equivalent to WMST 2121H.

NURS3000H - Experiencing Acute Illness

Overview

Department(s)
Nursing

Contact Department ('not set' refers to cross-listed depts)
Nursing - 100%

Course Description
Examination of the concepts relevant to practice with adults in a hospital setting experiencing acute illness. Focus on recognizing and responding to abnormal results and symptoms in selected disease processes and planned surgical interventions. Topics include safety (nosocomial infections, outbreaks, pandemic) and ethics (consequentialism, deontology, virtue ethics). Prerequisite: A pass in NURS 2020H or 2022H; a pass in NURS 2021H; 60% or higher in NURS 2000H, 2001H, 2003H, and 2550H; and 60% or higher in NURS 2031H or both PSYC 2018H and 2019H. NURS3004H - The Nurse As Leader and Advocate

Overview

Department(s)
Nursing

Contact Department ('not set' refers to cross-listed depts)
Nursing - 100%

Course Description
Focus on the nurse's role in providing leadership and facilitating change in personal, professional, and community contexts. Discussion and analysis of theories and skills related to leadership, management, change, and organizations. At a beginning level, students participate in development of health and social policy, explore advocacy and political action in the context of individual and societal change. Prerequisite: A pass in NURS 2020H or 2022H; a pass in NURS 2021H; 60% or higher in NURS 2000H, 2001H, 2003H, and 2550H; and 60% or higher in NURS 2031H or both PSYC 2018H and 2019H.

NURS3005H - Role Transition - RPN to RN

Overview

Department(s)
Nursing

Contact Department ('not set' refers to cross-listed depts)
Nursing - 100%

Course Description
Provides students the opportunity to explore the concept of transition, the mid-range theory of transition developed by Meleis, and to apply that theoretical knowledge to the role transition that occurs when moving from RPN to BScN-prepared RN within the context of the Ontario health care system. Students examine theoretical and research literature relevant to this transition and demonstrate the ability to integrate this knowledge into planning relevant to their own role transition within nursing. Prerequisite: 4.0 university credits including NURS 1010H (or 1000H) or permission of the department.

NURS4207H - Palliative Care

Overview

Department(s)
Nursing

Contact Department ('not set' refers to cross-listed depts)
Nursing - 100%

Course Description
Offers opportunities to develop depth and breadth of knowledge in caring for individuals/families dealing with dying and death, regardless of the setting. Building on previous courses and clinical experiences, students examine common issues which prevail throughout various illness trajectories. Prerequisite: A pass in NURS 3020H and 3021H; 60% or higher in 60% or higher in NURS 3000H, 3001H, 3004H, 3031H, and 3550H; and permission of department.

NURS4208H - Nursing, Feminism, and Women's Health

Overview

Department(s)
Nursing, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Nursing - 100%, Gender & Social Justice - Not Set

Cross-Lists
GESO-4208H

Course Description
Drawing from the meta-paradigm concepts of nursing science--person, health, environment, and nursing--the focus of this course is women's health and women-centered health care delivery in the Canadian context. Androcentric science, sex/gender-based analysis, and topics such as methadone and mothering, smoking as social control, and HPV vaccination are discussed. Prerequisite: A pass in NURS 3020H and 3021H; 60% or higher in NURS 3000H, 3001H, 3004H, 3031H, and 3550H; and permission of the department. For non-Nursing students: GESO 2121H and permission of the School of Nursing.

PHIL2200H - Philosophy of Education

Overview

Department(s)
Education, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Education - 100%, Philosophy - Not Set

Cross-Lists
EDUC-2200H

Course Description
Education is one of the most significant human occupations, in both the formal and informal understandings of the concept. In this course, we explore philosophical enquiries related to education, focusing on the nature, purpose, and aims of education, effective teaching and learning, issues of social justice, equity, and access. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL2210H - Misinformation

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
An examination of the spread of misinformation, the psychological factors influencing our susceptibility to it, and philosophical debates surrounding the rationality of various individual and societal responses to misinformation. Students will develop skills to analyze, evaluate, and articulate informed perspectives on the complex challenges posed by misinformation. Prerequisite: 4.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL2250H - Introduction to Democratic Leadership

Overview

Department(s)
Political Studies, Canadian Studies, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Philosophy - Not Set

Cross-Lists
CAST-2250H, POST-2250H

Course Description
Introduces students to the field of political leadership. Some classic texts on the challenges of leadership are engaged. The course focuses on key ethical dilemmas and strategic choices that leaders face in the real world, considers the complexity of leadership in a globalized world, and surveys the role of trust in positive, transformational leadership. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL2270H - Philosophy of Mind

Overview

Department(s)
Philosophy, Psychology

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Psychology - Not Set

Cross-Lists
PSYC-2270H

Course Description
An introduction to some of the central themes in philosophy of mind. Answers to ontological questions (what kinds of things are minds?) and epistemological questions (can we know that we and others have minds?) are used to focus discussions concerning personal identity, responsibility for action, animals' minds, and artificial intelligence. Prerequisite: 4.0 university credits or permission of department chair.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PHIL2320H - Existentialism

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
A study of selected figures in Existentialism. Topics may include nihilism, creation, the birth of the individual, the meaning of life, freedom, choice, and commitment. Prerequisite: 4.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL2351H - Ancient and Modern Political Theory

Overview

Department(s)
Political Studies, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%,
Philosophy - Not Set

Cross-Lists
POST-2351H

Course Description
This course surveys the history of political thought from ancient Greece to the end of the nineteenth century. Students will be introduced to how political theorists defined key concepts, such as natural right, sovereignty, contract, political rights, freedom, domination, and equality. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

0.5

PHIL2352H - Contemporary Political Theory

Overview

Department(s)
Political Studies, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Philosophy - Not Set

Cross-Lists
POST-2352H

Course Description
This course is a selective survey that introduces students to central texts, questions, debates, and concepts in contemporary political theory. It examines how thinkers from diverse vintage points have developed different theoretical frameworks to grapple with and make sense of the political reality and pressing political questions they face. Prerequisite: 4.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL2390H - Biomedical Ethics

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
An examination of central issues in the field of biomedical ethics. Topics may include abortion; euthanasia and assisted suicide; stem cell research; genetics; reproductive technologies; scarce resources; research using human subjects. Prerequisite: 4.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL2410H - Symbolic Logic

Overview

Department(s)
Philosophy, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set

Cross-Lists
COIS-2410H

Course Description
An introductory study of formal logical systems, together with their use in the analysis of various types of arguments. Prerequisite: 4.0 university credits or permission of department chair.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PHIL2420H - Ancient Philosophy 1: Pre-Socratics to Plato

Overview

Department(s)
Philosophy, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-2420H

Course Description
A study of early Greek philosophy focusing on Socrates, Plato, and their most influential predecessors. Complements PHIL-AGRS 2430H. Prerequisite: 4.0 university credits or permission of department chair. Equivalent to AHCL 2420H.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL2430H - Ancient Philosophy 2: Aristotle and the Hellenists

Overview

Department(s)
Philosophy, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-2430H

Course Description
A study of Greco-Roman philosophy focusing on Aristotle and the Hellenistic philosophers including the Epicureans and Stoics. Prerequisite: 4.0 university credits or permission of department chair. Recommended: PHIL-AGRS 2420H. Equivalent to AHCL 2430H.

Academic Level
Undergraduate

Credit Value

0.5

PHIL2590H - Philosophy and Film

Overview

Department(s)
Philosophy, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Media Studies - Not Set

Cross-Lists
MDST-2590H

Course Description
An exploration of philosophy in film and of the relationship between philosophy and film. The focus is on the ability of films not only to illustrate philosophical ideas, but also to advance our understanding of philosophical problems in ways unique to cinema. Prerequisite: 4.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL2618H - Responding to Violence

Overview

Department(s)
Criminology, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Criminology - 100%,
Philosophy - Not Set

Cross-Lists
CRIM-2618H

Course Description
A critical examination of social and legal responses to violence. Specific attention is paid to legal punishment as a response to violence, and punishment as a form of violence. Retributive and restorative conceptions of justice are considered. Prerequisite: 4.0 university credits including CRIM 1615H, or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL2750H - Philosophy of Religion

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
An inquiry into the nature of religion and religious belief; the relations among faith, reason, knowledge, and revelation; the analysis of religious language; the mystical claim to direct knowledge of God; the nature of evil; and religion and ethics. Prerequisite: 4.0 university credits or permission of department chair.

PHIL3025H - Philosophy of Nature Sport and Recreation

Overview

Department(s)
Philosophy, Kinesiology

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Kinesiology - Not Set

Cross-Lists
KINE-3025H

Course Description
An exploration of the ethics, meaning, and value of nature sports and recreation. Students study concepts of nature sport, outdoor recreation, nature and wilderness, embodiment, exploration, self-transcendence, and the freedom to roam alongside ethical, aesthetic, environmental, political, and social values in the pursuit of nature sport and recreation. Prerequisite: 7.0 university credits. Recommended: PHIL 2020H.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3030H - The Meaning of Life

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
An examination of ways of thinking about and ways of answering the question, "What is the meaning of life?" Classical attempts to account for the meaning of life in Eastern and Western philosophies, religious thought, and Indigenous knowledge systems are considered in relation to accounts defended in contemporary philosophical literature. Prerequisite: 7.0 university credits or permission of department chair.

PHIL3050H - Philosophy, Gender, and Feminism

Overview

Department(s)
Philosophy, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Gender & Social Justice - Not Set

Cross-Lists
GESO-3050H

Course Description
A study of philosophical concepts of gender, sex and sexuality, feminist critique, and developments in feminist philosophies. Prerequisite 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3110H - Ethical Theory

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
A study of texts in the foundations of morals and particular ethical theories, including virtue ethics, Kantianism, and utilitarianism. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3140H - Justice and Rights

Overview

Department(s)
Philosophy, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Political Studies - Not Set

Cross-Lists
POST-3140H

Course Description
A study of the nature and value of rights in relation to competing theories of justice. Attention is given to the nature of power and oppression in relation to social change; topics may include class, ability, age, gender, and race. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3180H - Social and Political Philosophy

Overview

Department(s)
Philosophy, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Political Studies - Not Set

Cross-Lists
POST-3180H

Course Description
An examination of philosophical theories related to political institutions and practices. Topics may include the foundations of the state, justified use of force, and limits to freedom. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3190H - Philosophy of Race

Overview

Department(s)
Philosophy, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Political Studies - Not Set

Cross-Lists
POST-3190H

Course Description
This course introduces philosophical articulations of race, racism, and racialization. Students learn how political philosophers have made sense of race as a structural condition of the modern and contemporary world, as a force that shapes individual lives in different ways, and how they have explored the different ways in which racialization takes place. A wide range of philosophical approaches are explored. Prerequisite: 7.0 university credits including PHIL 1100H, or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3210H - Epistemology

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
A wide-ranging introduction to the theory of knowledge. Topics may include the nature and limits of knowledge, external world skepticism, truth and objectivity, relativism, the possibility of moral knowledge, induction and the status of scientific theories, and the nature of rationality. Readings include classical as well as contemporary readings, with an emphasis on the latter. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3220H - Metaphysics

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
A wide-ranging introduction to metaphysics. Topics may include realism and anti-realism, monism and pluralism, substance, change and identity, causation, events, free will and determinism, space and time, universals, properties, necessity, and possible worlds. Readings include classical as well as contemporary readings, with an emphasis on the latter. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3270H - Philosophy of Artificial Intelligence

Overview

Department(s)
Philosophy, Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set, Artificial Intelligence - Not Set

Cross-Lists
AIST-3270H, COIS-3270H

Course Description
An examination of philosophical questions pertaining to artificial intelligence (AI) and the role AI plays in society. The first part treats the history, nature, and limits of AI. The second part turns to more applied questions related to ethics, and the social and political implications of AI. Prerequisite: 7.0 university credits or permission of the department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3280H - Philosophy of Dreams

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
An interdisciplinary study of the philosophy of dreams, incorporating perspectives from philosophy, psychology, cognitive science, and neuroscience. The course focuses on epistemological issues relating to the nature of dreams, our knowledge of dreams, the self in dreams, and the science of dreaming. Prerequisite: 7.0 university credits including 1.0 PHIL credit or permission of department chair. Recommended: PHIL 2270H. Not open to students with credit for PHIL 4280H.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3301H - Environmental Ethics

Overview

Department(s)
Environment, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%,
Philosophy - Not Set

Cross-Lists
ERST-3301H

Course Description
Provides a consideration of the moral dimensions of human/nonhuman relationships. We critically examine a range of systems of thought that address such ethical questions, including deep ecology, ecofeminism, Indigenous perspectives, and animal rights, with specific cases on each philosophical orientation. Deals explicitly with the ethical dimensions of ecological restoration. Prerequisite: 1.0 ERST and/or PHIL credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3302H - Animals and Society

Overview

Department(s)
Environment, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%,
Philosophy - Not Set

Cross-Lists
ERST-3302H, SAFS-3302H

Course Description
Provides an introduction to animal studies. Topics considered include the constructed divide between humans and non-human animals, societies' use of animals-for food, clothing, entertainment, companionship, research-and the implications of these relationships. The course will also discuss animal rights, animal protection, and posthumanist perspectives. Prerequisite: 1.0 ERST or PHIL credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3303H - Philosophy of Climate Change

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
An examination of the philosophical dimensions of the climate crisis at the intersection of climate science, epistemology, ethics, and politics. Topics include the role of values in scientific modeling, the rationality of climate skepticism, misinformation and trust, collective and individual moral responsibility, global inequality, and the ethics of geoengineering. Prerequisite: 7.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3320H - Language and Meaning

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
A focused study of philosophical issues related to language and meaning. Topics may include theories of meaning, intentionality, and reference; the relation between language and reality; concepts; analysis; and hermeneutics. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3335H - The Meaning of Politics Today

Overview

Department(s)
Political Studies, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%,
Philosophy - Not Set

Cross-Lists
POST-3335H

Course Description
Explores political theory in the context of contemporary political events and issues. In doing so, it examines the uses and limitations of political theory in relation to themes such as democracy, justice, equality, diversity, and reconciliation. Prerequisite: 7.0 university credits or permission of instructor. Not open to students with credit for POST 3330Y.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3360H - Social Media Ethics

Overview

Department(s)
Philosophy, Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set, Media Studies - Not Set

Cross-Lists
COIS-3360H, MDST-3360H

Course Description
An examination of the moral challenges raised by social media, including echo chambers, cancel culture, hate speech, privacy, manipulation, misinformation, and digital addiction. The course explores how social media reshapes our notions of friendship, community, responsibility, and freedom. Prerequisite: 7.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3370H - Cyberethics

Overview

Department(s)
Philosophy, Computer Science, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set, Media Studies - Not Set

Cross-Lists
COIS-3370H, MDST-3370H

Course Description
Enables students to develop their own positions about the most important social and moral problems raised by computer use and technologies, including the fragmentation of society into computer "haves" and "have-nots," Internet censorship, pornography, intellectual property rights, and software piracy. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3400H - Feminism and Disability

Overview

Department(s)
Gender & Social Justice, Philosophy, Sociology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Philosophy - Not Set, Sociology - Not Set

Cross-Lists
GESO-3400H, SOCI-3400H

Course Description
Introduces students to critical perspectives that push thinking about disability beyond medical and social models. Focuses on connections between gender and disability. Explores feminist challenges to ableism. Other topics include bodies, race, sexuality, education, creativity, access, eugenics, intersections, and austerity. Prerequisite: 6.0 university credits. Equivalent to WMST 3300H, 3400H.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3410H - Non-Classical Logic

Overview

Department(s)
Philosophy, Computer Science, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Computer Science - Not Set, Artificial Intelligence - Not Set

Cross-Lists
AIST-3410H, COIS-3410H

Course Description
Building on classical propositional and first-order logic, this course introduces students to a variety of non-classical logics including modal logic, intuitionistic logic, and many-valued logic, as well as fuzzy logic. Prerequisite 7.0 university credits including PHIL 2410H or COIS 2320H.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3420H - Early Modern Philosophy 1

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
The seventeenth century in Western Europe was an era of important revolutions in scientific, religious, and political thinking. This course studies the role that philosophers and their works played in these revolutions. Authors may include, but are not limited to, Descartes, Princess Elisabeth, Hobbes, Spinoza, Leibniz, and Conway. Complements PHIL 3430H. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3430H - Early Modern Philosophy 2

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
The eighteenth century in Western Europe witnessed the rise and then critique of the intellectual movement called the "Enlightenment," characterized by its promotion of freedom, equality, and the scientific method. This course studies philosophers sympathetic to and critical of the Enlightenment, such as Locke, Voltaire, Hume, Rousseau, and Kant. Prerequisite: 7.0 university credits or permission of department chair. Recommended: PHIL 3420H.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL3900Y - Reading Course

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
Students are encouraged to pursue a special interest, largely through independent study, for a half- or full-course credit. Students must arrange details in consultation with faculty in Philosophy at least one month prior to the start of the semester in which the course is to be started. Subject to departmental and decanal approval. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:

Undergraduate

Credit Value

:
0.5

PHIL4200H - Argumentation Theory

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
The course surveys and discusses the study of argument and arguing. It examines the issues raised when we apply the methods of logic, rhetoric, and dialectics to real-life examples of arguing (in interpersonal exchange, the study of science and philosophy, political discourse, the use of AI, etc.). Prerequisite: 7.0 university credits including PHIL 1200H, or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4210H - Advanced Topics in Metaphysics and Epistemology

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
A seminar devoted to in-depth investigation of selected central metaphysical and epistemological themes. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4250H - Business Ethics and Corporations

Overview

Department(s)
Business, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Business - 100%, Philosophy - Not Set

Cross-Lists
ADMN-4250H

Course Description
Examines a number of ethical issues raised by for-profit corporations, including whether corporations are moral agents and the purpose of corporations. Considers stakeholder theory, stockholder theory, Integrative Social Contact Theory, and CSR. Analyzes numerous case studies of corporate actions. Prerequisite: 12.0 university credits, of which 5.0 must be ADMN credits including ADMN 3300H; or both PHIL 1200H and 2110H.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4260H - Ethics and Capitalism

Overview

Department(s)
Business, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Business - 100%, Philosophy - Not Set

Cross-Lists
ADMN-4260H

Course Description
Examines ethical issues raised by the free-market capitalist economic system such as justice and the distribution of wealth, capitalism and democracy, and ecological sustainability. Several theories of justice are considered. Prerequisite: 12.0 university credits, of which 5.0 must be ADMN credits including ADMN 3300H; or both PHIL 1200H and 2110H.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4270H - Ethics of Artificial Intelligence

Overview

Department(s)
Philosophy, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-4270H

Course Description
An examination of pressing ethical issues raised by the transformative impacts of ArtificialIntelligence (AI) on our society and across the globe. Topics may include harm mitigation,autonomous systems, lethal autonomous weapons, surveillance, security, and privacy,manipulation and behaviour, fairness and bias, the future of work, and artificial moral agents. Prerequisite: 8.0 university credits including AIST 1000H or PHIL 1100H, or permission of the department.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4280H - Philosophy of Dreams

