

Barcode Disposal

Attach this poster to the inside of your lab door
OR to the wall next to your lab door

Principal Investigator (PI): _____ Building & Room #: _____

- Completed a chemical inventory is in progress
- All new chemical orders are barcoded at Shipping & Receiving prior to lab delivery
- If the barcode is attached to the outer package e.g. poly bag, remove and attach to the chemical container at first use. Attach barcode so you do not obscure the label.

The barcodes will appear similar to this →

The HECHMET bar codes must be removed from all chemical bottles prior to discarding;

- an empty bottle in garbage
- bottle to chemical waste room
- reusing empty bottle for another purpose

Attach HECHMET barcodes to this poster

If you are unable to remove the Trent U barcode from the container, write the code e.g. "AA4009" in the space above. Then deface the barcode with a marker.

Return to Angela Sikma via internal mail to c/o ESB A203
OR contact Angela for pickup ext. 6253 angelasikma@trentu.ca

If your bottle is missing a UPC barcode contact Angela