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
An interdisciplinary study of the philosophy of dreams, incorporating perspectives from philosophy, psychology, cognitive science, and neuroscience. The course focuses on epistemological issues relating to the nature of dreams, our knowledge of dreams, the self in dreams, and the science of dreaming. Prerequisite: Prerequisite: 7.0 university credits including 1.0 PHIL credit or permission of department chair. Recommended: PHIL 2270H.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4310H - Advanced Topics in Value Theory

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
A study of central themes in value theory, to be chosen among issues in moral theory and political theory. Prerequisite: 7.0 university credits including PHIL 3110H, or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4331H - Power, Resistance, and Hope

Overview

Department(s)
Political Studies, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%,
Philosophy - Not Set

Cross-Lists
POST-4331H

Course Description
Drawing on political theory, the course explores the relationship between power, forms of resistance, and the hope for and potential practices of alternative forms of politics. In doing so, it focuses on concepts such as oppression and domination, subjectivity, democracy, utopia, and prefigurative politics. Prerequisite: 12.0 university credits including 1.0 credit from POST-PHIL 2351H and 2352H or POST 3335H; or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4332H - Abolition, Emancipation, Decolonization

Overview

Department(s)
Political Studies, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Philosophy - Not Set

Cross-Lists
POST-4332H

Course Description
This is an advanced political theory course that surveys how Black, Indigenous, and other colonized and racialized peoples across the globe have theorized and critiqued structures of racial and colonial domination, and in so doing articulated unique visions of freedom and justice, from the nineteenth century to the present. Prerequisite: 12.0 university credits including 1.0 POST, GESO, and/or PHIL credit; or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4390H - Advanced Topics in Biomedical Ethics

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
An in-depth examination of a specific issue in biomedical ethics. Topics vary each year and may include cloning and stem cell research; reproductive technologies, including abortion; genetics; end-of-life issues; justice in health care delivery. Prerequisite: 7.0 university credits including PHIL 2390H, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4410H - Advanced Topics in Logic and Language

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
An advanced study of some of the central themes in philosophy of logic or philosophy of language. Prerequisite: 7.0 university credits including PHIL-COIS 2410H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4430H - Advanced Topics in Ancient Philosophy

Overview

Department(s)
Philosophy, Ancient Greek & Roman Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Ancient Greek & Roman Studies - Not Set

Cross-Lists
AGRS-4430H

Course Description
A focused study of texts and ideas from philosophers in Greek and Roman antiquity. Specific topics are determined each year. Prerequisite: 7.0 university credits including PHIL-AGRS 2420H and 2430H, or permission of department chair. Equivalent to AHCL 4430H.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4530H - Nineteenth Century Philosophy

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
A study of some central themes and important philosophers of the nineteenth century. Prerequisite: 7.0 university credits including PHIL 3420H or 3430H, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4540H - Twentieth Century Philosophy

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
A study of some central themes and important philosophers of the twentieth century. Prerequisite: 7.0 university credits including PHIL 2410H, 3420H, or 3430H, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4610H - Major Texts

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
A close study of one or more central texts by one or more important philosophers. Texts and philosophers to change annually. Prerequisite: 7.0 university credits including 1.0 PHIL credit at the 3000 level or beyond, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4710H - Advanced Topics in Philosophy of Mind

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
An in-depth investigation into some of the central issues in philosophy of mind, e.g., consciousness, embodiment, reasons for actions, the emotions, free will, zombies, thinking machines, conscious animals. Prerequisite: 7.0 university credits including PHIL-PSYC 2270H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4720H - Advanced Topics in Philosophy of Science

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
A study of central themes in philosophy of science, to be chosen from among issues in metaphysics, epistemology, and ethics. Topics vary yearly and may include a focus on problems in one specific area of scientific inquiry. Prerequisite: 7.0 university credits including PHIL 2780H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

PHIL4870Y - Community-Based Research Project

Overview

Department(s)
Philosophy

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%

Course Description
Each placement is supervised jointly by a faculty member and a representative of a community organization. For details, see Community-Based Research program. Students may take PHIL 4870Y or either or both of 4871H and 4872H for credit.

Academic Level

PHYS1000H - Foundations of Physics

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
A traditional introduction to mechanics for students without high school physics experience. Designed for students seeking to strengthen their physics background in preparation for PHYS 1001H, or those who do not currently intend to pursue further studies in physics. Topics include kinematics (description of motion) and dynamics (causes of motion/forces/Newton's laws) in one and two dimensions. Concepts are extended to rotational motion, work and energy, momentum, and conservation laws. Time is taken to develop related mathematical skills. Not open to students enrolled in or with credit for PHYS 1001H or 1002H. Not for credit toward a major or minor in Physics.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

0.5

PHYS1001H - Introductory Physics 1

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
An introduction to university-level mechanics for scientists, leading to the further study in physics via PHYS 1002H. Topics include kinematics (description of motion) and dynamics (causes of motion/forces/Newton's laws) in one and two dimensions. Concepts are extended to rotational dynamics, work and energy, momentum, and conservation laws. Prerequisite: 3U Physics or equivalent, or PHYS 1000H and 4U Advanced Functions or equivalent, or permission of the department. Strongly recommended: 4U Physics and 4U Calculus and Vectors. MATH 1110H or 1111H, required for upper-level Physics courses, recommended to be taken concurrently with PHYS 1001H. Not open to students with credit for PHYS-FRSC 1020H.

PHYS2091H - Light and Colour for Future Teachers

Overview

Department(s)
Physics & Astronomy, Education

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Education - Not Set

Cross-Lists
EDUC-2091H

Course Description
An experiential learning course designed for future elementary school teachers. Topics include image formation, colour perception, reflection, refraction, shadows, and printing. Emphasis is placed on student learning through collaborative experiments and construction of conceptual models. Registration preference is given to students in education programs, but students in other programs are also welcome. Can be taken either before or after PHYS-EDUC 2093H. Does not satisfy the science requirement for a science degree. Not open to students enrolled in or with credit for PHYS 1001H, 1002H, 1020H, 1060H, or 2090Y, except by permission of the instructor.

Academic Level
Undergraduate

Credit Value

PHYS2093H - Electricity and Motion for Future Teachers

Overview

Department(s)
Physics & Astronomy, Education

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Education - Not Set

Cross-Lists
EDUC-2093H

Course Description
An experiential learning course designed for future elementary school teachers. Topics include simple circuits and circuit elements, static electricity, forces, pulleys, levers, and gears. Emphasis is placed on student learning through collaborative experiments and construction of conceptual models. Registration preference is given to students in education programs, but students in other programs are also welcome. Can be taken either before or after PHYS-EDUC 2091H. Does not satisfy the science requirement for a science degree. Not open to students enrolled in or with credit for PHYS 1001H, 1002H, 1020H, 1060H, or 2090Y, except by permission of the instructor.

PHYS2130H - Introductory Classical Dynamics

Overview

Department(s)
Physics & Astronomy, Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Mathematics & Statistics - Not Set

Cross-Lists
MATH-2130H

Course Description
Analytical and computational methods for obtaining the motion of simple physical systems. Includes motion in one dimension, projectile motion, realistic motion of objects with drag and spin, oscillatory motion, chaos in the nonlinear pendulum. Students use a mix of analytical calculus-based methods and scientific computing tools to solve problems. Prerequisite: 60% or higher in PHYS 1001H and MATH 1120H or 1121H. Pre- or co-requisite: MATH 2150H. Strongly recommended: COIS 1020H. Not open to students with credit for PHYS-COIS 2310H or PHYS-MATH 3130H.

Academic Level
Undergraduate

PHYS2150H - Ordinary Differential Equations

Overview

Department(s)
Mathematics & Statistics, Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Physics & Astronomy - Not Set

Cross-Lists
MATH-2150H

Course Description
First order equations; qualitative and numerical methods. Second order linear equations. Linear systems. Applications to physical and biological models. Laplace transforms. Prerequisite: 60% or higher in MATH 1120H or 1121H. Recommended: MATH 1350H.

Academic Level
Undergraduate

PHYS2250H - Electronics

Overview

Department(s)
Computer Science, Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Computer Science - 100%, Physics & Astronomy - Not Set

Cross-Lists
COIS-2250H

Course Description
An applied course in the electronic circuits most commonly used in laboratory sciences. Circuit theory, test instruments, operational amplifiers, semiconductor theory, measurement sensors, power control, digital circuits, computer process-control and data collection, AC circuit theory, filters, DC power supplies, RC timing circuits, amplifiers, oscillators. Prerequisite: 60% or higher in PHYS 1002H and in MATH 1120H or 1121H, or permission of the department.

Undergraduate

Course Designation
Science

Credit Value
:
0.5

PHYS2605H - Introduction to Quantum Computing

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
An introduction to quantum computing at a beginner's level. Topics include review of classical computers and introduction to quantum computers, vector spaces, qubits, superposition (using photon and electron spin), quantum gates, quantum circuits, quantum algorithms. In addition, the course offers hands-on experience of working with quantum computers. Prerequisite: PHYS 1002H and MATH 1350H, or PHYS 1001H and MATH 2350H. Recommended: MATH 1550H.

Academic Level
Undergraduate

PHYS2610H - Introductory Quantum Physics

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
Particle-like aspects of radiation and wave-like properties of matter. Schrödinger equation and applications to one-dimensional systems. One-electron atoms, magnetic dipole moments, spin, identical particles and atomic structure. Prerequisite: 60% or higher in PHYS 1002H and a pass in MATH 2110H and PHYS-MATH 2150H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PHYS2700H - Thermal Physics

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
The laws of thermodynamics and their applications, thermodynamic potentials, kinetic theory of gases, introduction to statistical thermodynamics. Prerequisite: MATH 2110H. Co-requisite: PHYS 2610H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PHYS3130H - Classical Mechanics

Overview

Department(s)
Physics & Astronomy, Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Mathematics & Statistics - Not Set

Cross-Lists
MATH-3130H

Course Description
Classical mechanics of particles in three dimensions. Topics include motion in non-inertial reference frames, gravity, central forces, and special relativity. Prerequisite: PHYS-MATH 2130H (or PHYS 2110H). Pre- or co-requisite: MATH 2110H and 2150H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

PHYS3150H - Partial Differential Equations

Overview

Department(s)
Mathematics & Statistics, Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Physics & Astronomy - Not Set

Cross-Lists
MATH-3150H

Course Description
The transport equation, heat equation, wave equation, Laplace equation, Poisson equation, in one, two, and three dimensions, in Cartesian, Polar, and/or Spherical coordinates. Physical interpretations. Properties of harmonic functions. Fourier theory: uniform, pointwise, and L2 convergence. Initial/ boundary value problems: existence and uniqueness of solutions. Solutions to I/BVPs using orthogonal eigenfunction expansions. Solutions to I/BVPs using convolutional transforms. Prerequisite: MATH 2110H and 2150H. Strongly recommended: MATH 1350H.

Academic Level
Undergraduate

Course Designation
Science

0.5

PHYS3160H - Methods of Applied Mathematics

Overview

Department(s)
Mathematics & Statistics, Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Mathematics & Statistics - 100%, Physics & Astronomy - Not Set

Cross-Lists
MATH-3160H

Course Description
Differential equations in applied mathematics, including Bessel, Legendre, hypergeometric, Laguerre, Hermite, Chebyshev, etc. Series and numerical solutions. Properties of the special functions arising from these equations. Prerequisite: MATH 2110H and MATH-PHYS 2150H. Recommended: MATH 2200H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PHYS3200Y - Electricity and Magnetism

Overview

Department(s)
Physics & Astronomy, Computer Science

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Computer Science - Not Set

Cross-Lists
COIS-3200Y

Course Description
Electrostatics, magnetostatics, electric and magnetic properties of matter, Maxwell's equations, electromagnetic wave propagation. Prerequisite: 60% or higher in PHYS 1002H or permission of the department; PHYS-MATH 2150H, MATH 2110H, and 2120H.

Academic Level
Undergraduate

PHYS3510H - Astrobiology: Life in the Universe

Overview

Department(s)
Physics & Astronomy, Biology

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Biology - Not Set

Cross-Lists
BIOL-3510H

Course Description
An examination of the prospects for extraterrestrial life, based primarily on material from astronomy, biology, and planetary science. Topics include the origin and evolution of life on Earth, extremophiles, the habitability of Mars and Jovian moons, the nature and habitability of exoplanets, SETI, the Drake equation, and the Fermi paradox. Prerequisite: 5.0 university credits including at least one of BIOL 1020H, BIOL 1030H, BIOM 1000H, PHYS 1510H, or PHYS 1520H. Not for credit toward a major or minor in Physics.

PHYS3610H - Foundations of Quantum Mechanics

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
An introduction to the foundations of quantum mechanics. Topics include the postulates of quantum mechanics, Hilbert spaces, Dirac notation, one dimensional problems, matrix representations of quantum mechanics, unitary transformations. Prerequisite: PHYS-MATH 2130H (or PHYS 2110H or 2620H), PHYS-MATH 2150H, and PHYS 2610H. Recommended: MATH 2350H.

PHYS3901H - Reading Course

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
Designed to allow advanced students in Physics to pursue independent study under the direction of departmental faculty. Available only in exceptional circumstances and with the approval of the department.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PHYS4000Y - Project Course

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
An experimental or theoretical project on some topic of advanced physics. Projects are selected in consultation with Physics & Astronomy faculty. Students must obtain approval for the project. Contact the department office for an application form. A cumulative average of at least 77% in all PHYS and MATH credits will normally be required. Students may take only one of PHYS 4000Y or 4010H for credit.

PHYS4050H - Advanced Experimental Techniques

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
Instructs students in techniques commonly found within research laboratories and industrial workplaces, such as principal component analysis, microcontroller programming, analysis of control systems, and interferometry. Pre- or co-requisite: PHYS-COIS 2250H.

Academic Level
Undergraduate

Course Designation
Science

PHYS4140H - Advanced Classical Mechanics

Overview

Department(s)
Physics & Astronomy, Mathematics & Statistics

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%, Mathematics & Statistics - Not Set

Cross-Lists
MATH-4140H

Course Description
Classical mechanics of particles, rigid bodies, and continuous media. Topics include Lagrangian and Hamiltonian mechanics, systems of particles, motion of rigid bodies, and oscillating systems. Prerequisite: MATH 2110H, 2150H, and PHYS-MATH 3130H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PHYS4220H - Electromagnetic Theory

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
Maxwell's equations, the interactions of electromagnetic fields with matter, the relativistic formulation of electromagnetism and its applications. Prerequisite: PHYS-COIS 3200Y and PHYS-MATH 3150H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PHYS4240H - Modern Optics

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
Properties of light: polarization, interference, coherence, and diffraction. Interaction of light with matter: Einstein coefficients and quantum-mechanical treatment of matter. Laser operation and applications: absorption, gain, and saturation; three and four-level laser systems; longitudinal and transverse modes; specific laser systems. Concepts in modern quantum optics. Pre- or co-requisite: PHYS-MATH 2130H (or PHYS 2110H or 2620H), PHYS 2610H, PHYS-COIS 3200Y, and PHYS-MATH 3150H.

0.5

PHYS4520H - Astrophysics: Galaxies and Cosmology

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
An introduction to modern astrophysics, which applies the principles of physics to the study of galaxies and cosmology. Topics include the Milky Way galaxy, the nature of galaxies, galaxy evolution, the structure of the universe, active galactic nuclei and quasars, cosmology, and the early universe. Prerequisite: PHYS-MATH 2130H (or PHYS 2110H or 2620H) and PHYS 2610H. Strongly recommended: PHYS 1510H and 1520H.

Academic Level
Undergraduate

:
0.5

PHYS4605H - Building and Using Quantum Computers

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
An examination of a selection of physical systems being developed and used for quantum computation; benchmarks used to compare different platforms; categories of quantum computing approaches; quantum algorithms; error correction; applications. Prerequisite: PHYS 3610H. Recommended: MATH 1350H, MATH 2350H, and PHYS 2605H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PHYS4610H - Advanced Quantum Mechanics

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
Advanced topics in quantum mechanics. Spherically symmetric potentials, theory of angular momentum, perturbation theory, selected special topics. Prerequisite: PHYS 3610H and MATH 3150H. Recommended: MATH 2350H.

Academic Level
Undergraduate

Course Designation

0.5

PHYS4700H - Statistical and Thermal Physics

Overview

Department(s)
Physics & Astronomy

Contact Department ('not set' refers to cross-listed depts)
Physics & Astronomy - 100%

Course Description
The statistical meaning of entropy and temperature; microcanonical, canonical, and grand canonical ensembles; derivation of distributions for distinguishable and indistinguishable particles and applications. Additional topics may include advanced methods in classical statistical mechanics, an introduction to phase transitions, and cryogenics. Prerequisite: PHYS-MATH 2130H (or PHYS 2110H or 2620H), PHYS 2610H, PHYS 2700H, and MATH 2110H. Pre- or co-requisite: PHYS-MATH 3150H.

PLCW1001H - Introduction to Policing and Community Well-Being

Overview

Department(s)
Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%

Course Description
Examines the nature of safety and security in the community by focusing on the role of the police as an agent of social control and safety, including how police forces have changed over time in Western countries and the various challenges facing modern police forces in Canada. Not open to students with credit for PLCW 1000H.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW1003H - Social Determinants of Health and Crime

Overview

Department(s)
Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%

Course Description
Introduces social factors which protect communities and individuals from crime and social disorder. Provides a history of the social determinants of health movement and draws parallels to the challenges of stemming crime and social disorder in community. Draws parallels between "health promotion" in the health sector and safety promotion in community. Not open to students with credit for PLCW 2003H.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW2001H - Restorative Justice

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
CRIM-2001H

Course Description
Compares and contrasts restorative justice and Canada's criminal justice system, focusing on punitive versus restorative justice practices. Overviews Indigenous roots of restorative justice practices and the role of community in achieving justice for all. Introduces students to contemporary restorative justice practices. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW2002H - Community Problem-Solving and Analysis

Overview

Department(s)
Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%

Course Description
Introduces students to community safety and well-being planning. Students work collaboratively to research a local community, analyze its diversity, identify community problems that require resolution, and develop proposed solutions to identifiable community level safety and/or well-being issues. Prerequisite: 4.0 university credits including PLCW 1003H or 2003H.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW2005H - Diversity and Exclusion

Overview

Department(s)
Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%

Course Description
Prepares students to tackle complex problems in diverse communities through learning the history of discrimination, hate, and violence in Canada; demographic shifts and trends; and practical opportunities to learn about privilege, stereotyping, systemic exclusion, and measures to foster inclusion. Prerequisite: 4.0 university credits. Not open to students with credit for PLCW 3006H.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW2006H - Marginalization and Social Control

Overview

Department(s)
Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%

Course Description
Examines how social control is designed and manifested in society by closely examining how gender, race, sexuality, and poverty are managed by agents of social control. Particular attention is placed on how inequality is reinforced through social control tactics. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW2010H - Conflict Resolution

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
CRIM-2010H

Course Description
Examines different approaches to analyzing the causes, dynamics, and consequences of conflict, and subsequently designing interventions with the aim of resolving such conflicts peacefully and justly. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW2011H - Wrongful Convictions

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
CRIM-2011H

Course Description
Examines the causes and consequences of wrongful convictions in Canada. Particular attention is placed on role of criminal justice actors (police, courts, juries, lawyers), eyewitness testimony, false confessions, forensic misconduct, and DNA exonerations. The impact of wrongful convictions on the accused, victims, and the justice system is highlighted. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW2040H - Law and Order in Ancient and Contemporary Cultures

Overview

Department(s)
Anthropology, Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Policing & Community Wellbeing - Not Set

Cross-Lists
ANTH-2040H

Course Description
An examination of social control and organization and the development of laws in past and present societies around the world. Anthropological approaches and evidence are combined to understand the range of political and justice systems created as ways of defining and solving human problems. Prerequisite: ANTH 1001H or 3.0 university credits. Offered only at Trent University Durham GTA.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW2100H - Research Methods in Policing and Community Well-Being

Overview

Department(s)
Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%

Course Description
An introduction to research design and methods focusing on qualitative, quantitative, and mixed methodologies. The course equips students with the fundamental skills necessary to conduct and evaluate research. Some of the topics explored include ethical and political considerations, measurement, sampling, surveys, interviews, field research, and statistics. Prerequisite: 4.0 university credits including 1.0 PLCW credit at the 1000 level. Not open to students with credit for CHYS-COMM 2000H, CHYS-COMM 2010H, or SOCI 2151H.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW3002H - Mental Health and Addictions in the Community

Overview

Department(s)
Policing & Community Wellbeing, Criminology

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Criminology - Not Set

Cross-Lists
CRIM-3002H

Course Description
Focuses on mental health and addiction and their impacts on community safety and well-being. Explains these disorders using real case scenarios. Students will become aware of victimization and stigma associated with mental health and substance abuse disorders, and have a better understanding of the etiology of addictions and mental health problems. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW3003H - Violence in the Community

Overview

Department(s)
Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%

Course Description
Analyzes violence in community, including power relations and the intersection of age, gender, race, ethnicity, and class. Students examine physical, sexual, psychological, social, and economic violence among intimate partners, children, and elders; and leave this course knowing the etiology of violence as well as measures to stem it. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW3004H - Community-Based Research Methods

Overview

Department(s)
Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%

Course Description
Introduces students to the variety of research methods that are appropriate to community-based initiatives. Prepares students to enter into community problem-solving initiatives with the ability to source, understand, and apply the results of qualified research. Helps students understand research results and prepares them to make evidence-based decisions. Prerequisite: 7.0 university credits including 60% or higher in PLCW 2100H, CHYS-COMM 2010H (or 2000H), or SOCI 2151H.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW3005H - Community Consultation and Advocacy

Overview

Department(s)
Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%

Course Description
Students learn the history, principles, and practices of consultation and advocacy in public policy development and program design. They will leave the course with practical skills in achieving the goals of consultation and advocacy applied to resolving complex community problems. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW3007H - Problem-Solving in a Complex and Diverse Community

Overview

Department(s)
Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%

Course Description
Expands upon the community problem-solving framework to provide students with a deeper understanding of the role that collaboration plays in resolving safety and well-being concerns. Students may work directly with community partners on a variety of locally derived projects. The topic areas change each term. Prerequisite: 7.0 university credits including 65% or higher in PLCW 2002H.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW3008H - Indigenous Peoples and the Police: Past and Present

Overview

Department(s)
Policing & Community Wellbeing, Indigenous Studies

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%, Indigenous Studies - Not Set

Cross-Lists
INDG-3008H

Course Description
Introduces students to the historical underpinnings of the relationship between Indigenous peoples and police in Canada. Topics examined include colonial policing, replication of order, structural racism, Indigenous protest movements, and the Indigenization of the police. Solutions for improving policing for Indigenous peoples are also explored. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

PLCW3009H - Crime, Law, and Social Policy

Overview

Department(s)
Policing & Community Wellbeing

Contact Department ('not set' refers to cross-listed depts)
Policing & Community Wellbeing - 100%

Course Description
Examines policy responses to criminal behaviour, including general public attitudes and government legislation as an instrument of social control. Public crime policy looks at a variety of legal and normative considerations, starting with what ought to be criminal in the first place. Prerequisite: 7.0 university credits.

POST3030H - Eco-Anxiety to Eco-Hope: (Re)Imagining Green Futures Through Dialogue With Diversity

Overview

Department(s)
Political Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Environment - Not Set

Cross-Lists
ERST-3030H

Course Description
An interdisciplinary examination of the power of ideas, activating political, economic, sociocultural, gender, justice, and creative lenses to bridge diverse ways of knowing and inspire hope for a better future. Topics include eco-anxiety, environmental justice, attitudes toward nature, ecofeminism, radical environmentalism, sustainability, limits to growth, and perceptions of environmental risk. Prerequisite: 1.0 POST and/or ERST credit or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3091H - Law and Constitutional Issues

Overview

Department(s)
Political Studies, Canadian Studies, Criminology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Criminology - Not Set

Cross-Lists
CAST-3091H, CRIM-3091H

Course Description
Examines the way the Canadian constitution both constrains and opens up possibilities for political change. Includes consideration of formal constitutional interpretation and the politics of the judicial process. Looks at important issues such as the federal-provincial division of powers, secession, Senate reform, and Indigenous self-determination. Prerequisite: 7.0 university credits. Recommended: POST-CAST 2011H, 2012H, or PHIL-POST 2150H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3092H - Law and the Charter of Rights and Freedoms

Overview

Department(s)
Political Studies, Canadian Studies, Criminology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Criminology - Not Set

Cross-Lists
CAST-3092H, CRIM-3092H

Course Description
Examines key Supreme Court decisions on the Charter of Rights and Freedoms pertaining to fundamental freedoms, democratic rights, legal rights, and equality rights. Assesses the role of the Charter in advancing the struggles of groups such as women, racialized communities, LGBTQ persons, and people with disabilities. Prerequisite: 7.0 university credits. Recommended: POST-CAST 2011H, 2012H, or PHIL-POST 2150H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3115H - Citizenship Rights and Development

Overview

Department(s)
Sociology, Criminology, Political Studies, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Criminology - Not Set, Political Studies - Not Set, Global Justice & Development - Not Set

Cross-Lists
CRIM-3115H, GDST-3115H, HURI-3115H, SOCI-3115H

Course Description
An analysis of the concept of citizenship and rights and their role in social and political transformation. Includes social justice and citizenship struggles; critical perspectives on power; and various citizenship regimes and their implementation on national and global levels. Prerequisite: 7.0 university credits including 1.0 GDST/IDST, POST, and/or SOCI credit at the 1000 level and 1.0 GDST/IDST, POST, and/or SOCI credit at the 2000 level, or permission of instructor. Equivalent to IDST-CRIM-SOCI 3120H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3120H - Canadian Environmental Policy

Overview

Department(s)
Environment, Canadian Studies, Forensic Science, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set, Forensic Science - Not Set, Political Studies - Not Set

Cross-Lists
CAST-3120H, ERST-3120H, FRSC-3120H

Course Description
An interdisciplinary inquiry into how environmental policies in Canada are developed, implemented, and improved, applying political, economic, legal, scientific, Indigenous, and moral perspectives. Focus is on federal, provincial, and municipal contexts, recognizing that the environment does not respect jurisdictions. Topics include energy and materials use, biodiversity, toxic substances, waste management, and land use. Prerequisite: 1.0 ERST, CAST, POST, and/or ADMN credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3123H - The Politics of Global Finance

Overview

Department(s)
Political Studies, Business, Economics

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Business - Not Set, Economics - Not Set

Cross-Lists
ADMN-3123H, ECON-3123H

Course Description
Explores the economic, political, and social impacts of global money and finance while surveying the tight linkages between finance and state power. Topics include the transformation of the global financial system, the causes and implications of financial crises, debt and development in the Global South, and debates on climate finance. Prerequisite: 5.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3140H - Justice and Rights

Overview

Department(s)
Philosophy, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Political Studies - Not Set

Cross-Lists
PHIL-3140H

Course Description
A study of the nature and value of rights in relation to competing theories of justice. Attention is given to the nature of power and oppression in relation to social change; topics may include class, ability, age, gender, and race. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3150H - Global Migration

Overview

Department(s)
Global Justice & Development, Sociology, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Sociology - Not Set, Political Studies - Not Set

Cross-Lists
GDST-3150H, HURI-3150H, SOCI-3150H

Course Description
An examination of the theoretical and conceptual debates that centre on the causes and consequences of international migration. Forced migration, citizenship, gender and racial exclusion, and migrant solidarity are explored to investigate current developments in global migration. Prerequisite: 7.0 university credits including 1.0 GDST/IDST, POST, and/or SOCI credit at the 1000 level and 1.0 GDST/IDST, POST and/or SOCI credit at the 2000 level or permission of instructor. Not open to students with credit for IDST 4120H. Equivalent to IDST 3150H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3161H - Extremism in the Twenty-First Century

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Examines (violent) extremism as ideology and political strategy with linkages to assassinations, militias, political parties, rebellions, or acts of terrorism. Scrutinizes their proliferation on social media along with their domestic and foreign policy expressions. Larger goal is to understand the sources of political violence as well as potential solutions. Prerequisite: 4.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3180H - Social and Political Philosophy

Overview

Department(s)
Philosophy, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Political Studies - Not Set

Cross-Lists
PHIL-3180H

Course Description
An examination of philosophical theories related to political institutions and practices. Topics may include the foundations of the state, justified use of force, and limits to freedom. Prerequisite: 7.0 university credits or permission of department chair.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3190H - Philosophy of Race

Overview

Department(s)
Philosophy, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Political Studies - Not Set

Cross-Lists
PHIL-3190H

Course Description
This course introduces philosophical articulations of race, racism, and racialization. Students learn how political philosophers have made sense of race as a structural condition of the modern and contemporary world, as a force that shapes individual lives in different ways, and how they have explored the different ways in which racialization takes place. A wide range of philosophical approaches are explored. Prerequisite: 7.0 university credits including PHIL 1100H, or permission of the instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3200H - Ordering World Politics 1: US Foreign Policy in the Twentieth Century and Beyond

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Global Power & Politics (GP) course. Provides a critical perspective on the efforts to construct and regulate the global order represented by US foreign policy. A theoretically informed review of the historical record is used to achieve an understanding of current trends. Prerequisite: 2.0 POST credits at the 2000 level or permission of instructor. Recommended: POST 2200Y.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3210H - Ordering World Politics 2: Canadian Foreign Policy in the Twentieth Century and Beyond

Overview

Department(s)
Political Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-3210H

Course Description
Global Power & Politics (GP) course. Provides a critical perspective on the efforts to construct and regulate the global order represented by Canadian foreign policy. A theoretically informed review of the historical record is used to achieve an understanding of current trends. Prerequisite: 2.0 POST credits at the 2000 level or permission of instructor. Recommended: POST 2200Y.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3220H - Global Political Economy

Overview

Department(s)
Global Justice & Development, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Political Studies - Not Set

Cross-Lists
GDST-3220H

Course Description
An examination of the historical development of the global political economy and of key debates in the field. Focuses on the ideas that underpin different political-economic systems, the relationship between domestic and international political economy, finance and trade, and the political economy of warfare. Prerequisite: 7.0 university credits including 1.0 GDST-IDST or POST credit or permission of instructor. Equivalent to IDST 3220H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3230Y - Nationalism and Political Order in Global Perspective

Overview

Department(s)
Political Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Sociology - Not Set

Cross-Lists
SOCI-3230Y

Course Description
Global Power & Politics (GP) course. Why nationalism has survived and revived under globalization; how ethnicity is politicized and national identities constructed; nationalism's positive and negative forms and its relationship with democratic values. Incorporates philosophical, historical, sociological, anthropological, and economic approaches to explain and assess varieties of nationalism. Prerequisite: 2.0 POST credits at the 2000 level or permission of instructor. Recommended: POST 2200Y.

Academic Level
Undergraduate

Credit Value

:
1

POST3240H - European Integration

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Examines the most ambitious and far-reaching transnational project of political integration--the European Union--with particular emphasis on its current crisis. Prerequisite: 2.0 POST credits at the 2000 level or permission of instructor. Recommended: POST 2231H, 2232H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3281H - Government and Politics in the Middle East

Overview

Department(s)
Global Justice & Development, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Political Studies - Not Set

Cross-Lists
GDST-3281H

Course Description
Examines the main issues and state and non-state actors of the contemporary Middle East, with a focus on political, social, economic, and ideological factors. Prerequisite: 10.0 university credits including 1.0 GDST/IDST and/or POST credit at the 2000 level, or permission of the instructor. Not open to students with credit for IDST-POST 4280Y or 4281H. Equivalent to IDST 3281H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3282H - Politics of Arab-Israeli Conflict

Overview

Department(s)
Global Justice & Development, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Political Studies - Not Set

Cross-Lists
GDST-3282H

Course Description
Examines the main issues and state and non-state actors of the contemporary Arab-Israeli conflict, with a focus on political and ideological factors. Prerequisite: 10.0 university credits including 1.0 GDST/IDST and/or POST credit at the 2000 level, or permission of the instructor. Not open to students with credit for IDST-POST 4280Y or 4281H. Equivalent to IDST 3282H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3285H - Global Threats in a World At Risk: Heading for Dystopia?

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Our world is seemingly moving from crisis to crisis with extinction no longer a fictional scenario but a distinct possibility. This course examines these crises by putting the categories of risk and security centre stage. Discussed are key social theories and practical skills of risk assessment and management. Prerequisite: 7.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3290H - Causes of War

Overview

Department(s)
Political Studies, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Global Justice & Development - Not Set

Cross-Lists
GDST-3290H

Course Description
Familiarizes students with a variety of theories on the causes of war. Is war human nature? Is war "the continuation of politics by other means," as Clausewitz stated? Is war linked to race, class, and gender? The course also scrutinizes the power of propaganda through war films and news coverage. Prerequisite: 7.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3295H - International Law: Power, Order, and Global Conflict

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
This course examines how public international law shapes power, order, and conflict. Students study sources of law, statehood, jurisdiction, the UN system, the use of force, humanitarian law, the law of the sea, and state responsibility, and learn to apply legal rules to current international disputes. Prerequisite: 7.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3335H - The Meaning of Politics Today

Overview

Department(s)
Political Studies, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Philosophy - Not Set

Cross-Lists
PHIL-3335H

Course Description
Explores political theory in the context of contemporary political events and issues. In doing so, it examines the uses and limitations of political theory in relation to themes such as democracy, justice, equality, diversity, and reconciliation. Prerequisite: 7.0 university credits or permission of instructor. Not open to students with credit for POST 3330Y.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3420H - Perspectives on Poverty and Protest

Overview

Department(s)
Political Studies, Criminology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Criminology - Not Set, Sociology - Not Set

Cross-Lists
CRIM-3420H, SOCI-3420H

Course Description
Explores intersection of poverty and power--relations of ruling--through an examination of anti-poverty activism. Students analyze dominant strategic mobilizing approaches and investigate select case-studies of anti-poverty activism related to welfare, homelessness, migration, and drugs. The role of institutional advocates in the mobilization process is also scrutinized. Prerequisite: 7.0 university credits including 1.0 POST, ADMN, ANTH, CHYS, CRIM, ECON, GDST/IDST, IESS, INDG, PLCW, SOCI, and/or SWRK credit at the 2000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3422H - Dimensions of Poverty

Overview

Department(s)
Political Studies, Canadian Studies, Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Sociology - Not Set, Criminology - Not Set

Cross-Lists
CAST-3422H, CRIM-3422H, SOCI-3422H

Course Description
Poverty is a persistent social problem. In this course students are introduced to the dynamics of poverty in Canada, the USA, and Britain, learn how poverty affects people's lives, and become familiar with the dominant sociological perspectives that inform people's opinions about poverty and poverty-related policies and programs. Prerequisite: 7.0 university credits including 1.0 POST, CAST, CRIM, and/or SOCI credit at the 2000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3431H - Growing Gap: Gender (In)Justice in Canada

Overview

Department(s)
Gender & Social Justice, Canadian Studies, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, Political Studies - Not Set

Cross-Lists
CAST-3431H, GESO-3431H

Course Description
An intersectional feminist analysis of social welfare issues and policies in Canada. Focusing on topics including poverty, homelessness, childcare, and employment, we examine historical roots and contemporary contexts shaping the lives of women and marginalized groups bearing the brunt of the growing income gap and neoliberal threats to equality. Prerequisite: 6.0 university credits including 1.0 GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO-CAST-POST 4431H or 4430Y. Equivalent to WMST 3431H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3465H - Realities and Futurities in Film

Overview

Department(s)
Political Studies, Culture, Arts, and Media, Media Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Culture, Arts, and Media - Not Set, Media Studies - Not Set, Sociology - Not Set

Cross-Lists
CUST-3465H, MDST-3465H, SOCI-3465H

Course Description
What makes a film "political" and how can we understand the realities and futurities presented in film? We consider the various ways in which political life and action are portrayed in and through film, addressing--in relation to a variety of film genres--such topics as publics/counterpublics, visual politics, political senses. Prerequisite: 7.0 university credits including 1.0 POST, CUST, and/or SOCI credit, or permission of instructor. Recommended: POST 2351H, 2352H; CUST-MDST 2581H, 2582H, SOCI 2110H, or 2220H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3475H - Media of Politics

Overview

Department(s)
Political Studies, Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Culture, Arts, and Media - Not Set, Media Studies - Not Set

Cross-Lists
CUST-3475H, MDST-3475H

Course Description
Examines the decline of the traditional model of journalism and the explosive growth of internet and social media as citizens' main source of news. The ethical, political, and social implications of the nexus between the media and political accountability in a democratic society will be the focus of the course. Prerequisite: 7.0 university credits including 1.0 POST and/or CUST credit at the 2000 level, or permission of instructor. Recommended: POST 2351H and 2352H or CUST-MDST 2581H or 2582H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3571H - Arts and Culture Enacting Social and Political Change

Overview

Department(s)
Political Studies, Culture, Arts, and Media

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Culture, Arts, and Media - Not Set

Cross-Lists
CUST-3571H

Course Description
Political questions are always posed in a cultural context, but culture itself is a socio-political question and enactment. This course examines the importance of culture through the arts for political change. Vibrant examples of intersectional (race, queer, trans, etc.) Black, Indigenous, Persons of Colour (BIPOC) and Disability arts are considered. Prerequisite: 7.0 university credits including 1.0 POST and/or CUST credit, or permission of instructor. Not open to students with credit for POST-CUST 3570Y.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3600H - Designing and Doing Qualitative Research in Political Studies

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Introduces students to qualitative research methods in political studies. Designed to engage students in questions about how we collect and analyze data to explain political phenomena and to give students hands-on experience using qualitative research methods. Prerequisite: 7.0 university credits including 1.0 POST credit at the 2000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3602H - Environment and Development

Overview

Department(s)
Environment, Political Studies, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Political Studies - Not Set, Global Justice & Development - Not Set

Cross-Lists
ERST-3602H, GDST-3602H, SAFS-3602H

Course Description
Examines environmental issues and conflicts in developing countries, applying a critical political ecology perspective to a range of current topics, including oil production, biodiversity conservation, and resource conflicts. There is also a special focus on agriculture and food systems. Prerequisite: ERST-POST 2100H, ERST-CAST 2520H, GDST-HURI 2010H (GDST 2001H), or POST 2200Y.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3604H - Quantitative Research Methods and Design: Getting Research Done

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
This course introduces students to some of the fundamental principles that underlie empirical research. By the end of the course students should be able to recognize the value of different methodological approaches, understand the fundamental steps necessary for undertaking a research plan, and critically evaluate key aspects of empirical research. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3605H - Developing and Communicating Public Policy

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Introduces students to the practice of developing public policy. Examines key aspects of the policy process: defining problems, choosing policy instruments, weighing alternatives, consulting the public, communicating policy, and evaluating performance. Emphasis throughout is on constructing persuasive and practical responses to important policy problems. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3615H - Introduction to Black Politics in Canada

Overview

Department(s)
Canadian Studies, Political Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Political Studies - Not Set, Sociology - Not Set

Cross-Lists
CAST-3615H, SOCI-3615H

Course Description
An introduction to the political experiences and guiding ideologies of the Black population in Canada. Decidedly contemporary in nature and approach, the course critically examines the contributions of Blacks to the politics of Canada and how these contributions continue to shape and reshape Canadian Identity. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3621H - The Critical Place of Law in Canadian Society

Overview

Department(s)
Canadian Studies, Geography, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Geography - Not Set, Political Studies - Not Set

Cross-Lists
CAST-3621H, GEOG-3621H

Course Description
An exploration of the critical places and spaces of law in the making of Canadian identity. Discusses issues such as treaties and rights under the law and within Canadian society. Prerequisite 6.0 university credits. Not open to students with credit for CAST-INDG-WMST 3480Y or CAST-GEOG-POST 4621H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3661H - Race, Ethnicities, and Multiculturalism

Overview

Department(s)
Sociology, Political Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Political Studies - Not Set, Canadian Studies - Not Set

Cross-Lists
CAST-3661H, SOCI-3661H

Course Description
Explores ethnicities with a focus on contemporary Canada. Topics include settler colonialism, immigration, multicultural policies and practices, and contemporary political conflicts involving ethnicities. The course also covers theories and concepts of "race" and ethnicity as social categories, the social basis of racism, and the critique of multiculturalism. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI, CAST, and/or POST at the 2000 level.

Academic Level
Undergraduate

Credit Value
:
0.5

POST3665H - Canada: State, Society, Power

Overview

Department(s)
Canadian Studies, Sociology, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Sociology - Not Set, Political Studies - Not Set

Cross-Lists
CAST-3665H, SOCI-3665H

Course Description
Interrogates the political economy tradition in Canada from its roots to more contemporary approaches, examining the dynamics of Canadian economic, political, and social development. Addresses issues associated with the development of a resource-based and branch-plant economy, globalization and continental integration, and inequality, discrimination, and social justice. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value
:
0.5

POST3672H - Gender, Diversity, and Intersectionalities

Overview

Department(s)
Political Studies, Canadian Studies, Gender & Social Justice, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Gender & Social Justice - Not Set, Sociology - Not Set

Cross-Lists
CAST-3672H, GESO-3672H, SOCI-3672H

Course Description
Examines issues of diverse intersectional gender identities and gender experiences, including Indigeneity, (dis)ability, race, class, LBTQ, and fat, and provides socio-political perspectives to understand activism, community building, and possibilities for socio-political and policy change. Prerequisite: 7.0 university credits including 1.0 POST, CAST, GESO, and/or SOCI credit at the 2000 level, or permission of instructor. Recommended: POST-CAST 2011H and/or 2012H. Not open to students with credit for POST-CAST-WMST 3670Y.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3740H - The Politics of Legal Rights, Criminal Law, and the Canadian Judicial Process

Overview

Department(s)
Political Studies, Canadian Studies, Criminology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Criminology - Not Set, Sociology - Not Set

Cross-Lists
CAST-3740H, CRIM-3740H, HURI-3740H, SOCI-3740H

Course Description
An exploration of the politics of the Canadian criminal process. Examines legal rights under the Charter of Rights and Freedoms and critiques of the inequities of the Canadian criminal justice system. Also looks at key political issues in the making of criminal law, its enforcement, and the criminal trial process. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3785H - Canada in the 1980s: Culture and Conflict

Overview

Department(s)
Canadian Studies, History, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set, Political Studies - Not Set

Cross-Lists
CAST-3785H, HIST-3785H

Course Description
The 1980s in Canada were a time of tremendous change. Exploring the cultural, economic, political, and social transformations of the decade, this course examines a diversity of issues, which may include, for example, MuchMusic's impact, constitutional battles, free trade, the "new" West's emergence, and the Oka Crisis. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

POST3822H - The Canadian Labour Movement: Class, Protest, and Confronting Neoliberalism in the Digital Age

Overview

Department(s)
Sociology, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Political Studies - Not Set

Cross-Lists
SOCI-3822H

Course Description
Critically explores the politics and the practices of the Canadian labour movement. Examines feminist and anti-racist critiques of unions and the challenges facing unions in the neo-liberal period and the digital age. Other issues include globalization, technological change, precarious labour, and state behaviour towards workers and collective protest. Prerequisite: 5.0 university credits including at least 1.5 SOCI and/or POST credits at the 2000 level.

POST4081H - Canadian Politics and Public Policy

Overview

Department(s)
Political Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-4081H

Course Description
Explores Canadian process of developing public policy. Examines key institutions and actors in Canadian politics, including the public policy roles of the prime minister, cabinet, the opposition, political parties, the bureaucracy, business, the mass media, social movements, and the public. Prerequisite: 12.0 university credits including 1.0 POST credit that includes at least one of POST-CAST 2011H or 2012H; or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4200H - Politics of Globalization 1: Thinking Critically, Thinking Globally

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Global Power & Politics (GP) course. "Thinking globally" has become a watchword of living in an era of globalization. Drawing on current theories of world politics, as well as insights afforded by social and political theory, this course explores the issue of how to think critically in global terms. Prerequisite: 15.0 university credits, including 5.0 POST credits that include POST 2200Y and one of POST-PHIL 2350Y or POST 3335H, or permission of instructor.

POST4241H - Desiring Development: Psychoanalysis, Capitalism, and Global Futures

Overview

Department(s)
Global Justice & Development, Culture, Arts, and Media, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Culture, Arts, and Media - Not Set, Political Studies - Not Set

Cross-Lists
CUST-4241H, GDST-4241H

Course Description
Introduces psychoanalysis as a critical lens for understanding global development. Explores how unconscious forces such as desire, fantasy, and enjoyment shape ideas of progress, inequality, race, and globalization. Considers how media and ideology sustain these visions and examines possibilities for alternatives and transformation in contemporary global contexts. Prerequisite: 10.0 university credits including 1.0 GDST, CUST, or POST credit.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4252H - Refugees, Forced Migration, and Experience in the Canadian Context

Overview

Department(s)
Political Studies, Canadian Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Sociology - Not Set

Cross-Lists
CAST-4252H, GDST-4252H, SOCI-4252H

Course Description
This course focuses on the ethical and moral complexities raised by displacement and forced migration. Students examine the social, economic, and political factors associated with Canada's refugee sponsorship programs. Attention is given to media representations of refugees. Topics include resilience, parenting in a war context, and refugee education. Prerequisite: 10.0 university credits including 1.0 POST, CAST, GDST/IDST, and/or SOCI credit at the 2000 level, and an additional 2.0 credits at the 3000 level of which at least 1.0 must be from POST, GDST/IDST, CAST, or SOCI, or permission of instructor. Recommended: POST 2011H, 2012H, CAST 2245H, GDST 3150H, SOCI 3661H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4255H - Politics of Work: AI, Automation, and Global Capitalism

Overview

Department(s)
Political Studies, Business, Global Justice & Development, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Business - Not Set, Global Justice & Development - Not Set, Sociology - Not Set

Cross-Lists
ADMN-4255H, GDST-4255H, SOCI-4255H

Course Description
Examines how AI, robotics, and digital platforms intersect with global capitalism and geopolitics to reshape work's organization and politics. Students engage with theories of work generation to analyze automation, platform economies, and social reproduction, debating regulation, resistance, and competing visions for the future of work beyond algorithmic control. Prerequisite: 12.0 university credits including 1.0 POST, ADMN, GDST/IDST, and/or SOCI credit at the 2000 level; or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4258H - Governing Machines? Technology and Power in the Age of AI

Overview

Department(s)
Political Studies, Artificial Intelligence

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Artificial Intelligence - Not Set

Cross-Lists
AIST-4258H

Course Description
Examines how AI and emerging technologies reshape power, governance, and global order. Traces Silicon Valley's ideological roots, platform capitalism, and global tech diffusion before analyzing governance frameworks and future challenges of agentic AI and hybrid cognition. Explores whether techno-capitalism is governable, by whom, and for what purposes. Prerequisite: 10.0 university credits or permission of the instructor.

Academic Level
Undergraduate

Credit Value
:
0.5

POST4260H - Global Governance and Social Justice

Overview

Department(s)
Global Justice & Development, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Political Studies - Not Set

Cross-Lists
GDST-4260H, HURI-4260H

Course Description
Explores the relationship between global governance, human rights, and social justice in an interdependent world. Examines how major global institutions shape distributive outcomes and affect the protection or violation of rights. Using interdisciplinary scholarship, students analyze how governance structures reproduce inequalities and human rights frameworks are mobilized to contest them. Prerequisite: 14.0 university credits including 1.0 GDST, HURI, and/or POST credit at the 2000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value
:
0.5

POST4272H - Liberal Democracy at the Crossroads: Imagining Alternatives

Overview

Department(s)
Political Studies, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Global Justice & Development - Not Set

Cross-Lists
GDST-4272H

Course Description
Liberal democracies are at a crossroads. Challenged by authoritarian regimes, eroded from within by far-right populists and seemingly incapable of delivering on key concerns more and more people are disillusioned. This course seeks to counter this by building on already existing alternatives including indigenous governance and Chile's new plurinational constitution. Prerequisite: 12.0 university credits including 1.0 POST credit, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4331H - Power, Resistance, and Hope

Overview

Department(s)
Political Studies, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Philosophy - Not Set

Cross-Lists
PHIL-4331H

Course Description
Drawing on political theory, the course explores the relationship between power, forms of resistance, and the hope for and potential practices of alternative forms of politics. In doing so, it focuses on concepts such as oppression and domination, subjectivity, democracy, utopia, and prefigurative politics. Prerequisite: 12.0 university credits including 1.0 credit from POST-PHIL 2351H and 2352H or POST 3335H; or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4332H - Abolition, Emancipation, Decolonization

Overview

Department(s)
Political Studies, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Philosophy - Not Set

Cross-Lists
PHIL-4332H

Course Description
This is an advanced political theory course that surveys how Black, Indigenous, and other colonized and racialized peoples across the globe have theorized and critiqued structures of racial and colonial domination, and in so doing articulated unique visions of freedom and justice, from the nineteenth century to the present. Prerequisite: 12.0 university credits including 1.0 POST, GESO, and/or PHIL credit; or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4340H - Colonial and Post-Colonial Theory

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Global Power & Politics (GP) course. Analyzes the relationship between Western political thought and the project of imperialism. Engages the work of key figures in post-colonial theory (e.g., Said, Spivak) as well as precursors (e.g., Fanon, Gramsci) as a way of understanding forms of domination in the contemporary global order. Prerequisite: 2.0 POST (GP) credits. Strongly recommended: POST 4200H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4341H - Explorations in the Politics of Race in Global Perspective

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Global Power & Politics (GP) course. Extends the discussion of race theory, introduced in POST 4340H, with a focus on contemporary race-focussed social movements (e.g., Black Lives Matter; Idle No More) and recent treatments of those movements and the issues they raise by select scholars and commentators, in global perspective. Prerequisite: POST 4340H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4431H - Growing Gap: Gender (In)Justice in Canada

Overview

Department(s)
Gender & Social Justice, Political Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Political Studies - Not Set, Canadian Studies - Not Set

Cross-Lists
CAST-4431H, GESO-4431H

Course Description
An intersectional feminist analysis of social welfare issues and policies in Canada. Focusing on topics including poverty, homelessness, childcare, and employment, we examine historical roots and contemporary contexts shaping the lives of women and marginalized groups bearing the brunt of the growing income gap and neoliberal threats to equality. Prerequisite: 6.0 university credits including 1.0 GESO or WMST credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO-CAST-POST 4431H or 4430Y. Equivalent to WMST 3431H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4452H - Trust and Leadership in Parliament: The Prime Minister and the House of Commons

Overview

Department(s)
Political Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-4452H

Course Description
Explores the role of trust in the exercise of leadership with respect to Canada's Prime Minister and the House of Commons. Concentrating on legislative leadership the course examines how and why, in the face of declining trust and rising distrust, the political executive aims to exercise leadership. Prerequisite: 10.0 university credits including 1.0 POST and/or CAST credit at the 2000 level, and 2.0 credits at the 3000 level of which at least 1.0 must be POST and/or CAST; or enrolment in the Certificate in Political Leadership.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4460H - Canadian Security and the State

Overview

Department(s)
Political Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set

Cross-Lists
CAST-4460H

Course Description
Explores the meaning of security for the contemporary Canadian state. How governments define and deliver on their promise to "protect" and the impact of state exertions of power to maintain the safety and security of its citizens. Prerequisite: 14.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4505H - Futurities: Centring Difference and Worldmaking(s) of Possibilities

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
This course explores the interdisciplinary practice and knowledges of political theory, an intellectual project that grasps the age or contemporary context and desires alternative more democratic futurities for human flourishing. Contemporary critical thinkers and theoretical trajectories will be selected, providing insight into crises of our time and (re)imagined possibilities. Prerequisite: 12.0 university credits including POST 2351H and 2352H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4538H - Media Ecologies

Overview

Department(s)
Culture, Arts, and Media, Media Studies, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Media Studies - Not Set, Political Studies - Not Set

Cross-Lists
CUST-4538H, MDST-4538H

Course Description
Examines some theories and practices for the analysis of media ecologies. "Media ecologies" refers to the worlds, sensibilities, and perceptibilities that our interactions with media enable. Detailed attention is given to media objects, the role of the culture-maker, and the critical political analysis of human/non-human entanglement(s). May include a course fee: $50. Prerequisite: 10.0 university credits including 3.0 CUST credits; or CUST-MDST 1535H, COIS-MDST 1010H, and either CUST-MDST 2035Y or 2535H; or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4552H - The Culture of Fascism

Overview

Department(s)
Culture, Arts, and Media, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Culture, Arts, and Media - 100%, Political Studies - Not Set

Cross-Lists
CUST-4552H

Course Description
A survey of theoretical approaches to fascism in all its guises. Particular emphasis is placed on the critical tradition. Prerequisite: 10.0 university credits or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4555H - City, Economy, and Society: Urban Restructuring and the Global Economy

Overview

Department(s)
Political Studies, Canadian Studies, Geography

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Geography - Not Set

Cross-Lists
CAST-4555H, GEOG-4555H

Course Description
Focuses on contemporary issues facing Canadian cities in comparative perspective. It locates cities within the global circuit of capital, examines the ways in which cities are being reordered to enhance their global competitiveness and standing, and analyzes the effects of restructuring on communities and the struggles for social justice. Prerequisite: 14.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4610H - Global Environmental Policy

Overview

Department(s)
Environment, Global Justice & Development, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Global Justice & Development - Not Set, Political Studies - Not Set

Cross-Lists
ERST-4610H, GDST-4610H, SAFS-4610H

Course Description
Focuses on perspectives, actors, institutions, and economic relationships as they relate to global environmental policy and instruments. The aim is to provide students with a solid understanding of linkages between the global political system and the natural environment. Prerequisite: 9.0 university credits. Recommended: One of ERST-GDST-POST 3602H or POST 2200Y.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4621H - The Critical Place of Law in Canadian Society

Overview

Department(s)
Canadian Studies, Geography, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Geography - Not Set, Political Studies - Not Set

Cross-Lists
CAST-4621H, GEOG-4621H

Course Description
An exploration of the critical places and spaces of law in the making of Canadian identity. Discusses issues such as treaties and rights under the law and within Canadian society. Prerequisite: 14.0 university credits. Not open to students with credit for CAST-GEOG-POST 3621H.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4772H - Canadian Social Policy 1951-2014

Overview

Department(s)
Canadian Studies, History, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, History - Not Set, Political Studies - Not Set

Cross-Lists
CAST-4772H, HIST-4772H

Course Description
Examines the evolution of social policy from the mid-twentieth century to the present, including governmental, professional, and organizational responses to poverty, health care, old age, children's rights, mental illness, physical disability, family fragmentation, and caregiving. Prerequisite: 14.0 university credits.

0.5

POST4830H - Anthropology of Food Politics

Overview

Department(s)
Anthropology, Environment, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set, Political Studies - Not Set

Cross-Lists
ANTH-4830H, SAFS-4830H

Course Description
Explores moral and ethical dimensions of food production and circulation. The politics of excess and want, national cuisines, reactions to industrial and fast food (the Slow Food movement, culinary connoisseurship). Food distribution, from home to restaurants and fast food joints, is examined in the context of changing demands of work. Prerequisite: ANTH 2001H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4850H - Public Policy Field Placement

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
An opportunity for students to apply policy analysis ideas and skills in a practical setting. Students work part-time for a non-profit organization or government office engaged in public policy, attend periodic class meetings, and complete public policy assignments relevant to their placement. Enrolment is limited by the number of available work placements. Prerequisite: 12.0 university credits with a minimum cumulative average of 75% and permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

POST4870Y - Community-Based Research Project

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Students are placed in research projects with community organizations in the Peterborough area. Each placement is supervised jointly by a faculty member and a representative of a community organization. For details, see Community-Based Research program. Prerequisite: At least 10.0 university credits, with an overall cumulative average of at least 75%. Students may take POST 4870Y or both 4871H and 4872H for credit.

Academic Level
Undergraduate

Credit Value

:

POST4872H - Community-Based Research Project

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Students are placed in research projects with community organizations in the Peterborough area. Each placement is supervised jointly by a faculty member and a representative of a community organization. For details, see Community-Based Research program. Prerequisite: At least 10.0 university credits, with an overall cumulative average of at least 75%. Students may take POST 4870Y or both 4871H and 4872H for credit.

0.5

POST4873H - Community-Based Research With Immigrants

Overview

Department(s)
Political Studies, Global Justice & Development

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Global Justice & Development - Not Set

Cross-Lists
GDST-4873H

Course Description
Students engage in community-based research with a local immigrant focused agency to research, create, recommendation policies and ultimately solutions to challenges faced by immigrants in the community. Students learn the basics of conducting action-oriented research that advances social justice and creates social change. Prerequisite: 10.0 university credits including 1.0 POST and/or GDST/IDST credit at the 2000 level, and 2.0 credits at the 3000 level of which at least 1.0 must be from POST and/or GDST/IDST. Not open to students with credit for POST 4872H (2023-2024).

0.5

POST4900Y - Reading Course in Political Studies

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Open only to students in the fourth year of a Political Studies major program. Alternatively a student may do an internship, involving field and written work in an area related to politics. For further details, see the department website. Prerequisite: 80% average in all POST courses completed or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
1

POST4901H - Reading Course in Political Studies

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Open only to students in the fourth year of a Political Studies major program. Alternatively a student may do an internship, involving field and written work in an area related to politics. For further details, see the department website. Prerequisite: 80% average in all POST courses completed or permission of the chair.

0.5

POST4905Y - Reading Course in Global Power & Politics

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Global Power & Politics (GP) course. Allows students to pursue a specialized topic under the supervision of a Global Power & Politics faculty member. Students wishing to pursue this option must complete arrangements for the course by April 30 of the preceding academic year (October 31 for Winter term courses). Prerequisite: POST 2200Y or 2231H and 2232H, 2.0 POST (GP) credits at the 3000 level, and permission of instructor.

POST4960H - Politics of Globalization 2: the Global Imagination

Overview

Department(s)
Political Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%

Course Description
Global Power & Politics (GP) course. Draws on C. Wright Mills's notion of the "sociological imagination"-in particular, the link between "personal troubles of milieu" and "public issues of social structure"-to frame the question of globalization. Makes use not only of scholarly literature, but also fiction and film. Prerequisite: 15.0 university credits, including 5.0 POST credits that include POST 4200H and either both POST 2351H and 2352H or 3335H, or permission of instructor.

PSYC2018H - Critical Thinking and Research Methods in Psychology

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Provides an introduction to critical thinking and research methods in psychology. Topics include epistemology; theory and hypothesis development; variables; operational definitions; ethics, reliability, and validity; experimental, quasi-experimental, and correlational methods. Students also learn how to read and understand the structure of empirical research articles. Prerequisite: 60% or higher in PSYC 1020H and 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC2019H - Basic Research Methods and Statistics in Psychology

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Provides an introduction to the research and statistical methods that are commonly used in psychology and other sciences. Topics include descriptive statistics, probability, sampling distributions, hypothesis testing, confidence intervals, effect size, t-tests, one-way analysis of variance, correlation, and the chi-square test. Prerequisite: 60% or higher in PSYC 1020H and 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC2200H - Brain and Behaviour

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Basic neuroanatomy of the mammal with emphasis on the human nervous system. Examination of sensory and motor systems as well as the physiological mechanisms of behaviour, behaviour disorders, and memory. Prerequisite: 60% or higher in PSYC 1020H and 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC2210H - Brain and Body in Action

Overview

Department(s)
Kinesiology, Psychology

Contact Department ('not set' refers to cross-listed depts)
Kinesiology - 100%, Psychology - Not Set

Cross-Lists
KINE-2210H

Course Description
The functional anatomy of the central and peripheral nervous systems and the neuromuscular junction. The role of sensory and motor systems in the control of eye and hand movements and balance and gait control will be studied. Applications to product design, skill learning, and rehabilitation are included. Prerequisite: 60% or higher in PSYC 1020H and 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

PSYC2270H - Philosophy of Mind

Overview

Department(s)
Philosophy, Psychology

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Psychology - Not Set

Cross-Lists
PHIL-2270H

Course Description
An introduction to some of the central themes in philosophy of mind. Answers to ontological questions (what kinds of things are minds?) and epistemological questions (can we know that we and others have minds?) are used to focus discussions concerning personal identity, responsibility for action, animals' minds, and artificial intelligence. Prerequisite: 4.0 university credits or permission of department chair.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

PSYC2300H - Introductory Abnormal Psychology

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Designed to provide students with a background in theoretical, empirical, and conceptual issues central to the field of abnormal psychology, and to introduce contemporary diagnostic frameworks. Specific attention is paid to the role of prevailing theoretical perspectives in the understanding, investigation, and treatment of psychopathology. Prerequisite: 60% or higher in PSYC 1020H and 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC2310H - Introduction to Personality Theory

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
A cross-section of personality theories and theorists are examined: psychoanalytic, neopsychoanalytic, trait, phenomenological, behavioural, and social-learning. Prerequisite: 60% or higher in PSYC 1020H and 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC2400H - Introduction to Cognitive Psychology

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Focuses on humans as processors of information. Topics include perception, attention, memory, knowledge, consciousness, and reasoning. Prerequisite: 60% or higher in PSYC 1020H and 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC2550H - Theories of Human Development

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Provides students with both theoretical and empirical bases of current lifespan human development research. Students examine several lifespan developmental theories, including identity, psychosocial, cognitive, and socio-cultural development, as well as attachment. The course emphasizes original theoretical works and current psychological research rooted within those theories. Prerequisite: 60% or higher in PSYC 1020H and 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC2600H - Introduction to Learning

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
An examination of the fundamental concepts of learning in humans and animals. Emphasis is placed on empirical methods of investigation. Applications to choice behaviour, self-control, and education are included. Prerequisite: 60% or higher in PSYC 1020H and 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

0.5

PSYC2621H - History of Psychiatry and Clinical Psychology

Overview

Department(s)
History, Psychology

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Psychology - Not Set

Cross-Lists
HIST-2621H

Course Description
Surveys the social, cultural, institutional, and intellectual histories shaping Western world attitudes about the mind and brain, while exploring the histories of madness, mental deficiencies, insanity, and mental health during the period when psychiatry and psychology emerged as formal scientific disciplines. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC2700H - Introduction to Social Psychology

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
An examination of the foundations of social psychology, including attribution processes, social cognition, attitudes, prejudice, attraction, aggression, helping behaviours, groups, and conflict. Prerequisite: 60% or higher in PSYC 1020H and 1030H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3016H - Advanced Statistics and Research Design in Psychology

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Advanced study of applying statistical techniques to a variety of research questions and designs that builds heavily on material covered in PSYC 2018H and 2019H. Focus is on the further development of statistical reasoning and the interpretation of basic descriptive statistics through to more complex inferential statistics (e.g., regression and ANOVA). Prerequisite: 8.0 university credits including 60% or higher in PSYC 2018H and 2019H. Not open to students with credit for PSYC 3015Y.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3017H - Applied Data Analysis for Psychological Research

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
An intensive study of statistical methods for psychological research using computer software. A strong hands-on focus applied to data management, descriptive statistics, effect sizes, confidence intervals, parametric tests, nonparametric tests, and bootstrapping approaches. Prerequisite: 8.0 university credits including 60% or higher in PSYC 3016H. Not open to students with credit for PSYC 3015Y.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3020H - Philosophy of Emotion

Overview

Department(s)
Philosophy, Psychology

Contact Department ('not set' refers to cross-listed depts)
Philosophy - 100%, Psychology - Not Set

Cross-Lists
PHIL-3020H

Course Description
An examination of theories of emotion in classical and contemporary philosophical texts. Topics may include the relation of emotion to belief, motivation, and desire; the rationality of emotion; emotions, self-knowledge, and self-deception; and the relations between different emotions and between emotions and the body. Prerequisite: 7.0 university credits including PHIL 2010H, PHIL-PSYC 2270H, or PSYC 2400H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3210H - Principles of the Nervous System

Overview

Department(s)
Biology, Psychology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Psychology - Not Set

Cross-Lists
BIOL-3210H

Course Description
An intensive coverage of the central nervous system, its anatomy, and physiological interactions. Emphasizes subcortical and cortical brain structures and their functional characteristics. Prerequisite: 8.0 university credits including 60% or higher in one of BIOL 2070H, 2110H, 3840H, or PSYC 2200H, and 60% or higher in an additional 0.5 credit at the 2000 level in BIOL or PSYC.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3220H - Neuropsychology

Overview

Department(s)
Psychology, Biology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%, Biology - Not Set

Cross-Lists
BIOL-3220H

Course Description
An examination of the relationship between brain function and psychological processes, drawing heavily from contemporary research involving humans and animals and describing the neural bases for such psychological processes as learning, memory, language, and emotion. Special attention is given to behavioural abnormalities resulting from brain pathology. Prerequisite: 8.0 university credits including PSYC 2200H or PSYC-KINE 2210H or PSYC-BIOL 3210H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3230H - Sleep and Arousal

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
A description of the states of sleep using electrophysiological, physiological, and behavioural terms; exploration of the nature of normal sleep in various species; examination of the nature of sleep disorders; consideration of the various theories of the functions of sleep. Prerequisite: 8.0 university credits including 0.5 credit from A2 category.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3240H - Drugs and Behaviour

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
A comprehensive review of psychoactive drugs and how they affect brain and behaviour. The course emphasizes the mechanisms by which drug use modifies brain function and behaviour. Drugs used to treat psychiatric disorders and drugs of abuse will be discussed, including a consideration of their social, financial, and familial impacts. Prerequisite: 8.0 university credits including PSYC 2200H or PSYC-KINE 2210H or PSYC-BIOL 3210H or NURS 3550H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3300H - Advanced Abnormal Psychology

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Designed to explore in depth a cross-section of basic topics in abnormal psychology with emphasis upon specific diagnostic categories. Topics include anxiety, somatoform, mood, psychotic, and substance-related disorders. Clinical features, theoretical models of their development, maintenance and treatment, and associated paradigms and findings are addressed. Prerequisite: 8.0 university credits including PSYC 2300H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3320H - Forensic Psychology

Overview

Department(s)
Forensic Science, Psychology

Contact Department ('not set' refers to cross-listed depts)
Forensic Science - 100%, Psychology - Not Set

Cross-Lists
FRSC-3320H

Course Description
An introduction to how psychological theories and empirical research inform policing, the courts, and offender management and rehabilitation. Topics include suspect interrogation and lineups, deception detection, eyewitness memory and testimony, jury biases and jury selection, mental illness and specialized courts, risk assessment tools and methods, psychopathy, sexual, intimate partner, and homicidal violence. Prerequisite: FRSC 2100H and PSYC 2700H. Open only to students in Forensic Science (single major), Forensic Anthropology, Forensic Biology, Forensic Chemistry, or the joint-major program in Forensic Science and Psychology. Not open to students with credit for FRSC-PSYC 4320H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3330H - Theory and Practice in Psychotherapy

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Provides students with a background in major theories of psychotherapy and their application in clinical practice. This includes a historical account of each theory, the underlying conceptualizations of human behaviour and mental health, and the practical, clinical application of the theory (e.g., case conceptualization, treatment planning, and related intervention). Prerequisite: 8.0 university credits including PSYC 2018H, PSYC 2019H, at least 65% in PSYC 2300H, and at least 65% in PSYC 3300H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3360H - Behavioural Ecology

Overview

Department(s)
Biology, Psychology

Contact Department ('not set' refers to cross-listed depts)
Biology - 100%, Psychology - Not Set

Cross-Lists
BIOL-3360H

Course Description
An introduction to the ecological, physiological, and evolutionary mechanisms which influence the behaviour of animals, with emphasis on social relations, mating systems, selection, and co-evolution. Prerequisite: 8.0 university credits including 60% or higher in each of BIOL-ERSC 2260H and BIOL 2600H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3420H - Motivation and Emotion

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
A survey of theory and research on motivation and emotion. Topics include the definition, measurement, evolution, development, control, physiology, and neurology of motivation and emotions, as well as the connections between emotions, cognitions, and consciousness. Prerequisite: 8.0 university credits including PSYC 2400H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3430H - Memory

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Examines the processes and strategies underlying memory phenomena in humans, including their application to real-world events. Topics considered include imagery; working memory; memory as a constructive process; emotion and memory; implicit/explicit memory; memory disorders; and abilities and memory. Prerequisite: 8.0 university credits including PSYC 2018H, 2019H, and 2400H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3440H - Aging and Cognition

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
A detailed examination of the changes in cognitive functioning that accompany the aging process. While consideration is given to the alterations in nervous and sensory systems that help explain decrements, attention is also focused on the experiential factors that lead to maintenance and improvements in many cognitive skills. Prerequisite: 8.0 university credits including PSYC 2018H, 2019H, and 2400H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3451H - Psychology of Language

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
A research-oriented approach to psycholinguistic theory and the psychology of language. Topics include syntactic theory, the representation of meaning in language, the relation between cognition and language, language acquisition in children, individual differences in language use, bilingualism, and language disorders. Prerequisite: 8.0 university credits including PSYC 2018H, 2019H, and 2400H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3460H - Sensation and Perception

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
An intensive examination of how humans (and other species) perceive information presented to the senses. Topics include mechanisms of perception, detection, discrimination, and pattern recognition. Psychophysical measurement, colour and spatial vision, hearing, taste, smell, and touch may be covered. Anatomical and physiological structures that support the senses are discussed. Prerequisite: 8.0 university credits including PSYC 2018H, 2019H, and 0.5 credit from A2 category.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

PSYC3500H - Child Development

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Provides students with an intensive examination of theory and empirical research in the field of child psychology. Topics covered include theories of development, advanced research methods, biological foundations, developmental changes in basic and complex psychological processes, cognitive and intellectual development, social and emotional development, and family and peer influences on children's behavior. Prerequisite: 8.0 university credits including PSYC 2550H; or 4.0 NURS credits; or 1.5 CHYS credits and 60% or higher in PSYC 1020H and 1030H. Not open to students with credit for PSYC 2500H.

0.5

PSYC3550H - Adult Development and Aging: Psychosocial Perspectives

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Examines theory and research of aging within the framework of the life span perspective. Topics to be covered include theories of aging, lifestyle factors, personality, stress and coping, social resources, mental attitudes (optimism and personal meaning), death attitudes, and Alzheimer's disease. Prerequisite: 8.0 university credits including PSYC 2550H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:
0.5

PSYC3560H - Family Development

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
Exposes the student to current life-span developmental theory and research methodology in the area of family relationships. Topics include family-systems theory, attachment theory, Erikson's psychosocial theory, developmental interaction in the child-rearing years, family life transitions, challenging issues of contemporary parenting. Prerequisite: 8.0 university credits including PSYC 2550H; or 4.0 NURS credits; or 1.5 CHYS credits and 60% or higher in PSYC 1020H and 1030H.

Academic Level

Course Designation
Science

Credit Value
:
0.5

PSYC3590H - Psychology of Education

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
An examination of the history, research methodology, theories of learning, structure of intellect, and assessment procedures within the field of educational psychology. Focuses on the current, and sometimes controversial, issues which are at the forefront of research on and discussions of the relationship between psychological principles and educational practice. Prerequisite: 8.0 university credits including 1.0 PSYC 2000-level credit other than PSYC 2018H or 2019H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value
:
0.5

PSYC3610H - Behaviour Modification

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
The application of principles of learning and motivation to practical situations including teaching, child rearing, public institutions, and everyday life settings. The two areas of concentration are: a) basic principles of learning and b) their application. Prerequisite: 8.0 university credits including PSYC 2600H.

PSYC3710H - Environmental Health

Overview

Department(s)
Environment, Psychology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Psychology - Not Set

Cross-Lists
ERSC-3710H

Course Description
Examines environmental risk factors that affect human health and well-being, including diet and lifestyle, water and food security, exposure to chemicals, climate change, and the relationship between human and environmental health. Some principles of epidemiology are covered. Current topics in environmental health are examined in tutorial sessions. Prerequisite: ERSC 1010H and 1020H and one of ERSC 2230H, ERSC-INDG 2150H, ERST-INDG 2601Y, ERSC-BIOL 2701H; or BIOM 1000H, one of BIOL 1051H, 1500H, or 1501H, and one of BIOL 2000H, PSYC 2018H, or PSYC 2019H.

PSYC3725H - Sport Psychology

Overview

Department(s)
Kinesiology, Psychology

Contact Department ('not set' refers to cross-listed depts)
Kinesiology - 100%, Psychology - Not Set

Cross-Lists
KINE-3725H

Course Description
Introduces current theoretical, empirical and practical knowledge and application in the field of sport psychology. Applications of sport psychology are discussed from the perspective of athletes, coaches, trainers, and educational sport psychologists. Prerequisite: 8.0 university credits including PSYC 2018H and 2019H.

Course Description
Covers theories and current topics in research on issues central to aging and the chronic conditions of aging (including dementia). Students apply and integrate their learning through assignments and the Living Lab held off campus at the Ontario Shores Centre for Mental Health Sciences. Prerequisite: Minimum 65% average across completed PSYC courses; 14.0 university credits including PSYC 2550H and 75% or higher in PSYC 2018H and 2019H or 75% or higher in PSYC 3016H (or 3015Y). Offered only at Trent University Durham GTA.

PSYC4860H - Applied Psychological Placement in Mental Health

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
This placement allows students the opportunity to gain practical experience in the area of mental health by working in such settings as community programs and mental health centres. During the placement, the seminars lend support to the placement experience. Prerequisite: 14.0 university credits including 75% or higher in PSYC 3300H or 4150H; a minimum cumulative average of 75%; and permission of the chair. Offered only at Trent University Durham GTA.

PSYC4870H - Placement in Aging and Dementia

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
This course provides a combination of classroom-based learning and experiential learning through placements in community or care settings, where students engage directly with older adults with varying cognitive abilities (e.g., individuals living with dementia). Through these experiences, students develop practical skills while applying theoretical knowledge to real-world contexts. Prerequisite: Minimum 65% average across completed PSYC courses; 14.0 university credits including PSYC 3016H; and at least 1.0 additional 3000-level PSYC credit. Offered only at Trent University Durham GTA.

PSYC5016H - Advanced Univariate Statistics

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
This course provides a detailed examination of univariate statistics, including t-tests, analysis of variance including between-subjects designs, random effects and various mixed designs,multiple comparison and trend analyses, correlation, nonparametric statistics, power, effect size (typically offered in the Fall semester).

Academic Level
Graduate

Credit Value

PSYC5017H - Advanced Multivariate Statistics

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
This course provides a detailed examination of multivariate statistics, including MANOVA, MANCOVA, multiple regression, principal component and exploratory factor analysis, path analysis and structural equation modeling, including confirmatory analysis (typically offered in the Winter semester).

Academic Level
Graduate

Credit Value

:
0.5

PSYC5120H - Advanced Qualitative Analysis

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
This course provides a detailed examination of the main theoretical contributions to qualitative research methods including feminist research practices, Grounded Theory, Interpretative Phenomenology, Discursive Psychology, and Foucauldian analytical techniques as well as the scientific practices used to elucidate and analyze qualitative data (typically offered in the Fall semester).

PSYC5240H - Advanced Neuroendocrinology

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
This course provides an in-depth examination of the interactions between the central nervous system amd endocrine systems focusing on the limbic-hypothalamic-adrenal-pituitary axis. This course studies the control of hormone release at each level of the axis, including neurotransmiter modulation and steroid feedback during both homeostatic and stressor-induced states. In addition, the relevance of the effects of stessors on the neuroendocrine systems, disease, and behaviour is considered.

PSYC5460H - Perception and Cognition

Overview

Department(s)
Psychology

Contact Department ('not set' refers to cross-listed depts)
Psychology - 100%

Course Description
This course examines human perception and cognition. Particular emphasis is given to understanding (1) the critical findings and methods employed to study perceptual (e.g., perception for action) and cognitive (e.g., language mathematics) abilities, and (2) human knowledge representation. We consider how long-running debates (e.g., modular vs. distributed processing) and themes [the role of awareness and the role of embodiment] have influenced our understanding of each research area] have influenced our understanding of each research area.

RUSS1001H - Introduction to Russian 1

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An introduction to the Russian language for students with no previous knowledge. Students are introduced to the Cyrillic alphabet and learn basic phrases and grammar to enable them to participate in basic conversations and to get around in a Russian-speaking environment.

Academic Level
Undergraduate

Credit Value

:
0.5

RUSS1002H - Introduction to Russian 2

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
A continuation of the Russian language for students with some previous knowledge or who have taken RUSS 1001H. Students continue to learn phrases and more advanced grammar to improve their ability to get around in a Russian-speaking environment. Prerequisite: RUSS 1001H or permission of instructor.

SAFS1001H - Introduction to Sustainable Agriculture and Food Systems

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
An interdisciplinary survey of the environmental, social, economic, political, and cultural aspects of agriculture and food. Topics examined include ecological agriculture, soil and crop management, pests and diseases management, food policy, local food, and food security. The purpose of the class is for students to develop an informed critique of agricultural systems.

SAFS2350H - Ecological Agriculture

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
BIOL-2350H, ERSC-2350H

Course Description
An exploration of the scientific basis and ecology of agriculture. Abiotic and biotic factors influencing crop productivity, species interactions, energetics, nutrient cycling, cropping systems management and landscape diversity are considered. Traditional, conventional, and intense systems are reviewed in the context of sustainability. Prerequisite: BIOL 1020H or both ERSC 1010H and 1020H. Recommended: SAFS 1001H, BIOL 1030H.

Academic Level
Undergraduate

Course Designation
Science

SAFS2500H - The World Food System

Overview

Department(s)
Global Justice & Development, Anthropology, Geography, Sociology, Environment

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Anthropology - Not Set, Geography - Not Set, Sociology - Not Set, Environment - Not Set

Cross-Lists
ANTH-2500H, GDST-2500H, GEOG-2500H, SOCI-2500H

Course Description
An interdisciplinary and comparative analysis of the impact of transformations in the world food system on contemporary agrarian societies. Prerequisite: 4.0 university credits or permission of instructor. Equivalent to IDST 2500H.

Academic Level
Undergraduate

Credit Value

:
0.5

SAFS2600H - Peasants, Food, and Agrarian Change

Overview

Department(s)
Global Justice & Development, Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Anthropology - Not Set, Environment - Not Set

Cross-Lists
ANTH-2600H, GDST-2600H, SOCI-2600H

Course Description
An examination of the impact of processes of commodification, market integration, and globalization on the social organization of food-producing rural communities in developing countries. Prerequisite: 4.0 university credits or permission of instructor. Equivalent to IDST 2600H.

Academic Level
Undergraduate

Credit Value

:
0.5

SAFS2800H - Sustainable Farm Business Management

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
An exploration of the business of small-scale sustainable farming. Students learn about conventional, social economic, and cooperative approaches to organizing business. A number of point-of-sale strategies are considered, including 'farm gate' sales, farm stands, farmers' markets, value-added multifunctionality strategies, Community Supported Agriculture models, and direct sales to restaurants.

Academic Level
Undergraduate

SAFS2821H - Food in History

Overview

Department(s)
History, Environment

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Environment - Not Set

Cross-Lists
HIST-2821H

Course Description
Explores how and why foodways have changed in North America and Europe between 1800 and the present. It allows students to draw links between global questions and everyday life, gender and politics, and social class and health, while introducing various methods of historical inquiry. Prerequisite: 3.0 university credits or permission of the chair.

Academic Level
Undergraduate

Credit Value

:
0.5

SAFS3002H - Environmental Implications of Agriculture

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Cross-Lists
ERSC-3002H

Course Description
An introduction to the scientific basis of agriculture and an exploration of the environmental implications of agriculture. Topics include agricultural ecology, soil and moisture management, nutrient management, pest management, energy consumption in the agricultural sector, and the impact on agriculture of ambient environmental conditions, including air pollution and climate change. Prerequisite: ERSC 2220H and 2240H.

Academic Level
Undergraduate

SAFS3302H - Animals and Society

Overview

Department(s)
Environment, Philosophy

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Philosophy - Not Set

Cross-Lists
ERST-3302H, PHIL-3302H

Course Description
An introduction to animal studies. Topics considered include the constructed divide between humans and non-human animals, societies' use of animals--for food, clothing, entertainment, companionship, research--and the implications of these relationships. The course also discusses animal rights, animal protection, and posthumanist perspectives. Prerequisite: 1.0 ERST and/or PHIL credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

SAFS3341H - The Canadian Food System: Community Perspectives and Experiences

Overview

Department(s)
Environment, Canadian Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set, Sociology - Not Set

Cross-Lists
CAST-3341H, ERST-3341H, SOCI-3341H

Course Description
The history of Canada's food and agricultural system is the backdrop to this interdisciplinary course on community development of the system's social, economic, and environmental sustainability. Production, distribution, processing, consumption, and regulatory issues are addressed. Community-based research projects are undertaken with local food and agricultural organizations. Prerequisite: 9.0 university credits. Recommended: CAST-EDUC-ERST-GEOG 2043H, 2044H, GDST-ANTH-GEOG-SAFS-SOCI 2500H, and SAFS-GDST-ANTH 2600H. Equivalent to SAFS-CAST-ERST 3340H.

SAFS3370H - Organic Agriculture: Principles and Practices

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
BIOL-3370H, ERSC-3370H

Course Description
Focuses on farming methods and requirements for organic production. The importance of ecological processes, biodiversity, rotation, and organic amendments in organic crop production will be discussed. The standards, certification, packaging, and diversity of markets for organic foods will be emphasized. Mandatory field trips to organic farms. Prerequisite: SAFS 1001H and SAFS-BIOL-ERSC 2350H.

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
BIOL-3545H, ERSC-3545H

Course Description
The mechanisms of plant functioning from the molecular to the whole plant level. Fundamental processes such as photosynthesis, respiration, plant water relations, stomata physiology, mineral nutrition, plant hormone functions, seed germination and dormancy, and environmental stress physiology. Prerequisite: SAFS 1001H or BIOL 1020H. Equivalent to SAFS-BIOL 3530H. Not open to students with credit for BIOL 3180H.

SAFS3560H - Soil Science

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Cross-Lists
EGEO-3560H, ERSC-3560H, GEOG-3560H

Course Description
Soil is at the heart of terrestrial ecosystems. A sound understanding of soil science is necessary for physical geography, environmental science, engineering, and agriculture. This course describes the mechanisms of soil formation and the physical, chemical, and biological properties of soils, as well as current issues in soil science. Prerequisite: GEOG-ERSC 2080H and one of ERSC 2240H or GEOG 2540H.

Academic Level
Undergraduate

SAFS3602H - Environment and Development

Overview

Department(s)
Environment, Global Justice & Development, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Global Justice & Development - Not Set, Political Studies - Not Set

Cross-Lists
ERST-3602H, GDST-3602H, POST-3602H

Course Description
Examines environmental issues and conflicts in developing countries, applying a critical political ecology perspective to a range of current topics, including oil production, biodiversity conservation, and resource conflicts. There is also a special focus on agriculture and food systems. Prerequisite: ERST-POST 2100H, ERST-CAST 2520H, GDST-HURI 2010H (GDST 2001H), or POST 2200Y.

Academic Level
Undergraduate

SAFS3635H - Foodways of Great Lakes Basin Indigenous Peoples 1

Overview

Department(s)
Indigenous Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Environment - Not Set

Cross-Lists
ERST-3635H, IESS-3635H, INDG-3635H

Course Description
Students explore, through experiential learning and research, a seasonal range (summer-fall) of historical and contemporary foodways/systems of Great Lakes Basin Indigenous Peoples, and the ecosystems that support and the issues that impact these foodways. Recommended studies or science course for the Indigenous Environmental Studies/Sciences program. Course fee: $35. Prerequisite: INDG-ERST 2601Y; or both ERSC 1010H and 1020H; or 10.0 university credits and permission of instructor. Not open to students with credit for INDG-IESS-ERST-SAFS 3634H.

SAFS3650H - Soil Management and Conservation

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
ERSC-3650H, GEOG-3650H

Course Description
Soils represent one of the most important natural resources from the point of view of sustainable agriculture and forestry, and protection of habitat. This course explores the scientific basis and management options for conservation of soil resources. Prerequisite: ERSC 2240H or ERSC-EGEO-GEOG 2401H or GEOG 3520H or both GEOG 2540H and 2560H. Recommended: ERSC-GEOG-SAFS 3560H.

SAFS3746H - Anthropology of Drinks and Drinking

Overview

Department(s)
Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set

Cross-Lists
ANTH-3746H

Course Description
Drinks and drinking as meaningful and material forms pervade all social life. This course explores ethnographically the way the materiality of specific drinks--water (tap, mineral, purified), coffee, gin, wine, vodka, beer--serves as a social medium in specific times and places. Prerequisite: 4.0 university credits.

SAFS3760H - The Geography of Beer

Overview

Department(s)
Geography, Canadian Studies, Business, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Canadian Studies - Not Set, Business - Not Set, Environment - Not Set

Cross-Lists
ADMN-3760H, CAST-3760H, ERST-3760H, GEOG-3760H

Course Description
Designed around a term-long research project, this course explores themes such as tourism, built heritage, and post-industrial design associated with the production of craft beer. Students learn how to examine land-use patterns, built form, and branding techniques in one locale. Emphasis is placed on in-class participation and experiential learning. Prerequisite: GEOG-ERST 2510H, GEOG-CAST 2710H, ADMN 2080H, or SAFS 1001H.

Academic Level
Undergraduate

SAFS3800D - Community Development

Overview

Department(s)
Global Justice & Development, Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Anthropology - Not Set, Environment - Not Set

Cross-Lists
ANTH-3800D, ERST-3800D, GDST-3800D

Course Description
The theory and practice of community development, with an extensive field placement. Offered only in Ghana. Not open to students with credit for GDST 3802D or IDST-ANTH-ERST-SAFS 3802D. Equivalent to IDST 3800D.

Academic Level
Undergraduate

Credit Value

:
2

SAFS3801H - Intensive Small-Scale Agriculture Field Course

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
A hands-on field course that covers the principles of vegetable and field crop production from seed to table. Students learn the principles of sustainable crop production, including seed bed preparation, nutrient management, and the logistics of planting, managing, harvesting and distributing produce at the Trent Experimental Farm. Prerequisite: 9.0 university credits.

SAFS3820H - Culture and Food

Overview

Department(s)
Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set

Cross-Lists
ANTH-3820H

Course Description
Examines classic issues in the anthropology of food. We focus on etiquette of food consumption, food and sex, food and religion and morality, food exchange and preparation, vegetarianism and meat eating, and cannibalism. Prerequisite: ANTH 2001H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

SAFS3852H - Farming in the Kawarthas

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Focus is on farming and food system practices in the Kawartha region. Visits and course material focus on farm visits and marketing of local produce. Students conduct a project on an agreed farm or agri-business as part of an internship. Prerequisite: 9.0 university credits including 4.0 SAFS credits.

Academic Level
Undergraduate

Credit Value

:
0.5

SAFS3890H - Placement Course

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Consists of a placement experience with a government agency, industry, or non-governmental agency, or related laboratory or work unit, on themes and principles learned during coursework associated with the Environmental & Resource Science/Studies, Geography, or Sustainable Agriculture & Food Systems programs in the School of the Environment. Students work closely with the instructor and placement host to determine deliverables that will be presented to various stakeholders as technical report(s) and/or presentation(s). Course is graded on a pass/fail basis. Prerequisite: A minimum cumulative average of 75% and 9.0 university credits including 4.0 SAFS credits.

Academic Level
Undergraduate

Credit Value

:
0.5

SAFS3900Y - Reading Course

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
A research course on a specific topic. Only open to Sustainable Agriculture & Food Systems majors or joint-majors with a minimum average of 75% in 2.0 SAFS credits. Written permission must be obtained from the supervising instructor and the TSE director before registration.

Academic Level
Undergraduate

SAFS4010Y - Honours Thesis

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Design, implementation, and dissemination of a major research project in sustainable agriculture and food systems featuring independent work under the supervision of a faculty supervisor. SAFS 4020D is a double credit in Sustainable Agriculture & Food Systems. SAFS 4010Y is a single credit because the same thesis is submitted to the other program in a joint major. Prerequisite: 14.0 university credits and a minimum cumulative average of 75%. Students must find a faculty member who is agreeable to supervise their project. Applications are available from the TSE office, and should be submitted in the academic year before enrolment in the course.

SAFS4100H - Canadian Food and Agriculture Policy

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Examines the policies and associated legal instruments relating to agricultural production and food consumption in Canada, as administered by the federal government, provincial governments, and municipal and other local governments. Particular attention to the dynamics of policy development and controversy, and of policy innovation. Prerequisite: 9.0 university credits including 4.0 SAFS credits.

SAFS4270H - Nutrient Cycling in Ecosystems

Overview

Department(s)
Environment, Biology, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Geography - Not Set

Cross-Lists
BIOL-4270H, ERSC-4270H, GEOG-4270H

Course Description
Examines plant nutrition, soil fertility, and fertilizer management, with a focus on essential macronutrients. Topics include biogeochemical cycling of nitrogen, phosphorus, potassium, calcium, magnesium, and sulphur in crop production. Sustainable management of nutrients for optimum productivity and minimum impact on the environment will be discussed. Prerequisite: SAFS-ERSC-GEOG 3560H.

SAFS4350H - Origins and Spread of Agriculture

Overview

Department(s)
Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Environment - Not Set

Cross-Lists
ANTH-4350H

Course Description
Provides students with a critical understanding of the theoretical models and archaeological evidence for the origins and spread of agricultural societies. The course explores evolutionary, ecological and social theories and reviews genetic, linguistic, archaeobotanical, zooarchaeological and settlement data from Southwest and Southeast Asia, Europe, and the Americas. Prerequisite: 9.0 university credits including ANTH 2121H and 2122H, or permission of the instructor.

:
0.5

SAFS4703H - Senior Seminar in Earth and Environmental Science

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Geography - Not Set

Cross-Lists
ERSC-4703H, GEOG-4703H, WASC-4703H

Course Description
Students examine the fundamental concepts of scientific research, including the role of research in managing environmental issues. A range of topics will be covered through guest seminars, group discussions, and an individual research project. In the project, students evaluate the scientific literature on an emerging environmental issue of their choosing. Prerequisite: 14.0 university credits including 4.0 ERSC, ERST, GEOG, SAFS, and/or WASC credits.

Academic Level
Undergraduate

Credit Value

:
0.5

SAFS4830H - Anthropology of Food Politics

Overview

Department(s)
Anthropology, Political Studies, Environment

Contact Department ('not set' refers to cross-listed depts)
Anthropology - 100%, Political Studies - Not Set, Environment - Not Set

Cross-Lists
ANTH-4830H, POST-4830H

Course Description
Explores moral and ethical dimensions of food production and circulation. The politics of excess and want, national cuisines, reactions to industrial and fast food (the Slow Food movement, culinary connoisseurship). Food distribution, from home to restaurants and fast food joints, is examined in the context of changing demands of work. Prerequisite: ANTH 2001H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

SAFS4850Y - Community-Based Research Project

Overview

Department(s)
Environment

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%

Course Description
Students are placed in research projects with community organizations in the Peterborough area. Each placement is supervised jointly by a faculty member and a representative of a community organization. For details see Community-Based Research Program. Prerequisite: 14.0 university credits and a minimum cumulative average of 75%.

SAFS4860H - Soil Biodiversity and Functioning

Overview

Department(s)
Environment, Biology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set

Cross-Lists
BIOL-4860H

Course Description
A lab-based course focused on soil organisms and soil biodiversity; emphasis on the role of organisms in nutrient cycles and plant growth promotion using a hands-on approach to investigate key soil functions. Approaches for analyzing microbial populations and activities in the environment, including molecular techniques are covered. Prerequisite: One of SAFS 1001H, ERSC 1010H, or BIOL 1020H; and 1.0 science credit at the 2000 level or beyond in SAFS, ERSC, CHEM, or BIOL. Equivalent to SAFS 4840H.

SOCI1001H - Introduction to Sociology 1: Critical Foundations

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
An introduction to sociology's major thinkers, critical perspectives, theoretical foundations, research methods, and fields of inquiry. Course materials focus on the social forces and changes that shape culture, groups, social interaction, and institutions in Canadian and comparative contexts.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI1002H - Introduction to Sociology 2: Exploring Social Life

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
An examination of one or more sociological studies is used to develop students' understandings of social life, ranging from everyday social interaction to global social structures. Substantive areas in sociology that may be investigated include families, social inequalities, health, deviance, work, education, religion, communications, and social movements. Prerequisite: SOCI 1001H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI1003H - Foundations of Black Studies in Canada

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
This course offers a foundational understanding of Black/ African peoples in Canada, exploring themes such as migration, identity, resistance, and the struggle for equity and social change. Students examine Black Studies' complexities and the importance of Black Canadian history in discussions about race, inclusion, and systemic injustice through an interdisciplinary lens.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2002H - Black Sociology: Theorizing Race and Power

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
This course offers a critical examination of society through the perspectives and contributions of Black sociologists. Students will engage with the works of scholars and theoreticians who connect academic insights with real-world issues, challenging Eurocentric frameworks and emphasizing the interconnectedness of various forms of oppression. Prerequisite: 4.0 university credits including SOCI 1003H or permission of instructor.

Academic Level
Undergraduate

Credit Value

SOCI2003H - Black Experience in Canada

Overview

Department(s)
Canadian Studies, Political Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Political Studies - Not Set, Sociology - Not Set

Cross-Lists
CAST-2003H, POST-2003H

Course Description
Explores the Black Canadian experience from the first recorded moment that a Black body arrived in Canada to the present. Discussion moves the conversation from victimhood to the vitality inherent in the Black experience particularly as represented by activities and contributions made by Black communities to cultural diversity. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2005H - Law, Violence, and Transitional Justice

Overview

Department(s)
Global Justice & Development, Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Sociology - Not Set, Criminology - Not Set

Cross-Lists
CRIM-2005H, GDST-2005H, HURI-2005H

Course Description
Investigates the relationship between law and violence in contexts of conflict and repression. Analyzes mechanisms of transitional justice, including criminal prosecution, truth commissions, and reparations, and their effectiveness in confronting past injustices and advancing human rights. Prerequisite: HURI 1001H and 1002H or 4.0 university credits or permission of instructor. Equivalent to HURI 2001H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2015H - Critical Perspectives on Aging

Overview

Department(s)
Nursing, Sociology, Economics

Contact Department ('not set' refers to cross-listed depts)
Nursing - 100%, Sociology - Not Set, Economics - Not Set

Cross-Lists
ECON-2015H, NURS-2015H

Course Description
An introduction to aging from critical perspectives. Drawing on multidisciplinary perspectives within the Trent Centre for Aging and Society, this course provides a foundation for understanding and analyzing the meaning and significance of aging for individuals, communities, and societies. Topics include life course influences, representations and problematization of aging, and places for aging. Open to non-Nursing students. Prerequisite: 4.0 university credits.

Undergraduate

Course Designation
Science

Credit Value

:
0.5

SOCI2110H - Social Structures and Social Change

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
This course is the foundational social theory course. It focuses on explanations for the emergence and development of modern societies, with the arrival of capitalism, European colonialism, and scientific frameworks of thought, covering the early "classical" theorists who attempted to explain these changes and including under-studied early theorists of race, colonialism, and gender. Prerequisite: 60% or higher in SOCI 1002H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2151H - Researching Social Life

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
An introduction to major issues and decisions confronting the new researcher. Topics include epistemology and knowledge paradigms, including positivism/realism, interpretivism/ constructivism and critical knowledge development; research ethics; the role of theory in research design; an introduction to key methodologies and methods in sociological research; and sampling choices. Prerequisite: 60% or higher in SOCI 1002H. Not open to students with credit for SOCI 2150Y, CHYS-COMM 2010H, CHYS-COMM 2000H, CCTH 2000H, or PLCW 2100H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2220H - Intersecting Social Inequalities

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
An introduction to the intersecting formation of social inequality focusing on class, gender, and ethnicity, and the consequences for individuals and society, and the sociological theories which address these issues. Prerequisite: 60% or higher in SOCI 1002H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2301H - Self and Social Interaction

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
Examines the theoretical and methodological foundations of interactionist, micro-sociological, interpretive, and sociological-psychological research. Applied areas critically investigate the sociology of symbolic worlds, discourse and conversation, emotions, and the shaping of identity and subjective life in everyday contexts. Prerequisite: 60% or higher in SOCI 1002H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2340H - Work and Social Inequalities

Overview

Department(s)
Sociology, Business

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Business - Not Set

Cross-Lists
ADMN-2340H

Course Description
The nature and meaning of paid work and its relationship to wider social inequalities of ethnicity and gender. Specific topics may include the effects of technological changes, the shift to a service economy, global migration trends, managerial and employee strategies to control the workplace and to promote equity. Prerequisite: 60% or higher in SOCI 1002H or 1.0 ADMN credit. Not open to students with credit for SOCI-ADMN 3340H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2430H - Sociology of Gender

Overview

Department(s)
Sociology, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Gender & Social Justice - Not Set

Cross-Lists
GESO-2430H

Course Description
Focuses on gender as a core aspect of social organization and inequality. Key concepts are gender, femininity, masculinity, sexuality, homosexuality, heterosexuality, and queer. Naturalist ideas and sociological analyses developed within feminism and lesbian and gay theories are studied. Prerequisite: 60% or higher in SOCI 1002H or 0.5 GESO credit. Not open to students with credit for SOCI-WMST 3430H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2500H - The World Food System

Overview

Department(s)
Global Justice & Development, Sociology, Anthropology, Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Sociology - Not Set, Anthropology - Not Set, Environment - Not Set, Geography - Not Set

Cross-Lists
ANTH-2500H, GDST-2500H, GEOG-2500H, SAFS-2500H

Course Description
An interdisciplinary and comparative analysis of the impact of transformations in the world food system on contemporary agrarian societies. Prerequisite: 4.0 university credits or permission of instructor. Equivalent to IDST 2500H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2600H - Peasants, Food, and Agrarian Change

Overview

Department(s)
Global Justice & Development, Anthropology, Environment

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Anthropology - Not Set, Environment - Not Set

Cross-Lists
ANTH-2600H, GDST-2600H, SAFS-2600H

Course Description
An examination of the impact of processes of commodification, market integration, and globalization on the social organization of food-producing rural communities in developing countries. Prerequisite: 4.0 university credits or permission of instructor. Equivalent to IDST 2600H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2601H - Public Health and Medicine: Doctors, Nurses, and Patients in History

Overview

Department(s)
History, Sociology

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Sociology - Not Set

Cross-Lists
HIST-2601H

Course Description
Medicine is simultaneously scientific and social. What gets defined as a disease? Who heals? Who can access health care? Such questions reveal how political, cultural, and economic forces have shaped medicine throughout history. We explore topics highlighting this interaction between the scientific and the social in a variety of historical contexts. Prerequisite: 2.5 university credits or permission of the chair.

SOCI2610H - Deviance and Social Control

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
Introduces students to key classical and contemporary sociological theories of deviance and the processes of social integration and moral regulation. Topics may include moral panics, drug use, mental illness, criminalization, medicalization of deviance, and risk management. Prerequisite: 60% or higher in SOCI 1002H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2615H - Crime and Society

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
Introduces students to sociological theories of criminalization, examining contested definitions of crime and how criminologists measure crime. A key focus of the course is the impact of social inequality on crime patterns and how society responds to the "crime problem." Prerequisite: 60% or higher in SOCI 1002H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI2630H - Sociology of Health and Illness

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
Critically examines conceptualizations of health, illness, and disease, focusing on social determinants of health. Topics include income security, employment, and work; education and literacy; food production and access; Indigenous health; and intersections of gender and health. Prerequisite: 60% or higher in SOCI 1002H or 60% or higher in SOCI 1001H and HEAL-NURS 1005H.

SOCI3000Y - Reading the Social: Space, Difference, and Power in Canada

Overview

Department(s)
Canadian Studies, Political Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Political Studies - Not Set, Sociology - Not Set

Cross-Lists
CAST-3000Y, POST-3000Y

Course Description
An interdisciplinary study of the social practices of space, race, community, identity, and difference in Canada. In the first term students "unmap" the relationship between place and identity through selected case studies from various regions in Canada. In the second term students examine immigration, multiculturalism, globalization, and diaspora. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value

:
1

SOCI3002H - Applied Intersectionality

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
This course explores the application of intersectionality in diverse settings. Students study the genealogy of intersectionality as an analytical framework anchored in the knowledges of Black/African women. Through critical theory, case studies, and applied approaches, the course encourages reflection on the use of intersectionality in community, institutional, and organizational spaces. Prerequisite: SOCI 2002H or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3052H - Race and Racialization

Overview

Department(s)
Gender & Social Justice, Sociology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Sociology - Not Set

Cross-Lists
GESO-3052H

Course Description
Highlighting work by racialized and Indigenous women, this course explores contemporary themes within feminism about critical race theory, white supremacy, and anti-racist practice. Topics include intersections of racism with other systems of inequality, everyday and systemic racism, racial violence, whiteness and privilege, and feminist anti-racism responses. Prerequisite: 6.0 university credits including 1.0 GESO, SOCI, or WMST credit at the 2000 level, or permission of instructor. Not open to students with credit for GESO-SOCI 4052H.

Undergraduate

Credit Value
:
0.5

SOCI3070H - Sociolinguistics: Language in Society

Overview

Department(s)
Languages & Linguistics, Anthropology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%, Anthropology - Not Set, Sociology - Not Set

Cross-Lists
ANTH-3070H, LING-3070H

Course Description
An introduction to the study of language in use in society. Topics include varieties of language; pragmatics; ethnographic approaches; discourse analysis; multilingualism; pidgins and creoles; sexist language; language in education; and language policy and planning. Students investigate how language is shaped by factors such as region, sex/gender, age, and identity. Prerequisite: 4.0 university credits or permission of instructor. Recommended: LING 1000Y or 1002H.

Academic Level
Undergraduate

Credit Value
:
0.5

SOCI3100H - Contemporary Sociological Theory

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
Designed as a brief introductory overview of contemporary theories in sociology, with a focus upon core concepts such as hegemony, postmodernism, globalization, intersectionality, and the public sphere. Prerequisite: 5.0 university credits including SOCI 2110H and at least one other 0.5 credit in SOCI at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3111H - Classical Sociological Theory

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
An exploration of the structure and scope of sociological theorizing in the classical tradition, with particular emphasis on Marx, Durkheim, and Weber. Conceptions of theory, method, and object of investigation are explored through engagement with original texts. Prerequisite: 5.0 university credits including SOCI 2110H and at least one other 0.5 credit in SOCI at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3115H - Citizenship Rights and Development

Overview

Department(s)
Global Justice & Development, Sociology, Criminology, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Sociology - Not Set, Criminology - Not Set, Political Studies - Not Set

Cross-Lists
CRIM-3115H, GDST-3115H, HURI-3115H, POST-3115H

Course Description
An analysis of the concept of citizenship and rights and their role in social and political transformation. Includes social justice and citizenship struggles; critical perspectives on power; and various citizenship regimes and their implementation on national and global levels. Prerequisite: 7.0 university credits including 1.0 GDST/IDST, POST, and/or SOCI credit at the 1000 level and 1.0 GDST/IDST, POST, and/or SOCI credit at the 2000 level, or permission of instructor. Equivalent to IDST-CRIM-SOCI 3120H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3121H - Human Rights: Law and Institutions

Overview

Department(s)
Global Justice & Development, Criminology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Criminology - Not Set, Sociology - Not Set

Cross-Lists
CRIM-3121H, GDST-3121H, HURI-3121H

Course Description
This course examines the legal and institutional frameworks for protecting and promoting human rights at national and international levels. Students explore the main treaties, and the role of courts, tribunals, and other mechanisms in enforcing human rights standards. Prerequisite: HURI 2005H, GDST-HURI 2010H (GDST 2001H), GESO 2151H, POST 2232H, or SOCI 2110H, or permission of instructor.

Academic Level
Undergraduate

Credit Value

0.5

SOCI3150H - Global Migration

Overview

Department(s)
Global Justice & Development, Sociology, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Sociology - Not Set, Political Studies - Not Set

Cross-Lists
GDST-3150H, HURI-3150H, POST-3150H

Course Description
An examination of the theoretical and conceptual debates that centre on the causes and consequences of international migration. Forced migration, citizenship, gender and racial exclusion, and migrant solidarity are explored to investigate current developments in global migration. Prerequisite: 7.0 university credits including 1.0 GDST/IDST, POST, and/or SOCI credit at the 1000 level and 1.0 GDST/IDST, POST and/or SOCI credit at the 2000 level or permission of instructor. Not open to students with credit for IDST 4120H. Equivalent to IDST 3150H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3151H - Practicing Social Research

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
Students develop their skills in research design and data collection strategies. Reading and critiquing empirical literature on nominated research topics, students develop proposals, compare and contrast data collection methods, select and justify a sampling design, prepare an ethics proposal, and describe the anticipated outcomes of their proposed research. Prerequisite: SOCI 2151H or CHYS-COMM 2010H (or 2000H). Not open to students with credit for SOCI 2150Y.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3160H - Data Analysis

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
An introduction to basic statistics used in data analysis and their application in sociological research. Prerequisite: 5.0 university credits including SOCI 2151H. Not open to students with credit for CRIM 3617H, ECON-ADMN 2200H, GEOG-ERSC-BIOL 2080H, MATH 1051H, MATH 1052H, PSYC 2019H, PSYC 3015Y, or PSYC 3016H.

0.5

SOCI3230Y - Nationalism and Political Order in Global Perspective

Overview

Department(s)
Political Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Sociology - Not Set

Cross-Lists
POST-3230Y

Course Description
Global Power & Politics (GP) course. Why nationalism has survived and revived under globalization; how ethnicity is politicized and national identities constructed; nationalism's positive and negative forms and its relationship with democratic values. Incorporates philosophical, historical, sociological, anthropological, and economic approaches to explain and assess varieties of nationalism. Prerequisite: 2.0 POST credits at the 2000 level or permission of instructor. Recommended: POST 2200Y.

Academic Level
Undergraduate

Credit Value

:
1

SOCI3250H - Understanding Homelessness

Overview

Department(s)
Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Criminology - Not Set

Cross-Lists
CRIM-3250H

Course Description
Critically examines homelessness as a social issue, applying sociological perspectives and a Canadian focus. Topics may include mobility and containment, families and youth, employment and migration, the criminalization of homelessness, shelters and poor houses, masculinities and femininities on the street, and homelessness in their city. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI and/or CRIM at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3320H - Workplace Organizations, Diversity, and Inclusion

Overview

Department(s)
Sociology, Business

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Business - Not Set

Cross-Lists
ADMN-3320H

Course Description
Explores the nature and role of workplace organizations in the contemporary world, including classical, managerial, and recent sociological perspectives with a critical focus on contemporary policies of equity, diversity, and inclusion. Case studies focus on formal organizations in the public and private sectors. Prerequisite: 5.0 university credits including at least 1.5 ADMN credits at the 2000 level or 1.5 SOCI credits at the 2000 level including SOCI-ADMN 2340H (or 3340H).

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3341H - The Canadian Food System: Community Perspectives and Experiences

Overview

Department(s)
Environment, Canadian Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set, Sociology - Not Set

Cross-Lists
CAST-3341H, ERST-3341H, SAFS-3341H

Course Description
The history of Canada's food and agricultural system is the backdrop to this interdisciplinary course on community development of the system's social, economic, and environmental sustainability. Production, distribution, processing, consumption, and regulatory issues are addressed. Community-based research projects are undertaken with local food and agricultural organizations. Prerequisite: 9.0 university credits. Recommended: CAST-ERST-GEOG-INDG 2041H, 2042H, GDST-ANTH-GEOG-SAFS-SOCI 2500H, and SAFS-GDST-ANTH 2600H. Equivalent to SAFS-CAST-ERST 3340H.

Academic Level
Undergraduate

Credit Value

0.5

SOCI3400H - Feminism and Disability

Overview

Department(s)
Gender & Social Justice, Philosophy, Sociology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Philosophy - Not Set, Sociology - Not Set

Cross-Lists
GESO-3400H, PHIL-3400H

Course Description
Introduces students to critical perspectives that push thinking about disability beyond medical and social models. Focuses on connections between gender and disability. Explores feminist challenges to ableism. Other topics include bodies, race, sexuality, education, creativity, access, eugenics, intersections, and austerity. Prerequisite: 6.0 university credits. Equivalent to WMST 3300H, 3400H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3410H - Sociology of Education

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
Explores the development of formal education as a social institution, its social and political organization, schooling as a social process, the occupation of teaching, the relationship between education and social inequalities, and current changes and challenges. The focus is on education in Canada with comparisons to other societies when appropriate. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3420H - Perspectives on Poverty and Protest

Overview

Department(s)
Political Studies, Criminology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Criminology - Not Set, Sociology - Not Set

Cross-Lists
CRIM-3420H, POST-3420H

Course Description
Explores intersection of poverty and power--relations of ruling--through an examination of anti-poverty activism. Students analyze dominant strategic mobilizing approaches and investigate select case-studies of anti-poverty activism related to welfare, homelessness, migration, and drugs. The role of institutional advocates in the mobilization process is also scrutinized. Prerequisite: 7.0 university credits including 1.0 POST, ADMN, ANTH, CHYS, CRIM, ECON, GDST/IDST, IESS, INDG, PLCW, SOCI, and/or SWRK credit at the 2000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3422H - Dimensions of Poverty

Overview

Department(s)
Political Studies, Canadian Studies, Sociology, Criminology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Sociology - Not Set, Criminology - Not Set

Cross-Lists
CAST-3422H, CRIM-3422H, POST-3422H

Course Description
Poverty is a persistent social problem. In this course students are introduced to the dynamics of poverty in Canada, the USA, and Britain, learn how poverty affects people's lives, and become familiar with the dominant sociological perspectives that inform people's opinions about poverty and poverty-related policies and programs. Prerequisite: 7.0 university credits including 1.0 POST, CAST, CRIM, and/or SOCI credit at the 2000 level, or permission of instructor.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3440H - Sexuality and the Social

Overview

Department(s)
Sociology, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Gender & Social Justice - Not Set

Cross-Lists
GESO-3440H

Course Description
Explores sexuality as a complex issue in sociological analysis. Examines theoretical approaches to the body, gender, and sexuality, the construction of "normal" and "deviant" sexualities, and various forms of sexual regulation and resistance. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI and/or GESO at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3450H - The Sociology of Communication and Media in Canada

Overview

Department(s)
Sociology, Canadian Studies, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Canadian Studies - Not Set, Media Studies - Not Set

Cross-Lists
CAST-3450H, MDST-3450H

Course Description
Introduces the structure of the Canadian mediascape with a focus upon film, radio, television, and newer information and communication technologies. Sociological issues related to the production of these media and their reception by audiences are also addressed. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI and/or CAST at the 2000 level or CUST-MDST 2035Y or 2535H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3460H - Culture and Society

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
A critical examination of culture in contemporary society focusing on processes of cultural production and consumption as they are mediated by social relations of capital and technology. Topics include the ideology of consumerism, popular culture/art culture, advertising, lifestyle and taste, and culture and social change. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3465H - Realities and Futurities in Film

Overview

Department(s)
Political Studies, Culture, Arts, and Media, Media Studies

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Culture, Arts, and Media - Not Set, Media Studies - Not Set

Cross-Lists
CUST-3465H, MDST-3465H, POST-3465H

Course Description
What makes a film "political" and how can we understand the realities and futurities presented in film? We consider the various ways in which political life and action are portrayed in and through film, addressing-in relation to a variety of film genres-such topics as publics/counterpublics, visual politics, political senses. Prerequisite: 7.0 university credits including 1.0 POST, CUST, and/or SOCI credit, or permission of instructor. Recommended: POST 2351H, 2352H; CUST-MDST 2581H, 2582H, SOCI 2110H, or 2220H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3508H - Indigenous Genders, Sexualities, and Relationships

Overview

Department(s)
Indigenous Studies, Canadian Studies, Sociology, Gender & Social Justice

Contact Department ('not set' refers to cross-listed depts)
Indigenous Studies - 100%, Canadian Studies - Not Set, Sociology - Not Set, Gender & Social Justice - Not Set

Cross-Lists
CAST-3508H, GESO-3508H, INDG-3508H

Course Description
Addresses the intersection of patriarchy, colonialism, and Western constructions of gender binaries/hierarchies and sexual norms; the diversity of Indigenous genders and sexualities; and Indigenous understandings of relationships and of resurging a holistic and inclusive sense of community and identity. Prerequisite: 9.0 university credits including one of INDG 1001H, CAST 1100H, GESO 1001H, or SOCI 1001H. Not open to students with credit for INDG-GESO 3500Y.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3570Y - Community-Based Research Project

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
Students are placed in research projects with community organizations in Peterborough and Haliburton counties. Each placement is supervised jointly by a faculty member and a representative of a community organization. For details see Community-Based Research Program. Prerequisite: A minimum 75% cumulative average and 5.0 university credits including SOCI 2151H.

Academic Level
Undergraduate

Credit Value

:
1

SOCI3580H - Community-Based Research Project

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
Students are placed in research projects with community organizations in Peterborough and Haliburton counties. Each placement is supervised jointly by a faculty member and a representative of a community organization. For details see Community-Based Research Program. Prerequisite: A minimum 75% cumulative average and 5.0 university credits including SOCI 2151H.

Undergraduate

Credit Value

:
0.5

SOCI3601H - Critical Criminology

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
Examines neo-Marxist, feminist, critical race, and post-structuralist theories of crime and crime control, and how criminalization operates through the neo-liberal state. Topics include corporate crime, environmental crime, the prison industrial complex, and prison abolition. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3615H - Introduction to Black Politics in Canada

Overview

Department(s)
Canadian Studies, Political Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Political Studies - Not Set, Sociology - Not Set

Cross-Lists
CAST-3615H, POST-3615H

Course Description
An introduction to the political experiences and guiding ideologies of the Black population in Canada. Decidedly contemporary in nature and approach, the course critically examines the contributions of Blacks to the politics of Canada and how these contributions continue to shape and reshape Canadian Identity. Prerequisite: 3.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3630H - Plagues, Poxes and Pandemics: Disease in History From the Black Death to COVID

Overview

Department(s)
History, Sociology

Contact Department ('not set' refers to cross-listed depts)
History - 100%, Sociology - Not Set

Cross-Lists
HIST-3630H

Course Description
Explores episodes of major epidemic diseases to chart the social, cultural, demographic, scientific, and political impacts of widespread deadly scourges. Prerequisite: 4.0 university credits or permission of chair.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3631H - Sociology of Healthcare

Overview

Department(s)
Sociology

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%

Course Description
Explores the social construction and organization of medical knowledge and health care systems. Critically assesses the current "crisis" in Canadian health care; explores contradictory notions of health care as a right of citizenship and a commodity; and examines inequality in health care, "alternative health," and health promotion. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3661H - Race, Ethnicities, and Multiculturalism

Overview

Department(s)
Sociology, Political Studies, Canadian Studies

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Political Studies - Not Set, Canadian Studies - Not Set

Cross-Lists
CAST-3661H, POST-3661H

Course Description
Explores ethnicities with a focus on contemporary Canada. Topics include settler colonialism, immigration, multicultural policies and practices, and contemporary political conflicts involving ethnicities. The course also covers theories and concepts of "race" and ethnicity as social categories, the social basis of racism, and the critique of multiculturalism. Prerequisite: 5.0 university credits including at least 1.0 credit in SOCI, CAST, and/or POST at the 2000 level.

Academic Level
Undergraduate

Credit Value
:
0.5

SOCI3665H - Canada: State, Society, Power

Overview

Department(s)
Canadian Studies, Political Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Canadian Studies - 100%, Political Studies - Not Set, Sociology - Not Set

Cross-Lists
CAST-3665H, POST-3665H

Course Description
Interrogates the political economy tradition in Canada from its roots to more contemporary approaches, examining the dynamics of Canadian economic, political, and social development. Addresses issues associated with the development of a resource-based and branch-plant economy, globalization and continental integration, and inequality, discrimination, and social justice. Prerequisite: 6.0 university credits.

Academic Level
Undergraduate

Credit Value
:
0.5

SOCI3672H - Gender, Diversity, and Intersectionalities

Overview

Department(s)
Political Studies, Canadian Studies, Gender & Social Justice, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Gender & Social Justice - Not Set, Sociology - Not Set

Cross-Lists
CAST-3672H, GESO-3672H, POST-3672H

Course Description
Examines issues of diverse intersectional gender identities and gender experiences, including Indigeneity, (dis)ability, race, class, LBTQ, and fat, and provides socio-political perspectives to understand activism, community building, and possibilities for socio-political and policy change. Prerequisite: 7.0 university credits including 1.0 POST, CAST, GESO, and/or SOCI credit at the 2000 level, or permission of instructor. Recommended: POST-CAST 2011H and/or 2012H. Not open to students with credit for POST-CAST-WMST 3670Y.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3740H - The Politics of Legal Rights, Criminal Law, and the Canadian Judicial Process

Overview

Department(s)
Political Studies, Canadian Studies, Criminology, Sociology

Contact Department ('not set' refers to cross-listed depts)
Political Studies - 100%, Canadian Studies - Not Set, Criminology - Not Set, Sociology - Not Set

Cross-Lists
CAST-3740H, CRIM-3740H, HURI-3740H, POST-3740H

Course Description
An exploration of the politics of the Canadian criminal process. Examines legal rights under the Charter of Rights and Freedoms and critiques of the inequities of the Canadian criminal justice system. Also looks at key political issues in the making of criminal law, its enforcement, and the criminal trial process. Prerequisite: 7.0 university credits.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3822H - The Canadian Labour Movement: Class, Protest, and Confronting Neoliberalism in the Digital Age

Overview

Department(s)
Sociology, Political Studies

Contact Department ('not set' refers to cross-listed depts)
Sociology - 100%, Political Studies - Not Set

Cross-Lists
POST-3822H

Course Description
Critically explores the politics and the practices of the Canadian labour movement. Examines feminist and anti-racist critiques of unions and the challenges facing unions in the neo-liberal period and the digital age. Other issues include globalization, technological change, precarious labour, and state behaviour towards workers and collective protest. Prerequisite: 5.0 university credits including at least 1.5 SOCI and/or POST credits at the 2000 level.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3860H - Gender, Race, and Class

Overview

Department(s)
Gender & Social Justice, Canadian Studies, Sociology

Contact Department ('not set' refers to cross-listed depts)
Gender & Social Justice - 100%, Canadian Studies - Not Set, Sociology - Not Set

Cross-Lists
CAST-3860H, GESO-3860H

Course Description
Analyzes power relations and lived experiences through the intersections of gender, race, ethnicity, and class. Students undertake the critical work of understanding the ongoing implications of these interlocking systems of privilege and oppression upholding inequalities and fueling resistance in Canadian and international contexts. Prerequisite: 6.0 university credits including 1.0 GESO, WMST, CAST, and/or SOCI credit at 2000 level or beyond, or permission of instructor. Equivalent to WMST 3860H.

Academic Level
Undergraduate

Credit Value

:
0.5

SOCI3881H - Gender, Globalization, and Resistance

Overview

Department(s)
Global Justice & Development, Political Studies, Gender & Social Justice, Sociology

Contact Department ('not set' refers to cross-listed depts)
Global Justice & Development - 100%, Political Studies - Not Set, Gender & Social Justice - Not Set, Sociology - Not Set

Cross-Lists
GDST-3881H, GESO-3881H, HURI-3881H, POST-3881H

Course Description
Focuses on how globalization is transforming intersectional gender dynamics that underpin relationships between and within states, markets, civil society, and households. Introduces students to feminist perspectives on the global political economy, focusing on specific issues such as international trade agreements, labour, security, migration, health, environment, and human rights. Prerequisite: 1.0 HURI, GDST, IDST, GESO, WMST, POST, and/or SOCI credit at the 2000 level or beyond, or permission of instructor. Not open to students with credit for GESO-POST 4881H or WMST-POST 3880Y. Equivalent to IDST 3881H.

SPAN1001H - Introduction to Spanish 1

Overview

Department(s)
Languages & Linguistics

Contact Department ('not set' refers to cross-listed depts)
Languages & Linguistics - 100%

Course Description
An introduction to understanding, speaking, reading, and writing designed for students with limited or no knowledge of the language. The goal of the course is to encourage students to work towards developing control of everyday vocabulary and basic forms and constructions. Students judged by the instructor to be fluent in Spanish may not receive credit for this course. Not open to students with credit for HSST 1000Y or SPAN 1000Y. Equivalent to HSST 1001H.

Cross-Lists
CSID 5627H, INDG 6627H

Course Description
This graduate topic course is designed to facilitate engagement with an Indigenous language through weekend intensive cultural immersion. Located in culturally significant sites within the Kawarthas, the course will focus on language and culture as it relates to the Winter cycle within the Natural World. The course operates from the position that language provides a foundational framework for understanding the world. Students are not expected to be fluent in an Indigenous language but should have enough familiarity to work in a culturally immersive environment. Students will explore the connections between language and identity, worldview, orality, as well as recovery and revitalization. The intensive weekends will provide an immersive experience from which to think about the interplay between culture and language and how language can help us to understand the world better in a contemporary sense. Topics covered in the course include discussion of oral and writing systems, narrative and stories, performance, songs, chants, dances, conveyed through action (physical activities, movement, dancing, practices) that facilitate the development of positive relationships with the natural World (i.e. land, waters, trees, plants, animals, spiritual beings, ancestors etc.) Course fee is $170.00.

SWRK3101H - Social Work and Aging

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
Explores and critically assesses social work theories on aging, the elderly in Canada, the impact of oppression on the aging process, and current (as well as developing) gerontological social work practices. Investigates a range of perspectives on aging including life span theory, feminist approaches, critical race perspectives, and Indigenous knowledge(s). Prerequisite: Admission to the BSW professional years or permission of the director.

Academic Level
Undergraduate

Credit Value

:
0.5

SWRK3102H - Anti-Oppressive Child Welfare

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
Reviews the history of child welfare in Canada, issues of colonization, racialization, sexism, poverty, and discrimination, and examines the current structure of child welfare systems including legislation, definitions of abuse/neglect, roles of workers, and demographics of service users. Anti-oppressive theories of assessment and intervention strategies are examined and applied. Prerequisite: Admission to the BSW professional years or permission of the director.

0.5

SWRK3105H - Queering Social Work

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
Provides an overview of queer history, presence/ absence (exclusion of lesbians, trans, Indigenous, polysexual, and intersex individuals), theories, issues, liberation, resistance, and victories. Emphasis on sexual/ gender diversity, privilege, and identity(ies). Support of queer persons and queer-straight alliances, as well as the protection and growth of queer communities, will be explored. Prerequisite: Admission to the BSW professional years or permission of director.

0.5

SWRK3106H - Social Work Organizations and Leadership

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
Explores the theories, styles, and contemporary challenges of effective leadership in social work organizations. Perspectives of organizational development and theory, managerialism, and bureaucratic theories are critically examined. Selfknowledge, critical thinking, effective communication, teamwork, evidence-informed leadership, ethical leadership, and practical skills are developed. Prerequisite: Admission to the BSW professional years.

Academic Level
Undergraduate

Credit Value

:
0.5

SWRK3107H - Social Work and Addictions

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
In the context of anti-oppressive social work practice, this course covers pharmacological foundations of substance use; theoretical perspectives on the etiology of addiction; the history and structure of addiction and mental health treatment/support systems; treatment/support/prevention strategies for individuals, families, and groups; and policy/ethical debates. The implications across at-risk populations will be discussed. Prerequisite: Admission to the BSW professional years or permission of director.

0.5

SWRK3108H - Africentric Perspectives in Social Work

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
Provides students with an opportunity to engage in critical dialogue, reflection, and action about historical and contemporary experiences of African Canadians and Africans in the Diaspora. The course also focuses on awareness of Afri/ Afrocentric theory and its application in social work practice with Africans, Afro Caribbean, and non-Africans. Prerequisite: Admission to BSW professional years or permission of the director.

Academic Level
Undergraduate

Credit Value

:
0.5

SWRK3109H - Social Work and Disability

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
Examines disability as a "social construct" and provides a historical exploration of the concept in addressing disability issues and supporting individuals with disabilities. Using a social justice framework, the course assesses prevailing social work theories of disability. Prerequisite: Admission to the BSW professional years or permission of the director.

Academic Level

SWRK3114H - Braiding Indigenous Knowledge into Social Work Practice

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
A critical examination of current mainstream social work practice to invite critical understanding of Indigenous issues, struggles, and worldviews. Through Indigenous social work theory and approaches, students probe topics from Indigenous worldviews. Using Indigenous pedagogy, students explore history, legislation, and social work issues facing Indigenous individuals, families, communities, and Nations. Prerequisite: Admission to the BSW professional years.

Undergraduate

Credit Value

:
0.5

SWRK3901H - Reading Course

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
A structured course involving independent study of a topic that is not covered by existing Trent social work required and elective courses. An application for the course must be completed by the student in collaboration with the instructor, and approved by the Department Director, and the Dean. This option is only offered when faculty expertise and resources permit. Prerequisite: Admission to the BSW professional years.

0.5

SWRK4000D - Social Work Field Education Placement

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
Includes three mandatory parts-orientation, field placement hours, and regular in-class integration seminars-and will provide opportunities for students to further develop and integrate social work theory and practice and to apply and develop social work knowledge and skills. Students will apply key social work concepts, theories, and intervention approaches, including process recording, critical thinking, and ethical practice. Prerequisite: SWRK 3000Y. Placement agencies may require a Criminal Record Check with or without Vulnerable Sector Screening.

Undergraduate

Credit Value

:
0.5

SWRK4002H - Social Work Theory and Practice 2

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
Moving from macro and mezzo perspectives to micro-level theoretical assessment and intervention, this course examines social work theoretical models for working with service users, including the use of self as a therapeutic tool; planned change processes; understandings of diversity, identity, social location, intersectionality, and oppression; current research; and professional roles/functions. Prerequisite: 65% or higher in each of SWRK 3001H, 3002H, and 3003H.

Academic Level
Undergraduate

Credit Value

:
0.5

SWRK4005H - Social Work With Groups

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
The history, theory, and practice of group structure, process, skills, and development are examined. Content includes the use of self as a therapeutic tool in diverse group contexts; understandings of diversity, identity, social location, intersectionality, and oppression in group work; current research on group interventions; and professional ethics, skills, roles and functions. Prerequisite: Admission to the BSW professional years and 65% or higher in each of SWRK 3006H and 3007H.

Academic Level
Undergraduate

Credit Value

:
0.5

SWRK4006H - Social Work and Families

Overview

Department(s)
Social Work

Contact Department ('not set' refers to cross-listed depts)
Social Work - 100%

Course Description
Teaches interdisciplinary theoretical perspectives and practice approaches that are relevant for working with the contemporary family in all its forms, including Bowen, systems, feminist, structural, narrative, brief therapy, and Indigenous approaches. Develops family practice skills through the use of lectures, readings, class discussions/exercises, and interactive role play experiences. Prerequisite: 65% or higher in SWRK 4002H.

UNIV1000H - Academic Foundations for Success

Overview

Course Description
Drawing on key themes that inspire Trent's outstanding faculty, in small classes students explore interdisciplinary approaches to contemporary problems through reflection, discussion, writing, and inquiry. Building foundations for university and career success, students strengthen communication, peer-to-peer engagement, information seeking, critical analysis, applied learning, goal setting, and career development.

Academic Level
Undergraduate

Credit Value

:
0.5

UNIV1003H - Exploring Great Problems Through Scientific Inquiry

Overview

Course Description
Students explore three significant, complex, and challenging scientific problems from a variety of perspectives. Through this exploration, students strengthen their information seeking, group work, research, critical thinking, reflection, and presentation skills. Students are grouped in 'problem teams' and experience a range of workshops that will introduce different applications of scientific inquiry. Limited enrolment.

0.5

UNIV1005H - Making the Leap: Foundations of University Success

Overview

Department(s)
Education

Contact Department ('not set' refers to cross-listed depts)
Education - 100%

Course Description
UNIV 1005H is a bridging program that supports students entering post-secondary for the first time. Students will learn different ways of knowing at university and how to think critically about scholarly content. They will acquire practical skills in reading, writing, communicating, and engaging in lectures, labs, and seminars. Open only to incoming, first-year Trent students in the Bridge program who have not yet taken a college or university credit or with permission of the offering department.

UNIV2880H - Preparation for Workplace Integrated Learning

Overview

Course Description
Provides students with the skills needed to secure and successfully complete a placement in the field of their choice. In the first six weeks of this course, students learn how to prepare for and obtain a placement. In the latter weeks, participants gain experience in a workplace integrated learning opportunity working with a professional organization or business. Prerequisite: A minimum cumulative average of 70% and 6.0 university credits. Excludes CHYS 3880H.

Academic Level
Undergraduate

Credit Value

:
0.5

UNIV4880H - Advanced Community Based Learning

Overview

Course Description
Placement based course in a professional organization or business. Students work individually or in teams on an advanced workplace integrated learning project. Topics will vary based on placement. Prerequisite: A minimum cumulative average of 70% and 12.0 university credits.

Academic Level
Undergraduate

Credit Value

0.5

WASC2120H - Water Policy

Overview

Department(s)
Environment, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%,
Geography - Not Set

Cross-Lists
ERSC-2120H, GEOG-2120H

Course Description
An introductory overview of water issues and related policies in Canada and internationally. Surveys the key interest groups and factors that shape conflicts over water protection and allocation, as well as policy responses, including infrastructure, regulatory, and economic tools that are employed by national, provincial, and local agencies. Prerequisite: ERSC 1010H and 1020H.

0.5

WASC3120H - Canadian Environmental Policy

Overview

Department(s)
Environment, Canadian Studies, Political Studies, Forensic Science

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Canadian Studies - Not Set, Political Studies - Not Set, Forensic Science - Not Set

Course Description
An interdisciplinary inquiry into how environmental policies in Canada are developed, implemented, and improved, applying political, economic, legal, scientific, Indigenous, and moral perspectives. Focus is on federal, provincial, and municipal contexts, recognizing that the environment does not respect jurisdictions. Topics include energy and materials use, biodiversity, toxic substances, waste management, and land use. Prerequisite: 1.0 ERST, CAST, POST, and/or ADMN credit at the 2000 level or beyond.

Academic Level
Undergraduate

Credit Value

:
0.5

WASC3420H - Snow and Ice

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%, Environment - Not Set

Course Description
Emphasizes physical and geographical aspects of different ice forms and their implications for human and biological activity. Measurement of snow and ice are studied in practical laboratories. Some field work during the Reading Week is expected. Prerequisite: 9.0 university credits including GEOG-ERSC 2080H and 2460H.

Academic Level
Undergraduate

Course Designation
Science

Credit Value

:

WASC3530H - Hydrology

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
EGEO-3530H, ERSC-3530H, GEOG-3530H

Course Description
Study of the movement of water through the environment with emphasis on terrestrial aspects including interception, infiltration, soil moisture, groundwater, surface runoff, and stream-flow, also covering human impact on hydrological processes. Prerequisite: 9.0 university credits including GEOGBIOL- ERSC 2080H and one of GEOG 2440H, 2460H, 2540H, or 3440H.

WASC3540H - River Environments and Processes

Overview

Department(s)
Geography, Environment

Contact Department ('not set' refers to cross-listed depts)
Geography - 100%,
Environment - Not Set

Cross-Lists
GEOG-3540H

Course Description
Examines the morphology of rivers and river systems and relationships between process and form. Topics to be covered include erosion, transportation, and deposition of sediments; channel morphology, the drainage basin as a geomorphic unit; and human impact on river morphology. Field work. Prerequisite: GEOG-BIOL-ERSC 2080H and one of GEOG 2400Y, 2401H, 2540H, 2560H, or 3520H.

Academic Level
Undergraduate

Course Designation
Science

WASC4060H - The Geochemistry of Natural Waters

Overview

Department(s)
Environment, Biology, Geography

Contact Department ('not set' refers to cross-listed depts)
Environment - 100%, Biology - Not Set, Geography - Not Set

Cross-Lists
BIOL-4060H, EGEO-4060H, ERSC-4060H, GEOG-4060H

Course Description
Examines the chemistry of freshwater systems. Chemical and physical processes that lead to changes in water quality are discussed. The emphasis is on the concentrations and distributions of contaminants. Topics include watershed contributions of chemicals, acidification and the carbonate system, weathering, redox chemistry, trace materials, and synthetic organic contaminants. Prerequisite: ERSC 2230H or ERSC-CHEM 2620H (or 2600Y).

Academic Level
Undergraduate

Course Designation
Science

Credit Value

WRIT2002H - Write It Up: Effective Communication

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
Continues to develop the skills for clear and persuasive writing introduced in WRIT 1001H. Open to students in all disciplines, this writing-intensive course focuses on advancing effective rhetorical strategies in the contexts of academic and professional writing with an emphasis on persuasion, ease, and grace in written communication. Prerequisite: WRIT 1001H.

Academic Level
Undergraduate

Credit Value

:
0.5

WRIT2003H - Workplace Communications

Overview

Department(s)
English Literature

Contact Department ('not set' refers to cross-listed depts)
English Literature - 100%

Course Description
In this writing-intensive course, students learn to be proficient in the kinds of communication essential to a variety of workplaces. Students are introduced to key concepts in communication theory, practise a range of formats, and take part in a multi-stage simulation. Prerequisite: WRIT 1001H. Not open to students with credit for ADMN 3410H.
